morphic (mōr'fik), *a* [< Gr *μορφή*, form, + -ic] In *biol*, of or pertaining to form, morphological as, a *morphic* character

The majority of specific characters are of divergent origin — are *morphic* as distinguished from developmental
E D Cope, Origin of the Fittest, p 111

Morphic valence, morphological value or equivalency in the scale of evolution of organic forms. Thus, any organism in the gastrula stage of development is a gastrula form, having the morphic valence of a gastrula. Cope.

Morphids (mōr'fī-dē), *n. pl*. [NL, < *Morpho* + -ids.] The *Morphina* rated as a family.

Morphinae (mōr'fī-nē), *n. pl* [NL, < *Morpho* + -inae] A subfamily of nymphalid butterflies, typified by the genus *Morpho*, with large wings, grooved to receive the short abdomen and ocellated on the under side, and filiform antennae. They are found in tropical America and the East Indian islands, with a few in continental Asia. Ten genera and upward of 100 species compose the subfamily

morphine (mōr'fin), *n* [< F *morphine* = Pg *morfina* = It *morfina*, < NL *morfina*, *morphine*, < L *Morpheus*, the god of sleep see *Morpheus*] An alkaloid, C₁₇H₁₉NO₃, the most important narcotic principle of opium. It crystallizes in brilliant, colorless, odorless, and bitter prisms. It dulls pain induces sleep, promotes perspiration, checks peristalsis, contracts the pupil, and is extensively used in medicine in the form of its soluble salts. In large doses it causes death with narcotic symptoms. — *Morphine* or *morfia* process, in *photog*, a dry collodion process, now abandoned, in which the preservative agent was a bath of morphine acetate, one grain to the ounce

morphinism (mōr'fin-izm), *n* [< *morphine* + -ism] A morbid state induced by the use of morphine

That class of diseases in which *morphine*, caffeine, and vanillin are found
The American, XII 269

morphinomania (mōr'fī-nō-mā'nī-ā), *n* [NL.] Same as *morphomania*

morphinomaniac (mōr'fī-nō-mā'nī-ak), *n* Same as *morphomaniac*

morphiomania (mōr'fī-ō-mā'nī-ā), *n* [< NL *morfia*, q v., + L *mania*, madness see *mania*] A morbid and uncontrollable appetite for morphine or opium, the morphine-habit or opium-habit

morphiomaniac (mōr'fī-ō-mā'nī-ak), *n* [< *morphiomania* + -ac] One who suffers from morphiomania

The question arose as to how *morphomaniacs* procured the morphine
Lancet, No 3444, p 451

morphiometric (mōr'fī-ō-mē'trik), *a* [< NL *morfia* + Gr *μέτρον*, measure] Measuring the amount of morphine as, *morphiometric* assays of opium

Morphnus (mōr'fūs), *n* [NL, < L *morphnos*, a kind of eagle that lives near lakes, < Gr *μωφνός*, dusky, dark said of an eagle] A genus of South American diurnal birds of prey founded by Cuvier in 1817, the eagle-hawks There is but one species, *M. guianensis*, of large size, 3 feet long, with a crest Also *Morphnus*

Morpho (mōr'fō), *n* [NL, < Gr *Μωρφή*, 'the shapely,' a name of Aphrodite at Sparta, < *μορφή*, form, shape] A genus of magnificent nymphalid butterflies, typical of the subfamily *Morphina* There are upward of 30 species, mostly South American, some expanding over 7 inches, others of celestial blue hues above and ocellated below *M. achilles*, *M. laertes*, *M. cypris*, *M. neoptolemus*, and *M. polyphemus* are examples

morphea (mōr-fē-ā), *n* [NL, for *morfia*, < ML *morpheica*, **morpheica*, a scurfy eruption see *morpheut*.] A disease of the corium presenting multiple roundish patches, at first pinkish and slightly elevated, later pale, smooth, shining, and level or slightly depressed There is atrophy of the papillary layer of the corium, and cellular infiltration about hair follicles, sweat-glands, and sebaceous glands and vessels, this infiltration contracts, with subsequent atrophy of glands, follicles, and vessels The disease is allied to scleroderma

morphogenesis (mōr-fō-jen'e-sis), *n*, [NL, < Gr *μορφή*, form, + *γένεσις*, origin see *genesis*] The genesis of form, the production of morphological characters, morphogeny.

morphogenetic (mōr'fō-jē-net'ik), *a* [< *morphogenesis* + -ic see *genetic*.] Of or pertaining to morphogenesis, morphological, with special reference to ontogeny and phylogeny; embryological in a broad sense; evolutionary or developmental, with reference to biogeny

morphogenic (mōr-fō-jen'ik), *a* Same as *morphogenetic*

morphogeny (mōr-fō-jē-nī), *n*. [< Gr. *μορφή*, form, + -γενεα, generation: see -geny Cf *morphogenesis*.] 1 In *biol*, morphogenesis, the genesis of form, the production or evolution of those forms of living matter the study of which is the province of the science of morphology — 2 The history of the evolution of the forms of organisms, morphology, or the science of the forms of living bodies, with special reference to the manner in which, or the means by which, such forms originate or develop; embryology in a broad sense

Biogeny, or the history of the evolution of organisms, up to the present time has been almost exclusively *morphogeny*
Haeckel, *Evol. of Man* (trans.), II 461.

morphographer (môr-fog'ra-fēr), *n.* [*< morphograph-y + -er*]. One who investigates morphology or writes on that science
morphographical (môr-fô-graf'î-kal), *a* [*< morphograph-y + -ic-al*]. Of or pertaining to morphology
Encyc. Brit., XXIV 818
morphography (môr-fog'ra-fi), *n.* [*< Gr μορφή, form, + γραφία, < γράφω, write*]. Descriptive morphology; the systematic investigation, tabulation, and description of the structure of animals, including comparative anatomy, histology, and embryology, and the distribution of animals in time and in space, with special reference to their classification, general or systematic zoology

Morphography. — The work of the collector and systematist exemplified by Linnaeus and his predecessors
Encyc. Brit., XXIV 803

morpholecithal (môr-fô-les'î-thal), *a* [*< morpholecithus + -al*]. Germinal or formative, as the vitellus, of or pertaining to the morpholecithus

morpholecithus (môr-fô-les'î-thus), *n.* [NL, *< Gr μορφή, form, + λέκθος, the yolk of an egg*]. In embryol., the vitellus formativus, or formative yolk, which undergoes segmentation and germination. It constitutes all the yolk of holoblastic eggs, as those of mammals, but only a part (usually a small part) of the yolk of meroblastic eggs, as of birds, the rest being all food yolk or tropholecithus.

morphologic (môr-fô-loj'îk), *a* [= *F morphologia*, *as morpholog-y + -ic*]. Same as *morphological*

morphological (môr-fô-loj'î-kal), *a* [*< morphologie + -al*]. Of or pertaining to morphology, of the character of morphology

The most characteristic morphological peculiarity of the plant is the investment of each of its component cells by a sac, the walls of which contain cellulose or some closely analogous compound. The most characteristic morphological peculiarity of the animal is the absence of any such cellulose investment.
Huxley, Anat. Invert., p. 46

Morphological botany. See *botany*. — **Morphological classification**, a statement or tabulation or other exhibit of the degrees of structural likeness observed in animal or vegetable organisms. Such classification, based on form without regard to function and thus appreciating true morphological characters while depreciating mere adaptive modifications, is the main aim of modern taxonomy in zoology and botany. The term is also sometimes applied to classifications of languages. — **Morphological equivalents**. See *equivalent*

morphologically (môr-fô-loj'î-kal-î), *adv.* In a morphological manner; with reference to the facts or principles of morphology, from a morphological point of view

morphologist (môr-fô-lôj'î-jist), *n.* [*< morpholog-y + -ist*]. One who is versed in morphology, a student of morphology

morphology (môr-fô-lôj'î-jî), *n.* [= *F morphologia* = *Sp morfología* = *Pg morphologia*, *< Gr μορφή, form, + λογία, < λῑγν, speak* see *-ology*]. 1 The science of organic form, the science of the outer form and internal structure (without regard to the functions) of animals and plants, that department of knowledge which treats both of the ideal types or plans of structure, and of their actual development or expression in living organisms. It has the same scope and application in organic nature that crystallography has in the inorganic. — 2 The science of structure, or of forms, in language. It is that division of the study of language which deals with the origin and function of inflection and derivational forms, or of the more formal as distinguished from the more material part of speech

Morphology is the science of form (*Gr μορφή*), and is here applied to the forms of words as developed by the various kinds of mutation
S. S. Haldeman, Outlines of Etymology, p. 17

morphometrical (môr-fô-met'ri-kal), *a* [*< morphometr-y + -ic-al*]. Of or pertaining to morphometry

morphometry (môr-fom'et-ri), *n.* [*< Gr μορφή, form, + μετρία, < μέτρον, measure*]. The art of measuring or ascertaining the external form of objects
Thomas, Med. Diet.

morphon (môr'fon), *n.* [NL, *< Gr μορφή, form*]. A morphological element or factor

morphonomic (môr-fô-nom'îk), *a* [*< morphonom-y + -ic*]. Of or pertaining to morphonomy; morphologically consequent

morphonomy (môr-fon'ô-mî), *n.* [*< Gr μορφή, form, + νόμος, < νέμω, distribute* see *nomē*]. In *biol.*, the laws of morphology, the observed sequence of cause and effect in organic formation, that department of biology which investigates the principles of organic formation or configuration

morphophyly (môr-fôf'î-lî), *n.* [*< Gr μορφή, form, + φύλη, a tribe*]. The tribal history of

forms; that branch of phylogeny, or tribal history, which treats of form alone, without reference to function, the tribal history of the latter being called *phytomorphyly*
Haeckel

morphosis (môr-fô-sis), *n.* [NL, *< Gr μόρφωσις, a shaping, < μορφή, form, shape, < μορφή, form*]. Morphogenesis, the order or mode of formation of any organ or organism

morpion (môr'pi-on), *n.* [*< F morpion, a crab-louse, appar. < mordre < L mordere*], bite, + *puon* (= *it pedone*), *< ML *peduo(n)*, equiv. to *pediculus*, a louse, *< pedis*, a louse, *< pes (ped-)*, = *E foot*]. The crab-louse, *Phthirus pubis*. See *cut* under *crab-louse*

Swore you had broke and robbed his house,
 And stole his tallmanik louse,
 His flea, his morpion, and punquee
S. Butler, Hudibras, III 1 433

morpunkiee (môr-pung'ke), *n.* [*< Hind mor-punkhi, a boat with a peacock decoration, a pleasure-boat, < mor, a peacock, & punkhi, a fan, also a bird, dim. of pankhā, a fan, < pankh, a feather, wing, pimon* see *punka*]. Law of mortality, the principle, deduced from a study and analysis of the bills of mortality and the experiences of insurance companies during a long number of years, which determines what average proportion of the persons who enter upon a particular period of life will die during that period, and consequently the proportion of those who will survive

Tables showing the estimated number of persons of a given age that will die in each succeeding year are called *tables of mortality*. Thus, of 100,000 persons of the age of 10, 490 will not reach the age of 11, of 99,510 persons remaining alive, 487 will die before reaching the age of 12, and so on. On these tables are largely founded the calculations of insurance actuaries in regard to rates of premium, present value of policies, etc

Mortars in the Federal Mortar battery before Yorktown, Virginia

morter, MHG *mortere, morter, mortel, G. mortel, < L. mortarium, mortar, a mixture of lime and sand, so called from the vessel in which it was made, a mortar see mortar*¹] A material used (in building) for binding together stones or bricks so that the mass may form one compact whole. The use of mortar dates back to the earliest recorded history, but various materials were employed for that purpose. "Bitumen" (asphaltum and maltha), or bituminous mixtures, are known to have been used in Babylon and Nineveh. Plaster (calcined sulphate of lime) was the cement employed on the Great Pyramid, and apparently by the Egyptians generally, but not to the entire exclusion of what is now ordinarily called mortar. The substances mentioned are frequently designated as mortar in non technical works. What is now generally understood by this term among builders and architects is a mixture of lime with water and sand, in various proportions, according to the "fatness" of the lime and the desire to economize the more costly material. This kind of mortar was well known to both Greeks and Romans. Mortar made of ordinary lime "sets" (hardens) in the air (not under water) and slowly, since the absorption of carbonic acid and the consequent conversion of the hydrate of lime into the carbonate is by no means a rapid process. The hardening of the mortar depends in large part on the crystallization of the carbonate of lime around the grains of sand, by which these are made to cohere firmly, hence, a clean sand of which the grains are angular is of importance in forming a durable mortar. The kind of mortar which sets under water is sometimes called *hydraulic mortar*, but is more generally known as *hydraulic cement*, or simply *cement*. See *cement* and *cement stone*

(b) By the law of most of the United States, a lien or charge upon specific property, real or personal, created by what purports to be an express transfer of title, with or without possession, but accompanied by a condition that the transfer shall be void if in due time the money be paid or the thing done to secure which the transfer is given. It differs from a *pledge* in that it is not confined to personal property, and in that it is in form a transfer of title, while a pledge is of chattels and is usually a transfer of possession without the title but with authority to sell and transfer both title and possession in case of default. (See *pledge*.) At common law a mortgage was regarded (as in form it is still almost universally expressed) as actually transferring the title (See (a), above.) Courts of equity established the rule that a mortgagee of real property could, by payment or performance, redeem it even after default, at any time before the court had adjudged his right foreclosed on the mortgagee had caused a sale of the property to pay the debt (see *equity of redemption*, under *equity*), consequently mortgages ceased to be regarded in most jurisdictions as a transfer of the title, and are now generally held to create a mere lien although the form of the instrument is unchanged. The term *mortgage* is applied indifferently (a) to the transaction, (b) to the deed by which it is effected, and (c) to the rights conferred thereby on the mortgagee

Equitable mortgage, a transaction which has the intent but not the form of a mortgage, and which a court of equity will enforce to the same extent as a mortgage, as for instance, a loan on the faith of a deposit of title deeds.—**General mortgage-bond**. See *bond*—**Mortgage debentures**. See *debenture*, 1.—**Welsh mortgage**, a kind of mortgage formerly used in Wales and Ireland by which the mortgagee, without engaging personally for the payment of the debt, transferred the title and possession of the property to the mortgagee, who was to take the rents and profits and apply them on the interest, and there might be a stipulation that any surplus should be applied on the principal. Under this form of mortgage the mortgagee could not compel the mortgagor to redeem or be foreclosed of his right to redeem, for no time was fixed for payment and the mortgagor was never in default, but the mortgagee had the right at any time to redeem (and, though there were no personal debt, an account might be taken as if there were, in order to ascertain what he must pay to redeem), and the statute of limitations did not begin to run against his claim until after full payment of the principal

Of or pertaining to the burial of the dead. — **Mortuary chapel**, a wreath or crown put upon the head of a corpse at the funeral ceremony and often left with it in the tomb. Such a garland was known by the Romans as *corollarium*. In medieval Europe these wreaths were common, especially in the case of women who died unmarried. They were sometimes made of filigree-work with gold and silver wire. — **Mortuary chest**, a coffin of wood or other material intended to receive the remains of bodies once buried elsewhere, when the graves have been disturbed.

II. n, pl. *mortuaries* (-riz). 1. In law, a sort of ecclesiastical heriot, a customary gift claimed by and due to the minister of a parish on the death of a parishioner. It seems to have been originally a voluntary bequest or donation, intended to make amends for any failure in the payment of tithes of which the deceased had been guilty. Mortuaries, where due by custom, were recoverable in the ecclesiastical courts.

The curate claimed ye beryng shete for a *mortuary*
Hall, Hen VIII, an. 6.

The Payment of *Mortuaries* is of great Antiquity. It was antiently done by leading or driving a Horse or Cow, &c., before the Corps of the Deceased at his Funeral. It was considered as a Gift left by a Man at his Death, by Way of

Recompence for all Failures in the Payment of Tithes and Oblations, and called a *Corse-present*.

The architectural character of mosques varies greatly, according as they occupy free or cramped sites, and as in construction they are original foundations or adaptations of existing buildings. The normal plan of the mosque is rectangular, and includes, besides the covered place of worship proper, an open cloistered court with a fountain for ablutions, and one or more minarets from which the faithful are summoned to prayer at stated hours. The dome, supported on pendentives, and the arch, usually pointed, of the horse shoe (Saracenic) form, and springing from slender columns, together with elaborate and often splendidly colored surface ornament, mainly geometrical, are features of very frequent occurrence. In the interior the chief decora-

tion is found in numerous hanging lamps. The direction of Mecca is indicated by a niche or recess, sometimes a mere tablet inscribed with verses from the Koran, called

family *Culex*, though some members of related families, as *Simulidae*, are called *mosquitos*, the term being applied in most parts of the world to gnats which have a piercing and sucking proboscis and annoy man. The name is said to have arisen in the West Indies, where it specifically designates *Culex mosquito*, a gnat streaked with silvery white and having a black proboscis. Mosquitos are commonly supposed to be especially tropical insects, but they swarm in summer in almost inconceivable numbers in arctic and cold temperate latitudes, as in Labrador, or in the region of the Red River of the North, and throughout the moist wooded or marshy regions of British America. They breed in water, and hence are most numerous in marshy and swampy places. The life of the adult insect is very brief, and its natural food is a drop or two of the juice or moisture of plants. The L. word is commonly explained as lit. 'wagtail,' as if irreg. < L *motare*, move (freq. of *movere*, move), + *-cilla*, assumed to mean 'tail.' A wagtail. See *Motacilla*.

Motacilla (mō-ta-sil'ā), *n.* [NL, < L *motacilla*, the white water-wagtail. See *motacil*.] A genus of chiefly Old World oscine passerine birds, typical of the family *Motacillidae* or wagtails. The name has been used with great latitude and little discrimination for many small singing birds of all parts of the world, as the true *Sylvia* or Old World warblers, various *Muscicapidae* or Old World flycatchers, many of the American *Sylviidae* or wood warblers, and for all the *Motacillidae*, including the pipits or titlarks of the subfamily *Anthinae*. It is now restricted to the black and white or pied wagtails, as *M. alba*, of the form, with massed coloration of black, white, and ash, long vibratile tail of twelve weak narrow feathers, pointed wings whose tip is formed by the first three primaries, and whose inner secondaries are long and flowing, and long slender feet without specially lengthened or straightened hind claws. There are many species, widely distributed in Europe, Asia, and other parts of the Old World, one or two of which sometimes straggle to America. Thus, *M. alba* has been found in Greenland and *M. ocularis* in California.

Motacillidae (mō-ta-sil'ā-dō), *n. pl.* [NL, < *Motacilla* + *-idae*] A family of oscine birds of the order *Passeres*, typified by the genus *Motacilla*, the wagtails. The bill is shorter than the head, straight, slender, acute, and notched, the primaries are nine in number, the inner secondaries are lengthened, the feet are long and slender, with scutellate tarsi and usually long and straightened claw, and the tail is usually as long as the wings. The *Motacillidae* are small insectivorous birds of terrestrial habits, resembling larks (*Alaudidae*) in some respects, but widely separated by the laminalianation of the podotheca. Two subfamilies are generally recognized, *Motacillinae* and *Anthinae*, or wagtails proper and pipits or titlarks.

Motacillinae (mō-ta-sil'ā-nō), *n. pl.* [< *Motacilla* + *-ina*] 1 The *Motacillidae* as a subfamily of some other family, as *Sylvia*—2 A subfamily of *Motacillidae*. It contains the wagtails proper as distinguished from the pipits or *Anthinae*, having the point of the wing formed by the first three primaries, the tail as long as the wing or longer, and the coloration either pied with black and white or varied with yellow and green. There are some 50 species, chiefly of two leading genera *Motacilla* and *Rudya*. See *wagtail*.

motacilline (mō-ta-sil'ān), *a.* Pertaining to or resembling the *Motacillinae*.

motation† (mō-tā'shon), *n.* [LL *motatio* (n-), < L *motare*, keep moving, freq. of *movere*, move. See *move*.] The act of moving, mobility. *Bailey, 1731*

motatorious (mō-tā-tō'ri-us), *a.* [LL *motator*, a mover, < L *motare*, pp *motatus*, move. See *motation*.] Vibratory, mobile. Said of the legs of an insect or arachnid which, on alighting, has the habit of moving them rapidly, keeping the body in a constant state of vibration. This habit is found especially among certain long-legged spiders and crane-flies.

Motazilite (mō-taz'ī-lit), *n.* [From an Arabic word meaning 'to separate'.] One of a numerous and powerful sect of Mohammedan heretics, who to a great extent denied predestination, holding that man's actions were entirely within the control of his own will. They held extremely heretical opinions with reference to the quality or attributes of Dely. They appeared a few generations after Mohammed, and became one of the most important and dangerous sects of heretics in Islam.

mote†, *n.* [Formerly also *moat*, < ME *mot* (dat *mote*), < AS *mot*, a particle, atom, = D *mot*, dust, of D. *moet*, a knob, speck, mark, Sp *mota*, a bur in cloth. Cf *moat*†.] 1 A small particle, as of dust visible in a ray of sunlight, anything very small.

Originally the motet was designed as a contrast to the plain song of the remainder of the service, and probably it often possessed something of the graceful intricacy of the madrigal. The earliest motets date from about 1300. The use of an instrumental accompaniment is usually limited, and often avoided altogether. (b) Any vocal work in harmony intended for use in a church service; an anthem. Strictly speaking, a motet is in medieval style, and an anthem in modern style, but the distinction is often ignored

Moths resemble butterflies, but for the most part fly by night instead of by day, and their antennae, though exhibiting great diversity of size and shape, are not rhopaloceros or clubbed at the end like those of butterflies. There are many families and very numerous genera and species. Aside from numberless specific names, moths are distinguished by the leading families under English names. Hawk moths are *Sphingidae* and related families, butterfly moths *Pieridae* (various popular names), *Zygonidae*; clear-winged hawk moths, *Ageridae*, swift-moths, *Hepialidae*, lappet-moths or silk-worm moths, *Bombycidae*, tiger-moths, *Arctiidae*, lacey-moths, *Lathrididae*, rustic moths, *Noctuidae*, geometrid moths, *Geometridae*, meal moths, *Pyralidae*, leaf-rolling moths, *Tortricidae*, ermine moths, *Yponomeutidae*, leaf-mining moths, *Tenebridae*, plume-moths, *Alucidae* (or *Pterophoridae*). The tinetids include the various small moths injurious to carpets and other woollen fabrics. The smaller moths, of several families, are often collectively designated *Microlepidoptera*. Various small white meal moths are called *millers*. See the above

mother-of-coal (muTH'er-ov-köl'), *n.* See *coal*

mother-of-pearl (muTH'er-ov-péil'), *n.* The nacreous inner layer of the shell of various bivalve mollusks, as of the pearl-oyster, when hard, silvery, iridescent, or otherwise sufficiently beautiful to have commercial value; nacre. It is the substance of which pearls consist a pearl being a mass of it instead of a layer. The large oysters of the Indian seas secrete this nacreous layer of sufficient thickness to render their shells available for purposes of trade. The genus *Melocoryna* furnishes the finest pearls as well as mother of pearl. These shells are found in the greatest perfection round the coasts of Ceylon, near Ormuz in the Persian Gulf and in the Australian seas. Mother of pearl is procured from many different shells, univalve as well as bivalve, and is extensively used in the arts, particularly in inlaid work, and in the manufacture of knife handles, buttons, toys, snuff boxes, etc. — **Mother-of-pearl work**, a kind of embroidery in which many small pieces of mother of pearl are sewed to the background, small holes being bored in them for the purpose. The outlines of the flowers, leaves, etc., made by the thin mother of pearl are indicated by silk or gold thread, in which material are also made the light sprays, stems, etc.

mother-of-thousands (muTH'er-ov-thou'zands), *n.* The *Kenilworth* or *Colossium* ivy. See *ivy¹*. The name is less frequently applied to a few other plants, especially *Saxifraga sarmentosa*, the straw berry geranium, of similar habit. [*Prov. Eng.*]

mother-of-thyme (muTH'er-ov-tim'), *n.* The wild thyme, *Thymus Serpyllum*. See *thyme*

mother-of-vinegar (muTH'er-ov-vin'ë-gär), *n.* See *mother²*, 2

mother-pearl, *n.* Same as *mother-of-pearl*

mother-queen (muTH'er-kwën), *n.* The mother of a reigning sovereign, a queen-mother

mothersome (muTH'er-sum), *a.* [*< mother + -some.*] Careful or anxious, as a mother is. *Mrs. Trollope, Michael Armstrong*, xv.

mother-spot (muTH'er-spot), *n.* A congenital spot and discoloration of the skin, a birth-mark. See *nævus*.

mother-tongue (muTH'er-tung'), *n.* 1 One's native language — 2 A tongue or language to which other languages owe their origin.

mother-vessel (muTH'er-ves'el), *n.* A souring-vat used in the manufacture of wine-vinegar

mother-water (muTH'er-wä'ter), *n.* In *chem* and *phar*, and in chemical industries, water which has contained dissolved substances, and which remains after a part or the whole of these substances has crystallized or has been precipitated in an amorphous condition. Also called *mother-liquor*, *mother-lye*, and *mothers*

mother-wit (muTH'er-wit'), *n.* Native wit; common sense

For whatsoever *mother wit* or arte could worke he put in proofe

Spenser, Mother Hub Tale, I 1188.

Kath Where did you study all this goodly speech? —

Pet It is extempore, from my *mother wit*

moth-patch (móth'pach), *n.* A term loosely applied to various patches of increased pigmentation in the skin

moth-plant (móth'plant), *n.* A plant of the genus *Phalanopsis*

moth-sphinx (móth'sfing), *n.* A moth of the family *Castniidae*

moth-trap (móth'trap), *n.* In *bee-keeping*, a device to capture the moths whose larvae prey upon the bees in the hive, or to capture the larvae themselves

moth² (móth'2), *a* [*< moth¹ + -y¹*] Containing moths, eaten by moths

An old *moth²* saddle *Shak., T of the S*, III 2 40

motif (F pron mó-téif'), *n.* 1† A Middle English form of *motive*

Feres fele aithes to the folke that thei prechen Meuen *motifs* meny tymes insolubles and fallaces, That both lord and lewed of here byleue douten *Piers Plowman* (C), xvii 280

2 [F] A datum, theme, or ground for intellectual action used as French.

The *motifs* or data which give to the mind its guidance in achieving its more difficult tasks are the spatial series of muscular and tactual sensations which are caused by the motions of the eye for parallel turning, for accommodation, and for convergence in near vision

G. T. Ladd, Physiol. Psychology, p. 468

3 [F] In *music* (a) A figure (b) A subject or theme, particularly one that recurs often in a dramatic work as a leading subject

motif³ (mō-tif'ik), *a* [*< L. motus, motion (see mot³), + facere, make*] Producing or inducing motion, motor or motorial [*Rare*]

motile (mō'til), *a* and *n.* [*< L. as if *motilis, < motere, pp motus, move. see move*] 1. a. Capable of spontaneous motion, executing automatic or apparently voluntary movements as, a *motile* flagellum, *motile* cilia, spores, etc.

II. *n.* One in whose mind motor images are predominant or especially distinct

This division of men into visuals, audiles, *motiles*, is a case where motor representations are the favorite furniture of the mind *Mind*, XI 415.

motility (mō-til'i-ti), *n.* [= F *motilité* = Pg *motidade*, < L. as if **motilita*(t)-s, < **motilis*,

motile: see *motile*.] The quality of being motile; capability of moving; capability of automatic or spontaneous motion: the opposite of *stability*.

motion (mō'shon), *n.* [*< ME motion, mocion, < OF moton, F. motion = Sp mocion = Pg moção = It. mozione, < L. mōtio(n)-, a moving, an emotion, < movere, pp motus, move. see move*] 1 Change of place, transition from one point or position in space to another; continuous variation of position used both concretely, for a single change of position, and abstractly, to denote such change considered as a character belonging to the moving body, and also generally for a class of phenomena

There's not the smallest orb which thou behold'st But in his *motion* like an angel sings, Still quiring to the young eyed cherubins.

Shak., M of V, v 1 61

Encouraged thus, she brought her younglings nigh, Watching the *motions* of her patron's eye

Dryden, Hind and Panther, I 588

The atomists, who define *motion* to be a passage from one place to another, what do they more than put one synonymous word for another? For what is passage other than *motion*? *Locke, Human Understanding*, III iv 3

All that we know about *motion* is that it is a name for certain changes in the relations of our visual, tactile, and muscular sensations

Huxley, Sensation and Sensiferous Organs

Consider for a moment a number of passengers walking on the deck of a steamer. Their relative *motions* with regard to the deck are what we immediately observe, but if we compound with these the velocity of the steamer itself we get evidently their actual *motion* relatively to the earth

Thomson and Tait, Nat. Philos., § 45

2† The power of moving; ability to change one's position

As long as there is *motion* in my body, And life to give me words I'll cry for justice!

Fletcher, Valentinian, III 1

Swallow'd up and lost

In the wide womb of uncreated night, Devoid of sense and *motion*. *Milton, P. L.*, II 151

3 Style or manner of moving, carriage [*Rare*]

A true bred English Beau has, indeed, the Powder the Passions, the Tooth pick, and the Snuff box, and is as idle but the fault is in the flesh, he has not the *motion*, and looks stiff under all this

C. Burnaby, The Reform d Wife (1700), p. 82, quoted in [N and Q, 7th ser., V 834]

4. In *astron*, angular velocity, amount of angular movement, especially the rate of movement of a heavenly body in longitude as, the mean daily *motion* of the sun is 3548' — 5 In *mech*, any mechanism for modifying the movement in a machine, or for making certain parts change their positions in certain ways, also, the action of such mechanism as, the slide-valve *motion* of an engine, heart-*motion* in spinning-machines, etc. — 6† A puppet, or a similar figure mechanically moved, also, a puppet-show

Like dead *motions* moving upon wires.

Beau and Fl, Woman-Hater, III 1

They say there is a new *motion* of the city of Nineveh, with Jonas and the whale, to be seen at Fleet-bridge

B. Jonson, Every Man out of his Humour, II 3

Like the masters of a puppet show, they despise those *motions* which fill common spectators with wonder and delight

Swift, Change in Queen's Ministry

7 In *philos*, any change — a translation of *κίνησις*. There are four kinds of motion, according to Aristotelians — generation and corruption, alteration, augmentation and diminution, and change of place. Bacon distinguishes nineteen kinds of simple motions, which seem to be something like elementary forces

8 A natural impulse, as of the senses, but especially of the mind or soul, tendency of desires or passions, mental agitation

When we were in the flesh, the *motions* of sins, which were by the law, did work in our members to bring forth fruit unto death *Rom vii 5*

Hee found more *motions* of Religion in him than could be imagined. Quoted in *Capt. John Smith's Works*, II 59

The people exorbitant and excessive in all their *motions*, are prone oftentimes not to a religious onely, but to a civil kind of Idolatry in idolizing their Kings

Milton, Eikonoklastes, Pref

Catch, in the pauses of their keenest play,

Motions of thought which elevate the will

Wordsworth, Sonnets, III. 40

Woman's pleasure, woman's pain —

Nature made them blinder *motions* bounded in a shallower brain

Tennyson, Locksley Hall

9†. Animal life, the faculty of automatic movement and sensation or feeling; the exercise of such faculty, something which usually belongs equally to soul and body, though occasionally confined to one or the other

Ay, but to die and go we know not where,

To lie in cold obstruction and to rot,

This sensible warm *motion* to become

A kneaded clod *Shak., M of M*, III 1 120.

10. Inclination; disposition; impulse; will, as, of one's own motion

In 16 Edw IV, 1476, [the Lynenwevers] "of thaire fre motion and will have bounden thaim and thaire craft perpetually to kepe . . . upon Corpus Cristi day a pageant" (Council Book III fo 20^v)

York Plays, Int, p xvii

11. Proposal, instigation, incitement

Then he said to hys cardynals, Sire, make you redy, for I woll to Rome Of that moeyon his cardynales were sore abashed and displeased, for they louted nat the Romaynes Berners, tr of Froissart's Chron, I cccxxvi

12 A proposal or proposition formally made, specifically, a proposal formally submitted in a deliberative assembly, with a view to its discussion and adoption, also, the act of submitting such a proposal as, the motion to appoint a committee was carried

The motion about setting forth y^e fishing ship (caled y^e Frindship) came first from y^e plantation Bradford, Plymouth Plantation, p 286

Valentine and Hollis held the Speaker down in his seat by main force, and read the motion amidst the loudest shouts. Macaulay, Nugent's Hampden

13 In law (a) An application to a court or judge, usually in the course of a legal proceeding. Whatever is asked of a court by a suitor is asked by a motion (b) More narrowly, an application which is incidental to the progress of a cause, as distinguished from the trial or investigation of the issue as, a motion for an injunction, a motion to open a default. Still further distinctions are made in common parlance. Thus, applications on the trial incidental to its progress, such as to strike out testimony or to grant a non-suit, are called motions, though being on the trial, and the result being included in the judgment, they are not motions within the rules regulating the formalities required for making motions, the record of the decision, the award of costs, or the mode of review (c) In some of the United States, the paper drawn up by the attorney of the moving party, saying, "now comes the plaintiff (or defendant)," etc., "and moves," etc. (much in the same way that an application to the court would be entered in the minutes), and filed with the clerk in advance of applying to the court, and usually also served on the other party — 14 In music (a) The melodic change of a voice or voice-part from one pitch to another, melodic progression. It is concrete, conjunct or disjunct when it consists of a single step, discrete or disjunct when of a skip (b) The melodic progression of any two voice-parts in harmonic writing in relation to each other. It is similar when both voice parts rise or fall at the same time, parallel when they together rise or fall by the same interval contrary or opposite when one rises and the other falls, oblique when one rises or falls while the other remains stationary, and mixed when all varieties occur at once in several parts. In general, between important or conspicuous parts, contrary motion is sought. Parallel motion in perfect fifths or octaves is regularly forbidden, and similar motion to a perfect fifth or octave is employed sparingly 15 In the fine arts, the change of place or position which, from the attitude represented, a figure is portrayed as making. It can only be implied from the attitude which prepares the subject for the given change, and therefore differs from action 16 In med, evacuation of the intestine, alvine discharge

Shall I lose my doctor? no, he gives me the potions and the motions Shak, M W of W, III 1 105

17 In milit tactics, one of the stages into which each movement prescribed in the manual of arms is divided to facilitate instruction — Absolute motion, change of absolute place. — Accelerated motion. See accelerate — Active motion, in kinesotherapy, motion of the limbs or other parts of the patient produced by his own exertion in contradistinction to passive motion, where the limbs are moved by the attendant. — Angular motion. See angular — Brunonian motion. Same as Brunonian movement (which see, under Brunonian) — Center of motion. See center — Ciliary motion. See ciliary — Consensual motions. See consensual — Contrariety of motion. See contrariety — Differential motion. See differential — Direct motion. (a) In astron, increase in the longitude of a star (b) In music. See direct — Disjunct motion. See def 14 (a) — Diurnal motion of a planet, elliptic motion, equable motion. See the adjectives — Energy of motion. See energy, 7 — Equation of motion. See equation — Focus of mean motion of true motion. See focus — Harmonious motion. See harmonious — Heart-motion, in spinning, winding, and analogous machines, a motion produced by means of a heart-shaped cam — Hourly motion, the space moved through by a heavenly body in an hour — Hourly motion, in astron, the change of position which takes place in an hour — Instinctual, irrotational motion. See the adjectives — Lateral motion, in a railroad-car, the end play or freedom of movement of an axle in its boxes or the freedom of movement between a swing bolster and a truck — Laws of motion, specifically, Newton's three laws of motion, which are as follows First Law Every body continues in its state of rest, or uniform motion in

a straight line, except so far as it may be compelled by force to change that state. Second Law Change of motion is proportional to force applied, and takes place in the direction of the straight line in which the force acts Third Law To every action there is always an equal and contrary reaction, or, the mutual actions of any two bodies are always equal, and oppositely directed — Line of motion. See line — Local motion. See local — Lost motion, in mech, any difference of motion between the driving parts of a motor and the driven machine, or between the parts of a machine that communicate motion from one to another. It results from faulty construction of the parts, or from looseness of the boxes of axles or shafting or of a belt, which is thus permitted to slip — Natural motion, an involuntary movement of the body, as the beating of the heart — Overhead motion, a mechanism, consisting of counterweights and speed pulley arrangements of gears or any other contrivances, for increasing speed or force, interposed between some prime mover or main line of power transmission and a machine with which it communicates. It is so called because for convenience in transmission, or that it may not occupy working space it is placed over the machine affected by it. Also called overhead work — Paracentric motion, motion to or from an attracting center — Parallel motion (a) See parallel (b) In music. See def 14 (b) — Passive motion. See under active motion — Perpetual motion. (a) A machine which should do work without exhausting any power of doing work — that is, its work must not be accompanied by any displacement (such as the fall of a weight, or the uncoupling of a spring) or transformation (such as the combustion of fuel) which could not be undone by a replacement or counter transformation with out the expenditure of as much work as the machine has done. Such a machine is impossible, and contrary to all experience, for power of doing work is never increased nor diminished. Nevertheless, very many pretended perpetual motions have been put forth by deluded or knavish inventors. Most of them are of two classes — 1st, those which depend upon gravity or magnetism, and 2d, those which depend upon centrifugal force or other pressure mistaken for moving power (b) The mode of motion of such a machine (c) By a popular abuse of the term a movement or machine which could go on indefinitely by its own self generated power. Thus, if a man should pretend to have a wheel which turned upon its bearings without resistance, so that it would go on moving indefinitely, or to have a fluid which, though viscous, was frictionless, so that its motion, though continually decreasing never came to rest, neither claim would be a claim to a perpetual motion nor (however unfounded) would it violate any fundamental principle of mechanics. On the other hand, a machine (such as has actually been proposed) which would not go on moving of itself forever, but would require a little external force to overcome friction, but which with that little force should be capable of doing an indefinite amount of work, would, properly speaking, be a perpetual motion — Positive motion, in mech, an arrangement of apparatus connecting related parts of a machine in such manner that, as one moves, the other must move in accordance with the law of the relation. For example, the system of gearing which takes motion from the lathe spindle, and imparts motion to the lead screw of a lathe, is a positive motion. On the other hand, any mechanism which moves a part of a machine in a manner that permits the possibility of some subsequent motion, or variation of the motion, of the part, through the action of any force not directly transmitted by such mechanism, is not positive. Examples of motions not positive are — the mechanism actuating a tilt hammer, which falls by its gravity, a spring which by its elasticity recoils, and pulleys driven by belts in which the motion may be varied through slip — Positive-motion loom. See loom — Primary motion, the diurnal motion of a fixed star — Proper motion, in astron, that apparent motion or angular velocity of a fixed star which is due to a real movement of the star itself relatively to the other stars — Quantity of motion, momentum, the sum of the velocities of all the particles each multiplied by the mass — Rectilinear, parabolic, or circular motion, motion in a rectilinear, parabolic, or circular path — Relative motion, change of relative place — Retrograde motion, in astron, decrease in the longitude of a star — Rotational motion. See vortex-motion — Secondary motion, the proper motion of a fixed star — Simple harmonic motion, a motion like a uniform motion round the circumference of a circle which is looked at edgewise "when a point Q moves uniformly in a circle, the perpendicular QP drawn from its position at any instant to a fixed diameter AA' of the circle intersects the diameter at a point P, whose position changes by a simple harmonic motion" Thomson and Tait — Slide-valve motion, in a steam engine, broadly, the valve-gear, any one of a great variety of devices for imparting to a slide valve its proper motion for induction cut off, exhaust and compression or cushioning of steam at the end of the piston stroke, specifically, the motion of a slide valve produced by the valve gear. The link motion is one of the most important of valve gears. In the majority of slide valve motions the primary movement is derived from an eccentric keyed to the crank shaft. In other cases motion is taken from the cross-head. In the Joy valve gear the primary movement is obtained from the connecting-rod. See induction, cut off, exhaust, eccentric, and valve-gear — Take-up motion, in a loom, the mechanism which takes up and winds the woven cloth on the cloth beam as fast as the warp is unwound from the warp beam. The name is also given to analogous mechanism in many other kinds of machines — Violent motion, in older writers, a motion impressed upon a body by an external force — Voluntary motion, motion ensuing on an act of will, in contrast with reflex action or motion — Syn. Motion Movement Move Motion may be considered separate from that which moves, movement is always connected with the person or thing moving hence we speak of the laws of motion, of heat as a mode of motion, and of perpetual motion. not of movement in any of these cases, hence, also, motion is the more scientific and technical term Motion is more general and more voluntary, movement, more particular and occasional hence we speak of a motion with the hand, a movement of troops, involuntary movements, the movements of the heavenly bodies, the rate of motion or of movement. The figurative uses of the two correspond to the literal. The

chief uses of move are founded upon the idea of moving a piece, in chess or a similar game, for winning the game

motion (mō'shōn), v [ME *moecionen*, < *motio*, n] I *trans* 1 To guide by a significant motion or gesture, as with the hand or head as, to motion a person to a seat — 2 To propose, move

Motive power or force (a) The whole power or force acting upon any body or quantity of matter to move it. (b) Moving or impelling force in a figurative sense

Such men as *quæser* are not sent into the world to be part of its *motive power*

Lowell, Among My Books, 2d ser, p. 166.

(c) That which moves, as a locomotive, in *railroading*, the locomotive collectively of a railroad as, the superintendent of the *motive power*

II n 1 A mental state or force which induces an act of volition, a determining impulse, specifically, a desire for something, a gratification contemplated as the final cause of a certain action of the one desiring it. The term *motive* is also loosely applied to the object desired. The noun *motive* in this sense was brought into general use by writers influenced by Hobbs (though he uses the adjective only), who held that men's actions are always governed by the strongest motive, and denied the freedom of the will. It is now, however, in common literary and conversational use, apart from any theory

What moves the mind, in every particular instance, to determine its general power of directing to this or that particular motion or rest? And to this I answer the *motive* for continuing in the same state or action is only the present satisfaction in it, the *motive* to change is always some uneasiness

Locke, Human Understanding, II xxi § 29

Without another life, all other motives to perfection will be insufficient
Ep Atterbury, Sermons, I xl, Pref

By *motive*, I mean the whole of that which moves, excites, or invites the mind to volition, whether that be one thing singly, or many things conjunctly
Edwards, On the Freedom of the Will, I, 2.

When the effect or tendency of a *motive* is to determine a man to forbear to act, it may seem improper to make use of the term *motive*, since *motive*, properly speaking, means that which disposes an object to move. We must, however, use that improper term, or a term which, though proper enough, is scarce in use, the word determinative
Bentham, Intro to Morals and Legislation, x, 3, note

2 The design or object one has in any action, intention, purpose, the ideal object of desire

5. Prevailing design Specifically—(a) In music, same as *subject* (b) In the fine arts (1) the prevailing idea in the mind of an artist, to which he endeavors to give expression in his work, or (2) a subject or example prominently characteristic of any work or part of a work, and elaborated or often repeated with more or less variation

The Panathenaic procession furnished Phidias with a series of sculptural *motives*, which he had only to express according to the principles of his art
J A Symonds, Italy and Greece, p 214

6† Motion, proposition

Such *motives* thel moune this maistres in her glorie,
 And maken men in myshilleue that muse moche on her wordes
Piers Plowman (B), x, 113

Leading motive See *leading* = *Syn 1* *Motive, Reason, Inducement, Incitement, Impulse*, consideration, prompting, stimulus. The differences among the first five of these words are suggested by the derivations. A *motive* is that which moves one to act, addressing the will, as though directly, and determining the choice. It is the common philosophical term, and may be collective, as the whole field of *motives*. A *reason* is that which addresses the rational nature by way of argument for either belief or choice. An *inducement* leads one on by his desire for good as to hold out an additional inducement. An *incitement* urges one on like martial music. An *impulse* drives one on, but is transitory

motive (mō'tiv), *n*, pret and pp *motived*, ppr *motiving* [*< motive, n*] To act on as a motive, or with the force of a motive, prompt, instigate [*Recent*]

When he has satisfied himself that it was made by such a person as he, so armed and so *motived*, the problem is solved
Emerson, Essays 1st ser, p 10

motiveless (mō'tiv-less), *a* [*< motive + less*] Having no motive or aim, objectless

Though inconceivable, a *motiveless* volition would, if conceived possible, be conceived as morally worthless
Sir W Hamilton

motivelessness (mō'tiv-less-ness), *n* The character of being motiveless

That calm which Gwendolen had promised herself to maintain had changed into sick *motivelessness*
George Eliot, Daniel Deronda, xxiv

motivity (mō'tiv-i-ti), *n* [*< motive + -ity*] The power of moving, form of motion or locomotion

The active power of moving on, as I may call it, *motivity*
Locke, Human Understanding, II, xxiii, 28

motley (mot'h), *n* and *a* [Formerly also *motly*, *< ME motlikye, mottelay, mottike, motik*, a mixture of colors, a party-colored dress, of uncertain origin. According to Skeat, *< (OF) mottelé*, clotted, curdled, cf equiv *mattonni*, curdled, *< mottes*, curds, *< (G dial (Bav) math*, curds, but the sense does not suit. In meaning the word *motley* is like *medley*; but the forms disagree. The supposed derivation from *W mudline*, a changing color, *< mud*, change, + *lin*, a stain, hue, and that from *W ysmot*, a patch, spot, do not suit the conditions. Hence *mottle*] *I*, *n* 1 A habit made of pieces of cloth of different colors in glaring contrast the usual dress of the jester or professional fool

A worthy fool! *motley* is the only wear!
Shak, As you Like It, II, 6, 34

motley-minded (mot'h-min'ded), *a* Having a mind or character like that of a professional fool or clown, exhibiting incoherence in thought, having thoughts of a motley character

This is the *motley minded* gentleman
Shak, As you Like It, v, 4, 41

motly, *n* and *a* An obsolete spelling of *motley*

motmot (mot'mot), *n* [Also *momot*, said to be so named from the bird's note, which sounds like *mot-mot*, slowly repeated] A bird of the family *Momotida* or *Prionitidae*, a sawbill. These birds are peculiar to America inhabiting tropical and subtropical forests, and ranging north nearly or quite to Texas. The average size is about that of the jays, to which they have some superficial resemblance, but they are more like the bee eaters of the Old World, *Meropidae*, having a similar slender form, with long tail, of which the middle feathers project beyond the rest and are spatulate, forming a kind of racket. The bill is serrate, the coloration is variegated, chiefly greenish and bluish. These birds are of solitary habits, like kingfishers, to which they are closely related, they feed upon reptiles, insects, and fruits. See *cut under Momotus*

moto (mō'tō), *n* [It = Pg *moto*, *< L motus*, motion see *moté*] *In music* (a) Motion, the direction in which the harmonic parts move as, *moto contrario* (contrary motion) See *motion*, 14 (b) Energetic or spirited movement, spirit as *con moto* (with spirited movement)

motograph (mō'tō-gráf), *n* [*< L motus*, motion, + Gr *graphē*, write] A form of telegraph or telephone-receiver, invented by Edison, depending for its action on the variation of the friction between two conductors in relative motion, when a current of electricity is passed from one to the other across the surface of contact. A revolving drum is interposed in the circuit, one of the electrical connections being made through a movable terminal in contact with the surface of the drum. This contact piece is connected to a recording lever or to a telephone diaphragm, and, in consequence of the variations of the friction produced by the electric currents, causes the lever to record, or the diaphragm to repeat, the message

motographic (mō'tō-gráf'ik), *a* [*< motograph + -ic*] Of or pertaining to the motograph

There are models of the automatic and autographic telegraph, the *motographic* translator and repeater
Elect. Rev (Amer), XIV, 5

moton, *n* An obsolete form of *mutton*

moton, *n* [OF (?)] A piece of armor of the fifteenth century, forming part of the defense of the arm and shoulder. Perhaps (as thought by Meyrick) it was a gusset for the armpit

motoner, *n* See *muttoner*

motophone (mō'tō-fōn), *n* [*< L motus*, motion, + Gr *phōnē*, voice] A sound-engine actuated by aerial sound-waves, invented by Edison. Vibrations of a diaphragm, produced, as in the phonograph, by sound waves, are converted into motion of rotation by a stylus and ratchet-wheel

motor (mō'tor), *n* and *a* [= F *moteur* = Sp *l'g motor* = It *motore*, a motor, *< LL motor*, one who moves (applied to one who rocks a cradle), *< L movere*, pp *motus*, move see *move*]

I, *n* 1 One who or that which imparts motion, a source or originator of mechanical power, a moving power, as water, steam, etc.

These bodies likewise, being of a congenious nature, do readily receive the impressions of their *motor*
Sir T Browne, Vulg Err, II, 2

Specifically—2 *In math*, an operator or a quantity which represents the displacement of a rigid body. It involves the designation of a particular line in space, and the association with it of a length and an angle

This is in complete analogy with his (Clifford's) introduction of the word *motor* to embrace the species twist and wrench.
The Academy, June 29, 1889, p 462

3 *In mach*, a prime mover, a contrivance for developing and applying mechanically some natural force, as heat, pressure, weight, the tide, or the wind, a machine which transforms the energy of water, steam, or electricity into mechanical energy as, an electric *motor*

See *machine*, 2—4 A motor-nerve—5 *In anat*, specifically, a motor nerve—**Air-motor**, (a) A machine driven by compressed air. Such machines are constructed like steam-engines, and use the air expansively or non-expansively, according to the character of the engine. They are, strictly speaking, heat engines, in which the heat naturally existing in air, or this in connection with heat derived from the work of compression, is converted into *outer work*. When the air is used expansively, the expansion is regulated by cut-off valve-gear, as in a steam engine. Expansion is, however, not generally so available as with steam, on account of the chilling of the air during the period of expansion and consequent freezing of precipitated aqueous vapor, which closes the valve ports with ice, and seriously interferes with the working of such engines. This difficulty is avoided by heating the air prior to its induction to the cylinder of the engine, but, except in the so-called *caloric engine*, this principle has not been widely adopted. See *caloric engine* (under *caloric*), *ice machine*, and *cut under air engine*. (b) A motor car driven by an air motor—**Domestic motor**, a small motor used for pumping water, or running a sewing machine, etc.—**Electric motor** See *electric*—**First motor**, a prime motor—**Hydraulic motor** See *hydraulic*—**Motor oculi**, the third pair of cranial nerves, giving motor impulse to most of the muscles of the eye. Also called *oculomotor*. See *second cut under brain*

II. a 1 Giving motion, imparting motion

Asceticism throws away a great power given by God to help and improve us. It abandons to evil what might be a vast *motor* force leading to good
J F Clarke, Self-Culture, p 392

2 *In physiol*, conveying from the center toward the periphery an impulse that results or tends to result in motion, as a nerve opposed to *sensory*—3 (Of or pertaining to or acting through the motor nerves or trunks

A vigorous *motor* system, ready to act, and to act energetically, is a condition of a rapid development of will
J Sully, Outlines of Psychol, p 598

Motor dynamo, a dynamo used as a motor. When one dynamo is being driven by another the driven is sometimes called the *motor dynamo*—**Motor nerve**, any nerve whose function is to excite muscular contraction, and thus effect movement in an animal body. Most nerves are of mixed character, or sensorimotor, effecting both motion and sensation. See *vasomotor*—**Motor printer**, a printing telegraph in which the mechanism is moved by electric, steam, or other motive power

motor-car (mō'tor-kar), *n* A car which carries its own propelling mechanism, as an electric motor, pneumatic engine, steam-engine, etc., and is therefore a locomotive. Many such cars have sufficient power to draw other cars attached to them

motor-cycle (mō'tor-sī'kl), *n* A bicycle driven by an electric or other motor, an automobile bicycle

motorial (mō-tō'ri-al), *a* [*< LL motorius*, motory (see *motory*), + *-al*] Of or pertaining to motion, specifically, of or pertaining to a motor nerve, motor, as a nerve as, *motorial* nerve-fibers, a *motorial* impulse

motorium (mō-tō'ri-um), *n*, pl *motoria* (-ā) [NL, *< LL motorium*, the power of motion, neut of *motorius*, moving see *motory*] That part of an organism which moves or is moved, as distinguished from that which feels, senses, or perceives the opposite of *sensorium*. Since a sensorium has no determinable physical location, the *motorium* is the entire physical organism—**Motorium commune**, a hypothetical common center in the brain for motor impulses

motorius (mō-tō'ri-us), *n*, pl *motorii* (-i) [NL, *< LL motorius*, moving see *motory*] *In anat* and *physiol*, same as *motor*, 4—**Motorius oculi**. Same as *motor oculi* or *oculomotor*. More fully called *nervus motorius oculi*

motorman (mō'tor-man), *n* One whose business it is to drive a motor-car, or automobile vehicle [*Recent*]

motorpathic (mō-tor-path'ik), *a* [*< motor-path-y + -ic*] Of or belonging to motorpathy or the movement-cure, kinesiopathic—**Motorpathy** (mō-tōr'pa-thi), *n* [Irreg. *< L motor*, a mover (see *motor*), + Gr *-πάθος*, *πάθος*, suffering see *pathos*] *In med*, the movement-cure, kinesiopathy

mottle (mot'l), n. [*< mottle, v*] The pattern or arrangement of spots and cloudings forming a mottled surface, especially in marble or in the natural veining of wood

mottled (mot'ld), p. a. 1 Spotted, variegated, marked with blotches of color, of unequal intensity, passing insensibly into one another

The strong peculiarity of Harvey's style thought pressed on thought, sparkling with imagery, mottled with learned allusions, and didactic with subtle criticism
I. D'Iserles, *Amen of Lit.*, II 111

Bless the mottled little legs of that there precious child (like Canterbury brawn, his own dear father says)
Dickens, *Martin Chuzzlewit*, xix.

Specifically—2 In *entom.*, marked with irregular spots, generally formed of hairs of a different color from the ground; having two or more colors irregularly mingled in spots, but not running into one another—3 In *metal.*, an epithet noting the appearance of pig-iron when in a stage intermediate between the stages designated as the *white* and the *gray*. In mottled from the whiter parts of the metal are disseminated through the grayer, so that the whole has a spotted or mottled appearance. The grayest iron contains the largest amount of graphitic carbon, the whitest iron the least graphitic and the most combined carbon—**Mottled calf** See *calf*

mottle-faced (mot'l-fäst), a. Having a mottled face

The mottle-faced gentleman spoke with great energy and determination
Dickens, *Pickwick*, xliii

mottling (mot'ling), n. [Verbal n. of *mottle, v*]

1 Variegation of a surface by irregular spots—2 pl. In *entom.*, the marks of a mottled surface

motto (mot'ō), n., pl. *mottoes* or *mottoes* (-ōr) [*< It. motto (= F. mot), a saying, motto* see *mot*] 1 A short pithy sentence or phrase, sometimes a single word, used to indicate the tenor of that to which it is attached (as an essay or a treatise), or adopted as expressive of one's guiding idea or principle, or appended to a device or a coat of arms. In heraldry the motto is carried on a scroll alluding to the bearing or to the name of the bearer, or expressing some principle or tenet. The heraldic motto, strictly considered, is not hereditary, but personal, but it is frequently used by successive bearers of the escutcheon to which it belongs, especially when, as is often the case, it refers to some part of the achievement. 2 The poetry or verse contained in a motto-kiss or paper cracker

Then we let off paper crackers each of which contained a motto
W. S. Gilbert, *Ferdinand and Elvira*.

6 In *civil engin.*, in excavations, a piece of the original ground left at intervals to show the depth—**Indian mounds**, earthworks erected by the aborigines of North America, the so called mound builders. They are especially numerous in that part of the United States which lies between the Great Lakes on the north and the Gulf of Mexico on the south and is bounded on the west by the States lying the western bank of the Mississippi river, and on the east by a line drawn through the middle of the States of New York and Pennsylvania and extending southward so as to include the greater part of the two Carolinas and the whole of Georgia and Florida. Some of these works are very extensive and of varied character, consisting of mounds or tumuli, either conical or truncated, together with embankments or walls of earth or stone, which inclose areas of great size, and not infrequently are accompanied by wide and deep ditches. Thus the work at Newark, Ohio, covers an area of two square miles and consists of a network of hillocks and lines of circumvallation. So far as is known, some of these works were used as burial places and as the sites of rude dwellings and cabins. Others were intended, no doubt, for purposes of defense and others, again, may have been connected in some way with religious rites and ceremonies. Many of them were situated in the river valleys and not a few of the most prosperous cities in the Mississippi valley occupy sites once taken up by them

I venture the assertion that not only has there not, as yet been anything taken from the mounds indicating a higher stage of development than the red Indian is known to have reached, but that even the mounds themselves,

and under this head are included all the earthworks of the Mississippi Valley, were quite within the limits of his of forts *L Carr, Mounds of the Mississippi Valley, p. 3.*

mound¹ (mound), *v* & *n* [*< mound¹, n.*] To fortify with a mound, add a barrier, rampart, etc., to

mound-bird (mound'berd), *n.* A bird of the family *Megapodidae*, and especially of the genus *Megapodus*. The mound birds are so called from the great mounds or tumuli which they construct for the reception of their eggs, which are hatched by the heat of decomposition of the decaying vegetable substances in which they are buried. See *cat under Megapodidae*.

mound-builder (mound'bil'dér), *n.* 1 One of a race of people by whom the various earthworks called *Indian mounds* (see *mound¹*) were constructed. That these works are not necessarily of great antiquity, and that they were built by a race in no essential respect different from that found inhabiting the region where they occur when this was first settled by the whites, is the present opinion of nearly all the best-informed investigators of American archaeology. See quotation under *Indian mounds*, above.

In districts where the native tribes known in modern times do not rank high (even as savages, there formerly dwelt a race whom ethnologists call the *Mound Builders*, from the amazing extent of their mounds and enclosures, of which there is a single group occupying an area of four square miles. *E B Tylor, Prim. Culture, I. 50*

mound² (mound), *n* [*< mound², v*] 1. That upon which anything is mounted or fixed for use, and by which it is supported and held in place. Specifically—(a) The paper, cardboard, or other material to which an engraving or a drawing is attached in order to set it off to advantage. A mount may be a single sheet, or two sheets to one of which the print is attached, while the other, with a space cut out somewhat larger than the print, is placed over it, permitting it to be seen, while protecting it from abrasion.

The crude white mounts wholly or practically destroy the value of those "high lights" always so carefully placed by Turner, and which were with him so integral a part of every composition

(c) The paper, silk, or other material forming the surface of a fan.

A paper mount pasted on a wooden handle.
Coryat's Crudities, quoted in Art Journal, N. S., XVII. 172.

To this period belong the fans called "Cabriolet." In these the mount is in two parts, the lower and narrower mount being half way up the stick, the second mount in the usual place at the top of the stick
Harper's Mag., LXXIX. 404

(d) Apparatus for the adjustment and attachment of a cannon to its carriage

The carriages and mounts of the guns are made entirely of bronze and steel
The Century, XXXVI. 880

(e) pl. The metal ornaments serving as borders, edgings, etc., or apparently as guards to the angles and prominent parts, as in the decorative furniture of the eighteenth century in Europe. (f) The glass slip, with accessories, used to preserve objects in suitable form for study with the microscope. The object is usually covered with very thin glass, in squares or circles, and, except in the so-called *dry mounts*, is immersed in a liquid (*fluid mounts*), such as Canada balsam, glycerin, etc., a cell, as of varnish, is used in some cases.

2 The means of mounting or of raising one's self on or as on horseback (a) A horse, especially in riding or hunting use

mountain (moun'tān), *n.* and *a.* [*< ME. mountaine, mounten, montan, montaine, muntane, montaigne, < OF. montaigne, muntaine, F. montagne = Pr. montanha, montagna, montagna = Sp. montaña = Pg. montanha = It. montagna, < ML. montanea, also montana, a mountain, a mountainous region, < L. montana, neut. pl., mountainous regions, < montanus, of or belonging to a mountain, mountainous, < mon(t)-a, a mountain. See mound¹. Mountain is related to mound¹ as fountain is to fount¹.] **I. n.** 1 An elevation of land of considerable dimensions rising more or less abruptly above the surrounding or adjacent region. Ordinarily no elevation is called a mountain which does not form a conspicuous figure in the landscape, hence, what is a mountain in one region might be regarded as simply a hill in another. A region may have great elevation above the sea level, but not be recognized as a mountain. Thus, the Plains, or the region between the Missouri and the Rocky Mountains, have an elevation on their western edge as great as that of the highest points of the Appalachian range. Elevated regions not mountains are often called *plateaus*. Elevations, although of considerable height, if quite isolated or precipitous, are often called *rocks*, as, the *Rock of Gibraltar*. *Peak* is occasionally used in the same way as, *Pike's Peak*, the *Peak of Teneriffe*, and in the United States, in regions formerly occupied or explored by the French, the word *mont* is employed with a somewhat similar meaning, while *mound* is used over a considerable extent of country, especially in Wisconsin, as nearly the equivalent of *butte* or *mount*. For ranges or connected series of mountains, see *mountain-chain*.*

mountain-ash (moun'tân-ash'), *n*. 1 One of several small trees of the genus *Pyrus*, having ash-like leaves, primarily *P. aucuparia*. This, the rowan tree or quick beam, grows wild in the northern parts of the Old World, and is in general cultivation for ornament, on account of its handsome pinnate leaves, its small but numerous daisy-like white flowers, and its bright-red berries. The wood is used for tools, the berries afford malic acid, and all parts of the tree, as also of the American species, are astringent. The best known American mountain ash is *P. Americana*, a similar tree, but with larger leaves, and smaller though deeper colored fruit. It is native in the mountains of the eastern United States and northward, and is also cultivated. The western mountain-ash *P. sambucifolia*, a not very different tree, extends across the continent. See *dogberry*, 2, and *waken*. 2. mountain-chain (moun'tân-tân), *n* A connected series of mountains or conspicuous elevations. In the formation of mountains other than volcanic the process has usually been of such a character that a long strip of country has been raised in a sort of great or wall. Indeed, regions thousands of miles in length have occasionally been thus affected. This elevated ridge or wall has either in the original process of mountain building been raised into masses or submasses of varying height and more or less isolated from each other, or else long continued erosion and exposure to atmospheric agencies have brought about the same result. The more or less separated and distinct peaks, summits, or crests together make up the range. It is impossible to establish any criterion by which one mountain range can be separated from another adjacent one. In most cases, however, there is more or less similarity, if not absolute identity, between the different parts of a range, from both a geological and a topographical point of view, but there are ranges which are made up of parts differing from each other greatly in lithological character and in the epoch of their formation, and which, nevertheless, are always popularly considered as forming one system, and are so designated. This is the case with most of the greater mountain chains, as the Himalayas, the Andes, and the Cordilleras

mountain-cock (moun'tân-kok), *n*. The male capercaillie, *Tetrao urogallus*.

roneously, in farriers' use, for "mourue (being confused with the E. *mourn*), < OF. *mourue*, *mourue*, older *morue*, in pl. *mourues*, *mourues*, *morues*, hemorrhoids or piles, also the mumps and a disease of horses; prob (like *piles*), with ref to the shape of hemorrhoids, < L *morum*, a mulberry see *murr*. Confusion with OF *mort*, death (as asserted in the quot from Toppell), seems improbable, but there may have been confusion with OF *morve*, mucus of the nose, as used in the name of a disease of horses, "les *morves* de petit point, a kind of frenzie in an horse, during which he neither knows any that have tended him, nor hears any that come near him" (Cotgrave). There seems to have been confusion also with *mour*, the expression to *mour* in the *chine* being equivalent to *to mourn of the chine* see *mour*. None of the expressions appear in literary use except in allusive slang, and their origin was appar never clearly known. To have a kind of malignant glanders said of a horse, and allusively of persons, in the phrase *to mourn of the chine* or *mourning of the chine*. Compare *to mose in the chine* (under *mose*), and see *mourner*.

The Frenchman saythe "mort de langue, et de eschine sont maladyes saunce medicine," the *mourning* of the tongue and of the chyne are diseases without medicine. Fritzerbert, Husbandry (1634)

This word *mourning of the chine* is a corrupt name borrowed of the French tongue, wherein it is called *mote* (later editions *morte*) *deschen*, that is to say the death of the backe. Because many do hold this opinion, that this disease doth consume the marrow of the backe. Toppell, quoted in N and Q, 7th ser., III 184

This Lover, fuller of passions than of penck, began (when hee entred into the consideration of his owne estate) to *mourne of the chyne*, and to hang the lippe. Greene, Never too Late

2 The outward tokens or signs of sorrow for the dead, such as the draping of buildings in giving expression to public sorrow, the wearing of garments of a particular color, the use of black-bordered handkerchiefs, black-edged writing-paper and visiting-cards, etc. The color customarily worn on such occasions differs at different times and in different countries. In China and Japan, for instance, white is the mourning color, and basted unhemmed garments the style. At present in Europe and America the customary color is black or black slightly relieved with white or purple, black crape playing an important part especially in the mourning worn by women. Sometimes a distinctive garment, such as the widow's cap, is added.

No Athenian, through my means, ever put on *mourning*.
Langhorne, tr of Plutarch's Pericles.

And even the pavements were with *mourning* hid.
Dryden, Pal and Arc, iii 942

The mouth is in the head in most animals and serves for taking in food, mastication deglutition, and the utterance of the voice. In nearly all vertebrates the mouth is com-

posed of upper and lower jaws and associate parts, and consequently opens and shuts vertically. In many the orifice is closed by fleshy movable lips, and the cavity is furnished with teeth and a tongue. Appropriate salivary and mucous glands moisten the interior, which is lined with epithelium. In most invertebrates, as the enormous assemblage of arthropods, the basis of the mouth is clearly seen to be modified limbs, and the jaws work sidewise. In other cases the mouth, though definite in position and character in each case, varies too widely to be defined excepting as the ingestive orifice. In protozoans any part of the body may act as a temporary mouth, and in many worms there is never any mouth or special digestive system, food being absorbed directly through the integument. The most complicated mouths are found among insects and crustaceans (see cut under *mouth part*). See *oes*

Mozarabic (mō-zar'a-bik), *a* [< *Mozarab* + *-ic*] Of or pertaining to the Mozarabs as, *Mozarabic Church*, architecture, liturgy, etc. — **Mozarabic liturgy**, *Mozarabic mass*, the ancient national liturgy of the Spanish church. In its present form, which shows some assimilation to the Roman mass, this liturgy was restored and revised by Cardinal Ximenes in A.D. 1500, and is still in use in the chapel of a college at Toledo founded by him and in a few other chapels or churches. The Roman liturgy was made compulsory in Spain, with the exception of a few churches, about A.D. 1100, and in the thirteenth and succeeding centuries the national liturgy had fallen into almost entire disuse. The inappropriate epithet *Mozarabic* — that is, 'Arabizing' — may have been given to this liturgy from its longer retention in that part of Spain which was held by the Moors, or may have been meant as an unfavorable reflection upon it by the friends of the Roman rite. Apart from obvious Roman insertions, this liturgy is found to agree with canons of early Spanish councils, especially that of Toledo in A.D. 683, and with an account of the Spanish liturgy given by St Isidore of Seville at about the same date. The Mozarabic liturgy closely resembles the Gallican liturgy, belongs with them to the Ephesine, Gallican, or Hispano-Gallican group of liturgies, and as the only full and complete extant member of that group, serves as its type and representative. Among the marked peculiarities of this liturgy are: (1) the nature, arrangement, and unequalled variability of its parts; (2) its Oriental affinities such as remnants of the epiclesis, proclamations by the deacon, the position of the pax, the presence of the Sanctus Sanctus etc. (3) the elaborate ritual of the fraction, and (4) the use of a peculiar nomenclature for the parts, considerably different even from that of the Gallican use, as, for instance, *offertorium* for *missa*, *missa* for *offertorium*, *anthen*, *oration* for *præface*, etc. See *Ephean*, *Antiphon*, *Liturgy*. — **Mozarabic office**, the office for the canonical hours according to that ancient Spanish rite, as given in the breviary published by Ximenes in A.D. 1502.

— **Mozarabic rite**, the Mozarabic office and liturgy.

The hardest seeds corrupt and are turned to *mucilage* and rottenness, yet rise again, in the spring, from aqualor and putrefaction, a solid substance.

Boetius, True Religion, I 190.

2. Gum extracted from the seeds, roots, and bark of plants. It is found universally in plants, but much more abundantly in some than in others. The marsh mallow root, tubers of orchids, the bark of the linc and elm, the seeds of guineas and flax, are examples of plant products rich in this substance. In the arts the name is applied to a great variety of sticky and gummy preparations, some of which are merely thickened aqueous solutions of natural gum, which is easily extracted from vegetable substances by hot water, while others are preparations of dextrine, glue, or other adhesive materials, generally containing some preservative substance or compound, as creosote or salicylic acid.

3. In *chem*, the general name of a group of carbohydrates, having the formula $C_6H_{10}O_5n$. The mucilages have the common property of swelling enormously in water, so that they are in a condition near to solution, leaving no jelly like mass as many gums do. Members of the group differ greatly in properties, some being closely related to the gums, others to cellulose. Their chemical constitution is not yet determined. — **Animal mucilage**. Same as *mucus*, 1. — **Mucilage-canals**, special mucilage secreting passages or canals observed in many plants, as those traversing the parenchyma of the pith and cortex of the *Marantaceae*, the stems of the *Cyperaceae*, the posterior side of the leaves of some species of *Lycopodium*, etc. — **Mucilage-reservoirs**. Same as *mucilage canals*.

mucilage-cell (mū'si-lāj-sel), *n.* An individual cell secreting mucilage, as those which occur in various ferns, mosses, etc.

mucilage-slit (mū'si-lāj-slit), *n.* In *bot*, in the *Anthocerotae*, a slit on the under surface of the thallus, with no special guard-cells, and leading like a stoma into an intercellular space filled with mucilage. *Goebel*.

mucilaginous (mū-si-lāj'i-nus), *a.* [**<** *F. mucilagineux* = *Sp. Pg. mucilaginoso* = *It. mucellaginoso*, *mucilaginoso*, *<* *L. L.* as if **mucilaginosus*, *<* *mucilago* see *mucilage*] 1. In *anat*, muciparous; secreting a glairy or viscid substance like mucus specifically applied to synovial membranes, certain of whose fringed vascular processes were called *mucilaginous glands* by Clopton Havers in 1691. [Obsolete] — 2. Slimy, ropy, moist, soft, and slightly viscid, partaking of the nature of mucilage as, a *mucilaginous* gum. — **Mucilaginous extracts**, in *chem*, extracts which dissolve readily in water but scarcely at all in alcohol, and undergo spirituous fermentation. — **Mucilaginous glands**. See *gland*. — **Mucilaginous sheath**, an envelop or coat of mucilage surrounding the filaments of certain algae, occurring particularly in the *Conjugatae*.

mucilaginousness (mū-si-lāj'i-nus-nes), *n.* The state of being mucilaginous, sliminess, stickiness.

mucin (mū'sin), *n.* [**<** *L. mucus*, mucus, + *-in*] A nitrogenous body found in all connective tissue, and the chief constituent of

mugwump, a great man, chief, captain, leader
used in Eliot's translation of the Bible (1661) to
render the L. terms *captain, duke, centurion*, etc.]

I n 1: An Indian chief, an Indian leader. Said
to have been used among the Indians and whites of Mas-
sachusetts and Connecticut in the seventeenth and eight-
eenth centuries

2 (a) A person of importance; a man of conse-
quence, a leader. In this sense long in local use
along the coast of Massachusetts and the Connecticut
shore of Long Island Sound. Hence—(b) A person
who thinks himself of consequence; a self-im-
portant man — a humorous or satirical use of the
preceding. In this sense the word was also long in local
use as above, and occasionally appeared in print (as in
the Indianapolis "Sentinel," in 1872, and the New York
"Sun," March 28, 1884).

The great Mugwump [a Democratic (Locofoco) candidate
for county commissioner] was delivered of a speech upon
the occasion, which was highly applauded by the great
"Doctor Dum never"

Tippecanoe Log Cabin Songster, May 29, 1840 (a later edi-
tion, dated July 4, 1840) issued "from the office
[of the 'Great Western']"

[In a "song" following the above, in the "negro" dia-
lect, the same person is referred to as "ole mug" and
"honest, honest, mugwump woon"]

Then the great mugwump [a Democratic (Locofoco) can-
didate for Congress] was delivered of a speech which the
faithful loudly applauded

abstained from voting. The word was not generally
known in any sense before this time, but it took the popu-
lar fancy, and was at once accepted by the Independents
themselves as an honorable title. [*U. S. political slang*

the mulberry-tree — 2. Any tree of the genus *Morus*. The black mulberry, *M. nigra*, native somewhere in western Asia, has been known in Europe from antiquity. It yields a pleasant dark colored fruit, and its leaves were formerly in extensive use for feeding silkworms. The white mulberry, *M. alba*, introduced from China much later, has almost superseded the black in silkworm culture. It has been to some extent introduced into the United States. The red mulberry, *M. rubra*, a native of the United States, is the largest species of the genus. Its wood, which is very durable in contact with the soil, is used for posts, and for cooperage, ship and boat-building, etc. Its leaves are less valued for silk production than those of the other species, but its fruit is excellent. The Mexican mulberry, extending into Texas, etc., is *M. microrhyncha*.

the orig. L.] 1. A hybrid animal generated between the ass and the horse. The cross is usually between a jackass and a mare, that between a stallion and a she ass being called a *hinny*. The mule is a valuable product of artificial selection, in some respects superior to either parent and is extensively bred in America (Kentucky, Missouri, Mexico, etc.), in Spain, in Polton (France), etc. It retains to some extent the specific characters of the ass, in the comparatively large head, long ears, roached mane, slim tail, and narrow, pointed hoofs, but acquires much of the size, strength, and symmetry of the mare. The animal matures slowly, is very long lived, little liable to disease, and able to do more work than a horse under hard treatment and poor fare. Being also very agile and sure footed, it is serviceable as a pack animal in countries where a horse could scarcely be used. The mule is not less docile and intelligent than the horse, and its strength is, in proportion to its size, probably greater. Mules are ordinarily incapable of procreation, and such seems to be all ways the case with the jack, but instances of impregnation of the hinny by the male ass or by a stallion are not rare.

5. In *spinning*, a machine invented by Samuel Crompton (completed 1779), in which the rovings are delivered from a series of sets of drawing-rollers to spindles placed on a carriage which travels away from the rollers while the thread is being twisted, and returns toward the rollers while the thread is being wound so named because it was a combination of the drawing-rollers of Arkwright and the jenny of Hargreaves. — 6 In *numms.*, a coin, token, or medal which, owing to mistake or caprice, consists of two obverse or two reverse types, or of which the obverse and reverse types are accidentally associated. Thus, a denarius having a head of Tiberius on each side, or a denarius having the head of Iulianus on the obverse and a reverse type struck from one of the coin dies of Augustus, would be a mule.

The encouragement given to the creation of new varieties [of English tradesmen's tokens in the eighteenth century] by combining obverse and reverse dies that had no real connection was satirized by a token bearing the reverse type of an ass [that is, a token collector] and mule saluting each other, [and] having for the legend "Be assured, friend mule, you shall never want my protection." The very appropriate term *mule* was ever after applied to these illegitimate varieties.

Sp Hall, *South's Dove*

If we contemplate primitive human life as a whole we see that *multiformity* of sequence rather than uniformity of sequence is the notion which it tends to generate
H Spencer, *Prin of Psychol* § 488

multiformous (mul-ti-för'mus), *a.* [*< multiform + -ous*] Same as *multiform* [*Rare*]

His *multiformous* places compelled such a swarm of suitors to hunt about him
Sp Hackt, *Abp Williams* i 204 (*Darius*)

multiganglionate (mul-ti-gang'gli-on-at), *a.* [*< L. multus, many, + (NL) ganglion, a tumor, see ganglion*] Having many ganglia *Huxley*

multigenerate (mul-ti-jen'e-rät), *a.* [*< L. multus, many, + generatus, pp of generare, generate, see generate*] Generated in many ways—**Multigenerate function**, in *math*, a function not monogenous

multigenerous (mul-ti-jen'e-rus), *a.* [*< L. multigenus also multigenus, of many kinds, < multus, many, + genus (gener-), kind, see genus*] Of many kinds, having many kinds

multigranulate (mul-ti-gran'u-lät), *a.* [*< L. multus, many, + granulum, a grain, see granulate*] Having or consisting of many grains

multigyrate (mul-ti-p'jät), *a.* [*< L. multus, many, + gyrus, a circle, circuit, see gyrate*] Having many gyres or convolutions, much convoluted, as a brain

multijugate (mul-ti-jö'gät), *a.* Same as *multijugous*

multijugous (mul-ti-jö'gus), *a.* [*< L. multijugus, yoked many together, < multus, many, + jugum, yoke*] In *bot*, consisting of many pairs of leaflets

multilaminate (mul-ti-lam'i-nät), *a.* [*< L. multus, many, + lamina, a thin plate of wood, see laminate*] Having many layers or laminæ

multilateral (mul-ti-lat'e-räl), *a.* [*< F multilater = Sp multilatero = Pg multilatero = It multilatero, < L. multus, many, + latus (later-), side, see lateral*] 1 In *math*, having more lines or sides than one Hence—2 Generally, many-sided

The whole poem represents the *multilateral* character of Hinduism
J F Clarke, *Ten Great Religions*, III 8

multilineal (mul-ti-lin'e-äl), *a.* [= *Pg multilinal, < L. multus, many, + linea, a line, see lineal*] Having many lines

multilinear (mul-ti-lin'e-äl), *a.* [*< L. multus, many, + linea, a line, see linear*] Same as *multilinal*

multilobate (mul-ti-lö'bät), *a.* [*< L. multus, many, + NL lobus, a lobe, + -ate¹, see lobate*] Having many lobes, consisting of several lobes

multilobed (mul-ti-löbd), *a.* [*< L. multus, many, + NL lobus, a lobe, + -ed²*] Having many lobes or lobe-like parts, multilobate

multilobular (mul-ti-löb'ü-lär), *a.* [*< L. multus, many, + NL lobulus, lobule, see lobular*] Having many lobules

multilocular (mul-ti-lök'ü-lär), *a.* [= *F multiloculaire = Pg multilocular = It multiloculare, < L. multus, many, + locus, a cell, + -at³, see locular*] Having many cells, chambers, or compartments as, a *multilocular* pincarp, a *multilocular* spore, *multilocular* shells. See *plurilocular*—**Multilocular crypt**, *see crypt*

multiloculate (mul-ti-lök'ü-lät), *a.* [*< L. multus, many, + locus, a cell, + -ate¹*] Same as *multilocular*

multiloquence (mul-ti-lö-kwens), *n.* [= *It multiloquencia, < L. multus, many, + loquens, a talking, < loquor (-t-), pp of loqui, speak, talk, see locution*] Use of many words, verbosity, loquacity

multiloquent (mul-ti-lö-kwent), *a.* [*< L. multus, much, + loquor (-t-), pp of loqui, speak*] Speaking much, very talkative, loquacious

multiloquous (mul-ti-lö-kwus), *a.* [= *Sp multiloquo = Pg multiloquo = It multiloquo, < L. multiloquus, talkative, < multus, much, + loqui, speak, talk*] Same as *multiloquent*

multiloquy (mul-ti-lö-kwi), *n.* [= *Pg multiloquio = It multiloquio, multiloquio, < L. multiloquum, talkativeness, < multiloquus, talkative, see multiloquous*] Same as *multiloquence*

multimillionaire (mul-ti-mil-yon-är), *n.* [*< L. multus + millionarius*] One who possesses property worth several million dollars (or pounds, or francs, etc.)

multinodal (mul-ti-nö'däl), *a.* [*< L. multus, many, + nodus, knot, see nodal*] Having many nodes, in any sense of that word

multinodate (mul-ti-nö'dät), *a.* [*< L. multus, many, + nodus, knot, see node*] Same as *multinodal*

multinodous (mul-ti-nö'dus), *a.* [*< LL multinodus, multinodus, having many knots, < L. multus, many, + nodus, knot, see node*] Same as *multinodal*

multinomial (mul-ti-nö'mi-äl), *a* and *n.* [= *Sp It multinomio, < L. multus many, + nomen, a name, see nomen¹, nomen*] [*Cf binomial*] Same as *polynomial*—**Multinomial theorem**, an extension of the binomial theorem

multinomial (mul-ti-nom'i-näl), *a.* [*< L. multus, many, + nomen (nomin-), name, see nominal*] Same as *multinominous*

multinominous (mul-ti-nom'i-nus), *a.* [*< LL multinominus, many-named, < L. multus, many, + nomen (nomin-), name, see name¹*] Having many names or terms, multinomial, polynominous

Venus is *multinominous*, to give example to her prodigal disciples
Dante, *Paradise*

multinuclear (mul-ti-nu'klä-är), *a.* [*< L. multus many, + nucleus, a kernel, see nuclear*] Same as *multinucleate*

multinucleate (mul-ti-nu'kle-ät), *a.* [*< L. multus, many, + nucleus, a kernel, see nucleate*] Having many or several nuclei, as a cell [*Ency Brit*, XXIV 125]

multinucleated (mul-ti-nu'klä-ät), *a.* Same as *multinucleate*

multinucleolate (mul-ti-nu'klä-ö-lät), *a.* [*< L. multus, many, + nucleolus, dim of nucleus, a kernel, see nucleolate*] Having many or several nucleoli

multiovulate (mul-ti-ö-vü-lät), *a.* [*< L. multus, many, + ovulum, ovule, see ovule*] In *bot*, containing or bearing many ovules

multiara (mul-ti-p'ä-är), *n.* [*pl multiparæ (-ä)*] [*NL, tim of multiparus, see multiparus*] In *obstet*, a woman who has had two or more children or who, having had one, is parturient a second time opposed to *primipara*

multiparity (mul-ti-par'i-ti), *n.* [*< multiparus + -ity*] Plural birth, production of several at a birth

multiparous (mul-ti-p'ä-rus), *a.* [= *F multipare = It multipara, < NL multiparus, giving or having given birth to many, < L. multus, many, + parere, bear*] 1 Producing many at a birth

(Creatures that are feeble and timorous are generally *Multiparous*)
Ray, *Works of Creation*, p 138

2 In *bot* many-bearing said of a cyme with three or more lateral axes (the *pleiochasium* of Eichler)

multipartite (mul-ti-pär'tit), *a.* [= *F multipartite = It multipartito, < L. multipartitus, much-divided, < multus, much, + partitus, pp of partire, divide, < pars (part-), a part, see*

part, v] Divided or cleft into many parts, having several parts, multifold
multiplied, **multipede** (mul'ti-ped, -péd), *a.* and *n.* [= *F* *multiplé*, < *L* *multiplés* (-péd-), many-footed (> *multipléda*, a many-footed insect), < *multus*, many, + *pes* (-péd-) = *E* foot.] *I. a.* Having many feet, polypous

II. n. A many footed or polypous animal
multi-phase (mul'ti-fāz), *a.* Having many phases, in any sense of that word [Recent]
multi-pinnate (mul'ti-pin'āt), *a.* [*L* *multus*, many, + *pinnatus*, feathered see *pinnate*] In bot., many times pinnate See *pinnate*

multiple (mul'ti-pli), *a.* and *n.* [= *F* *multiple* = *Sp* *multiple* = *Pg* *multiple* = *It* *multiple*, < *ML* *multiplus*, manifold, < *L* *multus*, many, + *plus*, as in *duplex*, double, etc., akin to *E* -fold see *-fold*, and of *dupl*, *trip*, etc. (> *multi-plex*, with diff. second element)] *I. a.* 1 Manifold, having many parts or relations — 2 Consisting of more than one complete individual — **Law of multiple proportion**, in chem., the law, first announced by Dalton, that, when a given quantity of an element A unites with several different quantities of B to form definite compounds, these several quantities of B will bear a simple ratio to each other — **Multiple arc**, the system of connecting electric batteries, lamps, or other circuits to the leads or main conductors where terminals of each lamp or other circuit are connected to the leads, so as to form an independent arc or circuit between them See *parallel circuit* under *parallel* **Multiple contact**, **drilling-machine**, etc. See the nouns — **Multiple echoes** See *echo*, 1 — **Multiple epidermis**, in bot., an epidermis of several layers of superposed cells, resulting from the division of the original epidermal cells by partitions parallel to the surface — **Multiple fruit** See *fruit*, 4 — **Multiple images** See *image* — **Multiple integral**, in math., a quantity which results from the performance of integration more than once, generally with reference to different variables — **Multiple lines**, in fort., several lines of detached works or ramparts arranged for the defense of a military position — **Multiple neuritis**, a neuritis involving several nerves at once — **Multiple point of tangent**, in math., one which results from the coincidence of two points or tangents The *multiple points of curves* are made up of the three kinds of double points, namely, the point where the curve crosses itself the outlying point, and the cusp In like manner, the *multiple tangents* are made up of three kinds of double tangents the tangent from one real convexity to an other, the outlying tangent with no real point of tangency, and the tangent at an inflection — **Multiple pole** Same as *multipolar* — **Multiple star** See *star* — **Multiple values**, in alg., symbols which fulfil the algebraic conditions of a problem when several different values are given to them, as the roots of an equation, certain functions of an arc or angle, etc.

II. n. In *arith.*, a number produced by multiplying another by a whole number as, 12 is a *multiple* of 3, the latter being a *submultiple* or aliquot part of the former — **Common multiple** of two or more numbers, a number that is divisible by each of them without remainder thus 24 is a *common multiple* of 6 and 4 The *least common multiple* is the smallest number of which this is true thus, 12 is the *least common multiple* of 6 and 4 The same definitions apply to algebraic quantities — **Multiple of gearing**, a train of gearing by which a specific power to accomplish a definite act or function is attained through change of speed ratio Thus, in powerful shears, etc., a high speed is changed to a low speed with great increase of pressure exerted through a small distance on the cutting blade conversely, by a multiple of gearing a high speed with less pressure may be obtained

Multiplepointing (mul'ti-pli-poin'ting), *n.* In *Scots law*, double pointing or double distress It gives rise to an action by which a person possessed of money or effects which are claimed by different persons obtains an adjudication for settlement and payment corresponding to *into pleader* in England and the United States See *pointing*

multiplex (mul'ti-pleks), *a.* and *n.* [= *Sp* *multiplex* = *Pg* *multiplex*, *multplex* = *It* *multiplex*, *multplex*, < *L* *multiplex* (i.e. also *multiplus*), manifold, < *multus*, many, + *plus*, fold see *plate*] *I. a.* 1 Manifold, multiple, multiplexate

In favour of which unspeakable benefits of the reality, what can we do but cheerfully pardon the *multiple* ineptitudes of the semblance?

Carlyle, Misc., IV 197 (*Dames*)
2 In bot., having petals lying over one another in folds Also *multiple* — **Multiplex telegraphy**, a method by which several messages (specifically more than four) can be sent over the same wire By Edison a method (see *quadruplex*) four messages can be sent, and the number has been increased by Rowland to twelve or sixteen See *duplex telegraph*

II. n. In math., a set of objects
multiplex (mul'ti-pleks), *i* t [*<* *multiplex*, *a*] To render multiplex, manifold [Colloq.]
multipliable (mul'ti-pli-a-bl), *a.* [*<* *F* *multipliable*, < *L* *multiplabilis* see *multiply* Cf *multiplacable*] Capable of being multiplied

There is a continually increasing demand for popular art, *multiplacable* by the printing press, illustrative of daily events, of general literature, and of natural science

Ruskin, Lectures on Art (1872), p. 10
multiplacableness (mul'ti-pli-a-bl-nēs), *n.* Capableness of being multiplied

multiplacable (mul'ti-pli-ka-bl), *a.* [= *OF* *multiplacable*, *multiplacable*, *F* *multiplacable* = *Sp* *multiplacable* = *Pg* *multiplacavel* = *It* *multiplacabile*, that may be multiplied, < *L* *multiplacabilis*, multiplied, manifold, < *multiplacare*, multiply: see *multiply*] Multiplacable; capable of existing in many individual cases

multiplacand (mul'ti-pli-kand), *n.* [= *F* *multiplacando* = *Sp* *Pg* *multiplacando* = *It* *molto pluando*, < *L* *multiplacandus*, gerundive of *multiplacare*, multiply see *multiply*] In *arith.*, a number multiplied or to be multiplied by another, which is called the *multiplier* See *multiplication*, 2

The two numbers given or assigned in every multiplication have each of them a peculiar name, for the greater is called the *multiplacand* and the lesser is named the *multiplier*
T. Hall, Arithmetick (1600), fol. 230

multiply (mul'ti-pli-kat), *a.* [= *Sp* *Pg* *multiplacado* = *It* *multiplacato*, < *L* *multiplacatus*, pp. of *multiplacare*, multiply see *multiply*] 1 Consisting of many, or more than one — 2 In bot., same as *multipler*, 2

multiplacated (mul'ti-pli-kā-ted), *a.* [*<* *multiplacatus* + -ed] Multiplied, put in two or more folds

The Persian "cap was linen *multiplacated*"
Sir T. Herbert, Travels (1864), p. 319

multiplication (mul'ti-pli-kā'shon), *n.* [*<* *ME* *multiplication*, < *OF* *multiplicacion*, *F* *multiplication*, < *Sp* *multiplicacion* = *Pg* *multiplicação* = *It* *moltiplicazione*, < *L* *multiplicatio*(-n-), multiplication, < *multiplacare*, pp. *multiplacatus*, multiply see *multiply*] 1 The act or process of multiplying or of increasing in number, the state of being multiplied as, the *multiplication* of the human species by natural generation

In hills feet towards Septentrion
Good humour hath *multiplication*.
Palladius, Husbandrie (E. E. T. 8), p. 175

It may be doubted whether any of us have ever yet realized the enormous change which has taken place in the conditions of national progress by the *multiplication* and diffusion of cheap books
Nineteenth Century, XLIV 499

2 An arithmetical process in which one number, the *multiplier*, is considered as an operator upon another, the *multiplacand*, the result, called the *product*, being the total number of units in as many groups as there are units in the multiplier, each group being equal in number to the multiplacand, and, more generally, the operation of finding the quantity which results from substituting the multiplacand in place of unity in the multiplier Thus, the multiplication of 4 by 5 gives 5 times 4, or the number of units in five groups of four units each, so the multiplication of 4 by 5 consists in finding 4 not of unity, but of unity By a further generalization, multiplication in the higher mathematics is regarded as the process of bringing an operand under an operator Thus, in quaternions, if *u* be the operation of turning a line in a given direction through a given angle, and if *v* be another similar vector, then *uv* or the result of the multiplication of *v* by *u*, is the rotation which would result from turning a line first through *u* and then through *v* In like manner, in the theory of differential equations, if *D_x* denote the operation of differentiation relatively to the variable *x*, and *D_y* denote the same operation relatively to the variable *y*, then the operation of differentiating first relatively to *y* and then relatively to *x* is regarded as the product of *D_y* by *D_x*, and is written *D_{xy}* In the algebra of logical relations the multiplication of one relative by another consists in putting the relates of the multiplacand distinctively in place of the correlates of the multiplier In other cases, multiplication consists in conjoining (in some specific way) each unit of the multiplier with each unit of the multiplacand and this definition may be regarded as including every other Thus, the multiplication of 2 feet of length by 3 feet of breadth is considered as giving 6 feet of area, in each of which square feet one unit of length is conjoined with one unit of breadth So the momentum of a body having a motion of translation is said to be the product of the mass into the velocity — that is, is the result of imparting to each particle of the mass the whole of the given velocity In the Boolean algebra, the product of two classes *A* and *B* is the whole of the class embraced by both — that is, it embraces all the individuals each of which unites the characters of *A* and of *B* In algebra multiplication is denoted by writing the multiplier before the multiplacand, either directly, or with a cross (x) or a dot (.) interposed between them All multiplication follows the distributive principle, expressed by the formula

$$(a + b)(c + d) = ac + bc + ad + bd$$

Under certain restrictions, all multiplication follows the associative principle expressed by the formula $a(bc) = (ab)c$ According to the nature of the conjunction of units, multiplication does or does not follow the commutative principle expressed by the formula $ab = ba$
3 Specifically, in bot., increase in the number of parts of a flower, either (a) in the number of whorls or spiral turns, or (b) in the number of organs (pistils, stamens, petals, or sepals) in any whorl, circle, or spiral turn Also called *augmentation* See *chorus* — 4 The supposed art of increasing gold and silver by alchemical means *Chaucer*

multiplicious (mul-ti-pli-sh'us), *a.* [*<* *L* *multiplus* (*multiplus*), multiplex, + -ous.] Manifold, multiplex

The animal (*amphibæna*) is not one, but *multiplicious*, or many, which hath a duplicity or gemination of principal parts
Sir T. Browne, Vulg Err, III 15

This sense [smelling] although sufficiently grand and admirable (yet) is not so *multiplicious* as of the eye or ear
Derham, Physico Theology, IV 4

multipliciously (mul-ti-pli-sh'us-ly), *adv.* In a manifold or multiplex manner

multiplicity (mul-ti-pli-si'ti), *n.* [= *F* *multiplicité* = *Sp* *multiplidad* = *Pg* *multiplicidade* = *It* *moltiplicità*, < *L* *multiplus* (*multiplus*), manifoldness, < *L* *multiplus*, manifold see *multiplus*] 1 The state of being multiplex or manifold or various, the condition of being numerous

Moreover, as the manifold variation of the parts, so the *multiplicity* of the use of each part, is very wonderful
N. Grell, Cosmologia Sacra, I 5

2 Many of the same kind, a large number

Had they discoursed rightly but upon this one principle that God was a being infinitely perfect, they could never have asserted a *multiplicity* of gods
South, Sermons

A *multiplicity* of laws give a judge as much power as a want of law, since he is over sure to find among the number some to condemn him his partiality
Goldsmith, Revue de Boar's Head Tavern

Multiplicity of a curve, the total number of multiple points, cunodes, anodes, and cusps, or of their compound equivalents, belonging to it Thus, a curve having no singularity except a ramphoid cusp has a multiplicity of 2, since a ramphoid cusp is equivalent to a simple cusp and a cunode **Order of multiplicity of a right line with reference to a surface**, the number of tangent planes to the surface from the line

multiplier (mul'ti-pli-er), *n.* 1 One who or that which multiplies or increases in number.

Broils and quarrels are alone the great accumulators and multipliers of injuries
Decay of Christian Piety

2† An alchemist Compare *multiplication*, 3

Alchemists were formerly called *multipliers*, although they never could multiply as appears from a statute of Henry IV repealed in the preceding record
J. D. Israeli, Curios of Lit, I 376

3. The number in the arithmetical process of multiplication by which another is multiplied Also *multiplacator* — 4 A flat coil of conducting wire used as the coil of a galvanoscope. The tendency to deflection is proportional nearly to the number of coils — 5 An arithmetical factor for performing calculations in multiplication *E. H. multipresence (mul-ti-prez'ens), *a* [*L. multipresens* (t-) + *ce* of *presens*] The power or act of being present in many places at once, or in more places than one at the same time

This sleeveless tale of transubstantiation was surely brought into the world, and upon the stage, by that other fable of the Multipresence of Christ's body
By Hall, No Peace with Rome, I III 3.

The mediæval schoolmen and modern Roman divines ascribe omnipresence only to the divine nature and person of Christ, unipresence to his human body in heaven, and a miraculous *multipresence* to his body and blood in the sacrament of the altar
Schaff, Christ and Christianity, p. 75.

multipresent (mul-ti-prez'ent), *a* [*L. multus*, many, + *presens* (t-), present see *present*, *a*] Being present in more places than one, having the property or power of multipresence

multiradiate (mul-ti-rā'di-āt), *a* [*L. multus*, many, + *radius*, ray see *radiate*, *a*]

Having many rays, polyactinal

multiradicate (mul-ti-rad'i-kāt), *a* [*L. multiradix* (-radix-), many-rooted (< *L. multus*, many, + *radix* (radic-), a root). see *radicate*] Having many roots

multiramified (mul-ti-ram'i-fid'), *a* [*L. multus*, many, + *ramus*, a branch, + *facere*, make see *ramify*] Much-branched, having many branches

The Headlongs claim to be not less genuine derivatives from the antique branch of Cadwallader than any of the last-named *multiramified* families
Peacock, Headlong Hall, I

multiramose (mul-ti-rā'mōs), *a*. [*L. multus*, many, + *ramus*, branch. see *ramose*] Having many branches

multiramous (mul-ti-rā'mus), *a*. Same as *multiramose*

multisaccate (mul-ti-sak'āt), *a* [*L. multus*, many, + *saccus*, a sac see *saccate*] Having many sacs

multiscient (mul-tish'ent), *a* [*L. multus*, many, + *sciens* (scient-), ppr of *scire*, know see *scient*] Knowing many things, having much learning

multiscious (mul-tish'us), *a* [*L. multiscius*, knowing much, < *multus*, much, + *sciens*, knowing, < *scire*, know] Having variety of knowledge Bailey

multisect (mul-ti-sekt'), *a* [*L. multus*, many, + *sectus*, pp of *secare*, cut] Having many segments, as an insect or a worm

Coptic **mum**, bitumen, gum-resin] 1 A dead human body embalmed and dried after the manner of the ancient Egyptian preparation for burial. An immense number of mummies are found in Egypt consisting not only of human bodies, but of those of various ani-

mals, as bulls, apes, fishes, crocodiles, fish, etc. The processes of embalming bodies were very various. The bodies of the poorer classes were merely dried with salt or natron, and wrapped up in coarse cloths. Those of the rich and the great underwent the most complicated operations and were laboriously adorned with various ornaments. The embalmer extracted the brain through the nostrils and the entrails through an incision in the side. The body was then shaved and washed the belly filled with perfumes and the whole body covered with natron, and steeped in the same material for seventy days. After this the corpse was washed treated with balsam or other antiseptics, and then wrapped up in linen bandages sometimes to the number of twenty thicknesses. The body was then put into an ornamented case of wood or cartonnage. Sometimes the cases were double. The term **mummy** is likewise used of human bodies preserved in other ways either by artificial preparation or by accident. The Gimmiches, or ancient people of the Canaries, embalmed their dead in a simple but effectual manner. In some situations the conditions of the soil and atmosphere, by the rapidity with which they permit the drying of the animal tissues, are alone sufficient for the preservation of the body with the general characteristics of a mummy. This is the case in some parts of South America, especially at Africa (formerly in Peru), where considerable numbers of bodies have been found quite dry, in pits dug in a dry saline soil. In some places natural mummies are occasionally found in caverns or in crypts as in a well known church crypt in Bordeaux, France. Natural mummies of various animals are often found in such state of preservation as to allow of scientific description of many of their parts.

2 A contagious non-suppurative inflammation of the parotid and sometimes of the other salivary glands and of the circumglandular connective tissue, idiopathic parotitis. Mumps is usually an innocent affection without dangers or sequelae. It begins with pain and then swelling behind the jaw, close to the ear on one side. The pain at first is caused by motion of the jaw or the presence of acids. The other side is involved a day or two later. There may be inflammation of the testes and scrotum in males, or of the mammae, ovaries, and vulva in females; this extension is, however, mostly confined to pubescence and adult life. One attack usually protects. The period of incubation is thought to be from 7 to 14 days.

Mures (mūr'ez), *n*, *pl* [*NL, pl of L mus (mur-), mouse see Mus, mouse*] The Old World *Murina* as distinguished from the American *Sigmodontis* by having the molar cusps in series of three across the teeth. There are many genera. The group is only a section of a subfamily of *Murida*

murex (mūr'eks), *n* [*NL, < L murex, the purple-fish*] 1 [*cap*] The typical genus of *Murexidae*. The aperture of the shell is rounded, the canal is long and straight, and the outer surface of the shell is interrupted by numerous varices or spines, at least three to a whorl. The most remarkable forms of these shells are from tropical seas. The animals are highly rapacious, and some of them do great damage to oyster beds, as the European *M. canaliculatus*. The celebrated purple dye of the ancients was chiefly furnished by the animals of two species of the genus *Murex*, *M. trunculus* and *M. brandaris*, the dye being secreted by a special gland, called the "purpurigenous gland," of the animal. The amount secreted being very small, the number of animals sacrificed to secure it was correspondingly large, and the cost therefore great. Hence its use was confined to the wealthy, or reserved for sacred or regal purposes. Its manufacture seems to have expired after the capture of Constantinople by the Turks.
2 A species of this genus—3. *Pl murexes* or *murexes* (-rek-sez, -ri-séz) A caltrop.

murexide (mūr'ek-sid or -sīd), *n* [*< L murex, the purple-fish, + -ide*]. The purpurate of ammonia of Prout (probably $C_2H_3N_2O_3$). It crystallizes in four sided prisms, two faces of which reflect a green metallic luster. The crystals are transparent, and

by transmitted light are of a garnet red color. It forms a brownish red powder, and is soluble in caustic potash, the solution having a beautiful purple color. In 1855 and 1856 this substance was largely used as a dye for producing pinks, purples, and reds but the introduction of aniline colors put an end to its use

stone of which vases, cups, and other orna-
mental articles were made. This material and the
various things made from it are mentioned by several
Greek and Latin authors, but Pliny is the only one who
has attempted any detailed description of it. Unfortu-
nately his accounts are so vague that the material can
not be positively identified, nor has anything been found
in the excavations at Rome which is certainly known to
be the ancient murra. In the opinion of the best authori-
ties, however, it was fluor spar, for of the known materials
this is the only one found in abundance which has the pe-
culiar coloration indicated by Pliny. The principal ob-
jection to this theory is that no fragments of fluor spar
vases have been found in Rome or its vicinity. Vessels of
murra were at one time considered by the Romans as of
inestimable value

Mus (mū'zā), *n* [*NL*, *< L mus = Gr μῦς = E mouse*] The leading genus of *Muridae*, typical of the subfamily *Murinae*. The term was formerly used with great latitude for the whole family and various other rodents. It is now restricted to species like the common house mouse, *Mus musculus*, the common rat, *M. domesticus*, the black rat, *M. rattus*, *M. apiculatus*, the wood mouse of Europe and *M. musculus*, the harvest mouse of the same continent. It still includes a great many species of mice and rats, all indigenous to the Old World. Also *Musculus*. See cut under *harvest mouse*.

Musa (mū'zā), *n* [*NL* (Plumier, 1703), prob *< Ar mūze*, banana] A genus of monocotyledonous plants, type of the order *Scitamineae* and the tribe *Musaeae*, known by its tubular calyx. There are about 20 species, natives of the tropics. They are herbs with thick smooth tree-like stems formed of sheathing petioles, rising 5 to 30 feet high from solid watery bulbs, with large oblong leaves from 4 to 20 feet long, and yellowish flowers in the axils of large ornamental bracts (often purplish), the whole forming a long nodding spike. *M. sapientum* is the banana. *M. paradisiaca* (perhaps not distinct from the former) is the plantain. *M. testacea* is the Manila hemp. The finest ornamental species is *M. Encke*, the Abyssinian banana. See cuts under *banana* and *plantain*.

Musca (mus'ka), *n* [*L*, = *Gr μῦς*, a fly see *midge*. Hence ult *mosquito*] 1 A genus of flies, or two-winged insects, founded by Linnaeus in 1763. Formerly applied to *Diptera* at large, and to sundry other insects, as many of the *Hymenoptera*, now the type of the family *Muscidae*, and restricted to such species as the common house fly *M. domestica*. As at present restricted, *Musca* is characterized by having the antennal bristle thickly feathered on both sides, the fourth longitudinal vein of the wings bent at an angle toward the third, and middle tibiae without any strong bristles or spurs on the inner side. In this sense it is not a very large genus having but 11 species in Europe and 5 in North America, two of the latter *M. domestica* and *M. cornuta*, being common to both continents. See cut under *house fly*.

2 [*l*] A fly or some similar insect. [In this sense there is a plural, *musca* (-sē)]—3 The Fly, a name given to the constellation also called *Apis*, the Bee. It is situated south of the Southern Cross and east of the Camelion, and contains one star of the third and three of the fourth magnitude. The name was also formerly given to a constellation situated north of *Aries*. *Muscae triplices*, an old name of the ichneumon flies so called from the three threads of the ovipositor. *Muscae vibrantes*, an old name of the ichneumon flies so called because they continually wave their antennae. *Muscae volitantes*, specks appearing to dance in the air before the eyes supposed to be due to opaque points in the vitreous humor of the eye.

The word intended is appar *Muscarium*, so called in ref to their globular heads, *< L muscarium*, a fly-brush, also an umbel, *< musca*, a fly.] A genus of ornamental plants of the order *Illiceae* and the tribe *Scilleae*, characterized by its globose or urn shaped flowers. About 40 species are known, natives of Europe, northern Africa, and western Asia. They bear a few narrow fleshy leaves from a coated bulb and leafless scapes with a raceme of nodding flowers, usually blue. They are closely akin to the true hyacinth. The species in general are called *grape* or *globe hyacinth*, especially *M. botryoides*, a common little garden flower of early spring, with a dense raceme of dark blue flowers like a minute grape cluster. It is now naturalized in the United States. *M. moschatum*, from its odor, is called *musk* (*grape hyacinth*).

Muscaria (mus-kā'ri-a), *n pl* [*NL*, *< L musca*, a fly see *Musca*] A tribe of brachycerous dipterous insects, containing those flies whose proboscis is usually terminated by a fleshy lobe, as in the house-fly now equivalent to *Muscida* in the widest sense.

See *ermine*, 5.

Muscheters

Musci (mus'si), *n* *pl* [(*NL*, *pl* of *L* *musca*, moss, see *moss*)] A large class of cryptogamous plants of the group *Muscinæ* or *Bryophyta*, the mosses. They are low tufted plants a few inches in height, always with a stem and distinct leaves, producing spore cases (sporangia) which usually open by a terminal lid and contain simple spores alone. The germinating spore gives rise in the typical families to a filamentous coniferous prothallium, upon which is produced the leafy plant, these together constituting the sexual generation or oöphyte. The sexual organs are antheridia and archegonia and from the fertilized oöosphere proceeds the sporogonium or "moss fruit" which in itself comprises the non sexual generation or sporophyte. The sporogonium or capsule which is rarely indurated or splitting by four longitudinal slits, usually opens by a lid or operculum beneath the operculum, and arising from the mouth of the capsule are commonly one or two rows of rigid processes collectively the peristome which are always some multiple of four, those of the outer row are called *teeth*, those of the inner, *edges*. Between the rim of the capsule and the operculum is an elastic ring of cells, the annulus. The *Musci* are classified under four orders: the *Bryaceæ* or true mosses (which are further divided into acrocarpous, or terminal fruited and pleurocarpous, or lateral fruited), *Phanaceæ*, *Andropogonaceæ*, and *Sphagnaceæ*. See (at under *moss*).

Muscicapa (mu-sik'a-pä), *n* [(*NL*, < *L* *musca*, fly, + *capere*, take)] A Linnæan genus of flycatchers. It was formerly of great extent and indiscriminate application to numerous small birds which capture insects on the wing but is now restricted to the most typical *Muscicapideæ* such as the black flycatcher, the spotted flycatcher, *M. griseola*, the white-collared flycatcher, *M. collaris*, etc. See (at under *flycatcher*).

Muscicapideæ (mus-i-kap'i-dē), *n* *pl* [(*NL*, < *Muscicapa* + *-ida*)] A family of Old World oscine passerine birds, typified by the restricted genus *Muscicapa*, the flycatchers. They are richly colored, mostly with brown, buff, and grey plumage, with a flattened bill, broad at the base with a ridged culmen and long rectal villi. Their characteristic habit is to capture insects on the wing. None are American, though many American flycatching birds of the setophagine division of *Sylviaceæ* and of the clamariform family *Tyrannidae* have been included in *Muscicapideæ*. Upward of 60 genera and nearly 400 species are placed in this family in its most restricted sense.

Muscicapinæ (mu-sik'a-pi'ne), *n* *pl* [(*NL*, < *Muscicapa* + *-ina*)] The flycatchers as a subfamily of *Muscicapideæ* or of some other family.

muscapine (mu-sik'a-pi'n), *a* Portaining in any way relating to the genus *Muscicapa*.

muscolole (mus'i-kol), *a* [(*L* *musculus*, moss, + *colere*, inhabit)] In *bot*, living upon decayed mosses or *Hepaticæ*, as certain lichens.

muscoline (mu-sik'o-lin), *a* [(*L* *musculus* + *-ine*)] Same as *muscolole*.

muscolous (mu-sik'o-lus), *a* [(*L* *musculus* + *-ous*)] Same as *muscolole*.

Muscidæ (mus'i-dē), *n* *pl* [(*NL*, < *Musca* + *-idæ*)] The representative and by far the largest family of the order *Diptera*, the flies. The limits and definition of the family vary widely. It is now commonly restricted to forms with short three-jointed antennæ, the third joint of which is setose, the proboscis is normally ending in a fleshy lobe and the pupil generally projecting five abdominal segments, two tarsal pulvilli, and no falcate vein in the wing. The *Muscidæ* comprise more than a third of the order *Diptera*, and are divided into numerous subfamilies which are regarded as families by some writers. They are principally divided into *Calyptrata* and *Acalyptrata* according as the tegulæ are large or very small.

musiform (mus'i-fōrm), *a* [(*NL* *musiformis*, < *L* *musca*, a fly, + *forma*, form)] Fly-like, resembling a common fly, or of pertaining to the *Musiformes*.

musiform (mus'i-fōrm), *a* [(*L* *musculus*, moss, + *forma*, form, shape)] In *bot*, same as *muscolole*.

Musiformes (mus-i-fōrm'es), *n* *pl* [(*NL*, *pl* of *musiformis*, see *musiform*)] A section of musciform *Tipulidæ*, containing those craneflies which resemble common flies, having a comparatively stout body and short legs.

Muscineæ (mu-si'nē), *n* *pl* [(*NL*, < *Musca* + *-inæ*)] A subfamily of *Muscidæ*, exemplified by the genus *Musca*, in which the antennal bristle is feathered to the tip, and the first posterior cell of the wing is much narrowed or closed.

Muscineæ (mu-sin'ē-ē), *n* *pl* [(*NL*, < *L* *musca*, moss, + *-in* + *-æ*)] A group of higher cryptogams, coördinate in rank with the *Thallophyta*, *Pteridophyta*, and *Phanerogamia*, and embracing the two classes *Musci* and *Hepaticæ* same as *Bryophyta*.

Musciphaga (mu-sif'a-gä), *n* [(*NL*, < *L* *musca*, a fly, + (*gr* *phagō*, eat)] A genus of flycatchers same as *Dumetia*.

Muscisaxicola (mus'i-sak-sik'ō-lä), *n* [(*NL*, < *Muscicapa* + *saxicola*)] A genus of clamariform flycatchers of the family *Tyrannidae*, founded by Lafrenaye in 1837 so called from some resemblance to chats. The species are numerous, all South American. *M. rufivertex* and *M. flutivertex* are examples.

muscite (mus'it), *n* [(*L* *musculus*, moss, + *-it*)] A fossil plant of the moss family, found in amber and certain fresh-water Tertiary strata. Page.

Muscivora (mu-siv'o-rä), *n* [(*NL*, < *L* *musca*, a fly, + *vorare*, devour)] A genus of South American crested flycatchers of the family *Tyrannidae*. It was established by Cuvier in 1799-1800, and was afterward called by him *Muscivora* the mouse-eater. There are several species, as *M. cristata* and *M. coronata*. The term has also been variously applied to other birds of the same family, as by G. R. Gray in 1840 to species of *Micropus*, and by Lesson to certain flycatching birds of a different family.

muscle (mus'l), *n* [Early mod. in length and dilating in breadth on the application of a proper stimulus, as the impulse of a motor nerve, or a shock of electricity, flesh, "lean meat." By such change of form, the muscles become the immediate means of motion of the different parts of the body, and of locomotion of the body as a whole.

2. A certain portion of muscle or muscular tissue, having definite position and relation with surrounding parts, and usually fixed at one or both ends.

Any one of the separate masses or bundles of muscular fibers constitutes a muscle, which as a whole and in its subdivisions is enveloped in fascial connective tissue and usually attached to the part to be moved by means of a tendon or sinew. Muscles are for the most part attached to bones, with the periosteum of which their tendons are directly continuous. The most extensive or most fixed attachment of a muscle is usually called its *origin*, the opposite end is its *insertion*. Individual muscles not only change their shape during contraction, but are of endlessly varied shapes when at rest, indicated by descriptive terms, as *conical*, *fusiform*, *penniform*, *digastric*, *deltoid*, etc. besides which each muscle has its specific name. Such names are given from the attachments of the muscle, as *sternocleidomastoid*, *omohyoid*, or from function, as *flexor extensor*, or from position, as *pectoral gluteal*, or from shape, as *deltoid*, *trapezoid*, or from some other quality or attribute, in an arbitrary manner. Circular muscles are those whose fibers return upon themselves, they constitute sphincters, as of the mouth, eyelids, and anus. The swelling part of a muscle is called its *belly*, when there are two such, separated by an intervening tendon, the muscle is *double bellied* or *digastric*. Muscles whose fibers are set obliquely upon an axial tendon are *penniform* or *bipenniform*. Muscles whose fibers are all parallel are called *simple* or *rectilinear*, those whose fibers intersect or cross each other are called *compound*. Muscles which act in opposition to one another are termed *antagonistic*, those which concur in the same action are termed *synergic*.

congenious Muscles subject to the will are *voluntary*, their fibers are striped, and they compose the great bulk of the muscular system. *Involuntary* muscles are not subject to the will, they are generally unstriped, though the heart is an exception to this. Hollow organs whose walls are notably muscular, as the heart, intestine, bladder, and womb, are called *hollow muscles*. Striped or voluntary muscle is sometimes called *muscle of animal life* as distinguished from unstriped involuntary *muscle of organic life*.

3 A part, organ, or tissue, of whatever histological character, which has the property of contractility, and is thus capable of motion in itself.—4 Figuratively, muscular strength, brawn—as, a man of *muscle*—**Active insufficiency of a muscle**. See *insufficiency*.—**Alary muscles**, in insects, delicate fan shaped muscles in the upper part of the abdomen, each pair uniting by the expanded portion below the dorsal vessel or heart collectively they have been called the *pericardial septum*. Their function appears to be to promote the circulation of the blood by altering the size of the pericardial cavity.—**Amatorial muscles**. See *amatorial*.—**Appendicular muscles**, those which belong to the appendicular skeleton muscles of the limbs.—**Artificial muscle**, an elastic band of caoutchouc worn to supply the place of or to supplement the action of some paralyzed or weakened muscle.—**Axial muscles**, those which belong to the axial skeleton, muscles of the trunk, including the head and tail.—**Canine, ciliary, dermal, etc. muscle**. See the adjectives.—**Grief-muscles**, a name given by Darwin to the orbicularis palpebrarum, corrugator supercilii, pyramidalis nasi, and central anterior parts of the occipitofrontalis muscles, which draw the features into an expression of grief.

Grimacing-muscle, the levator anguli oris one of the muscles of expression.—**Hilton's muscle** [After the anatomist Hilton] The lower aryepiglottic or inferior arytenoid epiglottidean muscle, called by Hilton *compressor sacculi laryngis*.—**Hornor's muscle** [After the anatomist Hornor] The tensor tarsi, a very small muscle at the inner side of the orbit, inserted into the tarsal cartilage of the eyelid.—**Hypaxial, hypopharyngeal, etc. muscles**. See the adjectives.—**Intercostal muscles**, two sets of muscles, the external and the internal, their fibers crossing each other obliquely, connecting the adjacent margins of the ribs throughout nearly their whole extent. They are concerned in the act of expiration.—**Kissing-muscle**, the orbicular muscle or sphincter of the mouth technically called the *orbicularis oris* *oculorum* and *buccinator*.—**Müller's palpebral muscle** [After H. M. Müller] A layer of smooth muscular fibers in the lid, inserted near the attached margin of the tarsus, and innervated through the cervical sympathetic.—**Muscles of deglutition, of mastication, etc.** See *deglutition*, *mastication*, etc.—**Orbicular, pyramidal, quadrate, etc. muscles**. See the adjectives.—**Snarling-muscle**, the levator labii superioris, as of the dog, which when it acts displays the teeth, as in snarling.—**Snoring-muscle**, the human levator labii superioris laqueus, which acts in the expression of snoring (for other muscles, see their special names).

muscle², *n*. See *muscle*.
muscle-band, *n*. See *muscle-band*.
musclebill (mus'1-lul), *n*. The surf-scooter, a duck, (*Fulmar perspicillata* G. Trumbull [Kennebunk, Maine]).
muscle-case (mus'1-kas), *n*. A muscle-compartment.
muscle-casket (mus'1-kas'ket), *n*. A muscle-compartment.
muscle-cell (mus'1-sel), *n*. A cell from which muscular tissue is derived, a myotome; a myocyte.

The connection with the muscle cells.

C. Claus, Zool. (trans.), p. 45

muscle-clot (mus'1-klot), *n*. The substance formed as a clot in the coagulation of muscle-plasm, myosin.

muscle-column (mus'1-kol'um), *n*. 1 A bundle of muscular fibers.—2 A muscle-prism.

muscle-compartment (mus'1-kom-part'ment), *n*. The prismatic space bounded at both ends by Krause's membrane (intermediate disk) and laterally by the longitudinal planes which mark out Cohnheim's areas. It is occupied by a muscle-prism. Also *muscle-case*, *muscle-casket*.

muscle-corpusele (mus'1-kör'pus-l), *n*. A muscle-nucleus, especially in a striated muscle.

muscle-current (mus'1-kur'ent), *n*. See *current*.

muscle (mus'ld), *a*. [*< muscle¹ + -ed²*] Having muscles or muscular tissue, muscled, used in composition, as, a strong-muscled man.
muscle-nucleus (mus'1-nū'kle-us), *n*. A nucleus of a muscle-fiber. In the striated muscles these are usually placed on the inner surface of the sarcolemma.

muscle-plasm (mus'1-plazm), *n*. The liquid expressed from muscle minced and mixed while living with snow and a little salt. It coagulates, forming a clot (myosin) and muscle-serum.

muscle-plate (mus'1-plät), *n*. A primitive segment of the mesoderm of an embryo destined to become a muscle or series of muscles, a myotome, myomere, or myotome. Also called *muscular plate*.

Most of the voluntary muscles of the body are developed from a series of portions of mesoderm which are termed the *muscle plates*. Quann, Anat., II 132.

muscle-plum (mus'1-plum), *n*. A dark-purple plum. Halliwell.

muscle-prism (mus'1-prizm), *n*. The prismatic mass of muscle-rods occupying a muscle-compartment.

muscle-reading (mus'1-rē'ding), *n*. The detection and interpretation of slight involuntary contractions of the muscles by a person whose hand is placed upon the subject of experimentation.

In the researches I made on *muscle-reading* it was shown over and over that by pure chance only the blind fold subject would, under certain conditions, find the object looked for in one case, and sometimes in two cases out of twelve. Proc. Soc. Psych. Research, 17.

muscle-rod (mus'1-rod), *n*. A segment of a muscle-hybrilla between two successive Krause's membranes (intermediate disks).

muscle-serum (mus'1-sē'rūm), *n*. The serum formed on the coagulation of muscle-plasm.

muscle-sugar (mus'1-shug'ar), *n*. Inosite.

muscling (mus'ling), *n*. [*< muscle¹ + -ing¹*] Exhibition or representation of the muscles.

A good picture, the painter says, must have good *muscling*, as well as colouring and drapery. Shaftsbury.

musoid (mus'koid), *a* and *n*. [*< L. muscus*, (see *moss*), *moss*, + *id* *ad*, form] 1 *a* In bot., moss-like, resembling moss. Also *musoid-form*.

2 *n*. One of the mosses, a moss like plant.

musculological (mus-kol'ō-jī-kal), *a*. [*< musculology + -ical*] Belonging or pertaining to musculology.

musculologist (mus-kol'ō-jīst), *n*. [*< musculology + -ist*] One skilled in the science of musculology, a myologist.

The tribe of Sphagnaceae, or Bog Mosses, is now represented by *Musculopsis* from true Mosses.

W. B. Carpenter, Micros. § 330.

musculology (mus-kol'ō-jī), *n*. [*< F. musculologie*, *< L. muscus*, *moss*, + *log* *ad*, *-λογία*, *< γίγναι*, speak, see *-ology*] The branch of botany that treats of mosses, also, a discourse or treatise on mosses. Also called *mycology*.

muscosity (mus-kos'ī-tī), *n*. [*< L. muscosus*, *mossy*, *< muscus*, *moss* (see *moss*), + *-ity*] *MON-NESS*.

muscovado (mus-kō-vā'dō), *n*. [Also *muscovada*, = *F. muscovade*, *muscovade*, *< Sp. muscovada*, *muscobada*, *muscobado*, *muscobadi*, for *azúcar muscovado*, inferior or unrefined sugar.] Unrefined sugar, the raw material from which loaf sugar and lump-sugar are produced by refining. Muscovado is obtained from the juice of the sugar cane by evaporation and draining off the liquid part called *molasses*.

Muscovite (mus'ko-vit), *n* and *a*. [Formerly also *Moscovite*. *< F. Moscovite*, now *Muscovite* = *Sp. Moscovita* = *D. Moskoviet* = *G. Moskoviter* = *Sw. Dan. Moskovit*, as *Muscovity* (ML. *Muscovia*), Russian (*< Russ. Moskova* (*> G. Moskau*, *F. Moscou*), *Moscow*), + *-ite²*] 1 *n*. A native or an inhabitant of Muscovy or the principality of Moscow, or, by extension, of Russia.—2 [*i. e.*] In *mineral*, common or potash mica (see *mica²*), a silicate of aluminum and potassium, with the latter element in part replaced by hydrogen, the light-colored mica, varying from nearly white to pale smoky brown, which is characteristic of granite, gneiss, and other related crystalline rocks, formerly called *Muscovy glass*. In granitic veins it sometimes occurs in plates of great size, and is often mined, as for example in western North Carolina. In thin plates it is used in stove windows, etc. When ground up it is used as a lubricator for giving a silvery sheen to wall paper, etc. Phenolite is a variety of muscovite, containing more silica than the common kinds. The name *hydrumena* or *hydrumene* is sometimes given to the varieties which yield considerable water on ignition. These usually have a pearly or silky luster and a talc-like feel, and are less elastic than the less hydrous kinds, *dumortieri*, *margaritiferi*, and *sericite* are here included. Fuchsite is a green colored variety of muscovite containing chromium. In 1857 the production of mica (muscovite) in the United States was about 70,000 pounds, valued at nearly \$150,000. 2,000 tons of mica waste, valued at \$15,000, were ground for use. (*Min. Resources of the U. S.*, 1887.)

3 [*i. e.*] The demon or Muscovite rat.
II. *a*. Of or pertaining to Muscovy, or Moscow, a former principality in central Russia, and the nucleus of the Russian empire, by extension, of or pertaining to Russia.
I have used the word *Muscovite* in the sense of "pertaining to the Tsardom of Muscovy," and *Moscovite* in the sense of "pertaining to the town of Moscow." D. M. Wallace, Russia, p. 420.

Muscovitic (mus-kō-vit'ik), *a*. [*< Muscovite + -ic*] Same as *Muscovite*.

Muscovy (mus'kō-vī), *n*; pl. *muscovies* (-vīz). [Short for *Muscovy duck* (see *musk-duck*)] 1 A Muscovy duck or musk-duck. See *duck²*, 1, and *musk-duck*, 1.
2 *Muscovy glass*. See *muscovite*, 2.

She were an excellent lady but that her face peeleth like *Muscovy glass*. Marston and Webster, Malcontent, I 3.

muscular (mus'ku-lar), *a*. [= *F. musculaire* = *Sp. Pg. muscular* = *It. musculare*, *muscolare*, *< NL. *muscularis*, of muscle, *< L. musculus*, muscle, see *musc¹*] 1 Of or pertaining in any way to muscle or muscles, composing, constituting, or consisting of muscle—as, the *muscular system*, *muscular origin* or *insertion*, *muscular fiber* or *tissue*.—2 Done by or dependent upon muscle or muscles—as, *muscular action*, *muscular movement*, *muscular strength*.—3 Well muscled, having well developed muscles, strong sinewy, brawny—as, a *muscular man*.—4 Figuratively, strong and vigorous.

No mind becomes *muscular* without ride and early exercise. Bulwer, My Novel, II 18.

Muscular Christianity. See *Christianity*. [The origin of this phrase has been generally attributed to Charles Kingsley, but he expressly repudiates it.]

We have heard much of late about "*Muscular Christianity*." A clever expression spoken in jest by I know not whom has been bandied about the world, and supposed by many to represent some new ideal of the Christian character. For myself I do not know what it means. Letters and Memoirs of Charles Kingsley, II 212.]

Muscular fascicle, fasciculus, or lacertus a bundle of a variable number of parallel muscular fibers. **Muscular fiber** (a) Muscular tissue, as composed of fibers. (b) One of the fibers of which muscular tissue is ultimately composed. **Muscular fibril, fibrillation**. See the nouns. **Muscular impression**, the mark of the insertion of a muscle as of an adductor muscle on the inner surface of a bivalve shell. See cut in *abductor*. **Muscular insertion**, one of the attachments of an individual muscle, generally that inserted in the smaller or more movable part.

Muscular motion, muscular movement, the motion or movement which results from the action of muscles.

Muscular plate. Same as *muscle plate*. **Muscular rheumatism**. Same as *myalgia*. **Muscular sensations**, feelings which accompany the action of the muscles. (James Mill, 1829.) By these knowledge is obtained of the condition of the muscles, and the extent to which they are contracted, of the position of various parts of the body and of the resistance offered by external bodies.

Muscular sense, muscular sensations or the capacity of experiencing them, especially considered as a means of information. **Muscular stomach**, a stomach with thick muscular walls, as the gizzard of a fowl, distinguished from the *glandular stomach* or *proventriculus*.

Muscular system, the total of the muscular tissue or sum of the individual muscles of the body. **Musculature** or *musculature*, regarded as a set of similar organs or system of like parts comparable to the *vascular system*, the *osseous system*, etc. **Muscular tissue**, the proper contractile substance of muscle, muscular fiber. It is of two kinds, striated or striped muscle and smooth. The former, of which all the ordinary muscles of the trunk and limbs and the heart are composed, consists of bundles

Striated Muscular Fiber, magnified about 250 diameters.

1 *a* Muscular fiber without its sarcolemma breaking up at one end into fibrils. 2 *a* Two separate fibrils. 3 *a* Muscular fiber for drawing up into a knot. 4 *a* Muscular fiber of which the contractile substance is formed into a knot while the sarcolemma (5) has not given way.

of fibers which present a striated appearance and are enveloped in and bound together by connective tissue which also supports the vessels and nerves of the muscle. Striated muscle fibers, except those of the heart, have an outer sheath of sarcolemma. Smooth muscular tissue consists of elongated band-like non-striated fibers, each with a rod-like nucleus. They do not break up into fibrils and have no sarcolemma. **Muscular tube**, in *schist*, a myelome. Syn 3 Sinews, stalwart, sturdy, lusty, vigorous, powerful.

muscularity (mus-kul-ar'ī-tī), *n*. [*< muscular + -ity*] The state, quality, or condition of being muscular.

muscularize (mus'ku-lar-ī-z), *v*, *t*, pret. and pp. *muscularized*, *muscularizing*. [*< muscular + -ize*] To make muscular or strong, develop muscular strength in. Lowell, Among my Books, 2d ser., p. 5.

muscularly (mus'ku-lar-ī-lī), *adv*. With muscular power, strongly, as regards muscular strength.

musculature (mus-kū-lā'shon), *n*. [= *F. musculature*, as *L. musculus*, muscle, + *-ation*] The

way or mode in which a part is provided with muscles, the number, kind, and disposition of the muscles of a part or organ

It is not by Touch, Taste, Hearing, Smelling, *Musculature*, etc., that we can explain astronomical, physical, chemical, and biological phenomena

G. H. Lewis, *Probs. of Life and Mind*, II 446.

-Syn. *Musculature*, *Musculature*. *Musculature* is more frequent in merely descriptive anatomy, with reference to the attachments or other topographical disposition of individual muscles. *Musculature* is the more comprehensive morphological or embryological term.

musculature (mus'ku-lū-jur), *n* [= Sp *musculatura*, as *L. musculus*, *muscule*, + *-ature*] The furnishing or providing of a living organism with muscles, or the method or means by which muscles are formed, also, the muscular tissue, system, or apparatus itself, considered with reference to its origin, development, and subsequent disposition, *musculature*

The musculature of the right side of the larynx is still free, and when acting, a crater like cavity is seen, lined with granulations *Lancet*, No 8486, p 12

Dermal musculature See *dermal* = **Syn.** See *musculature*

muscle (mus'kul), *n* [*L. musculus*, *muscule* see *muscule*¹] A muscle

musculi, *n* Plural of *musculus*, 1

musculine (mus'ku-lin), *n* [*L. musculus*, *muscule* (see *muscule*¹), + *-ine*²] The animal basis of muscle, the chemical substance of which muscle chiefly consists. See *muscle-plasma* and *myosin*

musculite (mus'kū-lit), *n* [*L. musculus*, *muscule* (see *muscule*¹), + *-ite*²] A fossil shell like a muscle or *Mytilus*, or supposed to be of that kind

musculocutaneous (mus'kū-lo-kū-tā-nō-us), *a* [*L. musculus*, *muscule*, + *cutis*, skin see *cutaneous*] Muscular and cutaneous specifically said of certain nerves which, after giving off motor branches to muscles, terminate in the skin as sensory nerves. The superior and inferior musculocutaneous nerves of the abdomen are two branches of the lumbar plexus, more frequently called the *thyrogyastric* and *thyrogastric* (see these words). The musculocutaneous nerve in the arm is a large branch of the brachial plexus, which supplies the coracobrachialis and biceps muscles and in part the brachialis anticus, and then ramifies in the skin of the forearm. That of the leg is one of two main branches of the external popliteal or peroneal nerve, which supplies the peroneal muscles and then ramifies in the skin of the lower leg and foot.

musculopallial (mus'kū-lō-pāl'i-āl), *a* [*L. musculus*, *muscule*, + *NL. pallium* see *pallid*] Supplying or distributed to muscles and to the mantle or pallium of a mollusk specifically applied to the outer of two nerves given off from the visceral ganglion, the other being the *splanchnic* nerve *Trans Roy Soc Edin*, XXXII 628

musculophrenic (mus'kū-lō-frē-nik), *a* [*L. musculus*, *muscule*, + *Gr. φρήν*, diaphragm] Pertaining to the muscular tissue of the diaphragm specifically applied to a terminal branch of the internal mammary artery, which supplies the diaphragm and lower intercostal muscles

musculosity (mus'ku-lō-si-ti), *n* [= *F. musculosité*, *L.* as if **musculosita(-t-)*, *L. musculosus*, *musculous* see *musculous*] The quality of being muscular, *musculosity*

musculospiral (mus'kū-lō-spi-rāl), *a* [*L. musculus*, *muscule*, + *spira*, *spira* see *spirally*] Innermost of a muscle and winding spirally around a bone specifically applied to the largest branch of the brachial plexus, which winds around the humerus in company with the superior profunda artery, and supplies the muscles of the back part of the arm and forearm and the skin of the same part

musculous (mus'kū-lus), *a* [= *F. musculous* = Sp *musculoso* = *It. muscoloso*, *musculoso*, *L. musculosus*, *muscular*, *fleshy*, *L. musculatus*, *a muscle* see *muscule*¹] 1 Pertaining to a muscle or to muscles

The uvula coat or iris of the eye hath a *musculous* power, and can dilate and contract that round hole in it called the pupil or sight of the eye *Ray*, *Works of Creation*, II

2 Full of muscles, hence, strong, sinewy [Obsolescent]

He had a tongue so *musculous* and subtle that he could twist it up into his nose *Swift*, *Tale of a Tub*, XI

musculus (mus'kū-lus), *n* [*L.* see *muscule*¹] 1 Pl *musculi* (-li) In *anat.*, a muscle. Muscles were all formerly named in Latin, *musculus* being expressed or implied in their names, but few retain this designation, though the Latin form of the qualifying word or words may remain, as *pectoralis gluteus* etc.

2 [cap.] In *zool.* (a) A genus of mice, of which *Mus musculus* is the type same as *Mus Rappinque*, 1818 (b) A term in use among the conchologists of the seventeenth and eighteenth centuries for various bivalve shells, as

Panopæa, *Umonda*, *Cyrenoda*, *Mytiloda*, etc. (c) A genus of brachiopods of the family *Terebratulida* *Quenstedt*, 1871

OSp. musar* = *It. musare*), ponder, muse, dream, *F. loiter*, trifle, dawdle, origin uncertain, prob. same as *It. musari*, mutter, mumble, *F. dial* (Walloon) *muser*, hum, buzz, *< ML. musare*, *musare*, *L. musare*, murmur, mutter, be in uncertainty, cf. *Norw. musa*, *mussa*, *myssa*, mutter, whisper, *Gr. μύσσειν*, mutter, ult, like *mum*, mumble, mutter, etc., imitative of a low indistinct sound. Another etymology (Diez, Skeat) rests on *It. musari*, 'gape about,' explained as orig. 'sniff as a dog' (cf. *F. musier*, begin to rut), *< OF. *mus* (= *It. muso*), the mouth, *muzzle*, snout (whence *dim. musci*, *movi*, *> ME. mosel*, *> E. muzzle*), *< L. morsus*, bite, *ML.* also *muzzle*, snout, beak see *muzzle*, *morce*² For the change of *L. morsus* to *OF. *mus* (*mus*), cf. *OF. jus*, *< L. deorsum*, *OF. sus*, *< L. deorsum*. But the *Pr. OSp.* and *It.* forms, in this view must be borrowed from the *OF.*, a thing in itself highly improbable at a date so early, and sufficient, with the improbability of such a transfer of notions, to disprove this explanation. In another view, also improbable, the word is *< OIG. muosen*, be idle, *muosa*, *G. musci*, idleness, leisure. Hence *amusci*] 1 *intr.* 1 To ponder, meditate, reflect continuously and in silence, be in a brown study

In *Gr. myth.*, one of the daughters of Zeus and Mnemosyne, who according to the earliest writers were goddesses of memory, then inspiring goddesses of song, and according to later ideas divinities presiding over the different kinds of poetry, and over the sciences and arts, while at the same time having as their especial province springs and limpid streams. Their number appears in the Homeric poems not to be fixed, later it seems to have been put at three, but afterward they are always spoken of as nine. *Clio*, the Muse of heroic exploits, or of history, *Euterpe*, of Dionysiac music and the double flute, *Thalia*, of gaiety, pastoral life, and comedy, *Melpomene*, of song and harmony, and of tragedy, *Terpsichore*, of choral dance and song, *Erato*, of erotic poetry and the lyre, *Polyhymnia* or *Polyhymnia*, of the inspired and stately hymn, *Urania*, of astronomical and other celestial phenomena, and *Calliope*, the chief of the Muses, of poetic inspiration, of eloquence, and of heroic or epic poetry. The Muses were intimately associated in legend and in art with Apollo, who, as the chief guardian and leader of their company, was called *Musagetes*.

In this city [Cremona] did that famous Poet [Virgil] consecrate himself to the *Muses* *Coryat*, (trudition, I 140) Hence—2 [cap. or l. c.] An inspiring power, poetic inspiration often spoken of and apostrophized by poets as a goddess

3 Pertaining to the performance or the notation of music — 4 Fond of music, discriminating with regard to music as, the child is musical, or has a musical ear. — 5. Amusing, ridiculous [*Slang*, New Eng.]. — **Musical box,** a mechanical musical instrument, consisting essentially of a barrel or cylinder, caused to revolve by clockwork, in the surface of which are small pegs or pins, so arranged as to catch and twang the teeth of a kind of steel comb. These teeth are graduated in size, and carefully tuned, and the disposition of the pins is such as to sound them in perfect melodic succession and rhythm, so that even very elaborate music may be faithfully reproduced. The position of the barrel may usually be slightly shifted from side to side, so that more than one tune can be played from the same barrel, and sometimes more than one barrel is provided for the same box, so that an extensive repertoire is possible. Occasionally small bells or even small reeds blown by a bellows as in the hand organ, are added to increase the resources of the instrument. The effects produced are often very pleasing and varied. — **Musical characters.** See *character*. **Musical clock,** a clock to which a musical box or barrel organ is so attached as to play tunes at certain periods. **Musical condenser,** a condenser to the terminal plates of which the wires from a telephone transmitter are attached. pounded mustard-seed mixed with must or vinegar, *< OF* *moust*, *< L* *mustum*, must see *must*²] 1 A plant of the genus *Brassica*, formerly classed as *Sinapis*. The ordinary species are *B. nigra*, the black mustard, *B. alba*, the white mustard, and *B. sinapis*, the wild mustard or charlock. The black and white mustards are largely cultivated in Europe and America for the seed (see def. 2). *B. juncea*, the Indian mustard, is used for the same purposes. The seed of the charlock is inferior, but yields a good burning oil. All the species mentioned yield oils fit for lamps or for use as food, and, in Asia especially, the Indian and various other sorts are raised in large quantities for the sake of this product. The leaves of various mustards form excellent antiseptic salad. (See *Brassica* and *charlock*). The tree which grew from "a grain of mustard seed," mentioned in Luke xlii 19, was probably the true mustard, *Brassica nigra*, which attains in Palestine a height of 10 or even 15 feet, according to Royle and others; the tree meant in *Salvadora Persica*, a small tree bearing minute berries with pungent seeds which bear the same name in Arabic as mustard.

2 The seed of mustard crushed and sifted (and often adulterated), used in the form of a paste as a condiment, or, in the form of a poultice (sinapism), plaster, or prepared paper (mustard-paper), as a rubefacient.

Mustela (mus-tē-lä), *n* [NL, *< L* *mustela*, also *mustella*, a weasel, also a fish so called, *< mus*, a mouse, = Gr *μῦς*, mouse see *mouse*] The typical genus of *Mustelidae*, formerly nearly coextensive with the family, but now restricted, the marten and subgenus. The species are of medium and rather large size, with moderately stout form, sharp curved claws, tail longer than the head, bushy, erect, or tapering, setae furry with naked pads, pelage full and soft but not shaggy, and not whitening in winter, progression digitigrade and habits arboreal and terrestrial, not fossorial or aquatic. There are 38 teeth, or 4 more than in *Procyon*, and the lower sectorial tooth usually has an additional cusp. The leading species are the marten or pine marten, *M. martes* or *abelem*, the beech, stone, or white breasted marten, *M. faina* the Russian sable, *M. zibellina*, the American sable, *M. americana*, and the fisher, pekan, or Pennant's marten, *M. pennanti*. Mustelidae¹ (mus-tel'i-dē), *n* pl [NL, *< Mustela* + *-idae*] A family of arectoid furred carnivorous quadrupeds of the order *Fera*, suborder *Fissipedia*, and series *Arctoidea*, typified by the genus *Mustela*, having only one true molar in the upper jaw, and one or two in the lower jaw, with the last upper premolar normally sectorial. The family is represented in most parts of the globe except the Australian region, and reaches its highest development in the northern hemisphere. There are about 20 genera, representing 8 subfamilies: *Mustelinae*, *Martinae*, *Weasellinae*, *Mellivorinae*, *Ratelinae*, *Melinae*, *Badgerinae*, *Skunkinae*, *Zorilinae*, *African skunks*, *Mephitinae*, *American skunks*, *Lutrinae*, *otters*, and *Enhydryninae* sea-otters. See cuts under *marten*, *badger*, *hedgehog*, *skunk*, *Enhydra*, and *otter*

Mustelidae² (mus-tel'i-dē), *n* pl [NL, *< Mustela* + *-idae*] A family of sharks, typified by the genus *Mustelus*, having a nictitating membrane, and the small teeth frequently so set as to form a kind of pavement. The group is now commonly regarded as a subfamily of *Galeorhinidae* or *Carcharidae*. See cuts under *Galeorhinus* and *Carcharias*

Mustelinae¹ (mus-tē-li-nä), *n* pl. [NL, *< Mustela* + *-inae*] The leading subfamily of *Mustelidae*, typified by the genus *Mustela*. The teeth are 38 or 34, according to the number of premolars, and of unequal numbers in the two jaws. The upper molar is single on each side and of much greater width than length, or with the longest axis transverse. The back upper premolar is the large sectorial tooth, the first lower molar is sectorial, followed by a tubercular molar. The postorbital process is moderately developed, the anteorbital foramen is small. The bony palate is produced far back of the molars, the posterior nares are thrown into one, and the auditory bullae are much inflated. The feet have bent phalanges and retractile claws, the digits are slightly or not at all webbed, and progression is digitigrade or subplantigrade. The external appearance and the economy of the species are very variable, for they range from the smallest and most slender of weasels to the great, stout, shaggy wolverene. There are 4 leading genera: *Gulo*, *Galeus*, *Mustela*, and *Putorius*, or the wolverene, grison, marten, and weasels. See cuts under *wolverene*, *grison*, *galera*, and *marten*.

Mustelinae² (mus-tē-li-nä), *n* pl [NL, *< Mustelus* + *-inae*] A subfamily of sharks of the family *Galeorhinidae* or *Carcharidae*, corresponding to *Mustelidae*². It contains the common spineless dogfishes of Europe and North America and some other related small sharks.

mya (mī'a), *n*. Plural of *myon*

mya (mī'a), *n*. See *myon*, *myo*

Myacea, **Myacae** (mī-sē'sē-ā, -ē), *n* pl. [NL, (Menke, 1840), < *Mya* + *-acea*, *-acae*] 1 A family of bivalves same as *Myida* — 2 A superfamily or suborder of bivalves constituted for the families *Myida*, *Corbulidae*, *Saxicardidae*, and related types

Myadæ (mī'a-dē), *n* pl. [NL, < *Mya* 1 + *-adæ*] In *conch* (a) In earlier systems, a group of bivalve shells, or siphonate lamelibranchiate mollusks, related to the cob or clam *Mya*, including numerous genera, such as *Tritona*, *Anatina*, *Lutaria*, *Pandora*, etc., now separated into different families. (b) Same as *Myida*

myalgia (mi-al'jā), *n*. [NL, < Gr *μυα*, muscle, + *αλγος*, pain] 1 In *pathol.*, a morbid state of a muscle, characterized by pain and tenderness. Its pathology is obscure. Also called *myodinia* and *muscular rheumatism*. **Myalgia lumbalis**, lumbago

myalgic (mi-al'jik), *a*. [< *myalgia* + *-ic*] Of or pertaining to myalgia, affected with myalgia. *Quinn*, *Med. Diet.*, p. 1212

myall, **myall-tree** (mī'al-trē), *n*. One of several Australian acacias, affording a hard and useful scented wood. The Victorian myall is *Acacia homalophylla*. It has a dark brown wood, sought for turners work, and used particularly for tobacco pipes from its fragrance the wood is sometimes called *red wood*. Another myall is *A. acuminata* of western Australia, its wood scented like raspberry, and making durable posts and excellent charcoal. Others are *A. pendula* and *A. glaucocarpa*, the latter profitably grained but less fragrant.

Myaria (mī-a'ri-ā), *n* pl. [NL, see *Mya* 1] A family of bivalves same as *Myida* in its more comprehensive sense [Formerly in general use, but now abandoned]

myarian (mī-a'ri-an), *a* and *n*. [< *Myaria* + *-an*] 1 A pertaining to or resembling a clam, or of pertaining to the *Myaria*

II *n*. A clam, or some similar bivalve

myasthenia (mī-as-the-nī'a), *n*. [< Gr *μυα*, muscle, + *ασθένεια*, weakness see *asthenia*] Muscular debility

myasthenic (mī-as-the-nī'k), *a*. Affected with myasthenia

mycete, *n*. See *mych*

mycele (mī-sē'l), *n*. [< NL *mycelium*] Same as *mycelium*

mycelial (mī-sē'l-i-al), *a*. [< *mycelium* + *-al*] Of or pertaining to mycelium — **mycelial layer** Same as *membranous mycelium* — **mycelial strand** Same as *fibrous mycelium*

mycelioid (mī-sē'l-i-oid), *a*. [< NL *mycelium* + *-oid*] In *bot.*, resembling a mushroom

mycelium (mī-sē'l-i-um), *n*. [NL, < Gr *μυκη*, a fungus, + *γλος*, nail, wart, an excrescence on a plant] The vegetative part of the thallus of fungi, composed of one or more hyphae. The vegetative system of fungi consists of filiform branched or unbranched cells called *hyphae*, and the hyphae collectively form the *mycelium*. Also *mycele*. See *under Fungi*, *mold*, *mildew*, *ergot*, and *haustorium* — **Fibrillose mycelium** Same as *fibrous mycelium* — **Fibrous mycelium**, mycelium in which the hyphae form, by their union, elongated branching strands — **Filamentous mycelium**, mycelium of free hyphae which are at most loosely interwoven with one another, but without forming bodies of definite shape and outline. *De Bary* — **Floccose mycelium**.

Same as *filamentous mycelium*. — **Membranous mycelium** See *membranous*

Mycetales (mī-sē-tā'lēz), *n* pl. [NL, (Berkeley, 1857), < *Mycetes* 2] A former division of cryptogamous plants, including fungi and lichens

Mycetes (mī-sē'tēz), *n*. [NL, < Gr *μυκη*, a bellow, < *μικαθαι*, bellow, cf. L. *muqui*, bellow see *mugent*] The typical and only genus of *Mycetinae*, established by Illiger in 1811, the howlers a synonym of *Alouatta* of prior date. There are several species, as *M. uranusa*, inhabiting the forests of tropical America from Guatemala to Paraguay. See *cut* under *howler*

Mycetes (mī-sē'tēz), *n* pl. [NL, < (Gr *μυκη*, pl. of *μυκη*, a fungus, mushroom)] The plants now called *fungi* a term proposed by Sprengel

Mycetinae (mī-sē-tī-nē), *n* pl. [NL, < *Mycetes* 1 + *-ina*] A subfamily of *Cebidae*, represented by the genus *Mycetes*, the howling monkeys, howlers, or alouates. They are platyrrhine monkeys of tropical America having the cerebrum so short that it leaves the cerebellum exposed behind the hindbrain, vertical and the hyoid bone and larynx enormously developed, the former being expanded and excavated into a hollow drum, a conformation which gives extraordinary strength and resonance of voice. They are the largest of American monkeys, nearly 3 feet in length of head and body, including legs, with long prehensile tail and non appposable thumb

mycetogenetic (mī-sē'tō-jē-net'ik), *a*. In *bot.*, produced by fungi

Phenomena of deformation by fungi may be termed *mycetogenetic* in *limnophiles*. *De Bary*, *Fungi* (trans.), p. 908

mycetogenous (mī-sē'tō-jē-nūs), *a*. [< (Gr *μυκη*, a fungus, + *-γενος*, producing see *-genesis*] Same as *mycetogenetic*

mycetology (mī-sē'tō-lō-jē), *n*. [< (Gr *μυκη*, a fungus, + *-λογία*, < *λόγος*, speak see *-ology*] The science of fungi same as *mycology*

mycetoma (mī-sē-tō'mā), *n*. [NL, < Gr *μυκη*, a fungus, + *-oma*] 1 A chronic disease of the feet and hands occurring in Hindustan. The foot (or hand) becomes riddled with sinuses which discharge pale yellow masses of minute bodies resembling fish roe (pale or ochroid form of mycetoma), or dark masses resembling gunpowder (dark or melanoid form). In the latter the fungus *Chromyces* (Carter) has been found. The disease lasts for decades, and the only relief seems to be in the amputation of the affected member. Also called *Madura foot*, *Madura disease*, *fungus disease*, and *fungus foot of India*

2 [cap.] In *entom.*, a genus of coleopterous insects

mycetophagid (mī-sē-tof'a-jid), *a* and *n*. **I.** *a*. Of or relating to the *Mycetophagida*

II *n*. One of the *Mycetophagida*

Mycetophagidæ (mī-sē-tof'a-jī-dē), *n* pl. [NL, < *Mycetophagus* + *-idæ*] A family of clavicorn *Coloptera*, typified by the genus *Mycetophagus*. They have the dorsal segments of the abdomen partly membranous the ventral segments free, the tarsal four jointed the wings not fringed with hair, the anterior coxae oval and separated by the corneous pronotum, the head free, and the body depressed. The species live in fungi and under the bark of trees. The family is small, but of wide distribution containing about 10 genera and less than 100 species. The beetles of this family are sometimes distinguished as *heavy fungus beetles* from the *Erotylidae*, in which case the latter are called *smooth fungus beetles*

mycetophagous (mī-sē-tof'a-gūs), *a*. [< NL *Mycetophagus*, < (Gr *μυκη*, a fungus, + *φαγος*, eat)] Feeding on fungi, fungivorous

Mycetophagus (mī-sē-tof'a-gūs), *n*. [NL, (Heller, 1792) see *mycetophagous*] The typical genus of *Mycetophagidæ*. About 90 species are known all feed on fungi. 12 inhabit North America, and the rest are found in temperate Europe

Mycetophila (mī-sē-tof'i-lā), *n*. [NL, < (Gr *μυκη*, a fungus, + *φίλος*, loving)] 1 The typical genus of *Mycetophagidæ*, founded by Mogen in 1803. The larvae live in fungi and decaying wood. The genus is large and wide spread, over 100 species are European, and 20 are described from North America. Also *Mycetophila*, *Mycetophila*

2 A genus of tenebrionine beetles, erected by Gyllenhal in 1810, and comprising a number of European and North American species, 14 of which inhabit the United States. The genus is the same as *Mycetochorus* of Latreille, 1825, and the latter name is commonly used, *Mycetophila* being preoccupied in *Diptera*

Mycetophilidæ (mī-sē-tō-fil'i-dē), *n* pl. [NL, < *Mycetophila* + *-idæ*] A family of nemocerous dipterous insects, typified by the genus *Mycetophila*, the agaric-gnats, fungus-gnats, or fungus-midges. There are many hundred species, of small or minute size, agile and saltatorial, having few veined wings without diacal cell, long coxae, spurred tibia, and usually ocelli. The larvae are long slender grubs, like worms, and feed on fungi, whence the name. Also *Mycetophilidae*, *Mycetophilinae*, *Mycetophilinæ*

Mycetozoa (mī-sē-tō-zō'a), *n* pl. [NL, pl. of *mycetozoon*] A group of fungus-like organisms,

amounting at the present time to nearly 300 species. The larger number of them are contained in the division *Myxomycetes*, or slime fungi, together with the smaller one distinguished by Van Tieghem under the name of *Acerulea* (De Bary). Their nutrition is saprophytic, and the organs of reproduction are sufficiently like those of fungi to allow the same terminology to be applied to them. The vegetative body, however, differs widely, being a naked protoplasmic mass. See *Myxomycetes*.

mycetozoon (mī-sē-tō-zō'on), *n* [NL, < Gr. *μύκη* (*mykē*), a fungus, + *ζῷον* (*zōion*), animal] Any member of the *Mycetozoa*.

The naked protoplasm of the *Mycetozoon's* plasmodium. *Encyc Brit*, XIX, 832.

mycoderm (mī'kō-dērm), *n* [*< Mycodermis*, *q v*] A fungus of the genus *Mycodermis*.

Mycoderma (mī-kō-dēr'mā), *n* [NL, < Gr. *μύκη*, a fungus, + *δέρμα*, skin see *derm*] A genus or form-genus under which certain of the fermentation-fungi are known. See *fermentation*, and *mother*², 2.

mycodermatoid (mī-kō-dēr'ma-toid), *a* [*< Mycodermis* + *-oid*] Same as *mycodermis*.

mycodermic (mī-kō-dēr'mik), *a* [*< Mycodermis* + *-ic*] Of or pertaining to the genus *Mycoderma*.

mycodermatitis (mī'kō-dēr-mī'tis), *n* [NL, < Gr. *μύκη*, fungus, + *δέρμα*, skin, + *-itis*] Inflammation of a mucous membrane.

mycologic (mī-kō-lōj'ik), *a* [*< mycology* + *-ic*] Same as *mycological*.

mycological (mī-kō-lōj'ikal), *a* [*< mycology* + *-al*] Relating to mycology, or to the fungi.

mycologically (mī-kō-lōj'ikal-ly), *adv* In a mycological manner, from a mycological point of view.

mycologist (mī-kol'ō-jist), *n* [*< mycology* + *-ist*] One who is versed in mycology.

mycology (mī-kol'ō-jī), *n* [= F. *mycologie*, < Gr. *μύκη*, a fungus, + *λογία*, *lógos*, speak see *-ology*] The science of fungi, their structure, affinities, classification, etc. Also called *fungology* and *mycetology*.

mycophagist (mī-kof'a-jist), *n* [*< mycophagy* + *-ist*] One who eats fungi.

mycophagy (mī kof'a-jī), *n* [*< Gr. μίκτης*, a fungus, + *-φαγία*, *phagía*, eat] The eating of fungi.

The divine art of *mycophagy* reached a good degree of cultivation. *Pop Sci Mo*, XXXIV, 408.

mycoprotein (mī-kō-prō'tē-in), *n* [*< Gr. μύκη*, a fungus, + F. *protéine*] A gelatinous albuminoid compound closely allied to protoplasm, of which the putrefaction-bacteria are composed.

The bacteria consist of a nitrogenous, highly refractive, usually colorless substance, protoplasm or *mycoprotein*, imbedded in which glistening, oily looking granules can sometimes be observed.

W. T. Heddle, *Relations of Micro Organisms to Disease*, p. 5.

Mycorrhiza (mī-kō-rī'zhā), *n* [*< Gr. μύκη*, a fungus, + *ρίζα*, root] A fungus-mycelium which invests the roots of certain phanerogams, especially *Umbellifera* and some other forest-trees. It is believed to aid them in absorbing nutriment from the soil—a case of symbiosis. See *symbiosis*.

mycose (mī'kōs), *n* [*< Gr. μύκη*, a fungus, + *-ωσις*] A peculiar kind of sugar (C₁₂H₂₂O₁₁ + 2H₂O) contained in the ergot of rye, and also in trehalumanna, produced by a species of insect (*Tritonus*) found in the East. It is soluble in water, does not reduce copper solutions, and is converted by acids into a fermentable sugar. Also called *trehalose*.

mycosis (mī-kō'sis), *n* [NL, < Gr. *μύκη*, a fungus, + *-ωσις*] 1 The presence of fungi as parasites in or on any portion of the body—2 The presence of parasitic fungi together with the morbid effects of their presence, the disease caused by them.

mycotic (mī-kot'ik), *a* [*< mycosis* + *-ic*] Of or pertaining to mycosis. *Lancet*.

Mycteria (mīk'tē-ri-ā), *n* [NL, < Gr. *μυκτήρ*, nose, snout, < *μύσσειν* (*myssein*), to blow the nose, cf. *μύσσειν*, blow the nose see *myctus*] A genus of storks, of the family *Ciconiidae* and the subfamily *Ciconiinae*, having the head and neck mostly bare of feathers, and the bill enormously large and recurved. *M. americana* is the jabiru. Certain Old World storks are sometimes included in *Mycteria* sometimes called *Xenorhynchus* and *Ephippiorhynchus*. See cut under *jabiru*.

mydaleine (mī-dā'lē-in), *n* [*< Gr. μύδαλος*, wet, dripping, < *μύδα*, be damp or wet see *Mydas*] A poisonous ptomaine obtained from putrefying liver and other organs.

Mydas, *n* See *Mydas*².

Mydasidae (mī-das'i-dē), *n pl* Same as *Mydidae*, 2.

Mydas (mīd'ā-us), *n* [NL, irreg. < Gr. *μύδα*, be damp or wet, < *μύδος*, damp, wet, clamminess, decay.] A genus of fetid badgers, of the family *Mustelidae* and subfamily *Melinae*, including the stinking badger of Java, or Javanese skunk, *M. javanensis* or *M. meliceps*. See *teledu*.

mydding, *n* An obsolete spelling of *midding*.

mydget, *n* An obsolete spelling of *midge*.

mydriasis (mī-dri'a-sis), *n* [L, < Gr. *μυδρίασις*, undue enlargement of the pupil of the eye] In *med*, a morbid dilatation of the pupil of the eye.

mydriatic (mīd-ri-at'ik), *a* and *n*. [*< mydri-* (*mydri*) + *-atic*²] 1. *a* Pertaining to or causing mydriasis.

2. *n* A drug which causes mydriasis.

myelasthenia (mī-el-as-thē-nī'ā), *n* [NL, < Gr. *μυελός*, marrow, + *ασθένεια*, weakness see *asthenia*] In *pathol*, spinal exhaustion, spinal neurasthenia.

myelatrophia (mī-el-a-trō'fī-ā), *n* [NL, < Gr. *μυελός*, marrow, + *ατροφία*, atrophy see *atrophy*] In *pathol*, atrophy of the spinal cord.

Myelencephala (mī'el-on-sēf'a-lā), *n pl* [NL, neut. pl. of *myelencephalus* see *myelencephalus*] In Owen's classification, same as *Vertebrata*. [Not in use.]

myelencephalic (mī-el-en-sēf'al'ik or -sēf'a-l'ik), *a* [*< myelencephalus* + *-ic*] 1. Of or pertaining to the cerebrospinal axis, cerebrospinal—2 Of or pertaining to the modulla oblongata. See *myelencephalon*—3 Same as *myelencephalus*.

myelencephalon (mī'el-en-sēf'a-lon), *n* [NL, < Gr. *μυελός*, marrow, + *εγκεφαλος*, brain see *encephalon*] 1 The cerebrospinal axis, the brain and spinal cord taken together and considered as a whole. *Owen*—2 The hindmost segment of the encephalon, the afterbrain or metencephalon, more commonly called the medulla oblongata. See cuts under *encephalon* and *brain*. *Huxley*.

myelencephalous (mī'el-en-sēf'a-lus), *a* [*< NL, myelencephalus*, < Gr. *μυελός*, marrow, + *εγκεφαλος*, brain see *encephalon*] Having a brain and spinal cord, cerebrospinal. Also *myelencephalus*.

myelin, **myeline** (mī'e-līn), *n* [*< Gr. μυελός*, marrow, + *-ιν*, *-in*²] In *anat*, the white substance of Schwann, or medullary sheath of a nerve.

myelitic (mī'e-lī'tik), *a* [*< myelitis* + *-ic*] Of or pertaining to myelitis, affected with myelitis.

myelitis (mī'e-lī'tis), *n* [NL, < Gr. *μυελός*, marrow, + *-itis*] In *pathol*, inflammation of the spinal cord—*Anterior* or *corneal* myelitis. See *corneal*.

myelocoele (mī'e-lō-sēl), *n* [*< Gr. μυελός*, marrow, + *κύημα*, tumor] A variety of spina bifida.

myelocerebellar (mī'e-lō-sēr-ē-bel'ār), *a* [*< Gr. μυελός*, marrow, + *L. cerebellum*, cerebellum see *cerebellar*] Pertaining to the cerebellum and the spinal cord as, the *myelocerebellar* tract.

myelocoele (mī'e-lō-sēl), *n* [NL, < Gr. *μυελός*, marrow, + *κύημα*, hollow] The entire cavity of the myelon or spinal cord, consisting primitively of a syringocoele with a posterior dilatation termed rhombocoele. See cut under *spinal*.

myelocyte (mī'e-lō-sit), *n* [*< Gr. μυελός*, marrow, + *κύτος*, cell] Same as *myocyte*. *Nature*, XLII, 72.

myelohyphae (mī'el-ō-hī'fā), *n pl* [NL, prop. **myelohypha*, < Gr. *μυελός*, marrow, + *ὑφή*, web see *hypha*] The hyphae of lichens, which are rigid, elastic, containing lechenine, not becoming putrid by maceration, with no faculty of penetrating or involving, while the hyphae of fungi are caducous, soft, flexible, with thin walls, etc.

myeloid (mī'e-lōid), *a* [= F. *myéloïde*, < Gr. **myeloidēs*, contr. *myelōdēs*, like marrow, < *μυελός*, marrow, + *ειδός*, form] Medullary.

myeloma (mī'e-lō'mā), *n*, *pl myelomata* (-ma-tā) [NL, < Gr. *μυελός*, marrow, + *-oma*] A giant-celled sarcoma.

myelomalacia (mī'e-lō-ma-lā'si-ā), *n* [NL, < Gr. *μυελός*, marrow, + *μαλακία*, softness see *malacia*] In *pathol*, softening of the spinal cord.

myelomeningitis (mī'e-lō-men-in-jī'tis), *n* [NL, < Gr. *μυελός*, marrow, + *NL. meningitis*, *q v*] In *pathol*, spinal meningitis.

myelon (mī'e-lon), *n* [NL, < Gr. *μυελός*, neut. earlier *μυελός*, m, marrow] The spinal cord, the part of the cerebrospinal axis which is not the brain. See cuts under *spine*, *spinal*, and *Pharyngobranchii*.

myelonal (mī'e-lon-al), *a*. [*< myelon* + *-al*] Of or pertaining to the myelon.

myelonic (mī'e-lon'ik), *a*. [*< myelon* + *-ic*] Same as *myelonal*. *Encyc Brit*, XVI, 680.

myeloplax (mī'e-lō-plaks), *n*. [*< Gr. μυελός*, marrow, + *πλάξ*, anything flat and broad] A large multinucleated protoplasmic mass, occurring in the marrow, especially in the neighborhood of the osseous substance. These masses, also called *osteoclasts* or *giant cells*, are concerned in the process of bone-absorption.

Myelozoa (mī'e-lō-zō'ā), *n. pl* [NL (Geoffroy St. Hilaire, 1852), < Gr. *μυελός*, marrow, + *ζῷον*, an animal] A class of vertebrate animals with a spinal cord or myelon, but no brain or skull. They are the acranial or acephalous vertebrates, represented by the lancelet or amphioxus. See cuts under *lancelet*.

myelozoan (mī'e-lō-zō'an), *a* and *n*. 1. *a* Of or pertaining to the *Myelozoa*.

2. *n*. A member of the *Myelozoa*.

Mygale (mīg'a-lē), *n* [NL, < F. *mygale*, < L. *mygale*, < Gr. *μυγάλη*, *mygālē*, *mygālē*, field-mouse, < *μῦς*, mouse, + *γάλη*, *gālē*, a weasel.]

1 A Cuvierian genus of insectivorous quadrupeds, the desmans later changed to *Myogale* or *Myogalia* Cuvier, 1850.

2 The leading genus formerly of the now disused family *Mygalidae*. This genus included the very largest and fiercest spiders, in the United States known as *tarantulas*, a name which in Europe belongs to quite a different kind.

The common tarantula of the southwestern United States was called *M. hentzi*, a hairy brown species of large size and much dreaded. *M. araneolaria* is a former name of the South American blind spider, able to prey upon small birds, but under this designation several large hairy spiders have been confounded. It is now placed in the genus *Eurypelma*. *M. javanica* and *M. sumatrana* inhabit the countries whence their names are derived. They inhabit tubular holes in the ground under stones, or beneath the bark of trees. The bite is very painful and even dangerous. See cuts under *Araneida*, *arachnid* and *chehura*. *Latreille*, 1802.

Mygalidae (mī-gal'i-dē), *n pl* [NL, < *Mygale* + *-idae*] A former family of spiders, typified by the genus *Mygale*. It included the largest known spiders, with four pulmonary sacs, eight eyes clustered together, and great mandibles which work up and down.

Mygale, *Cteniza*, and *Atypus* were leading genera. The American tarantulas, the trap-door spiders, and others are longed to this family. Synonymous with *Theraphosidae*. See *Territelaria*.

Mygalina (mīg-a-lī'nā), *n pl* Same as *Myogalina*.

myght, myghte Obsolete spellings of *mighty*, *myght*².

myghty, *a* An obsolete spelling of *mighty*.

mygranet, mygreynet, *n* Middle English forms of *myrrane*, for *megrim*.

Myiadestes (mī'ī-a-des-tēs), *n* [NL, improper for **Myiades*, < Gr. *μυία*, a fly, + *ἑδστής*, an eater, < *ἔδω* = L. *edere* = E. *eat*] The leading genus of *Myiadeninae*, containing most of the species.

M. townsendi inhabits the western part of the United States. It is of a dull brownish ash color, paler below, the wings blackish with tawny variegations, the tail blackish, some of the feathers tipped with white, the bill and feet black, the eye surrounded with a white ring. The bird is 8 inches long, the wing and tail each about 4½. It is an exquisite songster, and nests on the ground or near it, building a loose nest of grasses and laying about four eggs of a bluish-white color with reddish freckles, 0.96 of an inch long by 0.67 broad. Several other species inhabit the warmer parts of America.

Myiadeninae (mī'ī-a-des-tī'nē), *n pl* [NL, < *Myiades* + *-inae*] An American subfamily of oscine passerine birds, typified by the genus *Myiades*, usually referred to the *Turdidae*, but also placed in the *Ampelidae*, the fly-catching thrushes. The bill is short, much depressed, wide at base, and deeply cleft. The feet are small, with booted tarsi and deeply cleft toes, of which the lateral ones are of unequal length. There are ten primaries, the first spurious, and twelve narrow tapering rectrices, the tail is double rounded end, the head is subcylindrical, the plumage is sordid, spotted in the young, the sexes are alike. There are about 12 species, belonging to the genera *Myiadenes*, *Cichlopsis*, and *Platycephala*, all but one of them inhabiting Central America, South America, and the West Indies. They are frugivorous and insectivorous, and highly musical.

myiadenine (mī'ī-a-des-tī'nē), *a*. Pertaining to the *Myiadeninae*, or having their characters.

Myiagra (mī'ī-ag'rā), *n* [NL, < Gr. *μυία*, a fly, + *ἀγρα*, hunting (taking)] The typical genus of *Myiagrinae*, founded by Vigors and Horsfield in 1826. It contains some 30 species of small flycatchers with very broad flat bills and copious rictal vibrissae, inhabiting the Australasian and Oceanian regions. *M. rubicola* is a characteristic example.

Texas Tarantula (*Mygale hentzi*)
Life natural size

Myiagrins (mi-'a-grī'nē), *n. pl.* [NL., < *Myiagra* + *-ina*.] A subfamily of *Muscicapidae*, typified by the genus *Myiagra*, named by Cabanis in 1850.

Myiarchus (mi-'i-ār'kus), *n.* [NL., < Gr *μῦα*, a fly, + *ἀρχός*, a leader, chief, commander.] A notable genus of tyrant flycatchers of the family *Tyrannidae*. It is typically of olivaceous coloration with yellow belly and dusky wings and tail, both varied with rufous tints, and no colored patch on the crown, which is slightly crested. There are numerous species, inhabiting America from Canada to Paraguay, known as ash throated or rufous tailed flycatchers. The best-known is the common great crested flycatcher of the United States, *M. cinerascens*, which is abundant in woodlands is of quarrelsome disposition, has a loud harsh voice, and habitually uses snake-skins in its nest. *M. cinerascens* is a similar species of the southwestern parts of the United States. *M. laurentis* is a much smaller species of Texas and Mexico. *M. validus* inhabits the West Indies, and there are many others in subtropical and tropical America.

Myidae (mi-'i-dē), *n. pl.* [NL., < *Myia* + *-idae*.] A family of dimyarian bivalves, typified by the genus *Mya*, to which various limits have been assigned. As most restricted, it comprises those which have the mantle open in front only for the foot and extended backward into a sheath covered by a rugous epidermis for the siphons, which are elongate and united to

Mya truncata

near their ends, the foot small and linguiform, the two pairs of branches elongated, but not extended into the branchial siphon, the shell inequivalve, having submedian umbones, gaping at the ends, its left or smallest valve provided with a flattened cartilage process, and the pallial sinus deeply excavated. It is a group of generally large bivalves, some of which are of considerable economical value. They are known as *coba*, *clams*, *garang clams*, and *gapers*. Also *Myale*, *Myacea*.

Myiodiocetes (mi-'i-dē-ok'tēz), *n.* [NL., < Gr *μῦα*, a fly, + *διόκτης*, a pursuer, see *Diocetes*.] A genus of fly-catching warblers of the family *Syl-*

Wilson's Black-capped Flycatching Warbler (*Myiodiocetes pusillus*)

viculidae and the subfamily *Setophagina*, founded by Audubon in 1839. Three species are well known and abundant birds of the United States. These are the hooded warbler *M. nigratus*, the Canadian, *M. canadensis*, and Wilson's black-capped, *M. pusillus*.

myitis (mi-'i-tis), *n.* [NL., < Gr *μῦς*, a muscle, + *-itis*.] In *pathol.*, inflammation of a muscle. Also, improperly, *myositis*.

mylt, *n.* An obsolete spelling of *myll*.

Mylabridae (mi-'lab-'ri-dē), *n. pl.* [NL. (Leach, 1817), < *Mylabris* + *-idae*.] A family of blister-beetles named from the genus *Mylabris*, now usually merged in *Cantharidae*.

Mylabris (mi-'a-bris), *n.* [NL. (Fabricius, 1775), < Gr *μύλαβρις*, also *μύλαγρις* and *μύλακρις*, a kind of cockroach in mills and bakehouses, of *μύλακρις*, a millstone, < *μύλη*, a mill.] A genus of blister-flies of the family *Cantharidae*, or the type of a family *Mylabridae*. There are several species possessing vesicatory properties, and used as cantharides, such as *M. cichorii* and *M. indica*. The genus is of great extent, with over 250 species, almost confined to the Old World, and distributed through Europe, Asia, and Africa. *M. chrysopus* and *M. dissimilis* are the only geographical exceptions, and there is some doubt about their position. The elytra cover the abdomen, the mandibles are short, and the antennae, inserted above the epistomal suture, are gradually enlarged toward the tip. These beetles are often of large size, and the coloration is yellow bands or spots on a black ground, or vice versa. They fly in the bright sunlight and frequent low ground.

mylet, *n.* A Middle English form of *myll*.

Myliobatidae (mi-'i-bat-'i-dē), *n. pl.* [NL., < *Myliobatus* + *-idae*.] A family of ray-like selachians, typified by the genus *Myliobatus*, the eagle-rays or whip-rays. (a) A family of masticatory rays with a very broad disk formed by the expanded pectoral fins, cephalic fins developed at the end of the snout, and interlocking hexagonal teeth, set like a pavement in the jaws. About 20 species are known, chiefly from tropical seas. Their broad pointed pectoral like wings give them the name *eagle-ray*, and from the whip-like tail armed with a spine near the base they are called

whip-rays and *sting-rays*, but they are not to be confounded with true sting rays of the family *Trygonidae*. (b) In Gunther's system, a family of *Batoides*, containing *Myliobatis* (a) and *Cephaloscyra*.

myliobatine (mi-'i-ob-'a-tin), *a.* Pertaining to the *Myliobatidae*, or having their characters.

Myliobatis (mi-'i-ob-'a-tis), *n.* [NL., < (Gr *μύλος* (see *lidos*, a stone), a millstone (< *μύλη*, mill, millstone, see *myll*), + *batis*, a flat fish, the skate.] The typical genus of *Myliobatidae*, with toothed teeth adapted for grinding, whence the name. *M. aquila* is an example. See cut under *eagle-ray*.

myliobatoid (mi-'i-ob-'a-toid), *a.* and *n.* I. a Pertaining to the *Myliobatidae*, or having their characters.

II. *n.* One of the *Myliobatidae*.

myllet, *n.* An obsolete spelling of *myll*.

mylnert, *n.* An obsolete form of *myll*.

Myiodon (mi-'i-don), *n.* [NL., < (Gr *μῦς*, a mouse, + *δόντις* (δόντ-) = *E. tooth*.)] 1 A genus of gigantic extinct sloths from the Pleistocene.

Skeleton of *Myiodon*

having teeth more or less cylindrical and in structure resembling those of the extinct sloths. *M. robustus* is a well known species from South America. The animal was large enough to browse on the foliage of trees.

2 [<] An animal of this genus.

mylodont (mi-'i-dont), *a.* and *n.* I. a Pertaining to the mylodonts, or having their characters.

II. *n.* A mylodont.

myloglossus (mi-'i-gloss'us), *n.*, *pl. myloglossae* (-i). [NL., < (Gr *μύλος*, a mill, a molar tooth, a grinder, + *γλῶσσα*, the tongue.)] A muscular slip accessory to the styloglossus, passing from the angle of the jaw or the stylomaxillary ligament to the tongue.

mylohyoid (mi-'i-lo-'hi-oid), *a.* and *n.* [< Gr *μύλη*, a mill, a molar tooth, + *E. hyoid*.] I. a Pertaining to the molar teeth and to the hyoid bone. — **Mylohyoid artery**, a branch of the inferior dental which runs in the mylohyoid groove and ramifies under the mylohyoid muscle. — **Mylohyoid groove and ridge**, a groove and a ridge along the inner surface of the lower jaw bone in the course of the mylohyoid vessels and nerve. — **Mylohyoid muscle**, the mylohyoid. See cut under *muscle*. — **Mylohyoid nerve**, a branch of the inferior dental accompanying the artery of the same name to the mylohyoid muscle and the anterior belly of the digastric.

II. *n.* The mylohyoidous, or the mylohyoid muscle, which extends between the mylohyoid ridge on the under jaw-bone and the hyoid bone, forming much of the muscular floor of the mouth.

mylohyoidan (mi-'i-lo-'hi-oidē-an), *a.* Same as *mylohyoid*.

mylohyoidous (mi-'i-lo-'hi-oidē-us), *n.*, *pl. mylohyoides* (-i). [NL. see *mylohyoid*.] The mylohyoid muscle.

Mymar (mi-'mār), *n.* [NL., < Gr *μῦμαρ*, a dial form of *μῦμαρ*, for *μῦμαρ*, blame, *Momus* see *Momus*.] The typical genus of *Mymarinae*. They have the tarsi four jointed, the abdomen distinctly petiolate, and the anterior wings widened only at the tip. Two species are known both European. *Curtis* 1832.

Mymaridae (mi-'mār-'i-dē), *n. pl.* [NL., < *Mymar* + *-idae*.] The *Mymarinae* rated as a family. *Haldy*, 1840. Also *Mymarids*, *Mymarides*.

Mymarinae (mi-'mār-'i-nē), *n. pl.* [NL., < *Mymar* + *-ina*.] A subfamily of the hymenopterous family *Proctotrupidae*, containing some of the smallest insects known. The front tibiae have but one spur, the mandibles are dentate, the antennae rise above the middle of the face, and the very delicate hind wings are almost linear. These insects are all parasitic, many of them on bark lice. One of the smallest, *Alaptus ezeus*, measures 0.17 millimeter in length.

mymarine (mi-'mār-'in), *a.* and *n.* I. a Pertaining to the *Mymarinae*, or having their characters.

II. *n.* A member of the *Mymarinae*.

mynt, *pron.* A Middle English form of *mine*¹, *my*.

myna, *mynah*, *n.* See *mina*².

myunchent, *n.* See *myunchery*.

myunchery, *n.* See *myunchery*.

myndet, *n.* An obsolete spelling of *mind*¹.

mynet, *n.* An obsolete form of *mynt*¹, *mynt*².

myngt, *r.* An obsolete form of *myngt*¹, *myngt*².

myneer (mūn-hār'), *n.* [< D *myneer* (= *G. mein herr*), *my*, lit 'my lord' see *my* and *herr*.]

1 The ordinary title of address among Dutchmen, corresponding to *mein herr* among Germans, and to *mr* or *Mr* in English use. Hence — 2 A Dutchman. [Colloq.]

myynet, *a.* A Middle English form of *mynt*².

myynour, *n.* A Middle English form of *mynt*.

myynster, **myynstre**, *n.* Middle English forms of *mynt*.

myynstral, **myynstralci**, etc. Middle English forms of *mynt*, etc.

myynt, *n.* An obsolete form of *mynt*¹, *mynt*², *mynt*³.

myo-atrophy (mi-'o-at-'rō-fī), *n.* [< Gr *μῦς*, muscle, + *atrophia*, atrophy, see *atrophy*.] Muscular atrophy.

myoblast (mi-'o-blāst), *n.* [< Gr *μῦς*, muscle, + *βλαστός*, germ.] A cell which gives rise to muscular fibers, the formative cell-element of muscular tissue. Myoblasts are sometimes known by the name of *neuromuscular cells* and when in sheets or layers they are called *myo-epithelium*. A myoblast may be either in part or wholly converted into a muscular fibril.

myoblastic (mi-'o-blāst'ik), *a.* [< *myoblast* + *-ic*.] Of or pertaining to myoblasts, or to the process of forming muscle from myoblasts.

myocardial (mi-'o-kar-'di-āl), *a.* [< *myocardium* (um) + *-al*.] Of or pertaining to the myocardium.

myocarditis (mi-'o-kar-'di-tis), *n.* [NL., < *myocardium* + *-itis*.] In *pathol.*, inflammation of the myocardium.

myocardium (mi-'o-kar-'di-um), *n.* [NL., < (Gr *μῦς*, muscle, + *καρδία* = *E. heart*.)] The muscular substance of the heart.

myocomma (mi-'o-kom'mā), *n.*, *pl. myocommata* (-i). [NL., < (Gr *μῦς* (μῦς), a muscle + *κόμμα*, that which is cut off, see *comma*.)] A primitive division of myoblasts or muscle-epithelium into longitudinal series corresponding to the segments of the axis of the body, a muscular metamere, a myotome. Thus, one of the serial flakes of the flesh of a fish very obvious when the fish is baked or boiled is a myocomma. The arrangement is generally obscured by ulterior modifications in the higher vertebrates but even in man, for example the series of intercostal muscles between successive ribs, and those between contiguous vertebrae, represent original myocommata.

myocyte (mi-'o-sīt), *n.* [NL., < (Gr *μῦς* (μῦς), a muscle, + *κύτος*, a hollow, cell.)] A muscle-cell, the formative cellular element of the contractile tissue of most sponges. They are of various shapes, usually slenderly fusiform with long filamentous ends. *Sollas*, *Encyc. Brit.*, XXII 419. Also *myocyte*.

Myodes (mi-'ō-dēs), *n.* [NL., < Gr *μῦς*, mouse, mouse-like, < *μῦς*, mouse (= *E. mouse*), + *ιδος*, form.] A genus of lemmings of the family *Muridae* and the subfamily *Arvicolinae*. The skull is massive and depressed, with a zygomatic width equal to two thirds its length. The species are of small size and stout compact form with very obtuse hairy muzzle, small ears, short rabbit like tail, large fore claws, and molliose pelage of variegated colors, which does not turn white in winter. They are arctic animals, sometimes occurring in almost incredible numbers. The common or Norway lemming is *M. lemmus*, that of Siberia is *M. obsoletus*, from which the corresponding animal of arctic America is probably not distinct and some others are described. The lemmings which turn white in winter belong to a different genus, *Circulus*. See cut under *lemming*.

Myodocha (mi-'ō-dō-'ka), *n.* [NL. (Latreille, 1807), < (Gr *μυδοχός*, harboring mice, < *μῦς*, mouse, + *δοχάω*, receive, harbor.)] A genus of heteropterous insects, typical of the subfamily *Myodochinae*. Four species are known three of which are Mexican while the other, *M. serripes*, is found in the eastern United States.

Myodochinae (mi-'ō-dō-'kī-nē), *n. pl.* [NL. (Stål, 1874, as *Myodochinae*), < *Myodocha* + *-ina*.] A subfamily of heteropterous insects of the family *Lygaeidae*. Thirty seven genera have been described, of which twenty six inhabit North America.

myodome (mi-'ō-dōm), *n.* [< (Gr *μῦς*, a muscle, + *δομος*, chamber, see *dome*.)] A tubular chamber or recess within the cranium of most osseous fishes for the insertion of the rectus muscles of the eye. It is isolated from the brain cavity by the development of a platform from the basilar cephalic continuous with horizontal ridges diverging from the prototics.

Myodome (muscular tube) developed and the cranial cavity open in front. *Gill*, *Amer. Nat.*, XXXI 357.

myodynamia (mi-'ō-dī-nā-'mī-ā), *n.* [NL., < Gr *μῦς*, muscle, + *δυναμις*, power, see *dynamic*.] Muscular force.

myodynamics (mī'ō-dī-nam'iks), *n* [*<* Gr *μῦς*, muscle, + *E dynamis*] The mechanics of muscular action

myodynamometer (mī'ō-dī-na-mom'e-tēr), *n* [*<* Gr *μῦς*, muscle, + *E dynameter*] An instrument for measuring muscular strength, a dynamometer

myodynia (mī'ō-dī-nī'a), *n* [NL, *<* Gr *μῦς*, muscle, + *odynē* pain] Same as *myalgia*

myofibroma (mī'ō fi-brō'mā), *n*, pl *myofibromata* (-mā-tā) [NL, *<* *myo*(ma) + *fibroma*] A tumor in part myomatous and in part fibromatous

Myogale (mī'og'a-lē), *n* [NL, *<* Gr *μυογάλη*, *myogalē*, a shrew mouse, *<* *μῦς*, a mouse, + *γάλη*, conti *gālē*, a weasel (*cf* *Mygale*)] The typical genus of the subfamily *Myogalinae*, containing the aquatic demians, musk-moles, musk-shrews, or muskrats of the Old World, *M. moschata* of Russia and *M. pyrenaea* of the Pyrenees. The former is the giant of the *Talpidae*, some 16 inches long, with a proboscis, webbed feet, and a long scaly tail vertically flat, like that of a muskrat and used similarly in swimming. In the smaller species the tail is round, and the proboscis is still longer. The dental formula of both is 3 incisors, 1 canine, 4 premolars, and 3 molars in each upper and lower half jaw. Also *Mygale* and *Myogalea*. See cut under *demian*.

Myogalidae (mī'og-gal'i-dē), *n* pl [NL, *<* *Myogale* + *-idae*] The *Myogalinae* rated as a family of *Insectivora*. See *Myogale*, *Myogalinae*.

Myogalinae (mī'ō-ga-lī-nē), *n* pl [NL, *<* *Myogale* + *-inae*] A subfamily of insectivorous mammals of the family *Talpidae*. There is no necessary carpel on the clavicle and humerus are moderately long, the manubrium sterni is moderate and the scapula has a metacromion the fore limbs being thus fitted for simple progression, not especially fossorial. The incisors are fewer than in any other *Talpidae*, being 2 in each upper and lower half jaw or 2 in each upper and 1 in each lower half jaw. The group contains the genera (or subgenera) *Myogale*, *Galemys*, *Scaptonyx*, *Urotrichus*, *Urotrichus*, and *Neurotrichus*, all but the last confined to the Old World. They are known as *demians*, *musk moles*, and *musk shrews*. *Galemys* is a synonym. Also *Myogalina*.

myogaline (mī'og'a-līn), *a* Pertaining to the *Myogalinae*, or having their characters

myogenic (mī'ō-jen'ik), *a* [*<* Gr *μῦς*, muscle, + *γενεῖν*, origin] Of muscular origin

myoglobulin (mī'ō-glob'ū-līn), *n* [*<* Gr *μῦς*, muscle, + *E globulin*] A globulin obtained from muscle. It coagulates at a lower temperature than paraglobulin.

myogram (mī'ō-giam), *n* [*<* Gr *μῦς*, muscle, + *γραμμή*, a writing, a line see *gram*²] The tracing of a contracting and relaxing muscle drawn by a myograph.

myograph (mī'ō-giāf), *n* [*<* Gr *μῦς*, muscle, + *γραφειν*, write] An instrument for taking tracings of muscular contractions and relaxations.

myographer (mī'og'grā-fēr), *n* [*<* *myograph* + *-er*] One who describes muscles or is versed in myography.

myographic (mī'ō-grāf'ik), *a* [= *F myographique* = *Pg myographico* = *It myografico* as *myograph* + *-ic*] 1 Descriptive of muscles, pertaining to myography. — 2 Obtained with a myograph as, a *myographic tracing*.

myographical (mī'ō-grāf'ī-kal), *a* [*<* *myograph* + *-al*] Same as *myographic*.

myographically (mī'ō-grāf'ī-kal-ī), *adv* By means of the myograph.

myographion (mī'ō-grāf'ī-on), *n* [NL, *<* Gr *μῦς*, muscle, + *γραφειν*, write] A myograph.

myographist (mī'og'grā-fist), *n* [*<* *myograph* + *-ist*] A myographer.

myography (mī'og'grā-fī), *n* [= *F myographie* = *Sp myografia* = *Pg myographia* = *It miografia*, *<* Gr *μῦς*, muscle, + *γραφία*, *<* *γραφειν*, write] Descriptive myology, the description of muscles.

myohematin (mī'ō-hem'a-tīn), *n* [*<* Gr *μῦς*, muscle, + *E hematin*] The specific pigment of muscle. Also *myoharmatin*.

myoid (mī'oid), *a* [*<* Gr *μυοειδής*, contr *μυοειδής* (*cf* *Myodes*), like a mouse (taken in sense of 'like a muscle'), *<* *μῦς*, a mouse, muscle, + *ειδής*, form] Resembling muscle.

myoidema (mī'oi-dē'mā), *n* [NL, *<* Gr *μῦς*, muscle, + *οίδημα*, a swelling, *<* *οίδω*, swell] The wheal brought out by a smart tap on a muscle in certain conditions of exhaustion.

myolemma (mī'ō-lem'mā), *n* [NL, *<* Gr *μῦς*, muscle, + *λεπμή*, peel, *<* *λεπν*, peel see *lepis*] Sarcolemma.

myologic (mī'ō-loj'ik), *a* [= *Pg myologico* = *It miologico*, as *myology* + *-ic*] Same as *myological*.

myological (mī'ō-loj'ī-kal), *a* [*<* *myologic* + *-al*] Of or pertaining to myology. — **Myological formula**, in *ornith.*, a formulated statement of the

presence or absence of certain muscles of the legs of birds, for classificatory purposes, invented by A. H. (Arrod, who used the symbols A, B, X, and Y to denote the ambiens, semitendinosus, accessory semitendinosus, and semitendinosus respectively, thus, a bird with the myological formula A, B, X, has the first three of these muscles and lacks the last.

myologist (mī'ol'ō-jist), *n* [*<* *myology* + *-ist*] One who is versed in myology, a myological anatomist.

myology (mī'ol'ō-jī), *n* [= *F myologie* = *Sp miologia* = *Pg myologia* = *It miologia*, *<* Gr *μῦς*, muscle, + *-λογία*, *<* *λέγω*, speak see *-ology*] The science of muscles, myological anatomy.

To instance in all the particulars were to write a whole system of myology.

myoma (mī'ō-mā), *n*, pl *myomata* (mā-tā) [NL, *<* Gr *μῦς*, a muscle, + *-oma*] A neoplasm or tumor composed of muscular tissue. — **Myoma cavernosum**, myoma telangiectodes. — **Myoma leiocellulare**, a myoma composed of smooth muscular fiber. Also called *leiomyoma*. — **Myoma stricellulare**, a myoma composed of striated muscular tissue. Also called *leiomyoma*. — **Myoma telangiectodes**, excessively vascular myoma.

myomalacia (mī'ō-mā-lā'sī-a), *n* [NL, *<* Gr *μῦς*, muscle, + *μαλακία*, softness see *malacia*] Morbid softening of a muscle such as might be induced by an embolus of the nutrient artery. — **Myomalacia cordis**, softening of the myocardium from obstruction of the coronary arteries.

myomancy (mī'ō-man-sī), *n* [*<* Gr *μῦς*, mouse, + *μαντεία*, divination, *<* *μαντις*, prophet see *Mantis*] A kind of divination or method of foretelling future events by the movements of mice.

Some authors hold *myomancy* to be one of the most ancient kinds of divination, and think it is on this account that Isaiah (lxvi 17) reckons mice among the abominable things of the idolater.

myomantic (mī'ō-man'tik), *a* [As *myomancy* + *-ic*] Of or pertaining to myomancy.

myomata, *n* Plural of *myoma*.

myomatous (mī'ō-mā-tūs), *a* [*<* *myoma*(-t-) + *-ous*] Pertaining to, of the nature of, or affected with a myoma.

myomectomy (mī'ō-mek'tō-mī), *n* [*<* NL *myoma* + Gr *εκτομή*, a cutting out] Removal of a uterine myoma by abdominal section.

myomere (mī'ō-mer), *n* [*<* Gr *μῦς*, a muscle, + *μερ*, a part] A muscular metamere, a myotome or myotome.

The rudimentary myotomes or myomeres of the tail. *Phylog. Br.*, XXII, 186.

myomorph (mī'ō-mōrf), *n* A member of the *Myomorpha*, a murine rodent.

Myomorpha (mī'ō-mōr'fā), *n* pl [NL, *<* Gr *μῦς*, a mouse, + *μορφή*, form] A superfamily of simpridontate rodents, one of three prime divisions of *Glires simpridontate*, containing the murine rodents, the others being *Hystri-comorpha* and *Sciuromorpha*. They have no post-orbital processes, slender zygomatic arches, the angular part of the mandible springing from the lower edge of the incisor socket (except in *Bathyergidae*), perfect clavicles (except in *Lophomyidae*), and the tibia and fibula ankylosed to some extent. *Myomorpha* includes 9 families: *Muridae*, domestic *Lophomyidae*, skunkrats *Muridae*, mice and rats (*cf* *Spalacidae*), mole rats *Geomyidae*, pocket rats and mice, *Theridomyidae* (fossils), *Dipodidae*, jerboas, and *Zapodidae*, jumping deer mice. See cuts under *mole rat*, *Muridae*, *Geomyidae*, and *deer mouse*.

myomorphic (mī'ō-mōr'fik), *a* [*<* *Myomorpha* + *-ic*] Murine in form or structure, pertaining to the *Myomorpha*, or having their characters.

myotomy (mī'ō-moi'tō-mī), *n* [*<* NL *myoma* + Gr *τομή*, a cutting] Removal of a uterine myoma by abdominal section; myomeotomy.

myon (mī'on), *n*, pl *mya* (-ā) [NL, *<* Gr *μῦς*, a cluster of muscles, *<* *μῦς*, a muscle see *muscle*¹] Any individual unit of musculature, a muscular integer. *Cones*, *The Auk*, V, 104.

myonicity (mī'ō-mī'sī-tī), *n* [*<* **myonic* (*<* Gr *μῦς*, a muscular part of the body) (see *myon*) + *-ity*] The characteristic property of living muscle, namely its power of contracting.

myonosis (mī'ō-nō'sī-s), *n* [NL, *<* Gr *μῦς*, muscle, + *νόσος*, disease] In *pathol.*, a disease of the muscles.

myopalms (mī'ō-pāl'mus), *n* [*<* Gr *μῦς*, muscle, + *παλμος*, a vibration, quivering, *<* *πάλειν*, poise, vibrate, quiver] A twitching of the muscles, subultus tendinum.

myopathic (mī'ō-pāth'ik), *a* [*<* *myopathy* + *-ic*] Of or pertaining to myopathy.

myopathy (mī'ō-pā-thī), *n* [*<* NL *myopathia*, *<* Gr *μῦς*, muscle, + *παθία*, *<* *παθω*, disease] Disease of a muscle.

myope (mī'ōp), *n* [= *F myope* = *Sp. miope* = *Pg miope* = *It miope*, *<* LL *myopia* (*myop*), *<* Gr *μῦς* (*μῦς*), short-sighted, lit 'closing the

eye,' i e blinking, *<* *μῦεν*, close, + *ὥψ* (*ωπ*-), eye.] A short-sighted person. Also *myops*.

myophan (mī'ō-fan), *n*. [*<* Gr *μῦς*, muscle, + *-φανής*, *<* *φαίνεσθαι*, appear] The layer developed in many *Infusoria* that contains muscle-like fibrillae. *Haeckel*.

myophore (mī'ō-fōr), *n* [*<* NL *myophorus* see *myophorous*.] A part or an apparatus of the shell of a mollusk specialized for the attachment of a muscle, as in the genus *Ehymus*.

myophorous (mī'ō-fō-rus), *a* [*<* NL *myophorus*, *<* Gr *μῦς*, muscle, + *-φορος*, *<* *φέρω* = *E bear*] Bearing or connected with a muscle, as a myophore, provided with a myophore, as a mollusk.

myophysical (mī'ō-fī'r'ī-kal), *a* [*<* *myophysical* + *-al*] Pertaining to myophysics.

myophysics (mī'ō-fī'z'iks), *n* [*<* Gr *μῦς*, muscle, + *φυσικά*, physics see *physis* and *physics*] The physics of muscle.

Such outstanding questions of *myophysics* as the pre-existence of muscular currents, the presence of a paleoelectrotonic layer, the number and nature of cross-disks etc. *G S Hall*, German Culture, p. 221.

myopia (mī'ō-pī-a), *n* [NL, *<* LL *myopia*, *<* Gr *μυωπία*, also *μυωπιασ* (Galen), *<* *μῦς*, short-sightedness see *myope*] Short-sightedness; near-sightedness the opposite of *hypermetropia*.

In this condition, parallel rays of light are brought to a focus before they reach the retina, the accommodation being relaxed the near point and far point of distinct vision approach the eye. Also called *brachymetropia*.

myopic (mī'ō-pī'ik), *a* [*<* *myop* + *-ic*] In *pathol.*, of or relating to myopia; affected with myopia, short-sighted, near-sighted. Also *brachymetropic*.

myopolar (mī'ō-pō'lār), *a* [*<* Gr *μῦς*, muscle, + *πόλος*, pole see *pole*, *polar*] Pertaining to the poles of muscular action, or to muscular polarity.

Correcting for the movement of the indifference point along the myopolar tract. *Amer Jour Psychol* 1 185.

Myoporaceae (mī'ō-pō-rā'sē-ē), *n* pl [NL (Lindley, 1835), *<* Gr *μῦς*, close, + *πόρος*, pore (see *por*²), + *-acea*] Same as *Myoporinae*.

Myoporinae (mī'ō-pō-rī'nē-ē), *n* pl [NL (R. Brown, 1810), *<* *Myoporium* + *-inae*] An order of the *Myoporaceae* gamopetalous shrubs of the cohort *Lamiales*, typified by the genus *Myoporium*. It is distinguished by a two lipped or oblique corolla, didynamous stamens a two or four (called ovary with one or two seeds in each cell, drupaceous fruit, axillary flowers and usually alternate leaves. There are 5 genera and about 80 species known, mainly Australian.

myoporineous (mī'ō-pō-rī'nē-us), *a* Belonging to, resembling, or pertaining to the *Myoporinae*.

Myoporium (mī'ō-pō-rūn), *n* [NL (Banks and Solander, 1797), so called in allusion to the spots covering the leaves, which suggest pores closed with a semi-transparent substance, *<* Gr *μῦς*, close, + *πόρος*, a pore] A genus of plants, type of the order *Myoporinae*, characterized by somewhat bell-shaped flowers and ovary-cells one-ovuled. About 20 species are known ranging from Australia to Japan. They are smooth or glutinous shrubs or low trees bearing small white flowers introduced to some extent into greenhouses. *M. serratum* of Australia is called *blueberry tree*, *M. latum* of New Zealand, named *guttarwood*, is useful for shade, and its wood takes a fine polish. *M. Sandwicense* of the Sandwich Islands, etc., affords a fragrant wood which has been substituted for sandalwood, hence the name *bastard sandalwood*.

Myopotamus (mī'ō-pōt'a-mus), *n* [NL, *<* Gr *μῦς* (*μῦς*), mouse, + *ποταμός*, river *cf* *hipopotamus*].

A South American genus of hystri-comorphic rodents of the family *Octodontidae* and the subfamily *Echimyinae*, the coypus. There is but one species, *M. coypus*. See cut under *coypu*.

myops (mī'ōps), *n* [LL see *myope*] Same as *myope*.

myopsid (mī'ōp'sid), *a* [NL, irreg. *<* Gr *μῦς*, close, + *ὄψις*, vision] Having the cornea of the eye closed, so that the water does not touch the lens, as certain decapod cephalopods opposed to *oicopsid*.

myosarcoma (mī'ō-sār-kō'mā), *n*, pl. *myosarcomata* (-mā-tā) [NL, *<* Gr *μῦς*, muscle, + *σάρκωμα*, a fleshy excrescence see *sarcoma*.] In *pathol.*, a tumor composed in part of muscular and in part of sarcomatous tissue.

myosarcomatous (mī'ō-sār-kōm'a-tus), *a* [*<* *myosarcoma*(-t-) + *-ous*] Of, pertaining to, or affected with myosarcoma.

myoscope (mī'ō-skōp), *n* [*<* Gr *μῦς*, muscle, + *σκοπεῖν*, view] An apparatus or instrument for the observation of muscular contraction.

With the aid of an apparatus which he terms the *myoscope*, M. F. Laulanié has studied the contraction phenomena of muscles retained in their normal environment and connections. *Jour of Roy Microsc. Soc.*, 2d ser., VI 1 47.

myosin (mī'ō-sin), *n.* [*<* Gr. *μῦς*, muscle, + *-ose* + *-in*.] A globulin, the chief ingredient which separates from muscle-plasma on coagulation. It is a proteid body forming an elastic amorphous non fibrous mass, insoluble in pure water but readily soluble in 5 to 10 per cent. salt solution. It begins to coagulate at 55 C. It is insoluble in a saturated salt solution.

As we know that the reagents in question dissolve the peculiar constituent of muscle, myosin, it is to be concluded that the interseptal substance is chiefly composed of myosin. *Huxley, Crayfish, p. 186*

myosis (mī-ō'sis), *n.* [*<* NL, *<* Gr. *μῦς*, close, be shut, as the eye.] Abnormal contraction of the pupil of the eye.

myositic (mī-ō-sit'ik), *a.* [*<* NL *myosis* (-it-) + *-ic*.] In med., pertaining to myosis; causing contraction of the pupil; said of certain medicines, as opium.

myositis (mī-ō-sit'is), *n.* [*<* NL, irreg. *<* (Gr. *μῦς*, muscle, + *-itis*.] In *pathol.*, inflammation of a muscle, myitis.

Myosotis (mī-ō-sō'tis), *n.* [*<* NL (Dillenius, 1719), *<* L. *myosotis*, also *myosota*, *<* (Gr. *μῦς*, mouse, also as two words *μῦς*, *οὐς*, *μῦς*, *οὐς*, the plant mouse-ear, forget-me-not, *<* *μῦς*, gen. *μῦος*, mouse, + *οὐς* (ōr-), ear.] A genus of dicotyledonous gamopetalous plants of the natural order Boraginaceae and the tribe Boragaceae, known by the flowers without bracts, their rounded lobes convolute in the bud. More than 40 species are scattered widely over colder regions. They are small plants with alternate leaves, usually weak stems and racemes of blue, pink or white flowers. *M. palustris* is the true forget me not, but the name is extended to the whole genus. See *forget me not*, 2, mouse ear, and *scorpion grass*. See also cut under *circinate*.

myospasmus (mī-ō-spaz'mus), *n.* [*<* NL, *<* (Gr. *μῦς*, mouse, + *σπασμός*, spasm.) Spasm or cramp of a muscle.

myotatic (mī-ō-tat'ik), *a.* [*<* Gr. *μῦς*, muscle, + *τατικός* (tat-), tension, *<* *τείνω* (tēnō), stretch see *te* and *nd*.] Pertaining to the tension of a muscle. — **Myotatic contraction**, contraction produced by suddenly stretching the muscle as by blows on their tendons. Also called *tendon reflex*, *deep-reflex*, or *tendon jerk*. — **Myotatic irritability**, the property of responding to sudden stretching by a contraction. said of a muscle.

myotic (mī-ōt'ik), *a.* and *n.* [*<* *myosis* (-ot-) + *-ic*.] 1 *a.* Pertaining to or causing myosis, or contraction of the pupil.

2 *n.* A drug which causes myosis.

myotility (mī-ō-til'itē), *n.* [*<* For **myomotility*, *<* Gr. *μῦς*, muscle, + *ἐμψυχή* (ēmpsukhē), contraction of muscles, myomotility.] Contractility of muscles, myomotility.

myotome (mī-ō-tōm), *n.* [= F. *myotome*, *<* (Gr. *μῦς*, muscle, + *τομή*, *tomē*, cut.) 1 A muscular segment or metamere, a myocomma. See cut under *Pharyngobranchii*.

In the lowest Vertebrata the chief muscular system of the trunk consists of the epikrural muscles, which form thick lateral masses of longitudinal fibres, divided by transverse intermuscular septa into segments (or *Myotomes*) corresponding with the vertebrae. *Huxley, Anat. Vert., p. 45*

2 An instrument for dividing a muscle.

myotomic (mī-ō-tōm'ik), *a.* [*<* *myotome*, or *myotom-y*, + *-ic*.] 1. Divided or dividing into myotomes, or of pertaining to a myotome. — 2 Of or pertaining to myotomy.

myotomy (mī-ō-tō-mi), *n.* [= F. *myotomie* = Pg. *myotomia* = It. *miotomia*, *<* (Gr. *μῦς* (mūs), muscle, + *τομή* (tomē), cut.) 1 Dissection of muscles, muscular anatomy. — 2 A surgical operation consisting in the division of muscle.

myotonic (mī-ō-tōn'ik), *a.* [*<* *myotom-y* + *-ic*.] Pertaining to muscular tone, or myotony.

myotony (mī-ō-tō-ni), *n.* [*<* Gr. *μῦς*, muscle, + *τόνος*, tension see *tone*.] Muscular tone.

Myoxidae (mī-ok'si-dē), *n. pl.* [*<* NL, *<* *Myoxus* + *-idae*.] A family of myomorph rodents, the dormice. They have no caecum, a long hairy tail, large eyes and ears, small forelimbs, and a general resemblance to small squirrels, in habits as well as in form. There are 4 genera — *Myoxus*, *Muscardinus*, *Elomys* and *Graphiurus*. The absence of a caecum is unique among Rodentia.

Myoxinae (mī-ok-si'nē), *n. pl.* [*<* NL, *<* *Myoxus* + *-inae*.] The dormice as a subfamily of *Muridae*. See *Dormice*.

myoxine (mī-ok'sin), *a.* Having the characters of a dormouse, resembling a dormouse.

Myoxus (mī-ok'sus), *n.* [*<* NL, *<* LGr. *μυῶξ*, Gr. *μῦς*, mouse, the dormouse, *<* *μῦς*, mouse (the second element is uncertain).] A genus of dormice of the family *Myoxidae*, having a distichous bushy tail and simple stomach. *M. glis* of Europe is the type. See cut under *dormouse*.

myre¹, *n.* A Middle English spelling of *myre*¹.

myre², *v.* A Middle English spelling of *myre*².

myriacanthous (mī-rī-a-kān'thus), *a.* [= F. *myriacanthé*, *<* Gr. *μυρία*, numberless (see *myriad*), + *ἀκανθα*, thorn, spine.] Having very nu-

merous spines: specifically applied to fish of the genus *Myriacanthus*.

Myriacanthus (mī-rī-a-kān'thus), *n.* [*<* NL, *<* (Gr. *μυρία*, numberless, + *ἀκανθα*, thorn, spine.) A genus of rays founded by Agassiz in 1837. They abounded in the Liass.

myriad (mī-rī-ad), *n.* and *a.* [= F. *myriade* = Pg. *myriada* = It. *miriade*, *<* Gr. *μυριάς* (myriads), a number of ten thousand, *<* *μυρία*, numberless, countless, as a def. numeral, *μυρία*, pl., ten thousand.] 1 *n.* 1 The number of ten thousand.

2 An indefinitely great number.

But O, how fallen! how changed
From him, who in the happy realms of light,
Clothed with transcendent brightness, didst outshine
Myriads, though bright! *Milton, P. L., l. 87*

The world on world in myriad myriads roll
Round us, each with different powers *Tennyson, Death of Wellington, l. v*

II. *a.* Numberless, innumerable, multitudinous, manifold.

Then of the crowd ye took no more account
Than of the myriad cricket of the mead
When its own voice clings to each blade of grass,
And every voice is nothing *Tennyson, Lancelot and Elaine*

myriad-minded (mī-rī-ad-mīn'ded), *a.* Of vast intellect or great versatility of mind.

Our myriad minded Shakespeare *Coleridge, Biog. Lit., xv*

Myriaglossa (mī-rī-a-gloss'a), *n. pl.* [*<* NL, *<* (Gr. *μυρία*, numberless, + *γλῶσσα*, tongue, see *gloss*.)] Those mollusks whose admedian (lateral) teeth are indefinite in number (forty to fifty), and which have a median tooth. *Fuchs, Brit., XVI 641*

myriagram, myriagramme (mī-rī-a-gram), *n.* [= F. *myriagramme*, prop. **myriogramme*, *<* (Gr. *μυρία*, ten thousand, + *γράμμα*, a small weight see *gram*.)] In the metric system, a weight of 10,000 grams, or 22 0462 pounds avoirdupois.

myrialiter, myrialitre (mī-rī-a-lō'tē), *n.* [= Pg. *myrialitro* = It. *mirialitro*, *<* F. *myrialitre*, prop. **myrialitre*, *<* (Gr. *μυρία*, ten thousand, + *λίτρο*, liter see *liter*.)] A measure of capacity, containing 10,000 liters, or one decastere, equal to 2,642 United States gallons.

myriameter, myriametre (mī-rī-a-mē'tē), *n.* [= Pg. *myriametro* = It. *miriametro*, *<* F. *myriamètre*, prop. **myriamètre*, *<* (Gr. *μυρία*, ten thousand, + *μέτρον*, meter see *meter*.)] In the metric system, a measure of length, equal to 10 kilometers, or 6 2137 English miles, or 6 miles 376 yards.

myriande (mī-rī-a-nid), *n.* [*<* NL *Myrianda* (see *def*), *<* (Gr. *μυρία*, numberless.)] A marine worm of the family *Syllidae*, *Myrianda pinnigera*, with the head rounded in front, three clavate antennae, and the segments white transversely marked with yellow. It is a littoral European species, about 1½ inches long, remarkable for its reproduction.

The *Myrianda* discloses a wonderful history, for of this beautiful worm the posterior half becomes self divided into as many as six parts each of the remaining cephalic appendages of the original before they take leave and migrate themselves. In this condition the worm wanders about with a concatenated train behind of six big bellied moths.

Johnston, British Non parasitical Worms, p. 193

myriapod (mī-rī-a-pod), *a.* and *n.* [*<* Trop. *myriopod*, *<* F. *myriapode*, *myriopode*, *<* NL **myriopous* (-pod-), *<* (Gr. *μυρία*, ten thousand, + *ποῦς* (pōs) = F. *foot*.] 1 *a.* Having very numerous legs, specifically pertaining to the *Myriapoda*, or having their characters.

II. *a.* A member of the *Myriapoda*, a centiped or milleped.

Also *myriapodan*.

Myriapoda (mī-rī-ap'ō-da), *n. pl.* [*<* NL, prop. *Myriapoda*, neut. pl. of **myriapous* see *myriapod*.] A class of articulate animals of the subkingdom *Arthropoda*, the centipeds and millepedes. They have a long worm like body of cylindrical or flattened form, composed of from 10 to more than 200 rings or segments, scarcely or not at all differentiated into thorax and abdomen, a distinct head, and one or two pairs of legs to each somite of the body. There is a pair of antennae, and the jaws are mandibulate. Respiration is tracheal, through small pores or spiracles along the sides of the body. Reproduction is oviparous or ovoviviparous, and the sexes are

distinct. There is no proper metamorphosis, but the young have fewer segments and legs than the adults, the normal number being acquired by successive molts. Excluding the pauropods and malacopods, the *Myriapoda* occur under two well defined types forming two orders: the *Chilopoda* or *Thysanopoda*, millepedes or gaily worms, and the *Diplopoda* or *Symphyla* centipeds. See cuts under *centiped*, *milleped*, *cephalic band*, and *myriapod*.

myriapodan (mī-rī-ap'ō-dan), *a.* and *n.* [*<* *myriapod* + *-an*.] Same as *myriapod*.

myriapodous (mī-rī-ap'ō-dus), *a.* [*<* *myriapod* + *-ous*.] Same as *myriapod*.

myriarch (mī-rī-ark), *n.* [*<* (Gr. *μυριαρχία*, *μυρία*, ten thousand, + *ἀρχαί*, ruler, *<* *ἀρχαί*, rule.)] A commander of ten thousand men.

myriare (mī-rī-ā), *n.* [= Pg. *myriare*, *<* F. *myriare*, *<* Gr. *μυρία*, ten thousand, + F. *are*, are see *are*.] A land-measure of 10,000 ares, or 1,000,000 square meters, equal to 247 105 acres.

Myrica (mī-rī'kē), *n.* [*<* NL (Linnaeus, 1737), *<* (Gr. *μύrica*, the tamarisk.)] A strongly marked genus of shrubs constituting the order *Myricaceae*, and characterized by staminate catkins, an ovary with one cell and one ovule, and the seed not lobed. About 45 species are known, found in temperate warm climates nearly throughout the world. The wax clad berries of *M. cerifera*, which abounds in the coast-sands of the Atlantic United States, yield bay

berry tallow, formerly in considerable use for candles, and employed as a domestic remedy for dysentery. Various other species as *M. cordifolia* of South Africa, afford a useful wax. Some yield edible fruits, as *M. Napa*, the yangmei of China, the sophora of 1st Indian mountain regions, and *M. Faya* of Madeira. The genus *Myrica*, readily recognized by the peculiar nervation of its leaves, is very abundant in the fossil state, and more than 150 fossil species have been described found in the Cretaceous and Tertiary formations of nearly all parts of the world in which these formations are found to contain vegetable remains.

Myricaceae (mī-rī-kā'sē-dē), *n. pl.* [*<* NL (Lindley, 1836), *<* *Myrica* + *-aceae*.] An order of dicotyledonous apetalous plants of the series *Unseriales*, consisting of the genus *Myrica*.

myrica-tallow (mī-rī'ka tal'ō), *n.* Same as *myrtle-wax*.

myricin, myricine (mī-rī'sin), *n.* [*<* *Myrica* + *-in*, *-ine*.] One of the substances of which wax is composed. Myricin is the matter left undissolved when wax is boiled with alcohol. It constitutes from 20 to 40 per cent. of the weight of beehive wax, and is a grayish white solid a palmitate of mellin.

myricyl (mī-rī'sil), *n.* [*<* *Myrica* + *-yl*.] Same as *mellinyl*.

myriet, *a.* A Middle English form of *merry*¹.

Myrina (mī-rī'nā), *n. pl.* [*<* NL, *<* (Gr. *μυρίνα*, var. *μυρίνα*, as if *<* L. *marinus*) a sea-fish (cf. *Murana*).] In Günther's system, a group of *Muraenidae platyschista*. They have gill openings separated by an interspace, nostrils labial tongue not free, and end of tail surrounded by the fin. The genus contains about 14 tropical or subtropical eels.

Myringa (mī-rī'nē), *n. pl.* [*<* NL, *<* *Myrina* + *-inae*.] A subfamily of *Ophichthidae*, having the tail surrounded by a fin as is usual in eels contrasted with *Ophichthinae*.

myringitis (mī-rī-nj'itis), *n.* [*<* NL, *<* *myringa*, the membrana tympani, + *-itis*.] In *pathol.*, inflammation of the membrana tympani.

Myriolepidinae (mir'-i-ō-lep-i-dī'nō), *n. pl.* [NL, < *Myriolepis* (-id-) + -inae.] A subfamily of *Chiroidei* exemplified by the genus *Myriolepis*. It includes chiroid fishes with blunt head, entire opercle, and obsolete anal spines, and was established for the reception of *M. zoster*, a marine fish found in rather deep water off the Californian coast.

myriolepidine (mir'-i-ō-lep-i-dīn), *a* and *n. I. a* Of or pertaining to the *Myriolepidinae*, or having their characters.

II. n A myriolepidine chiroid fish.

Myriolepis (mir'-i-ō'-pīs), *n.* [NL, < Gr *μύριοι*, ten thousand, + *λίπος*, a scale.] The typical genus of *Myriolepidinae*. These fishes are covered with many small scales on most parts of the body, head, and fins. Lockington, 1880.

myriophyllite (mir'-i-ō-fil'it), *n.* [LGr. *μυριόφυλλος*, with numberless leaves (see *myriophyllous*), + *-ίτης*.] A kind of fossil root with numerous fibers, found in the coal-measures.

myriophyllous (mir'-i-ō-fil'us), *a* [LGr. *μυριόφυλλος*, with numberless leaves, < (Gr *μύριος*, numberless, + *φύλλον*, leaf.) Laterally, having ten thousand leaves, specifically, in bot., having a large number of leaves.

Myriophyllum (mir'-i-ō-fil'um), *n.* [NL (Vahlant, 1719) (L. *myriophyllum*), < LGr. *μυριόφυλλον*, spiked water-milfoil, noun of *μυριόφυλλος*, with numberless leaves (see *myriophyllous*). Cf. *milfoil*.] A genus of dicotyledonous plants, the water-milfoil, belonging to the polypetalous order *Haloragaceae*, characterized by an ovary with two or four deep furrows. About 15 species are known, growing submerged in fresh water throughout the world. They are plume like, erect, creeping, or floating plants, with small sessile pinkish flowers solitary in the axils of the usually dissected leaves.

myriopod, Myriopoda, etc. More correct forms of *myriapod*, etc.

myriorama (mir'-i-ō-rā'mī), *n.* [NL, < Gr *μύριος*, numberless, + *όραμα*, view, < *όρᾶν*, see.] A picture made up of interchangeable parts which can be harmoniously arranged to form a great variety of picturesque scenes. The parts are usually fragments of landscapes on cards.

myrioscope (mir'-i-ō-skōp), *n.* [LGr. *μύριος*, numberless, + *σκοπεῖν*, view.] 1. A variation of the kaleidoscope, consisting of a square box having a sight-hole in front, and two plane mirrors at the rear arranged at a suitable angle. On horizontal rollers a piece of embroidery or other ornamental pattern is caused to traverse the bottom of the box, when the multiplied images condense in such a manner as to form geometrical patterns.

2. A form of this device used for exhibiting carpets, a carpet-exhibitor. The mirrors are so arranged as to repeat a carpet pattern in its correct relations, and thus show from a small piece how the carpet will look when laid down. It is sometimes supplied with an attachment for causing a strip bearing pieces of different carpets to pass through the machine so as to exhibit the different patterns in turn.

myriosporous (mir'-i-ō-spō'rus), *a* [LGr. *μύριος*, numberless, + *σπόρος*, a seed.] In bot., containing or producing a great number of spores.

myristic (mī-nis'tik), *a* [LGr. *μύριστα*.] Derived from or related to nutmeg — **Myristic acid**, an acid (C₁₄H₁₆O₄) found in *spermaceti*, oil of nutmeg, and some other vegetable oils, generally as a glyceride myristin.

Myristica (mī-nis'ti-kā), *n.* [NL, < LGr. *μύριστακός*, fit for anointing, < (Gr *μύρις*, anoint, <

ments, a single ovary-cell and ovule, and alternate leaves. About 80 species are known, mainly in tropical Asia and America. They are aromatic trees, with small white or yellow flowers, the leaves often pellucid-dotted, and the fleshy fruits split in two or four parts, disclosing an arilode usually colored, which incloses the hard seed. *M. fragrans* (*M. moscata*) is the nutmeg tree, a bushy evergreen, 40 or 50 feet high, native in the eastern Moluccas, cultivated in the Malay peninsula and islands, Penang, etc. See *mace* and *nutmeg*. For other species, see *benicabnut*, *dak*, *dolce wood*, and *nutmeg*.

2. [L. c.] In *phai*, the kernel of the seed of *Myristica fragrans*. It is aromatic and somewhat narcotic. See *nut* under *arilode* — 3. In zoöl., a genus of gastropods Swainson, 1840.

Myristicaceae (mī-nis-ti-kā'sē-sē), *n. pl.* [NL (Lindley, 1845), < *Myristica* + -aceae.] Same as *Myristicaceae*.

Myristicivora (mī-nis-ti-siv'ō-rā), *n.* [NL, see *myristicivorous*.] A genus of fruit-pigeons of the subfamily *Columbinae*, having the tail short and the plumage black and white, the nutmeg-pigeons.

myristicivorous (mī-nis-ti-siv'ō-rus), *a* [NL, < *Myristica* + *-ivorus*, devourer.] Devouring or habitually feeding upon nutmegs.

myristin (mī-nis'tin), *n.* [LGr. *μύριστα* + -in.] The crystalline constituent of oil of nutmeg, a glyceride of myristic acid.

myrkt, *a, n*, and *i*. A Middle English form of *myrk*.

myrmecobe (mer-mē-kōb), *n.* An animal of the genus *Myrmecobius*.

Myrmecobiidae (mēr-mē-kō-bī'i-dē), *n. pl.* [NL, < *Myrmecobius* + -idae.] The myrmecobes regarded as a family.

Myrmecobiinae (mēr-mē-kō-bī-i-nē), *n. pl.* [NL, < *Myrmecobius* + -inae.] A subfamily of *Dasyuridae*, sometimes elevated to rank as a family *Myrmecobiidae*, containing the single genus *Myrmecobius*, and distinguished from *Dasyurinae* by the long extensible tongue and larger number of molar teeth.

myrmecobiline (mer-mē-kō-bī-n), *a* and *n. I. a* Pertaining to the *Myrmecobiidae*, or having their characters.

II. n A member of the *Myrmecobiidae*.

Myrmecobius (mer-mē-kō-bī-us), *n.* [NL, < (Gr *μύρις* (μυρμική), an ant, + *βίος*, life.)] 1. A genus of insectivorous marsupials, typical of the subfamily *Myrmecobiinae*. The tongue is protrusile and vermiform, as in other ant-eaters. The teeth are more numerous than in any other extant mammalian quadruped. *M. yarrabensis*, of Australia, is about the size of a squirrel, of a chestnut-red color, the back fasciate with white bands on a dark ground. The animal lives on the ground, feeds on ants, and is known by the name of *ant-eater*.

2. In entom., a genus of dermestid beetles, erected by Lucas in 1846. The only species is *M. aegyptius*, an active little black beetle, one twelfth of an inch long, found in ants' nests in Algeria.

Myrmecoleon (mer-mē-kō-lē-on), *n.* [NL, < (Gr *μύρις* (μυρμική), ant-hon, < *μύρις* (μυρμική), ant, + *λεων*, lion.)] See *Myrmecoleon*.

myrmecological (mēr-mē-kō-lōj'i-kal), *a* [LGr. *μύρις* (μυρμική), ant-hon, < *μύρις* (μυρμική), ant, + *λογος*, word.] Of or relating to ants.

myrmecology (mēr-mē-kō-lōj'i), *n.* [LGr. *μύρις* (μυρμική), an ant, + *λογία*, < *λέγειν*, speak, see -ology.] That branch of entomology which treats of ants.

Myrmecophaga (mēr-mē-kōf'a-gā), *n.* [NL, fem. of *myrmecophagus* see *myrmecophagous*.] 1. The typical genus of ant-eaters of the family *Myrmecophagidae*. *M. jubata* is the great or maned ant-eater or ant-bear of South America. See *cut* under *ant-bear*, *Edentata*, and *zenarctid* — 2. In ornith., a genus of ant-birds same as *Formicarius*.

myrmecophage (mēr-mē-kōf'ā), *n.* An ant-eater of the genus *Myrmecophaga*.

Myrmecophagidae (mēr-mē-kōf'āj'i-dē), *n. pl.* [NL, < *Myrmecophaga* + -idae.] A South American family of vermilinguate edentate quadrupeds, typified by the genus *Myrmecophaga*, and alone representing the suborder *Vermilinguinae* of the order *Edentata* or *Bruta*, the ant-eaters or ant-bears. They are entirely toothless, with tubular

mouth, long worm-like protrusile tongue, short stout limbs, hairy body, bushy tail, and hind feet pentadactyl or tetradactyl. The family is divided into *Myrmecophaginae* and *Cyclotheriinae*.

Myrmecophaginae (mēr-mē-kōf'a-jī-nē), *n. pl.* [NL, < *Myrmecophaga* + -inae.] A subfamily of *Myrmecophagidae*, represented by the genera *Myrmecophaga* and *Tamandua*, with the fore feet pentadactyl and the third digit enlarged with a very long claw. There are 3 species — the maned ant-bear, *M. jubata*, the collared tamandu, *T. blattaria*, and the yellow tamandu, *T. longicaudata*.

myrmecophagine (mēr-mē-kōf'a-jīn), *a* and *n. I. a* Pertaining to the *Myrmecophaginae*, or having their characters.

II. n A member of the *Myrmecophaginae*.

myrmecophagous (mēr-mē-kōf'a-gus), *a* [LGr. *μύρις* (μυρμική), ant, + *φαγεῖν*, eat.] Ant-eating, specifically, of or pertaining to the *Myrmecophagidae*.

Myrmecophila (mēr-mē-kōf'i-lā), *n.* [NL, < *myrmecophilus* see *myrmecophilous*.] 1. A genus of crickets of the family *Gryllidae*, which live in ant-hills, and closely resemble cockroaches in form, though they are of diminutive size and great activity. *M. pergandei* is a North American species. *M. acervorum* is the commonest European species, another is *M. ochracea*.

2. *pl* [L. c.] *Myrmecophilous insects*, a general designation, having no classificatory implication. Among the insects which live in ant-hills asinquillines are included representatives of coleoptera, hymenoptera, lepidoptera, diptera, orthoptera, and homoptera, especially the first named of these, and some arachnids also come in the same category.

myrmecophilous (mēr-mē-kōf'i-lus), *a* [LGr. *μύρις* (μυρμική), ant, + *φιλος*, loving.] Fond of ants, applied to insects which live in ant-hills, also to plants which are cross-fertilized or otherwise benefited by ants.

In the preface to the descriptions of his exceedingly beautiful and well known *myrmecophilous* plants, Beccari puts forward the very view taken by Prof. Henslow.

Nature, XXXIX 172

Myrmecoleon (mēr-mē-kō-lē-on), *n.* [NL (Linnaeus, 1748), for *Myrmecoleon*, q. v.] A genus of *Myrmecoleonidae*, the ant-lions. See *ant-lion*. *M. ummaculatus* is the best known American species. *M. europaeus* and *M. formicarius* are found in Europe. Also *Myrmecoleon*.

Myrmecoleonidae (mēr-mē-kō-lē-on'i-dē), *n. pl.* [NL, < *Myrmecoleon* + -idae.] The ant-lion family of planipennine neuropterous insects. Also *Myrmecoleonidae*, *Myrmecoleonitidae*, *Myrmecoleonitidae*, *Myrmecoleonidae*, *Myrmecoleonidae*. See *ant-lion*.

Myrmica (mer-mī'kā), *n.* [NL, < Gr *μύρις* (μυρμική), ant.] The typical genus of *Myrmicinae* and of *Myrmecinae*, established by Latreille in 1802. It contains some of the commonest and best-known species, as the red ants.

Myrmicidae (mēr-mī-sī-dē), *n. pl.* [NL, < *Myrmica* + -idae.] A family of stinging ants of the order *Hymenoptera*, founded by Leach in 1817 on the genus *Myrmica*, and distinguished from all other ants by the two-jointed instead of one-jointed petiole of the abdomen.

Myrmicinae (mēr-mī-sī-nē), *n. pl.* [NL, < *Myrmica* + -inae.] The *Myrmicinae* as a subfamily of *Formicidae*.

myrmicine (mēr-mī-sīn), *a* Having the characters of the *Myrmicinae*, pertaining to the *Myrmicinae*.

Myrmidon (mēr-mī-don), *n.* [= F *myrmidon*, < L *Myrmidonis*, < Gr *Μυρμιδώνες*, a warlike people of Thessaly, sing *Μυρμιδόν* (see def 1).] 1. One of a warlike ancient Greek people of Phthiotis in Thessaly, over whom, according to the legend, Achilles ruled, and who accompanied him to Troy. Hence — 2. [L. c.] A devoted and unquestioning or unscrupulous follower, one who executes without scruple his master's commands. — **Myrmidons of the law**, bailiffs, sheriffs, officers, policemen, and other inferior administrative officers of the law. [Colloq.]

I found all these household treasures in possession of the *myrmidons of the law*. Thackeray

Myrmidonian (mēr-mī-dō'nī-an), *a*. [LGr. *μύρις* (μυρμική), ant-hon, < *μύρις* (μυρμική), ant, + *ων*, lion.] Of or pertaining to the *Myrmidons*.

Some beam of comfort yet on Greece may shine, If I but lead the *Myrmidonian* line. Pope, *Iliad*, xvi. 57

myrobalan (mī-rob'a-lan), *n.* [Formerly also *myrobalan*, *myrobalan*, *myrobalam*, *myrobalan*, *myrobalan*, etc., < F *myrobalan* = Sp *mirabolano* = Pg *myrobalano* = It *mirabolano*, < L *myrobalanum*, < Gr. *μυροβάλλανος*, < *μύρον*, an unguent, + *βάλλανος*, acorn, or similar fruit.] The dried drupaceous fruit of several species of *Terminalia*, chiefly *T. Bellerica* and *T. Chebula*.

myronate (mī'rō-nāt), *n* [*< myron(ic) + -ate*]. A salt of myronic acid.—**Potassium myronate**, a glucoside found in the seeds of black mustard, which, when wet under the action of a ferment, is resolved into potassium sulphate, glucose, and oil of mustard.

myronic (mī-rō-n'ik), *a*. [= *F myronique*, *< Gr μύρον*, an unguent, perfume, any sweet juice distilling from plants and used for unguents or perfumes]. An epithet used only in the following phrase—**Myronic acid**, an acid found in black mustard. See *myronate*.

myropolist (mī-rōp'ō-list), *n* [*< Gr μύρον-πώλης*, a dealer in perfumes, *< μύρον*, perfume, + *πώλης*, sell]. One who sells unguents or perfumery. *Johnson*

myrosin (mī'rō-sin), *n* [*< myr(onic) + -one + -in*]. A nitrogenous ferment contained in the seeds of black mustard, and possibly in horseradish-root. By its action potassium myronate is decomposed, forming potassium sulphate, glucose, and oil of mustard.

Myroxylon (mī-rok'si-lon), *n* [NL (*C. Linnæus*, *florus*, 1781), *< Gr μύρον*, a sweet juice from plants, + *ξύλον*, wood]. A genus of trees of the order *Leguminosæ* and the tribe *Sophoræ*, distinguished by a one-seeded pod winged at the base and anthers longer than the filaments. About 6 species are known, all South American, having the leaves and whitish flowers much as in the related *Myrospermum*. For species, see *balsam of Peru*, *balsam of Tolu*, and *Brazilian balsam* (all under *balsam*), *myrrh seed*, and *quinquina*.

myrrh (mēr), *n* [Now spelled according to the *L*, early mod *E murra*, *< ME murre*, *< AS myrra*, *myrra* = *OS myrra* = *D murra* = *OHG myrrā*, *MHG murra*, *G myrrhe* = *Sw Dan myrra* = *OF murre*, *F myrrhe* = *Sp murra* = *Pg myrrha* = *It muria*, *< L myrrha*, *myrrha*, *murra*, *< Gr μύρρα*, myrrh, the balsamic juice of the Arabian myrtle, *< Ai murr* (= *Heb mor*), myrrh, *< murr*, bitter. Cf *Marah*]. 1 A gummy resinous exudation from several species of *Commiphora* (*Balsamodendron*). The largest part, and the proper myrrh, is derived from *C. Myrrha*, a spiny shrub with scanty foliage, small green axillary flowers, and small oval fruits. The myrrh of Scripture was doubtless largely obtained from this plant. For a second kind, see *benzoin*. A third is from the same plant as the balm of Gilead (which see, under *balm*). These plants are found in parts of Arabia and eastern Africa. Myrrh is an astringent tonic. It is also used for incense, perfumery, and minor purposes. The myrrh carried by the Ishmaelites into Egypt is thought to have been the same as *ladanum*. See *Commiphora*, and compare *delphinium*.

They [the wise men] saw the young child with Mary his mother, and presented unto him gifts, gold, and frankincense, and myrrh. *Mat II 11*

A royal oblation of gold frankincense, and myrrh is still annually presented by the queen on the feast of Epiphany in the Chapel Royal in London, this custom having been in existence certainly as early as the reign of Edward I. *Encyc Brit.* XVII 121

2 The sweet cicely of Europe. See *Myrrhis* [Eng].—**India myrrh**. Same as *benzoin*.—**Turkey myrrh**, a former commercial name of the true myrrh.

myrrhic (mīr'ik), *a*. [*< myrrh + -ic*]. Pertaining to or obtained from myrrh as, *myrrhic acid*.

myrrhin (mēr'in), *n*. [*< myrrh + -in*]. The fixed resin of myrrh.

myrrhine (mēr'in), *a*. See *murrine*.

Myrrhis (mīr'is), *n* [NL (*Scopoli*, 1760), *< L. myrrhis*, *myrris*, *< Gr μύρρις*, a plant, sweet cicely, *< μύρρα*, myrrh see *myrrh*]. A genus of dicotyledonous plants of the order *Umbellifera* and the tribe *Ammineæ*, known by its long-beaked narrow fruit, almost winged, furrowed seed, and obscure oil-tubes. *M. odorata*, the sweet cicely or sweet chervil of Europe, the Caucasus and South America, is a long cultivated graceful plant with white flowers in compound umbels, finely divided leaves, and pleasant-flavored roots and stems. The only other species is *M. occidentalis* (perhaps better *Glycyrrhiza*), found in Oregon, etc.

myrrhol (mīr'ol), *n* [*< myrrh + -ol*]. The volatile oil of myrrh.

myrrhophore (mīr'ō-fōr), *n*. [*< Gr μύρρα*, myrrh, + *φορέω*, bearing, *< πέρω* = *E bear*]. Myrrh-bearer; specifically, in the *Gr Ch*, and in the *fine arts*, a name given to one of the Marys who came to see the sepulcher of Christ. They are usually represented as bearing vases of myrrh.

myrrh-plaster (mēr'plās'tér), *n*. A plaster made by incorporating with lead-plaster myrrh, camphor, and balsam of Peru.

myrrh-seed (mēr'sēd), *n*. The balsamic seed of *Myroxylon pubescens*, native of the United States of Colombia.

myrrhy (mēr'i), *a* [*< myrrh + -y*]. Smelling of, perfumed with, or producing myrrh.

The myrrhy lands.

Myrsinaceæ (mēr-si-nā'shins), *a* [NL (*Landley*, 1835), *< Myrsine + -acea*]. Same as *Myrsinæ*.

myrsinaceous (mēr-si-nā'shins), *a*. Belonging to resembling, or pertaining to the natural order *Myrsinæ* (*Myrsinaceæ*).

Myrsine (mēr'si-nē), *n* [NL (*Linnaeus*, 1737), *< Gr μύρσις*, a myrtle see *myrtle*]. A genus of dicotyledonous gamopetalous shrubs and trees, type of the natural order *Myrsinæ*, known by its single seed immersed in the placenta, and its laterally clustered flowers. There are about 80 species, mainly in tropical Asia Africa, and America, with small flowers and smooth rigid leaves, usually veined. *M. Africana* widely distributed in Africa, is called *African box* or *myrrh*. *M. melanophloeos* of the Cape of Good Hope has a tough close grained wood used in wagon work, and has been named *Cape beech*. *M. laeta* of the West Indies is called *black sassafras*. It is one of the bulby trees. *M. Hispanica* of South America and the West Indies extends into Florida.

Myrsinæ (mēr-si-nē), *n* [NL (*Bentham* and *Hooker*, 1876), *< Myrsine + -inæ*]. A natural order of trees and shrubs of the cohort *Primulales*, typified by the genus *Myrsine*, and characterized by its indehiscent fruit, one-celled ovary with five central placentas, and two or more ovules. About 500 species in 21 genera are known, all tropical. Both their usually white or pink flowers and their alternate leaves are filled with resinous glands.

myrtle, *n* [ME *myrt*, *< L. myrtus*, myrtle see *myrtle*]. Myrtle.

The seed of myrt, If that thou maist it gete,
Of birch, of yew, crabbe, and wild olyve,
Lete yow hit in now and now for change of mete
Palladius, Husbandrie (E. T. 18), p. 21

Myrtaceæ (mēr-tā'sē-ē), *n* [NL (*R. Brown*, 1814), *< Myrtus + -aceæ*]. The myrtle family, an order of dicotyledonous trees and shrubs of the polypetalous cohort *Myrtales*, typified by the genus *Myrtus*, and known by the numerous stamens and leaves without stipules, generally opposite, dotted, and with a marginal vein. There are about 1,800 species of 70 genera and 4 tribes, natives of warm climates, usually with racemed flowers and pervaded by a fragrant volatile oil. Some are valuable as spices, as myrtle, clove, pimento; others for edible fruit, as the guava, jamunade, monkey pot, and Brazil nut, others for timber, as the gum trees (*Eucalyptus*) of Australia and the iron trees (*Acacia*) of Java.

myrtaceous (mēr-tā'shins), *a* [*< L. myrtaceus*, of myrtle, *< myrtus*, myrtle see *myrtle*]. In bot., of, resembling, or pertaining to the natural order *Myrtaceæ*.

Myrtales (mēr-tā'sē-ē), *n* [NL (*Landley*, 1833), *< Myrtus*, *q. v.*]. A cohort of the polypetalous series *Calycifloræ*, known by its undivided style and two or more ovules in each cell of the ovary, which is united to the calyx, or included in it. It comprises 6 orders, of which *Myrtaceæ* is the chief and *Onagraceæ* the best represented in the United States.

Myrtææ (mēr-tē-ē), *n* [NL (*A. L. de Jussieu*, 1825), *< Myrtus + -ææ*]. A tribe of shrubs and trees of the order *Myrtaceæ*, typified by the genus *Myrtus*, and characterized by an ovary of two or more cells, the fruit an indehiscent berry or drupe, and the leaves opposite and dotted. It includes 18 genera, among them *Eugenia* (clove, etc.) and *Padium* (guava).

myrtiform (mēr'ti-fōrm), *a*. [= *F. myrtiforme* = *Sp. myrtiforme* = *Pg. myrtiforme* = *It. myrtiforme*, *< L. myrtus*, myrtle, + *forma*, form]. Resembling myrtle or myrtle-berry.—**Myrtiform fossa**. See *fossa*.

myrtle (mēr'tl), *n*. [Formerly *myrtle*, *myrtile*, *< OF myrtill*, *myrtile*, *myrtile*, a myrtle-berry, also the lesser kind of myrtle (= *Pg. myrtillo* = *It. myrtillo*), dim of *myrtus*, *myrtus*, *F. myrtus*, *Sp. myrtus* = *Pg. myrtus* = *It. myrtus* (= *ME myrt* see *myrt*), *< L. myrtus*, *myrtus*, *myrtus*, *< Gr μύρτος* (also *μύρτις*, *μύρτις*), *< Pers mūrda*, the myrtle]. 1 A plant of the genus *Myrtus*, primarily *M. communis*, the classic and favorite common myrtle. It is a bush or small tree with shining evergreen leaves and fragrant white flowers, common in the Mediterranean region. In ancient times it was sacred to Venus, and its leaves formed wreaths for bloodless victors; it was also a symbol of civil authority. It is used in modern times for bridal wreaths. The plant is an important astringent. Its aromatic berries have been used to flavor wine and in cookery. Its flowers, as also its leaves, afford perfumes, the latter used in sachets, etc. Its hard mottled wood is prized in turnery. *M. Lemai* and *M. Mili*

[U S.]—**Sand-myrtle**, a smooth, dwarf shrub, *Laophyllium bursifolium* of the *Kricaceæ*, found in the eastern United States. **Tasmania myrtle**. See *Fagus*.—**Wax-myrtle**, *Myrica cerasera*.**

myrtle-berry (mēr'tl-ber'i), *n*. The fruit of the myrtle.

myrtle-bird (mēr'tl-berd), *n*. The golden-crowned warbler or yellow-rump, *Dendroica coronata*. It is one of the most abundant of the warblers in most parts of the United States and Canada, is migratory and insectivorous, breeding in the far north, and wintering in most of the States east of the Mississippi. It is about 6½ inches long, slate blue streaked with black, below white streaked with black, the throat and large blotches in the tail white, the rump a crown spot, and each side of the breast bright yellow, bill and feet black.

myrtle-green (mēr'tl-grēn), *n*. A rich pure green of full chroma but low luminosity.

myrtle-wax (mēr'tl-waks), *n*. The product of the *Myrica cerifera*. Also called *myrica-tallow*.

Myrtus (mēr'tus), *n* [NL (*Tournefort*, 1700), *< L. myrtus*, *< Gr μύρτος*, myrtle see *myrtle*]. A genus of shrubs, type of the natural order *Myrtaceæ* and of the tribe *Myrtææ*. It is characterized by the numerous ovules in the usually two or three ovary cells, small cotyledons, and the calyx lobes fully formed in the bud. There are over 100 species, mostly in South America beyond the tropics, some in tropical America, and a dozen in Australia. The typical species, however, *M. communis*, is native in Asia, and has long been naturalized in southern Europe. See *myrtle*.

Myrus (mī'rus), *n* [NL (*< Gr μύρος*, a kind of sea-eel). A genus of eels, typifying the subfamily *Myrina*.

myself (mī-sel'f), *pron* [*< ME my selve*, *me selfe*, *my selve*, *me selve*, *my-selven*, *< AS gen mīn selfes*, dat *mē selfum*, acc *mē selfu*, nom *ic selfa*, being the pron *ic*, *mī*, with the adj *self* in agreement acc *mē* and *self*. Cf *himself*]. An emphatic or reflexive form of the first personal pronoun *I* or *me*, either nominative or (as originally) objective. In the nominative it is always used for emphasis, in apposition with *I* or *alone*, in the objective it is either reflexive or emphatic, being, when emphatic, usually in apposition with *me*. Compare *himself*, *herself*, etc.

Mystacina (mis-tā-si-nā), *n* [NL, < Gr *μύσταξ*, the upper lip, the beard upon it (see *mystax*), + *-ina*] A genus of molossid emballonurine bats. The tail perforates the interfemoral membrane and lies upon its upper surface, the middle finger has three phalanges, the wing membrane has a thickened leathery edge, the soles of the feet are expansive and somewhat sucker-like, and the pollex and hallux have each a supplementary claw. The single species, *N. tuberculata*, is confined to New Zealand, composing with *Chalinobates* the whole indigenous mammalian fauna. The peculiarities of the genus cause it to be made by some authors the type of a subfamily *Mystacinae*.

Mystacinae (mis-tā-si-nē), *n pl* [NL, *pl* of *Mystacina*] A group of molossid *Emballonuridae*, represented by the genus *Mystacina*.

mystacine (mis-tā-sin), *a* Having the character of *Mystacina*, pertaining to the *Mystacina*.

mystagogic (mis-tā-gōj'ik), *a* [*< mystagoge* + *-ic*] Having the character of, relating to, or connected with a mystagogue or mystagogy, pertaining to the interpretation of mysteries. *Jer. Taylor*, *Rules of Conscience*, in 4.

mystagogical (mis-tā-gōj'ik-āl), *a* [*< mystagoge* + *-al*] Same as *mystagogic*.

mystagogue (mis-tā-gog), *n* [*< F mystagogue* = *Sp. mystagogo* = *Pg. mystagogo* = *It. mystagogo*, < *L. mystagogus*, < Gr *μύσταγος*, one introducing into mysteries, < *μύστος*, one initiated (see *mystic*), + *άγω*, lead (> *αγώγος*, a leader)] 1 One who instructs in or interprets mysteries, one who initiates. — 2 Specifically, in the early church, the priest who prepared candidates for initiation into the sacred mysteries. *Smith*, *Diet. Christ. Antiq.* — 3 One who keeps church relics and shows them to strangers. *Barley*.

mystagogus (mis-tā-gō'gus), *n, pl* *mystagoga* (-jī) [*L. see mystagogue*] Same as *mystagogue*.

That true interpreter and great *mystagogus*, the Spirit of God. *Dr H. Mori*.

Bp. Horne, *Works*, IV. xxi.

God moves in a *mysterious* way

His wonders to perform.

He plants his footsteps in the sea

And rides upon the storm.

Couper, *Light Shining out of Darkness*.

2 Expressing, intimating, or implying a mystery as, a *mysterious* look, his manner was very mysterious and important = *Syn. Mysterious*, *Mystic*, *Caballistic*, dark, occult, enigmatical, incomprehensible, inscrutable. *Mysterious* is the most common word for that which is unknown and excites curiosity and perhaps awe. The word is sometimes used where *mystic* would be more precise. *Mystic* is especially used of that which has been designed to excite and baffle curiosity, involving meanings in signs, rites, etc., but not with sufficient plainness to be understood by any but the initiated. *Mystic* is used poetically for *mysterious*, it may imply the power of prophesying. The meaning of *caballistic* is shaped by the facts of the Jewish (abala). The word is therefore applicable especially to occult meanings attributed to written signs.

mysteriously (mis-tō'ri-us-ly), *adv* In a mysterious manner, by way of expressing or implying a mystery, obscurely, as, he shook his head mysteriously.

mysteriousness (mis-tō'ri-us-ness), *n* 1 The quality of being mysterious, obscurity, the quality of being hidden from the understanding and calculated to excite curiosity or wonder. — 2 That which is mysterious or obscure. *Jer. Taylor*.

3 The behavior or manner of one who wishes or affects to imply a mystery as, he told us with much *mysteriousness* to wait and see.

mysterize (mis'te-iz), *v t* [*< myster-y* + *-ize*] To interpret mystically.

The Caballists, *mysterizing* their ensigns, do make the particular ones of the twelve tribes accommodable unto the twelve signs in the zodiac, and twelve months in the year. *Sir T. Browne*, *Vulg. Err.*, v. 10.

mystery¹ (mis'te-ri), *n, pl* *mysteries* (-riz) [Formerly also *mistry*, < *ME. mystere* = *F. mystère* = *Sp. misterio* = *Pg. misterio* = *It. misterio*, < *L. mysterium*, < Gr *μυστήριον*, secret doctrine or rite, mystery, < *μύστος*, one initiated, < *μύω*, initiate into the mysteries, teach, instruct, < *μύω*, close the lips or eyes, < *μύ*, a slight sound with closed lips] 1 *pl* In ancient religions, rites known to and practised by certain initiated persons only, consisting of purifications, sacrifices, offerings, processions, songs, dances, dramatic performances, and the like as, the Eleusian *mysteries*. Hence — 2 (a) In the Christian Church, especially in the early church and in the Greek Church, a sacrament. This name originally had reference partly to the nature of a sacrament itself as concealing a spiritual reality under external form and matter, and partly to the fact that no catechumen was instructed in the doctrine of the sacraments (except partially as to baptism) or admitted to be present at their administration except through baptism as an initiation. (b) *pl* The consecrated elements in the eucharist, in the singular, the eucharist.

My duty is to exhort you to consider the dignity of that holy *mystery* (the Holy Sacrament), and the great peril of the unworthy receiving thereof.

Book of Common Prayer, Communion Office, First Exhortation.

(c) Any religious doctrine or body of doctrines that seems above human comprehension.

They count as fables the holy *mysteries* of Christian Religion. *Ascham*, *The Scholemaster*, p. 82.

Great is the *mystery* of godliness. *1 Tim. iii. 16*.

3 In general, a fact, matter, or phenomenon of which the meaning, explanation, or cause is not known, and which awakens curiosity or inspires awe, something that is inexplicable, an enigmatic secret.

'Twas you incensed the rabble

Cats, that can judge as fitly of his worth

Over whose actions the hypocrisy of his youth, and the conclusion of his old age, threw a singular *mystery*.

Macaulay, *History*.

Mystery does indeed imply ignorance, and in the removal of both the principle of curiosity is involved, but there may be ignorance without *mystery*.

Mark Hopkins, *Essays*, p. 10.

4 A form of dramatic composition much in vogue in the middle ages, and still played in some parts of Europe in a modified form, the characters and events of which were drawn from sacred history.

Properly speaking, *Mysteries* deal with Gospel events only, their object being primarily to set forth, by an illustration of the prophetic history of the Old Testament, and more particularly of the fulfilling history of the New, the central mystery of the Redemption of the world, as accomplished by the Nativity, the Passion, and the Resurrection.

A. W. Ward, *Eng. Dram. Lit.*, I. 23.

mystery² (mis'te-ri), *n; pl* *mysteries* (-riz) [Commonly confused with *mystery*¹, to which it has been accented in spelling, prop. *mistry*, < *ME. misterie*, *mysterie*, for *mister*, *mistere*, *mys-*

See *flabellum*. — **Mystical sense of Scripture**, a sense to be apprehended only by spiritual experience. — **Mystical theology**, the knowledge of God or of divine things, derived not from observation or from argument, but wholly from spiritual experience, and not discriminated or tested by the reason.

mystically (mis'ti-kal-ly), *adv* In a mystic manner, or by an act implying a secret meaning, in *Greek liturgies*, in a low or inaudible voice, secretly. See *mystic recitation*, under *mystic*.

mysticalness (mis'ti-kal-ness), *n* The quality of being mystical. *Bailey*, 1727.

Mysticete (mis'ti-sē'tē), *n pl* [NL, irreg for **mystacocete*, < Gr *μύσταξ*, the upper lip (see *mustache*), + *κίτος*, *pl κήτις*, a whale. See *Cete*³] A suborder of *Cete* or *Cetacea*, having no teeth developed, the upper jaw being provided with baleen plates, the baleenoid whales or whalebone-whales opposed to *Denticete*. The supra-maxillary bone is produced outward in front of the orbits, the ram of the lower jaw remain separate, the nasal bones project forward, and the olfactory organs are well developed. There are two families, *Baleenopteridae* and *Balaenidae*. See cut under *Balaenidae*.

mysticete (mis'ti-sēt), *a* [*< NL Mysticete*] Having baleen instead of teeth in the upper jaw, belonging to the *Mysticete*.

mysticism (mis'ti-sizm), *n* [= *F. mysticisme* = *Sp. misticismo* = *Pg. mysticismo* = *It. misticismo*, as *mystic* + *-ism*.] 1 The character of being mystic or mystical; mysticalness. — 2. Any mode of thought, or phase of intellectual or religious life, in which reliance is placed upon a spiritual illumination believed to transcend the ordinary powers of the understanding.

The lofty *mysticism* of his (Plato's) philosophy.

D. Stewart, *Philos. Essays*, II. 5.

Mysticism is a phase of thought, or rather perhaps of feeling, which from its very nature is hardly susceptible of exact definition. It appears in connection with the endeavor of the human mind to grasp the divine essence or the ultimate reality of things, and to enjoy the blessedness of actual communication with the Highest.

Angels, *Book*, XVII. 128.

2. A superfamily or suborder of bivalves, comprising the families *Mytilidae*, *Aviculidae*, *Pranidae*, and those differentiated from them
mytilacean (mit-i-lā'sē-an), *a* and *n*. I. *a* Mussel-like, mytiloid or mytiliform; pertaining to the *Mytilacea*

II. *n* A mussel or some similar shell, any member of the *Mytilacea*

mytilaceous (mit-i-lā'shi-us), *a* [*NL* *Mytilus* + *-aceus*] Resembling a mussel, mytiliform, mytiloid, of or pertaining to the *Mytilacea*

Mytilaspis (mit-i-las'pīs), *n* [*NL* (Targioni-Tozzetti, 1868), < *Gr* *mytilos*, a sea-mussel, + *aspis*, a round shield] A large and important genus of scale-insects, of the homopterous family *Coccidae* and subfamily *Diapriinae*. They belong among the armored scales, and have the scale long narrow, more or less curved, with the exuviae at the anterior extremity. The genus is cosmopolitan, as are many of its species. *M. pomorum* is the common oyster shell scale insect of the apple. Some discussion has arisen respecting the precedence of this genus or *Lepidoaspis* of Shiller, proposed in January, 1868, but most systematists retain *Mytilaspis* as the generic name. See cut under *scale insect*.

Mytilidae (mī-tīl'i-dē), *n* *pl* [*NI* (Flöming, 1828), < *Mytilus* + *-idae*] A family of bryozoan (bryozoanous) asiphatate bivalve mollusks, typified by the genus *Mytilus*, the mussels. The shell is equivalve, inequilateral thickly coated with epidermis, with a weak and generally toothless hinge and marginal ligament. The animal is diuysian, with a large posterior and a small anterior muscle. The mantle is united by its margins behind into a single rudiment of an anal siphon. A well developed byssus is always present. The species are mostly marine. *Mytilus*, *Modiolus*, and *Lathodromus* are representative genera. These and their allies constitute the subfamily *Mytilinae*. See cuts under *Mytilus*, *Modiolus*, *Dreissenidae*, and *date shell*.

mytiliform (mī-tīl'i-fōrm), *a* [*L* *mytilus* (see *Mytilus*), a mussel, + *forma*, form] Shaped like a mussel-shell, resembling a mussel, mytiloid

Mytilinae (mī-tīl'i-nē), *n* *pl* [*NL*, < *Mytilus* + *-inae*] A subfamily of *Mytilidae*, represented by the genus *Mytilus* and closely related forms

mytilite (mī-tīl'i-ī), *n* [*NL* *Mytilus* + *-ite*] A fossil mussel-shell like, or supposed to be, a member of the genus *Mytilus*, or referred to an old genus *Mytilites*.

mytiloid (mī-tīl'i-ōid), *a* and *n* [*L* *mytilus* (see *Mytilus*), a mussel, + *oides*, form] I. *a* Like a mussel, mytiliform, of or pertaining to the *Mytilidae*

II. *n* A member of the family *Mytilidae*, a mussel

mytilotoxine (mī-tīl'i-tōk'sin), *n* [*Gr* *mytilos*, a sea-mussel, + *toxos* (toxic), poison, + *-ine*] A leucamine (C₁₅H₁₅N₂O₂) found in the common mussel. It is an active poison.

Mytilus (mī-tīl'i-us), *n* [*NL*, < *L* *mytilus*, *mytilus*, < *Gr* *mytilos*, *mytilos*, a sea-mussel, < *μυ*, a shell-fish see *murex* and *nucula*] A genus of bivalves to which very different limits have been assigned. In modern systems it is the typical genus of *Mytilidae* characterized by its terminal umbones. *M. edulis* is the commonest mussel, found on most coasts, adhering by the byssus in multitudes to rocks, submerged wood, etc. They are often used for food, sometimes cultivated, and used in large quantities for manure. Also written *Mytilus*, *Mytilus*.

myxa (mik'sā), *n*, *pl* *myxæ* (-sē) [*NL*, < *Gr* *μύξα*, nostril, beak, also mucus see *mucus*] In *ornith*, the terminal part of the under mandible of a bird, as far as the symphysis or gonys extends, corresponding to the *dentum* of the upper mandible. [Little used.]

myxedema (mik-sē-dē'mā), *n* [*Gr* *μύξα*, mucus, + *Edema*] A disease having the following characters: (1) An increase and degeneration of connective tissue over the body, so that it yields an extraordinary quantity of mucus and hence an edematoid condition of the skin which does not however, pit on pressure. This is accompanied by dystrophy of epidermic structures and failure of dermal secretions, anæsthesia, paræsthesia, neuralgia, and digestive troubles also are complicated. (2) Muscular and mental sluggishness which may advance to extreme dementia. Abnormal temperature in most cases and high arterial tension in many. (3) Atrophy or other disease of the thyroid gland. The disease usually occurs in women over forty years of age, but has been observed in men and children. Its course is chronic, lasting six years and upward and progressive, with occasional lulls and sometimes temporary improvement.

myxedematous (mik-sē-dem'i-tus), *a* [*Gr* *myxedema* + *-ous*] Pertaining to, of the nature of, or affected with myxedema

Myxine (mik-ai'nē), *n*. [*Gr* *μύξα*, slime, + *-ine*] A genus of myxins which have a very slimy body and attach themselves to fishes by means of their sucker-like mouth, typical of the family *Myxiniidae*, the hags. See cut under *hag*, 3.

Myxiniidae (mik-ai-ni'i-dē), *n* *pl* [*NI*, < *Myxine* + *-idae*] A family of hyperotretous marsipobranchs, cyclostomes, or myxonts, represented by the genus *Myxine*. (a) In Gill's ichthyological system, hags with six pairs of branchial sacs which open by ducts confluent with an inferior median canal discharging by one aperture. These hags have an elongate eel like form, and live in the colder waters of both the northern and the southern hemisphere. They are destructive to other fishes. Often when a fish is caught upon the line, they bore into the body and feed upon the flesh. They are known as *hags*, *hagfishes*, *slime-eels*, and *suckers*. (b) In Günther's system, a family of cyclostomatous fishes whose nasal duct penetrates the palate, including the *Myxiniidae* proper and the *Heptatremitidae* or *Edellodontidae*.

myxinoid (mik-ai-ni-ōid), *a* and *n* I. *a* Pertaining to the *Myxiniidae* or *Myxinoidea*, or having their characters

II. *n* A myxont (a) of the family *Myxiniidae* or *Myxinoidea*, or (b) of the order *Myxinoidea*

myxochondroma (mik'sō-kon-drō'mā), *n*, *pl* *myxochondromata* (-mā-tā) [*NL*, < *Gr* *μύξα*, mucus, + *NL* *chondroma*, q v] A tumor composed of mucous tissue mixed with cartilage, myxoma united with chondroma.

myxofibroma (mik'sō-fi-brō'mā), *n*; *pl* *myxofibromata* (-mā-tā) [*NL*, < *Gr* *μύξα*, mucus, + *NL* *fibroma*, q v] A tumor composed of mucous mixed with connective tissue

Myxogastres (mik-sō-gas'trēs), *n* *pl* [*NL* (Fries), < *Gr* *μύξα*, mucus, + *γαστήρ*, stomach] Same as *Myxomycetes*

myxogastric (mik-sō-gas'trik), *a* [*NL* *Myxogastris* + *-ic*] Same as *myxogastrous*

myxogastrous (mik-sō-gas'trus), *a* [*NL* *Myxogastris* + *-ous*] Pertaining to the *Myxogastrics*

myxolipoma (mik'sō-lī-pō'mā), *n*, *pl* *myxolipomata* (-mā-tā) [*NL*, < *Gr* *μύξα*, mucus, + *NL* *lipoma*, q v] A tumor composed of mucous mixed with fatty tissue

myxoma (mik-sō'mā), *n*, *pl* *myxomata* (-mā-tā) [*NL*, < *Gr* *μύξα*, mucus, + *-oma*] A tumor consisting of mucous tissue—that is, a tissue with round, fusiform, or stellate cells in a transparent, semifluid, intercellular substance containing a large amount of mucus. Also called *collumma*.

myxomatous (mik-sōm'a-tus), *a* [*myxoma* + *-ous*] Pertaining to a myxoma, affected with myxoma

Myxomycetaceæ (mik-sō-mī-sē-tā'sē-dē), *n* *pl* [*NI*, < *Myxomycetes* + *-aceæ*] Same as *Myxomycetes*

Myxomycetes (mik'sō-mī-sē'tēz), *n*, *pl* [*NI*, < *Gr* *μύξα*, mucus, + *μύκης*, pl *μύκη*, a mushroom, fungus] A group of fungus-like organisms, the slime-molds or slime-fungi, belonging according to the classification of De Bary to the *Mycetozoa*, and numbering about 300 species. They form slimy yellow, brown, or purple (never green) masses of motile protoplasm during the period of active growth, and are then destitute of cell wall and nucleus. Under certain conditions they secrete a cellulose wall and pass into a resting state. This resting state is brought about either by the absence of the requisite moisture, producing larger, somewhat irregular masses, the so-called sclerotium stage, or when the plasmodium seems to have concluded its vegetative period, the protoplasm then becoming heaped into a mass which breaks up internally into a large number of rounded bodies (the spores), each one of which is provided with a cell wall. Under proper conditions these spores burst their walls and become motile nucleated masses of protoplasm (swarm spores) which divide separately by simple fission. After a few days two or more of these swarm-spores coalesce and form new plasmodia, which differ only in size from the original. They occur on decaying logs, tan bark, decaying mosses, etc. See *Mycetozoa*.

myxomycetous (mik'sō-mī-sē'tus), *a* [*NL* *Myxomycetes* + *-ous*] Pertaining to the *Myxomycetes*

myxont (mik'son), *n* [*L* *myxon*, *myxo* + *-ont*] (*Gr* *μύξων*, also *μύξινος*, a smooth sea-fish, a kind of mullet, appar < *μύξα*, mucus see *mucus*.) A mullet of the family *Mugilidae*

myxopod (mik'sō-pod), *n*, and *a* [*NL* *myxopod* + *-pod*], < *Gr* *μύξα*, mucus, + *πούς* (pod-) = *F foot*] I. *n* A protozoan animal possessing pseudopodia, as distinguished from a *mastigopod*, one which has cilia or flagella, one of the *Myxopoda*. See cut under *Protomyxa*.

II. *a* Same as *myxopodous*

Myxopoda (mik-sop'ō-dē), *n* *pl* [*NL*: see *myxopod*] Protozoans whose locomotive appendages assume the form of pseudopodia synonymous with *Rhizopoda*. *Huxley*
myxopodous (mik-sop'ō-dus), *a* Of or pertaining to the *Myxopoda*, possessing pseudopodia. Also *myxopod*.

myxosarcoma (mik'sō-sār-kō'mā), *n*; *pl* *myxosarcomata* (-mā-tā) [*NL*, < *Gr* *μύξα*, mucus, + *σάρκωμα*, a fleshy excrecence. see *sarcoma*.] A tumor composed of mucous and sarcomatous tissue.

myxosarcomatous (mik'sō-sār-kom'ā-tus), *a* [*myxosarcoma* + *-ous*] Pertaining to a myxosarcoma

Myxospongia (mik-sō-spon'jā), *n*, *pl* [*NL*, < *Gr* *μύξα*, mucus, + *σπογγία*, a sponge see *sponge*] A division of the *Spongia* or *Porifera*, established for the reception of the genus *Hali-sarcon*, consisting of certain gelatinous sponges

myxospore (mik'sō-spōr), *n* [*Gr* *μύξα*, mucus, + *σπόρος*, seed] In certain fungi, a spore produced in the midst of a gelatinous mass, without evident differentiation of ascus or basidium as in ascospores or basidiospores

myxosporous (mik-sō-spō'rus), *a* [*myxospore* + *-ous*] Containing, producing, or resembling a myxospore.

myxotheca (mik-sō-thē'kā), *n*, *pl* *myxothecæ* (-sē) [*NL*, < *Gr* *μύξα*, mucus, + *θήκη*, a sheath] The inferior ungueorn of a bird's bill, or horny sheath of the end of the lower mandible, corresponding to the *derotheca* of the upper mandible

Myzomela (mī-zom'e-lā), *n* [*NI*, < *Gr* *μύζω*, mutter, + *μέλος*, song] The typical genus of *Myzomelinae*, containing most of the species of the subfamily, nearly 30 in number. The bill is long and slender, and curved, the tail is two thirds as long as the wing, the coloration of the males is chiefly black and red, with or without yellow on the under parts, and that of the females is generally plain olive above. *M. cardinalis* is known as the cardinal honey eater, *M. sanguinolenta* as the sanguineous or cochineal creeper, the former inhabits New Hebrides, the latter Australia.

Myzomelinae (mī-zom'e-lī'nē), *n* *pl* [*NL*, < *Myzomela* + *-inae*] A subfamily of *Melephagidae*, typified by the genus *Myzomela*

myzomeline (mī-zom'e-līn), *a* Pertaining to the *Myzomelinae*, or having their characters

myzont (mī-zont), *a* and *n* [*NL* *myzom* (in *pl* *Myzontes*), < *Gr* *μύζω* (μύζων-), ppr of *μύζω*, suck] I. *a* Sucking or suetorial, as a lamprey or hag, of or pertaining to the *Myzontes*, cyclostomous or marsipobranchiate, as a fish

II. *n* Any member of the *Myzontes*, a lamprey or hag

Myzontes (mī-zon'tēz), *n* *pl* [*NL*, *pl* of *myzom* see *myzont*] A class of vertebrates in which the skull is incompletely developed and there is no lower jaw. The brain is distinctly developed. The heart is also well developed and partitioned into an auricle and a ventricle. The gills have a pouch like form. In the adult the mouth is circular and suetorial. The *Myzontes* are the lampreys and hags, representing two orders, *Hyperoartia* and *Hyperotreta*. Also called *Cyclostomes*, *Marsipobranchii*, and *Monorhina*.

Myzostomida (mī-zō-stom'i-dā), *n* *pl* [*NL*, < *Myzostomum* + *-ida*] An order of doubtful affinities, referred by some to the worms and by others approximated to the mites. It comprises symmetrical animals provided with an external chitinous cuticle, five pairs of movable parapodia, each with a hook and supporting rod, and an alimentary canal with oral and anal apertures, through which latter the eggs are extruded. They are parasitic on and in crinoids. Also *Myzostomata*.

Myzostomidae (mī-zō-stom'i-dē), *n* *pl* [*NL*, < *Myzostomum* + *-idae*] A family of *Myzostomida* with ramified alimentary canal, parapodia connected by muscles which converge to a central muscular mass, body-cavity divided into paired chambers by incomplete septa, and usually four pairs of suckers. They are hermaphrodite or dioecious, the ova are evacuated through a cloaca, and the male generative apertures are situated laterally.

myzostomous (mī-zōs'tō-mus), *a* Of or pertaining to the *Myzostomida* or having their characters

Myzostomum (mī-zōs'tō-mum), *n* [*NL*, < *Gr* *μύζω*, suck, + *στόμα*, the mouth.] The typical genus of *Myzostomida*, comprehending certain small creatures which are parasitic upon crinoids. They are not over one fifth of an inch in length, and have the form of a flattened disk. *Stebold*, 1843, after *Myzostoma* of Leuckart, 1827.

Sea mussel (*Mytilus edulis*) dissected

1 The fourteenth letter and eleventh consonant in the English alphabet, having a corresponding place also in the alphabets from which ours comes. The comparative scheme of forms in these alphabets and in the Egyptian (see 4) is as follows

The value of the character has been the same through the whole history of its use. It stands for the "dental" nasal, the nasal sound corresponding to *d* and *t*, as does *m* to *b* and *p*, and *ng* to *g* and *k*. This sound, namely, implies for its formation the same check or mute contact as *d* and *t*, with sonant vibration of the vocal cords as in *d*, and further with enclosure of the passage from the mouth into the nose, and nasal resonance there. Among the nasals, it is by far the most common in English pronunciation (more than twice as common as *m*, and eight times as common as *ng*). While all the nasals are semivocalic or liquid, *n* is the only one which (like *l*, but not more than half as often) is used with vocalic value in syllable making, namely in unaccented syllables, where an accompanying vowel, formerly uttered, is now silenced: examples are *broken*, *rotten*, *open*, *leaven*, *reason*, *even*, such form on an average about one in eight hundred of English syllables. The sign *n* has no variety of sounds, but before *ch*, *y* in the same syllable (as in *unch*, *hymn*) it takes on a slightly modified—a palatalized—character, and similarly it is gutturalized or pronounced as *ny*, before *g* and *q* (hard), as in *ink*, *finger*, and its digraph *ny* (see 7) is the usual representative of the guttural or back palatal nasal which in none of our alphabets has a letter to itself. *N* is doubled under the same circumstances as other consonants and in a few words (as *kun*, *damn*, *hymn*) is silent. In the phonetic history of our family of languages, *n* is on the whole a constant sound—that is to say, there is no other sound into which it passes on a large scale, but its loss, with accompanying vowel modification, has been a frequent process.

2 As a medieval numeral, 90, and with a stroke over it (*N*), 90,000.—3 In *chem*, the symbol for nitrogen.—4 [*l* *c* or *cap*] In *math*, an indefinite constant whole number, especially the degree of a quantic or an equation, or the class of a curve.—5 An abbreviation (*a*) of *north* or *northern*, (*b*) [*l* *c*] of *noun* (so used in this work), (*c*) [*l* *c*] of *neuter*, (*d*) [*l* *c*] of *nail* (or *nail*), a measure.

na (nā), *adv*. An obsolete or dialectal (Scotch) form of *no*!

Na. In *chem*, the symbol for sodium (NL *natrum*).

N. A. An abbreviation (*a*) of *North America*, or *North American*, (*b*) of *National Academy*, or *National Academician*, (*c*) in *microscopy*, of *numerical aperture* (see *objective*).

naam, *n*. An archaic form of *nam*?

naamharr (nām'hār), *n*. [Australian] The prickly tea-tree, *Melaleuca styphelioides*, of New South Wales. It is a tall tree with hard wood, almost imperishable under ground, the bark in thin layers, used for thatching, etc.

nab¹ (nab), *r* *t*, *pret* and *pp* *nabbed*, *ppr* *nabbing* [Formerly also *knab*, as var. of *knab*¹, but also *nap*, < Sw. *nappa* = Dan. *nappe*, catch, snatch at, seize see *nap*⁵] To catch or seize suddenly or by a sudden thrust and grasp. (*a*) To seize and make off with as, to nab a purse. (*b*) To capture or arrest as, he was nabbed by the police. [*colloq*]

Nabalus (nab'a-lus), *n*. [NL (Cassini, 1826), according to Gray so called (in allusion to its lyrate leaves) < Gr. *vaβa*, a harp, according to others, from a N Amer name for the rattlesnake-root.] An important section of *Prenanthes*, containing all the American species, long regarded as a distinct genus of plants, the rattlesnake-roots.

Nabatean, Nabatean (nab-a-tē'an), *a* and *n*. [Also *Nabathian*, < LL *Nabathar*, *Nabathar* < Gr. *Nabatharoi*, also *Nabara*, < Heb. *Nebhāyāth* see *def*] 1 *a* Of or pertaining to the Nabateans, as, *Nabatean* kings, *Nabatean* inscriptions.

II. *n* One of the Arab people dwelling in ancient times on the east and southeast of Palestine, often identified with the people mentioned in the Old Testament under the name of *Nebathoth* (Isa. lx 7), and in the first book of Maccabees (v 25) as *Nabathites*. Their ancestor Nebajoth is spoken of as the first born of Ishmael (Gen. xxv 16). They are referred to in Assyrian inscriptions of the seventh century B.C., but the period of their greatest historical importance was the century immediately preceding and that immediately succeeding the Christian era. They seem to have been for a long time the chief traders between Egypt and the valley of the Euphrates. Important Nabatean inscriptions have been recovered, and the rock inscriptions in the valleys around Mount Sinai have been attributed to them.

Nabathite (nab'a-thīt), *n*. [As *Nabath(aan)* + -ite²] Same as *Nabatean*.

nab-cheat, *n*. [< *nab*², 4, + *cheat*³] A cup, a hat.

In most communities of European civilization at the present day the name a person bears is double - consisting of the family name or surname and the (Christian or distinctively personal name, which latter ordinarily precedes the surname, but in some countries stands last. Either of these name elements may and (the personal name especially) often does consist of two or more names as component parts. An ancient Roman of historical times had necessarily two names, one distinguishing his family or gens the *nomen* or *nomen gentile*, and the other, the *praenomen*, distinguishing the individual as, *Caius Marius* - that is, *Caius* of the gens of the *Marii*. Every Roman citizen belonged also to a familia, a branch or subdivision of his gens, and hence had or might have a third name, or *cognomen*, referring to the familia. This cognomen was always borne by men of patrician estate, and in the case of men of distinction a fourth name or epithet (*cognomen secundum*, or *agnomen*) was sometimes added in reference to some notable achievement of the individual thus *Lucius Cornelius Scipio Aemilianus* was *Lucius* of the *Scipio* branch of the *Cornelian* gens, who had won personal distinction in Asia. Women as a rule bore only the feminine form of the *nomen* of their gens as, *Cornelia*, *Tullia*. But sometimes, especially at a comparatively late date, they received also an individual *praenomen*, which was the feminine form of the *praenomen* of

the husband, or, still later, was given to them, as in the case of boys, in infancy

2. In modern use, an artificial volatile colorless liquid obtained from petroleum. It is a general term applied to the products of the distillation of crude petroleum from gasoline and refined oil. Ordinary petroleum now yields from 6 to 12 per cent. of this material, the specific gravity of which is from 76° to 60° (Beaumé). Naphtha as a solvent has largely taken the place of tur-

petine, camphene, benzol, and other similar products in industrial art, being often superior, and always much less expensive. In this way it is used in the manufacture of rubber goods, paints and varnishes, floor- and table cloths also by dyers and clothing and glove cleaners. In its many applications for light and heat it is very largely taking the place both of coal and crude oil for the manufacture of illuminating gas and for street-lighting by naphthalene lamps, as well as for cooking by vapor stoves in the use of the grade called *stone-gasoline*

naphthalene (nāf'thā-lēn), *n.* [*< naphtha* + *al(cohol)* + *-ene*] A benzene hydrocarbon (C₁₀H₈) usually prepared from coal-tar. It forms white crystalline leaflets, having a peculiar odor. It is used internally as an intestinal antiseptic, and as an expectorant. It is insoluble in water, soluble in alcohol and ether. Naphthalene derivatives form an important group of coal tar colors. Also *naphthalin*, *naphthaline*. **Naphthalene red**, a coal tar color used in dyeing, obtained from naphthylamine belonging to the induluc class. It is used for producing light shades on silk. Narthecium (nâr-thê'si-um), *n* [NL. (Möhrling, 1742), < Gr *vapnê*, a tall hollow-stemmed umbelliferous plant; see *narthex*] A genus of herbs of the order *Liliaceae*, type of the tribe *Narthecaceae*, known by its single style, stiff open flowers, and rigid linear leaves in two ranks, rising from a creeping rootstock. There are 4 species of north temperate regions with yellow flowers in racemes. The name *bog asphodel*, applied to the genus, belongs especially to *N. ossifragum*, the Lancashire asphodel of England, and *N. Americanum*, a rare plant of New Jersey

narthex (nâr'thek), *n* [NL. < L. *narthex*, < Gr *vapnê*, a tall hollow-stemmed umbelliferous plant (L. *ferula*), also a wand of this plant, a cense, casket, in LGr also as in def 1] 1 A part of an early Christian or an Oriental church or basilica, at the end furthest from the bema or sanctuary, and nearest to the main entrance. It was originally separated from the nave merely by a railing or screen, but after the earliest Christian centuries it was generally divided from the church proper by a complete wall, in which were the main entrance doors to the church, the narthex thus forming a capacious and lofty vestibule of the full width of the church. In primitive times the narthex was the part of the church to which the catechumens, the enquirers, and the class of penitents called *audentes* or *hearers* were admitted. Some times it was set apart for the women of the congregation. Occasionally it was double, in which case the inner division was called the *exonarthex* and the outer division the *exonarthex*. In the church building of western Europe, in certain times of monastic churches notably in those of the Benedictines and Cistercians, the narthex persisted until the end of the twelfth century, and often formed a very important architectural feature as in the splendid example in the great abbey church of Vézelay, France. Also called *antechurch*, *antenna*, *pronaos*. See diagram under *bema* 2 In *antiqu*, a small box or casket for unguents or perfumes — 3 [*cap*] An old genus of umbelliferous plants, now referred to *Ferula*. See *asafetida*

senses modern, < F. *nasal* = Sp Pg *nasal* = It *nasale*, < NL *nasale*, of the nose, < L *nasus* = E *nose*¹ see *nose*¹.] I, a 1. Of or pertaining to the nose or nostrils, nasal, rhinal — 2 Uttered with resonance in the nose, or with admission of the expelled air into the nasal passages, by relaxation or dropping of the palatal veil that shuts them off from the pharynx. A nasal sound uttered with complete closure of the mouth organs is a nasal stop, or check, or mute, or oftenest called a nasal merely. Such in English are *n*, *m*, *ng*, uttered respectively in the mouth positions of *d*, *b*, *g*. There are apt to be in any language as many such as there are positions of mouth closure, thus, in Sanskrit there are five. A nasal uttered in a vowel position of the mouth organs is a nasal vowel. Such are the French *an*, *on*, *in*, *un*, the Portuguese *do*, etc. Nasal semivowels are also possible. And sometimes the whole utterance is rendered more or less nasal (the "nasal twang") by habitual relaxation of the velar closure.

See the nouns — **Nasal fossa** (a) In *anat*, the nasal passages, the hollow interior cavity of the nose. In man the nasal fossae are right and left, separated by the nasal septum, and each is subdivided into three fossae or meatus, superior, middle, and inferior (b) In *ornith*, the depressions upon the bill of a bird in which the external nostrils open. These are usually well marked fossae at or near the base of the bill, on either side of the culmen, naked or filled in with feathers, or arched over by an operculum or nasal scale, their characters are often of zoological importance. See cuts and diagram under *bill* — **Nasal helmet**, the helmet of the early middle ages to which a nasal was attached. See II, 1 — **Nasal index**. See *craniometry* — **Nasal meatus**. Three such are named in man (a) *frontal*, a process of the frontal bone in part supporting the two nasal bones, (b) *anterior*, a median process of each maxillary bone, together forming one spine which projects at the base of the outer nostrils or anterior nares, (c) *posterior*, a corresponding median process of the conjoined palatine bones in the floor of the posterior nares, at the root of the uvula. The last two processes are sometimes called *premaxillary* and *postnasal*. The anterior process has some ethnological significance being best developed in the higher races of men, and is also one of several datum points in craniometry — **Nasal suture**, in *entom*, the impressed line dividing the clypeus from the front same as *clypeal suture* (which see, under *clypeus*) — **Nasal tube**, in *ornith*, a tubular naricorn or rhinotheca, such as occurs in the petrel family and some of the goat suckers.

T. 4), iii 629 2 A sound uttered through or partly through the nose, especially, a nasal mute or stop, as *m*, *n*, *ng* — 3. In *anat*, one of the nasal bones. In the higher vertebrates they are a pair of bones of the surface of the skull in relation with the frontal, lacrimal, or maxillary bones, covering in more or less of the nasal cavity. They are very variable in shape in different animals, less so in position and relations, in man they form the bridge of the nose. In the osseous fishes different bones have been identified as representatives of the nasals. According to Cuvier, they are a pair of separated small tabular bones in front of the frontals, called by others *turbinate*. According to Owen, they are represented by an unpaired projecting bone in front of the frontals more generally considered to be the ethmoid. The nasals were regarded by Owen as forming the neural spine of the foremost, rhinencephalic, or nasal vertebra. Over the nasty sty Shak Hamlet, III 4 94

I am a *nastier* heap than those, and may
Taint thy sweet Lustre by my filth's excess
J. Beaumont, *Psyché*, II 135

A people breaths not more savage and *nasty*, crusted
with dirt.
Savidge, *Traveller*, p. 85

(b) Of filthy habits

Therefore the Lord, this Day, with loathsome lice
Plagues poor and rich, the *nasty* and the nice,
Both Man and beast.
Sylvester, tr. of Du Bartas's *Weeks*, II The Lawe

This day our captain told me that our landmen were
very *nasty* and slovenly, and that the gun deck, where they
lodged, was so beastly and noisome with their victuals
and badness as would much endanger the health of
the ship.
Wentworth, *Hist. New England*, p. 12

(c) Morally filthy, indecent, ribald, indelicate applied
to speech or behavior

Sir Thomas More, in his answer to Luther, has thrown
out the greatest heap of *nasty* language that perhaps ever
was put together.
Bp Atterbury

2 *Nauseous*, disgusting to taste or smell as,
a *nasty* medicine — 3 In a weakened sense,
disagreeable, bad [Colloq., Eng.]

Lady A — said here [in England] at a dinner,
speaking to her husband, who thought it proper not
to touch his soup. Do take some, A — It's not at all
nasty. R. G. White, *England Without and Within*, xvi

4 Foul, stormy, disagreeable, unpleasant
applied to the weather. Compare *dirty* and
foul in the same sense [Colloq., Eng.]

A stormy day (as called in England) a *nasty* day.
R. G. White, *England Without and Within*, xvi

5 Troublesome, annoying, difficult to deal
with, or threatening trouble, of a kind to be
avoided as, a *nasty* customer to deal with, a
nasty cut or fall — 6 Ill-natured, mean, dis-
honorable, hateful as, a *nasty* remark, a *nasty*
trek [Colloq.]

She is a *nasty*, hardened creature and I do hate her
How a woman can be so *nasty* I can't imagine.
Trollope, *Is he Popenjoy*? ix

=Syn 1 and 3 *Nasty*, *Filthy*, *Poll*, *Dirty*. These words are
on the descending scale of strength. *Nasty* is the
strongest word in the language for that which is offensive to
sight, smell, or touch by the quality of its uncleanness
or uncleanliness. The English fondness for the colloquial
use of the word in connection with bad weather, and fig-
uratively for anything disagreeable, is not matched by
anything in America. ordinarily the word is con-
sidered too strong for ordinary or delicate use, and *foul* is
used of bad weather. All the words apply to that which
is filled or covered in considerable degree with anything
offensive. The moral uses of the word correspond with
the physical.

A member of a Jewish political party in the time of Christ, a zealot—3. [cap.] A supporter of Irish nationalism.

The Unionists cried out against a remedy for the coercion of the disloyal Irish Nationalists which would necessitate the coercion by the latter of the loyal inhabitants of Ulster.
Appleton's Ann. Cyc., 1884, p. 408

II. *a.* Of or pertaining to nationalists, advocating or upholding nationalism.

nationality (nash'-on-al'-i-ti), *n.*, *pl. nationalities* (-tiz) [= *F nationalité* = *Sp nacionalidad*, as *national + -ity*] 1. The fact of being a member of a particular nation, birth and membership in a particular nation, relationship by birth and race to a particular nation, as, the nationality of an immigrant—2. Relationship as property, etc., to a particular nation, or to one or more of its members, as, the nationality of a ship—3. The people constituting a particular nation, a nation, a race of people.

When the revolution of 1848 broke out, oppressed nationalities were heard of everywhere.
H. S. Edwards, Polish Captivity II, vi (Latham)

Hadjis and merchants from all the neighboring countries elbow the Indian Persians, and each nationality is easily distinguishable.
O'Donovan, Misc., xl

The war which established our position as a vigorous nationality has also sobered us.
Lowell, Study Windows, p. 78

4. Separate existence as a nation, national unity and integrity.

Institutions calculated to insure the preservation of their nationality.
Quoted in H. S. Edwards, Polish Captivity, II, vi

The partition of Poland was the event that forced the idea of nationality upon the world.
Stubbs, Medieval and Modern Hist., p. 226

5. Nationalism, devotion or strong attachment to one's own nation or country.

In antiquity they [the Jews] developed an intense sentiment of nationality.
J. Frazer, Idea of God, p. 72

nationalization (nash'-on-al-i-zā'shon), *n.* [*< nationalize + -ation*] 1. The act of rendering national in character instead of local.

Calhoun's letter to Fakenham was the official proclamation of the nationalization of slavery, only, however, so far as it imposed duties upon the Union, but by no means with regard to any corresponding rights.
H. von Holst, John C. Calhoun (trans.), p. 239

2. The act of making national as regards possession, use, and control, especially, as advocated by many socialists, the abolition of private property, as in lands, railways, etc., and the vesting of it in the nation for national use, as, the nationalization of land.

Without compensation, nationalization of the land is flagrantly unjust and quite hopeless, with compensation, its benefits are remote and doubtful.
O'Brien, The Land Question, p. 209

Nationalization of the land makes its appearance in the list of many a London Working Men's Club. Nationalization of ordinary capital and state regulation of wages appear hardly less frequently.
Contemporary Rev., LIII, 149

Also spelled *nationalisation*.

Hakluyt's Voyages, I 268

There is something in this more than natural, if oh how phy could find it out.
Shak, Hamlet, II 2 385

It would seem natural that we should first of all have asked the question how the mere understanding could arrive at all this knowledge a priori, and what extent, what truth, and what value it could possess. If we take natural to mean what is just and reasonable, then nothing could be more natural. But if we understand by natural what takes place ordinarily, then, on the contrary, nothing is more natural and more intelligible than that this examination should have been neglected for so long a time.
Kant, tr by Max Müller

Saving men from the natural penalties of dissolute living eventually necessitates the infliction of artificial penalties in solitary cells, on tread wheels and by the lash
H. Spencer, Man vs. State, p. 19.

Among natural baits are many small fishes, as minnows, frogs, certain crustaceans, as crawfish, worms of various kinds, mollusks of various kinds, some insects or their larvae, spawn of various fishes and crustaceans, etc. — **Natural being**. See *being*. — **Natural belief**, an instinctive, a priori cognition. — **Natural body**, according to St. Paul's teaching, the physical body in its present visible condition, literally, the psychical body — that is, the body belonging to the soul as the breath of life opposed to *spiritual body*, the body belonging and adapted to the spirit or highest part of man's nature. See *soul*, *psychical*, *spiritual*. — **Natural body**, it is raised a spiritual body. There is a *natural body* and there is a *spiritual body*. 1 Cor xv 44.

Natural cause, a cause which acts by natural necessity, as opposed to compulsion and to freedom. — **Natural child**, cognition, etc. See the nouns. — **Natural consciousness**, the form of consciousness possessed by all men, primary consciousness. — **Natural day**, a space of twenty-four hours. — **Natural definition**, a definition which states the essential parts of the thing defined as when man is defined as a substance composed of a body and an intellectual soul. — **Natural dualism**, finger-breadth, flannel, gas, goodness, etc. See the nouns. — **Natural egotistical idealism**, the doctrine that the immediate object in perception is a mode of the mind which is determined to present by its own natural laws. — **Natural harmonic**, in musical instruments of the viol, lute, or harp families, one of the harmonics or overtones of an open string opposed to *artificial harmonic*, which is derived from a stopped string. Also used pianistically for any harmonic or derived chord. — **Natural hexachord**, in *me diant music*, the second hexachord (and also the fifth) so called because it began on C, the key note of the "natural" key. See *key*. — **Natural history**, immutation, infirmity. See the nouns. — **Natural infancy**, a phrase sometimes used by law writers to designate infancy under the age of seven years, as being a period of natural and complete incapacity in a legal sense. — **Natural interval**. See *interval*. — **Natural law**. See *law*. — **Natural liberty**. See *liberty*. — **Natural line of sight**. See *sight*. — **Natural logarithm**. See *logarithm*. — **Natural logic**, love, magic, magnet, man, marmalade, method, motion. See the nouns. — **Natural modulation**, in *music*, a modulation of easy and direct character, as from a given key (tonality) to one of its near relatives. — **Natural necessity**, necessity which springs from within, from an internal principle of development, not from outward compulsion. — **Natural obligation**, an expression used in the civil law, in two different cases. (a) Where two different persons, though no agreement express or implied had been made, came into such a relation that the pretor was induced to impute to it some of the legal characteristics of an obligation for example, the fact of becoming unduly enriched at another person's expense. (b) Where an obligation was imperfect, so that no action could be maintained on it, and yet certain legal effects, which were not the same in all cases, were attributed to it by law. The equivalent English phrase is *imperfect obligation*. — **Natural order**, in *bot.*, an order belonging to the natural system of classification, in contradistinction to one of an artificial system devised for the mere convenience of a student. In this system all the organs must be taken into consideration, and the affinity of any two or more plants will be determined by their agreement or disagreement first in the more important organs and then in the less important. — **Natural perfection**, a perfection due to natural causes, or belonging to nature. — **Natural persons**. See *person*. — **Natural philosophy**, originally, the study of nature in general, now, more commonly, the branch of physical science which treats of those properties and phenomena of bodies which are unaccompanied by an essential change in the bodies themselves. It thus includes the various sciences classed under physics. See *physics*. Abbreviated *nat. phil.* — **Natural pitch**, the pitch of a wind instrument, especially of an organ pipe, when not overblown. — **Natural price**, printing, etc. See the nouns. — **Natural propensity**, or appetite, a congenital or innate one, although it may not be actually developed until later in life. — **Natural realism**, the doctrine that the immediate object of perception is the real external object or thing. — **Natural rights**. See *rights*. — **Natural scale**. See *natural key*, under *key*. — **Natural science**, a phrase employed in much the same signification as *natural history* in its widest sense, and used in contradistinction to *mental*, *moral*, or *mathematical sciences*. — **Natural selection**, theology, etc. See the nouns. — **Natural sign**, a sign which stands for its object independently of any human convention. Natural signs are either *formal*, standing for their objects in virtue of resembling them, or *material*, standing for their objects by virtue of some natural connection or real relation with them, as a weathercock to the wind. The former are called *icons*, the latter *synchres*. The distinction seems to have originated with Paulus Venetus. — **Natural system**, in *bot.* See *Jussieu*, and *natural order*, above. — **Natural whole**, in *logic*, a whole determined by the logical comprehension, either an essential or a mathematical whole. — **Nat.**, 1, 2, and 4. *Natal*, etc. See *natives*.

II. 1. That which is natural to one; natural quality, disposition, or expression. — That is, when he [our courtly poet] is most artificial, so to disguise and cloak it as it may not appear nor

seem to proceed from him by any study or trade of rules, but to be his *natural*. — *Puttenham*, *Arte of Eng. Poesie*, p. 252.

It is with depraved man, in his impure *natural*, that we must maintain this quarrel. — *Sp. Hall*, St. Paul's Combat.

And yet this much his courses do approve, He was not bloody in his *natural*. — *Daniel*, *Civil Wars*, iv 42. (*Norw.*)

2. A natural gift or endowment.

But how out of purpose and place do I name art? When the professors are grown so obstinate contemners of it, and presumers on their own *natural*, as they are deriders of all diligence that way. — *B. Jonson*, *Alchemist*, To the Reader.

3. One born without the usual faculty of reasoning or understanding, a fool, an idiot.

This drivelling love is like a great *natural*, that runs lolling up and down to hide his bauble in a hole. — *Shak.*, *R. and J.*, ii. 4. 96

I own the Man is not a *Natural*, he has a very quick Sense, tho' very slow Understanding. — *Shakspeare*, *Conscious Lovers*, ii. 1.

4. A native, an original inhabitant.

The more severe that these are to the *naturals*, the greater their repute with the Spaniards, who enrich themselves by extorting from the other. — *Sandys*, *Travels*, p. 202.

5. A production of nature.

The abjectest *naturals* have their specificall properties, and some wondrous vertues, and philosophy will not flatter the noblest or worthiest *naturals* in their venoms or impurities. — *Harvey*, *Pierce's Supererogation*.

6. An oyster of natural wild growth, not planted. [New Jersey.] — 7. In *music* (a) On the keyboard, a white key (digital) as distinguished from a black key. (b) In notation, the sign ♮, placed before a note to counteract the effect of a sharp or flat in the signature or previously introduced as an accidental. Naturals are not used in signatures except where a change of key takes place and one or more of the sharps or flats of the original signature are to be annulled. Also called a *cancel*. See *accidental*, *n.*, and *signature*. (c) A note affected by a ♮, or a tone thus represented. — 8. A kind of wig worn in England early in the eighteenth century.

In 1724 the peruke makers advertised "full bottom tyes, full bobs, minister's bobs, *naturals*, half *naturals*, Grecian tyes, curly roys, airy levants, qu (= queue) perukes, and bagg wiggs" among the variety of artificial head gear which they supplied. — *Encyc. Brit.*, XXIV 560.

natural-born (nat'ū-rā-l-bōrn), *a*. 1. Native in a country, not alien.

Natural-born subjects are such as are born within the dominions of the crown of England, that is, within the allegiance, or, as it is generally called, the allegiance of the king. — *Blackstone*, *Com.*, I x.

No person except a *natural-born* citizen, or a citizen of the United States at the time of the adoption of this constitution, shall be eligible to the office of president. — *Constitution of the United States*, art. II. § 1.

2. So by nature; born so: as, a *natural-born* fool.

naturalia (nat'ū-rā-l'ia), *n. pl.* [NL, neut. pl. of *L. naturalis*, natural. — see *natural*.] The sexual organs.

naturalisation, naturalise. See *naturalization, naturalize*.

naturalism (nat'ū-rā-l'izm), *n.* [= *F. naturalisme* = *Sp. naturalismo*, as *natural* + *-ismo*.] 1. A state of nature, uncivilized or unregenerate condition.

Those spirited and wanton cross-worms, as they call themselves, who are striving with speed and alacrity to come up to the *naturalism* and lawless privileges of the first class. — *Sp. Langston*, *Moravians Compared and Detected*, p. 62. (*Latham*.)

2. Conformity to nature or to reality; a close adherence to nature in the arts of painting, sculpture, poetry, etc. opposed to *idealism*, and implying less of crudeness than *realism*.

Gogol, the father of Russian *naturalism*, who wrote fifty years ago, was as full of literary consciousness as Thackeray or Dickens. — *Harper's Mag.*, LXXVI. 478.

3. Specifically, in the *fine arts*, the rendering of nature, as it is, by the arts of design, but without either slavish fidelity or attempt at illusion. It is the mean between idealism and realism. — 4. In *philos.*, that view of the world, and especially of man and human history and society, which takes account only of natural (as distinguished from supernatural) elements and forces.

On the basis of *Naturalism*, we may either look upon man as an individual distinct from other individuals, . . . or we may consider the race as itself an organism, apart from which the individual is unintelligible. — *W. R. Sorley*, *Ethics of Naturalism*, p. 17.

5. In *theol.*: (a) The doctrine that natural religion is sufficient for salvation. (b) The doctrine that all religious truth is derived from a study of nature without any supernatural revelation,

and that all religious life is a natural development unaided by supernatural influences.

naturalist (nat'ū-rā-l'ist), *n.* [= *F. naturaliste* = *Sp. Pg. It. naturalista*, < *ML. naturalista*, a naturalist, < *L. naturalis*, natural: see *natural* and *-ist*.] 1. One who understands natural causes, one who is versed in natural science or philosophy; specifically, one who is versed in or devoted to natural history, in the most restricted sense, a zoologist or botanist.

Naturalists observe that when the frost seizes upon wine they are only the sligher and more waterish parts of it that are subject to be congealed. — *South*, *Sermons*, II. xii.

2. One who holds the theological theory or doctrine of naturalism.

So far as the Spirit of God is above reason, so far doth a Christian exceed a mere *naturalist*. — *Sp. Hall*, *Meditations and Vows*, ii. § 24.

naturalistic (nat'ū-rā-l'is'tik), *a*. [*< naturalist* + *-ic*.] 1. Of, pertaining to, or in accordance with nature, natural, not formal, conventional, or conventionalized, hence, simulating or resembling nature as, a *naturalistic* effect of light on the stage.

Such vivacious and *naturalistic* expletives as would scarcely have passed the censor. — *Athenaeum*, No 2840, p. 421.

2. Realistic. — "No one," as Señor Valdés truly says, "can rise from the perusal of a *naturalistic* book without a vivid desire to escape" from the wretched world depicted in it. — *Harper's Mag.*, LXXIX 903.

3. Of, pertaining to, or based on naturalism in its philosophical or theological sense. — **Naturalistic theory**. See *mythical theory*, under *mythical*. — **naturalization** (nat'ū-rā-l'iz-ā-shon), *n.* [*< ME naturalize*, < OF (and F) *naturalis* = *Sp. naturalidad* = *Pg. naturalidade* = *It. naturalità*, < *L. naturalis* (t-s), naturalness, < *naturalis*, natural: see *natural*.] The quality of being natural, naturalness.

The goddess by their *naturalis* and power close vp the furies, and governe the steeres. — *Golden Boks*, x. (*Richardson*.)

naturalization (nat'ū-rā-l'iz-ā-shon), *n.* [*< naturalize* + *-ation*.] The act of naturalizing, or the state of being naturalized, specifically, in *law*, the act of receiving an alien into the condition, and investing him with the rights and privileges, of a natural subject or citizen. In the United States, by Rev. Stat. 1878, title xxx. § 2165, etc., persons of age, of the classes enumerated below, may be naturalized, with their resident minor children, upon taking an oath to support the Constitution of the United States, and renouncing all allegiance to a foreign prince, or state, those over 21 who have (a) resided here at least five years continuously, and have legally declared their intention to be naturalized and to renounce foreign allegiance more than two years before naturalization, or (b) resided here for a continuous period of five years, of which three were during minority, or (c) resided here one year and have served in and been honorably discharged from the military forces of the United States, or (d) served three years on a merchant vessel of the United States after legal declaration of intention, etc. Citizens, etc., of countries at war with the United States are excepted. There are also provisions — now nearly obsolete — relating to the naturalization of aliens residing in the United States before January 20th, 1795, or between June 15th, 1798, and June 15th, 1812. Widows and children of those who have made legal declaration before death are deemed citizens. In Great Britain, by the Naturalization Act of 1870, an alien resident in the United Kingdom for a term of not less than five years, or who has been in the service of the crown for not less than five years, may obtain a certificate of naturalization. Also spelled *naturalisation*.

All States that are liberal of *naturalization* towards strangers are fit for empire. — *Bacon*, *Kingsdoms and Estates*.

Naturalization implies the renunciation of a former nationality, and the fact of entrance into a similar relation towards a new body politic. — *Woolsey*, *Introd. to Inter. Law*, § 66.

Naturalization Act, a British statute of 1870 (amended in 1872), under which aliens are allowed to hold real and personal property in the United Kingdom, additional facilities for aliens to become British subjects being also given, and provisions embodied enabling British subjects to become aliens.

naturalize (nat'ū-rā-l'iz), *v.*; pret and pp *naturalized*, ppr *naturalising*. [= *F. naturaliser* = *Sp. Pg. naturalizar* = *It. naturalizzare*, as *natural* + *-ize*.] 1. To reduce to a state of nature; identify with, or make a part of, nature.

Human freedom must be understood in some different sense from that with which our anthropologists are familiar, if it is to stand in the way of the scientific impulse to *naturalize* the moral man. — *T. H. Green*, *Prolegomena to Ethics*, § 6.

2. To make natural; render easy and familiar by custom and habit.

He rises fresh to his hammer and anvil, custom has *naturalized* his labours to him. — *South*.

3. To confer the rights and privileges of a natural subject or citizen upon; receive under

sanction and form of law as a citizen or subject. See *naturalisation*.

Then the best way for a foreigner to break your exclusiveness is to be *naturalised*.

Harper's Mag., LXXVIII 322.

4. To receive or adopt as native, natural, or vernacular; incorporate into or make part and parcel of a language, receive into the original or common stock. as, to *naturalise* a foreign word or expression

She must be foudroyant and pyramidal — if these French adjectives may be *naturalised* for this one particular emergency

O. W. Holmes, *Else Venner*, xxi.

5. So to adapt to new conditions of life that those conditions shall appear to be native to the person or thing *naturalized*; to introduce and acclimatize or cause to thrive as if indigenous. as, to *naturalise* a foreign plant or animal. (A plant that is *naturalized* is not merely habituated to the climate, but grows without cultivation. A *naturalized* animal is not only acclimatized, as an elephant or a tiger in captivity, but shifts for itself and propagates, as rabbits in Australia or English sparrows in America.)

Living so amongst those Blacks, by time and cunning they seem to be *naturalized* amongst them

Capt. John Smith, *True Travels*, I 48

Our melons, our peaches, our figs, our apricots, and cherries are strangers among us, imported in different ages, and *naturalized* in our English gardens

Addison, *The Royal Exchange*

6. In *musical notation*, to apply a natural or cancel (♮) to.

II. *intrans.* 1. To explain phenomena by natural laws, to the exclusion of the supernatural.

We see how far the mind of an age is infected by this *naturalizing* tendency, let us note a few of the thousand and one forms in which it appears

Bushnell, *Nature and the Supernat.*, i.

2. To become like a native

I have *naturalized* here [in London] perfectly, and have been more kindly received than is good for my modesty to remember

Jeffrey

3. To become a citizen of another than one's native country

Also spelled *naturalise*

naturally (nā'tŭr-əl-ē), *adv.* 1. By nature, not by art or habit; as, he was *naturally* eloquent

Fire, whose flame if ye marks it, is always pointed, and *naturally* by his form outlets to clymbe

Puttenham, *Arte of Eng. Poesie*, p. 78

We *naturally* know what is good, but *naturally* pursue what is evil

Sir T. Browne, *Religio Medici*, I 55

Shak., *I Hen. IV.*, I 1 11

We who are Jews by *nature*, and not sinners of the Gentiles.

Gal. II 15

2. The forces or processes of the material world, conceived of as an agency intermediate between the Creator and the world, producing all organisms and preserving the regular order of things. as, in the old dictum, "*nature* abhors a vacuum." In this sense *nature* is often personified.

And there is in this business more than *nature*
Was ever conduct of. *Shak.*, *Tempest*, v 1 242.

Thou, *nature*, art my goddess, to thy law
My services are bound. *Shak.*, *Lear*, I 2 1

Nature is the last of all causes that fabricate this corporeal and sensible world, and the utmost bound of incorporeal substances. Which, being full of reasons and powers, orders and presides over all mundane affairs

Proclus (tr. by Cudworth), *Comm. in Timæum*, I

Wherefore, since neither all things are produced fortuitously, or by the unguided mechanism of matter, nor God himself may reasonably be thought to do all things immediately and miraculously, it may well be concluded that there is a plastic nature under him, which as an inferior and subordinate instrument doth drudgingly execute that part of his providence which consists in the regular and orderly motion of matter, yet so as that there is also beside this a higher providence to be acknowledged, which, presiding over it, doth often supply the defects of it, and sometimes overrule it, forasmuch as this plastic nature cannot act electively nor with discretion

Cudworth, *Intellectual System*, I 3

Nature never did betray

The heart that loved her
Wordsworth, *Tintern Abbey*

3. The metaphysical principle of life; the power of growth, that which causes organisms to develop each in its predeterminate way. Aristotle defines nature as the principle of motion in those things that move themselves, meaning by motion especially generation and corruption. Inasmuch as the most striking characteristic of growth is its regularity, nature is also conceived by Aristotle as the principle of inward necessity, as opposed to constraint on the one hand and to chance or freedom on the other. Hence *nature* is in literature frequently contrasted with fate and with compulsion, as well as with fortune and free election

There are in sublimity bodies both constant tendencies and variable tendencies. The constant Aristotle calls *nature*, which always aspires to good, or to perpetual renovation of forms as perfect as may be, though impeded in this work by adverse influences, and therefore never producing anything but individuals comparatively defective and sure to perish. The variable he calls spontaneity and chance, forming an independent agency inseparably accompanying *nature*—always modifying, distorting, frustrating the full purposes of *nature*. Moreover, the different natural agencies often interfere with each other, while the irregular tendency interferes with the ideal. So far as *nature* acts in each of her distinct agencies, the phenomena before us are regular and predictable: all that is uniform, and all that, without being quite uniform, recurs usually or frequently is her work. But, besides and along with *nature*, there is the agency of chance and spontaneity, which is essentially irregular and unpredictable

Grote, *Aristotle*, iv

Let us sit and mock the good housewife Fortune
That she makes fair the sea: she makes honest
And those that she makes honest she makes very ill favoured

Ros. Nay, now thou goest from Fortune's office to *Nature's*. Fortune reigns in the gifts of the world, not in the lineaments of *Nature*. *Shak.*, *As you like it*, I 2 44

Yet had the number of her days
Been as complete as was her praise,
Nature and Fate had had no strife
In giving limit to her life

Milton, *Epitaph on Marchioness of Winchester*, I 18

4. Cause, occasion, that which produces anything

The *nature* of his great offence is dead
Shak., *All's Well*, v 3 28

5. The material and spiritual universe, as distinguished from the Creator, the system of things of which man forms a part, creation, especially that part of it which more immediately surrounds man and affects his senses, as mountains, seas, rivers, woods, etc. as, the beauties of *nature*, in a restricted sense, whatever is produced without artificial aid, and exists unchanged by man, and is thus opposed to *art*

All things are artificial for *Nature* is the art of God
Sir T. Browne, *Religio Medici*, I 16

He needed not the spectacles of books to read *Nature*, he looked inwards, and found her there

Dryden, *Essay on Dram. Poesy*

Nature is that world of substance whose laws are laws of cause and effect, and whose events transpire, in orderly succession, under those laws

Bushnell, *Nature and the Supernat.*, p. 48

Nature in the common sense, refers to essences unchanged by man: space, the air, the river, the leaf

Bumerson, *Nature*, p. 7

Nature in the abstract is the aggregate of the powers and properties of all things. *Nature* means the sum of all phenomena, together with the causes which produce them, including not only all that happens, but all that is capable of happening: the unused capabilities of causes being as much a part of the idea of *nature* as those which take effect

J. S. Mill

Hence—6. That which is conformed to nature or to truth and reality, as distinguished from that which is artificial, forced, conventional, or remote from actual experience; *naturalness*

With this special observance, that you overstep not the modesty of *nature* for anything so overdone is from the purpose of playing, whose end, both at the first and now, was and is, to hold, as 'twere, the mirror up to nature

Shak., *Hamlet*, III 2

Only *nature* can please those tastes which are unprejudiced and refined

Addison

7. Inherent constitution, property, or quality, essential character, quality, or kind; the quali-

ties or attributes which constitute a being or thing what it is, and distinguish it from all others; also, kind, sort; species, category. as, the *nature* of the soul, the divine *nature*, it is the *nature* of fire to burn, the compensation was in the *nature* of a fee

Things rank and gross in *nature*
Shak., *Hamlet*, I 2 130

I wish my years
Were fit to do you service in a *nature*
That might become a gentleman
Fletcher, *Spanish Curate*, I 1

Only this is certain: that many regions lying in the same latitude afford Mines very rich of divers *natures*
Capt. John Smith, *Works*, I 125

They [the Jews] apprehended the Crown of Thorns which was put upon our Saviour's head was the fittest representation of the *nature* of his Kingdom

Stillington, *Sermons*, I viii

The *nature* of her [Catherine Sedley's] influence over James is not easily to be explained

Macaulay, *Hist. Eng.*, vi

8. An original, wild, undomesticated condition, as of an animal or a plant, also, the primitive condition of man antecedent to institutions, especially to political institutions. as, to live in a state of *nature*

That the condition of mere *nature*—that is to say, of absolute liberty, such as is theirs that are neither sovereigns nor subjects, is anarchy and the condition of war; that the precepts by which men are guided to avoid that condition are the laws of nature, (that a commonwealth without sovereign power is but a word without substance, and cannot stand, that subjects owe to sovereigns simple obedience in all things in which their obedience is not repugnant to the laws of God, I have sufficiently proved

Hobbes, *Leviathan*, II 81

9. The primitive aboriginal instincts, qualities, and tendencies common to mankind of all races and in all ages, as unchanged or unmodified by civilization, especially, the instinctive or spontaneous sense of justice, benevolence, affection, self-preservation, love of show, etc., common to mankind, *naturalness* of thought, feeling, or action, humanity

For when the Gentiles, which have not the law, do by *nature* the things contained in the law, these, having not the law, are a law unto themselves

Rom. II 14

Ros. But, to Orlando: did he leave him there,
Food to the sick and hungry lions?
Or twice did he turn his back and purposed so
But kindness, nobler ever than revenge,
And *nature*, stronger than his just or casual,
Made him give battle to the lions

Shak., *As you like it*, IV 3 180

One touch of *nature* makes the whole world kin,
That all, with one consent, praise new-born gawds.
Shak., *T. and C.* III 3 175

If thou hast *nature* in thee bear it not
Shak., *Hamlet*, I 5 81

Oh mother, do not lose your name! forget not
The touch of *nature* in you, tenderness!
Beau and Fl., *Thierry and Theodoret*, v 2.

10. The physical or moral constitution of man; physical or moral being, the personality

As surfeit is the father of much fast,
So every slope by the immoderate use
Turns to restraint. Our *natures* do pursue,
Like rats that ravin down their proper bane,
A thirsty evil, and when we drink we die

Shak., *M. for M.*, I 2 182

In swinish sleep
Their drenched *natures* lie as in a death
Shak., *Macbeth*, I 7 68.

Thus have they made profane that *nature* which God hath not only cleans'd, but 'Christ also hath assum'd

Till the foul crimes done in my days of *nature*
Are burnt and purged away *Shak.*, *Hamlet*, I 5 1

My offences being many, I would repent out the remainder of nature.
Shak, *All's Well*, iv 3 272.

O, sir, you are old.
Nature in you stands on the very verge
Of her confine *Shak*, *Lea*, ii 4 140

13. In *theol*, the natural unregenerate state of the soul, moral character in its original condition, unaffected by grace.

We all were by nature the children of wrath, even as others *Eph*. ii 3.

Yet if we look more closely we shall find
Most have the seeds of judgment in their mind,
Nature affords at least a glimmering light,
The lines, though touch'd but faintly, are drawn right
Pope, *Essay on Criticism*, l 21

The Judgment, umpire in the strife
That Grace and Nature have to wage through life.
Cowper, *Tirocinium*, l 30

14. Conscience

Make thick my blood,
Stop up the access and passage to remorse,
That no compunctious visitings of nature
Shake my fell purpose, nor keep peace between

[= *F. navigation* = *Sp. navegacion* = *Pg. navegacão* = *It. navigazione*, *navigazione*, < *L. navigatio* (-n-), a sailing, a passing over in a ship, < *navigare*, sail. see *navigate*.] 1 The act of navigating, the act of moving on water in ships or other vessels, sailing as, the *navigation* of the northern seas, also, by extension, the act of "sailing" through the air in a balloon (see *aerial navigation*, below).—2. The science or art of directing the course of vessels as they sail from one part of the world to another. The management of the sails, etc., the holding of the assigned course by proper steering, and the working of the ship generally, pertain rather to seamanship, though necessary to successful navigation. The two fundamental problems of navigation are the determination of the ship's position at a given moment, and the decision of the most advantageous course to be steered in order to reach a given point. The methods of solving the first are, in general, four: (1) by reference to one or more known and visible landmarks, (2) by ascertaining through soundings the depth and character of the bottom, (3) by calculating the direction and distance sailed from a previously determined position (see *dead-reckoning*, *log*, and *compass*), and (4) by ascertaining the latitude and longitude by observations of the heavenly bodies (see *latitude and longitude*). The places of the sun, moon, planets, and fixed stars are deduced from observation and calculation, and are published in nautical almanacs (see *almanac*), the use of which, together with logarithmic and other tables computed for the purpose, is necessary in reducing observations taken to determine latitude, longitude, and the error of the compass. 3 Ships in general, shipping. "The Kennet Navigation"—a very old canal, which connects the waters of the East with those of the West country
The Academy, July 6, 1899, p. 18.

Act of Navigation, an act which was first passed by the British Parliament in 1661, under Cromwell's administration, was reenacted in 1690, and remained in force, with various modifications. It was greatly altered in 1825 and at other times, and finally repealed in 1849. Its object was to encourage the British merchant marine by reserving to it the whole of the import trade from Asia, Africa, and America, and the chief part of that from Europe. This end it accomplished by denying to foreign vessels the right to bring to England any goods not produced in their respective countries, and also by restrictions in regard to fisheries and the coasting trade. The act was aimed especially at the Dutch, who possessed at that time almost a monopoly of the carrying-trade of the world.—**Aerial navigation**, the sailing or floating in the air by means of balloons, particularly, the principles, problems, and practice involved in the attempt to pass from place to place through the air by means of balloons capable of being steered.—**Arterial navigation**. See *arterial*—Inland

navigation, the passing of boats or vessels on rivers, lakes, or canals in the interior of a country, conveyance by boats or vessels within a country.—**Navigation laws**, the various acts and regulations in any country which define the nationality of its ships, the manner in which they shall be registered, the privileges to which they have claim, and the conditions regulating the engagement of foreign ships in the trade of the country in question, either as importers and exporters or with relation to coasting traffic. The first British navigation law of importance was enacted under Richard II. It provided that no merchandise should be imported into England or exported from the king's realms by any of his subjects except in English ships, under penalty of forfeiture of vessel and cargo.

navigational (nav'ŭ-gā-shŕn-al), *a*. [*Navigation* + *-al*.] Of or pertaining to navigation, used in navigation.

navigator (nav'ŭ-gā-tŕr), *n* [= *F. navigateur* = *Sp. Pg. navegador* = *It. navigatore*, *naveuttore*, < *L. navigator*, a sailor. see *navigate*.]

1 One who navigates or sails; especially, one who directs the course of a ship, or is skilful in the art of navigation. In the merchant marine the commanding officer usually navigates the vessel. In men of war of nearly all nationalities, one of the line-officers or executive officers (in the United States navy the third in rank) is detailed for that duty. In the United States navy the navigator, in addition to his other duties, has charge of the log book, of the steering gear, of the anchors and chains, and of the stowage of the hold, and has also general supervision of the ordnance and ordnance stores.

2 A laborer on a "navigation" or canal (see *navigation*, 4), or on a railway. Now usually abbreviated *navey* (see *navey*²). [Eng.]

navey¹ (nav'ŭ), *n* [Abbr. of *navigation*, 4.] Same as *navigation*, 4.

In Skipton (in Craven) the canal is vulgarly called "the navey." The horse path or towing path is always "the navey bank," a bridge in Mill hill Street is "the navey brig," and a garden on one of the slopes of the canal was always called "the navey garden."

3 All the ships belonging to a country, collectively, in a wide sense, the ships, their officers and crew and equipment, and the department of the government charged with their management and control. Specifically—(a) All the war-ships belonging to a nation or monarchy, the military marine in Great Britain distinguished by the title of *Royal Navy*. In the United States the control of the navy is vested in a cabinet officer called the Secretary of the Navy, the head of the Navy Department. (See *department*.) The government of the royal navy is vested in the Board of Admiralty, or lords commissioners for discharging the office of lord high admiral. The board consists of the following members: the first lord, who has supreme authority, and is a member of the cabinet, the senior naval lord, who directs the movements of the fleets, and is responsible for their discipline, the second naval lord, who superintends the manning of the fleet, coast guard, transport department, etc., the junior naval lord, who deals with the victualing of the fleets, medical department, etc., a civil lord, member of Parliament, who is also connected with the civil branch of the service, a controller of the navy and an expert civilian. Under the board is a financial secretary, changing like the five lords, with the government in power. There is a permanent secretary, and a number of heads of departments. (b) All the ships and vessels employed in commerce and trade usually called the *merchant marine* or *merchant navy*.

Nebalia (nē-bā'li-ā), n. [NL.; origin not

ascertained.] 1 A remarkable genus of un-

certain position among the lower crustaceans,

ranged by Huxley among the phyllopodous

Branchiopoda, by others in a peculiar order

named *Phyllocarida* or *Leptostraca*. It has a large

carapace (cephalostegite) with mobile rostrum, the eyes

are large and pedunculated, there are well developed

antennae, mandibles, and two pairs of maxillae, the anterior

of which ends in a long palp

genus *Nebalia*. It has been variously located in the

systems, and is now usually considered a synthetic type

nearly related to some Silurian forms, and representa-

tive of an order or suborder named *Phyllocarida* or *Lepto-*

straca. The anterior part of the body has a large com-

pressed bivalvular carapace with a separate anterior

tongue-shaped process, the abdomen is long and seg-

mented, there are eight pairs of phyllopodous legs to the

trunk, four pairs of large pleopods behind, and no telson

The living species are marine, and have been referred to

8 genera.

nebula (neb'ū-lā), n, pl nebulae (-lā). [*L* *ne-*

bula = *Gr* *νεβήλα*, a cloud, mist, vapor see *neb-*

ule.] 1 A luminous patch in the heavens, far

beyond the limits of the solar system. Some

nebulae are resolvable into clusters, generally globular, in

which the separate stars can be distinguished These are

for the most part in the Galaxy. The remaining nebulae are

of two types, according as their spectra are continuous

or consist of bright lines. The latter class are greenish-

blue, have fairly definite outlines, and show a tendency to

concentration toward the galactic circle. Of the three

brightest lines in their spectra two are unidentified, and

one is the F line of hydrogen There are six or seven

other faint lines, two of them hydrogen There are besides

nebulous stars, or stars with haze about them which in

some cases is of vast proportions The continuous spectra

indicate that all these nebulae are solid, liquid, or, if gase-

ous, enormously condensed The nebulae in Andromeda,

Orion, and Argo are visible to the naked eye. The Galaxy,

the Magellanic clouds, and the clusters Bode's Hair

and Praesepe are not included by astronomers among the

nebulae

Dumb-bell nebula, a nebula which, seen in a telescope of

small power, appears to have a form like a dumb-bell in-

scribed in a fainter ellipse, but with a more powerful in-

strument is seen to have a spiral structure.—Planetary

nebula, a circular or elliptical gaseous nebula, with a well-

defined outline.—Resolvable nebula, a nebula in which

a powerful telescope detects many points of light, which,

however, are not usually distinguished as perfectly as in a

cluster.—Ring nebula, or annular nebula, a nebula

which appears like a ring with a dark center.—Spiral

nebula, a nebula which presents the appearance either

of a contorted stream or of a number of such streams pro-

ceeding from a center.

nebular (neb'ū-lār), a. [= *F* *nebulaire*, < *NL*

nebularis, < *L* *nebula*, a cloud, see *nebule*.] 1.

Like a nebula; cloudy.—2. Pertaining or re-

lating to a nebula.—The nebular hypothesis, a the-

ory of the formation of the solar system, originated by the

philosopher Kant and the astronomer Sir William Her-

schel, and developed by Laplace and others. The solar

system is supposed to be the result of the gradual con-

densation of a nebula under the action of the mutual grav-

itation of its parts

necessarian (*nes-e-sā'-ri-an*), *a* and *n.* [*L. necessarius*, inevitable, necessary, + *-an*.] I. *a.* Relating to necessarianism; necessitarian. II. *n.* One who accepts the doctrine of necessarianism; a necessitarian

The only question in dispute between the advocates of philosophical liberty and the necessarians is this "whether volition can take place independently of motive" *W. Balaam*, *Philos. of the Mind*, ix. § 1

Necessarians will say that even this [voluntary effort for a good end] is ultimately the effect of causes extraneous to the man's self *H. Sidgwick*, *Methods of Ethics*, p. 258.

necessarianism (*nes-e-sā'-ri-an-izm*), *n.* [*L. necessarian + -ism*.] The doctrine that the action of the will is a necessary effect of antecedent causes; the theory that the will is subject to the general mechanical law of cause and effect. Also *necessitarianism*, and rarely *necessism*.

Let us suppose, further, that we do not know more of cause and effect than a certain definite order of succession among facts, and that we have a knowledge of the necessity of that succession—and hence of necessary laws—and I, for my part, do not see what escape there is from utter materialism and necessarianism. *Huxley*

necessarily (*nes-e-sā'-ri-ly*), *adv.* In a necessary manner, by necessity; so that it cannot be otherwise; inevitably.

The Author has shown us that design in all the Works of Nature which necessarily leads us to the Knowledge of its First Cause. *Addison*, *Spectator*, No. 389

Powerful temperaments are necessarily intense *Froude*, *Sketches*, p. 183.

In philosophy it is requisite to distinguish an *irresistible* inference, the force of which may be blindly felt, from a *necessary* one, which is seen to belong to a possible class of inferences, all true (b) As a proposition or fact, true or taking place not merely in the actual state of things, but in every possible state of things (within some meaning of the word possible) A necessary proposition should not be confounded with an absolutely certain one, far less with one we are irresistibly compelled to believe (c) As a thing or being, existing in every possible state of things, having existence involved in its essence Thus, God is said by Anselm, Descartes, and others to be a necessary being

Death, a necessary end, Will come when it will come. *Shak.*, *J. C.*, ii. 2. 36.

In asserting that the human mind possesses in its own ideas an element of necessary and universal truth, not derived from experience, Kant had been anticipated by Price, by Cudworth, and even by Plato *Whewell*, *Philos. of Discovery*

Given such a cause—that is, accept the idea of God—and worship follows as a rational, nay, a necessary consequence. *Mivart*, *Nature and Thought*, p. 230.

The only way that anything that is to come to pass here after is or can be necessary is by a connection with something that is necessary in its own nature, or something that already is or has been so that, the one being supposed, the other certainly follows. *Edwards*, *On the Will*, i. 8

2. Such that it cannot be disregarded or omitted; indispensable; requisite; essential; needful; required: as, air is necessary to support animal life; food is necessary to nourish the body.

Advertisements and counsells varie necessarye for all noble men and counsellors. *Books of Precedence* (E. E. T. S., extra ser.), i. 74.

A nimble hand is necessary for a cut-purse. *Shak.*, *W. T.*, iv. 3. 693.

A country replenished with all manner of commodities necessary for mans life. *Coryat*, *Crudities*, i. 108.

Neither dares any man complain of injustice, tho his cause be never so just and therefore patience is in this Country as necessary for poor people as in any part of the World. *Dampier*, *Voyages*, ii. i. 78.

The enemies of the court might think it fair, or even absolutely necessary, to encounter bribery with bribery. *Macaulay*, *Hallam's Const. Hist.*

3. In law (a) Requisite for reasonable convenience and facility or completeness in accomplishing the purpose intended as, the land necessary for building a railroad. (b) Naturally and inseparably connected in the ordinary course as, necessary consequences. Thus, the necessary consequences of a trespass, such as depreciation in value of a thing injured, or the suffering of a person injured, are general damages, and need not be pleaded, but loss of profits or medical expenses are not necessary consequences in the legal sense, and must be specially alleged

4. Acting from compulsion or the absolute determination of causes opposed to free See *Free*

Necessary, Essential, Requisite, Needful**. The following remarks refer to the application of the words to ordinary practical affairs, not to philosophy. *Necessary* is so general a word that it covers all the others, and has the additional sense, which they do not have, of *inevitable*. *Essential* is an absolute word, noting that which is a part of the chief end of the action or of every mode of bringing that end about. *Requisite* is less strong than *essential* and *needful* is less strong still, yet each is strong and emphatic, applying to that which is imperatively needed. *Needful* generally applies to concrete, and often to temporary, things, as, knowledge of the countries visited is *requisite*, and even *essential*, to enjoyment of travel, but money is *needful* in order to be able to travel at all. *Needful* is often applied to that which must be supplied to produce or effect a perfect state or action

II. *n.*, pl. *necessaries* (-riz). 1. Anything that is necessary or indispensable, that which cannot be disregarded or omitted as, the necessities of life

And thiel alle han alle necessities, and alle that hem nedeth, of the Emperours Court *Mandeville*, *Travels*, p. 239

Fear of poverty makes Iruis allow himself only plain necessities *Steele*, *Spectator*, No. 114

That strength joy'd with religion, abus'd and pretended to ambitious ends, must of necessity breed the heaviest and most quelling tyranny *Milton*, *Church Government*, ii. 3

2. As applied to the human will, the opposite of *liberty* (a) Compulsion, physical or, more generally, moral, a stress upon the mind causing a person to do something unwillingly or with extreme reluctance as, to make a virtue of necessity

Thoune of necessity I hey them withdrewe, and towards the Citee They toke the way *Generyden* (E. E. T. S.), i. 2552.

Then take his Head, Yet never say that I Issu'd this Warrant, but Necessity *J. Beaumont*, *Psyche*, iii. 194

Necessity was the argument of tyrants, it was the creed of slaves *Pitt*, *On the India Bill*, Nov. 18, 1783

And the great powers we serve themselves may be Slaves of a tyrannous Necessity *M. Arnold*, *Mycerinus*.

(b) In *philos.*, the inevitable determination of the human will by a motive or other cause. This is only a special use of the word in the free-will dispute. In philosophy generally, by the *necessity* of a cognition is properly meant a cognized *necessity*, or universality in reference to possible states of things, although some writers use the word to denote a constraint upon the power of thought.

Will and reason (reason also is choice), Useless and vain, of freedom both despoil'd, Made passive both, had served necessity, Not me *Milton*, *P. L.*, iii. 110.

Wherever thought is wholly wanting, or the power to act or forbear according to the direction of thought, there necessity takes place

Locke, Human Understanding, II xxi. 13.

3. A condition requisite for the attainment of any purpose; also, a necessary of life, without which life, or at least the life appropriate to one's station, would be impossible

These should be hours for necessities,
Not for delights Shak, Hen. VIII, v. 1. 2.

When war is called a necessity, it is meant, of course, that its object cannot be attained in any other way

Sumner, Orations, I 48.

4. Want of the means of living, lack of the means to live as becomes one's station or is one's habit.

Off me shall ye have both ayde and comfort
In all your needs of necessity

Rom. of Parthenay (E. E. T. S.), I 3818.

I abjure all roofs, and choose
To wage against the enemy o' the air,
To be a comrade with the wolf and owl—
Necessity's sharp pinch! Shak, Lear, II. 4. 214

5. Extreme need, in general.

See what strange arts necessity findes out.

Mariotte and Neche, Dido, I. 142.

Signior Necessity, that hath no law,
Scarcely ever read his littleton.
Times' Whistle (E. E. T. S.), p. 40

Necessity is the mother of invention
H. Franck, Northern Memoirs (written in 1658,
printed in 1694). (Bartlett)

6†. Business; something needful to be done

They that to you have necessities
Be gracious euer through your gentleness.
Political Poems, etc. (ed. Furnivall), p. 41

When he hadde hym a while conveled, he toke leve, and
yede thourgh the courte in his othir necessities
Merian (E. E. T. S.), I. 64

7. Bad illicit spirit. *Hallwell* [Prov. Eng.]

—**Doctrine of necessity**, the doctrine that all human actions are absolutely determined by motives, so that the will is not free. — **Internal necessity**. See *internal*. — **Legal necessity**, constraint by the law, also, that which one is constrained by the law to do, irrespective of consent. The word *necessity* is also used in the law to denote that degree of moral necessity which is recognized as justifying or excusing an act otherwise unlawful, such as the killing of an assailant in self defense, also, particularly in the phrase *public necessity*, to designate the requirement of what is needed for reasonable convenience or facility and completeness in accomplishing a public purpose. — **Logical necessity**, truth, not merely in the existing state of things, but in every state of things in which the proposition to which the necessity belongs should preserve its signification, the truth of that to know which it is sufficient to know the meanings of the words in which it is expressed. — **Money of necessity**, coins (generally of an unusual shape, and rudely fabricated) issued during a siege (see *stage money*), or in times of necessity, when there is an insufficient supply of gold and silver and the operations of the ordinary mints are suspended. — **Moral necessity**. See def. 2 above. — **Natural necessity**. See *natural*. — **Physical necessity**, the necessity which arises from the laws of the material universe. This necessity is conditional, not absolute. — **Works of necessity**, in the Sunday laws, any labors which are necessary to be done on Sunday for life, health, comfort, general welfare, and reasonable convenience for enjoying the leisure and the privileges of the day, such as the running of horse-cars, ferries, and, within reasonable limits, railroad trains, and such labors as are requisite for maintaining in their necessary continuity processes of manufacture incidental to civilization, such as keeping up the fires of a blast-furnace. = *Syn.* *Necessity*, *Need*. *Necessity* is more urgent than need; a merchant may have need of more money in order to the most successful managing of his business, he may have a necessity for more cash in hand to avoid going into bankruptcy.

neck (nek), *n*. [*ME* *necke*, *nekke*, *nike*, *nakke*, *AS.* *hnecca*, the neck, the back of the neck, the nape of the neck, = *OFries* *hnecca*, *necke* = *MD.* *neck*, *nek*, *nack*, *D.* *nek* = *MLG.* *nacke*, *Lt.* *nakke* = *OHG.* *hnaec* (*hnaech*), *hnaech*, *nae*, *MHG.* *nacke* = *knack*, *G.* *nacken* = *Icel.* *hnakki* = *Sw.* *nacke* = *Dan.* *nakke*, nape of the neck, back of the head Cf. *nike*, nape of the neck.] 1. That part of an animal's body which is between the head and the trunk and connects these parts. In every vertebrate the neck corresponds in extent to the cervical vertebrae, when such are distinguishable. It is usually narrower or more slender than the parts between which it extends. See cuts under *muscle*.

He hath abouten his *Nikke* 800 *Pories* o'ryent, gode and grete, and knotted, as *Pater Nostre* here of *Amber*.
Mandeville, *Travels*, p. 197

Or necklace for a neck to which the swan's
Is tawnier than her cygnets

Tennyson, *Lancelot and Elaine*

2. Figuratively, life, from the breaking or severing of the neck in legal executions as, to risk one's neck, to save one's neck. — 3. In *entom.* (a) The membrane connecting the hard parts of an insect's head with those of the thorax, and visible only when the head is forcibly drawn out. (b) The posterior part of the head when this is suddenly narrowed behind the eyes. (c) A slender anterior prolongation of the prothorax found in certain *Diptera* and *Hymenoptera*. — 4. In *anat.*, a constricted part, or constriction of a

part, like or likened to a neck: as, the neck of the thigh-bone, the neck of the bladder; the neck of the uterus. See cut under *femur*. — 5. The flesh of the neck and adjoining parts: as, a neck of mutton. — 6. That part of a thing which corresponds to or resembles the neck of an animal.

Some of them upon the necks of their launce have an hooke, wherewithall they attempt to pull men out of their saddles
Hakluyt's Voyages, I. 62.

(a) That part of a garment which covers the neck as, the high neck of a gown. (b) A long narrow strip of land connecting two larger tracts, an isthmus

They followed vs to the necks of Land, which we thought had been severed from the mayne

Quoted in *Capt. John Smith's Works*, I. 107

(c) The slender upper part of any vessel which has a larger rounded body as, the neck of a bottle, retort, etc.

Take the noblest and the strengest brennyng watir that ge may haue distillid out of pure mysty wyne, and putte it into a glas clepid amphora; with a long necke

Book of Quante Essence (ed. Furnivall), p. 5

(d) In stringed musical instruments of the viol and lute families, the long slender part extending upward from the body culminating in the head where the tension is regulated, and bearing in front the finger-board over which the strings (or such of them as are to be stopped) are stretched. (e) The part of an axle that passes through the hub of the wheel, also, a diminished part of any shaft resting in a bearing. (f) The round shank connecting the blade and the socket of a bayonet. (g) The constricted part joining the knob to the breech of a gun. (h) The contracted part of a furnace over the bridge, between the stack and the heating or melting chamber. (i) In *graving*, the slope between the face and the shoulder of a type. Sometimes called *beard*. (j) In bot. (1) In mosses, the column or tapering base of the capsule. (2) In histology, the rim or wall of the archegonium which projects above the prothallium. It rests upon the venter, and is ordinarily composed of four longitudinal rows of cells. (k) The filled up pipe or channel through which volcanic material has found its way upward. In modern volcanic areas the vent through which the lava, cinders, or ashes are ejected and reach the surface is generally concealed from view by the accumulated material which has been thrown out. In eruptive regions belonging to the older geological systems denudation has occasionally removed the overlying debris, so that the connection of the volcanic orifice with the more deep seated regions can be seen and examined. This is particularly the case in the Carboniferous and Permian volcanic areas of Scotland. (l) The crook of the head of a golf club where it joins the shaft.

7. In the clamp process of brickmaking, one of a series of walls of unburned bricks which together constitute a clamp. necromantical (nek-rō-man-ti-kal), *a* [*< necromantic + -al.*] Practising necromancy or the black art

Most necromantical astrologer!
Do this, and take me for your servant ever
T. Fomieu (?) Albumazar, I. 7

necromantically (nek-rō-man'ti-kal-i), *adv* By necromancy or the black art, by conjuring

necronite (nek-rō-nit), *n* [Irreg. < Gr. *νεκρός*, a dead body, + *-it*²] Fetid feldspar, a variety of orthoclase. When struck or pounded it exhales a fetid odor like that of putrid flesh. It is found in small nodules in the limestone of Baltimore

Necrophaga (nek-rof'a-gā), *n* pl [NL., neut. pl of *necrophagus* see *necrophagous*] A division of pentamerous Coleoptera, proposed by Macleay, including various beetles which feed upon carrion, as the *Derestidae*, *Silphidae*, *Nitidulidae*, and *Engidae*. See cut under *Silpha*.

necrophagan (nek-rof'a-gan), *a* and *n* [*< Necrophaga + -an.*] I. *a* Of or pertaining to the *Necrophaga*

II. *n* A member of the *Necrophaga*, as a burying-, sexton-, or carrion-beetle

necrophagous (nek-rof'a-gus), *a* [*< NL. necrophagus*, < Gr. *νεκροφάγος*, eating dead bodies or carrion, < *νεκρός*, a dead body, + *φαγέιν*, eat] Eating or feeding on carrion

necrophilism (nek-rof'i-lizm), *n* [*< Gr. νεκρός*, a dead body, + *φίλος*, loving, + *-ism*] An unnatural or morbid state characterized by a revolting attraction toward the dead. It manifests itself in various ways, those subject to it living beside dead bodies exhaling corpses to see them, kiss them, or mutilate them, etc. Necrophilism sometimes develops into a sort of cannibalism.

necrophilous (nek-rof'i-lus), *a* [*< NL. Necrophilus*, < Gr. *νεκρός*, a dead body, + *φίλος*, loving] Fond of carrion, specifically, pertaining to the genus *Necrophilus*

Necrophilus (nek-rof'i-lus), *n* [NL. (Latreille, 1829) see *necrophilous*] A genus of lamellicorn coleopterous insects of the family *Silphidae*. It closely resembles *Silpha* proper, but the internal mandibular lobe is unmarked at the end, the palps are more filiform, the third antennal joint is almost as long as the first, the second and sixth are submoniliform, and the seventh to eleventh form a club enlarged and serrate, the middle coxae are contiguous, and the first joints of the front and middle tarsi are in the males a little dilated. There is a European species, and several are found in north western America.

necrophobia (nek-rō-fō-bi-ā), *n* [NL., < Gr. *νεκρός*, a dead body, + *φοβία*, < *φοβέσθαι*, fear] 1 A morbid horror of dead bodies—2 An exaggerated fear of death; thanatophobia.

necrophore (nek-rō-fōr), *n* A beetle of the genus *Necrophorus*

Necrophoridae (nek-rō-fōr'i-dē), *n*. [NL., < *Necrophorus* + *-idae*] A family of beetles, founded by Fabricius in 1775, now merged in the *Silphidae*

necrophorous (nek-rof'ō-rus), *a*. [*< Gr. νεκροφόρος*, bearing dead bodies, < *νεκρός*, a dead body, + *φέρω*, bearing, < *φέρω* = E. *bear*.] Conveying and burying dead bodies; specifically, per-

taining to or characteristic of beetles of the genus *Necrophorus*, or having their habits

Necrophorus (nek-rof'ō-rus), *n*. [NL.: see *necrophorous*.] The typical genus of *Necrophoridae*, having ten-jointed antennae. They are mostly large dark colored beetles, sometimes ornamented with reddish or yellowish bands, they usually exhale a musky odor. They have long been noted for burying the bodies of small dead animals, in which they lay their eggs. The larvae resemble those of *Silpha*, but are longer and attenuate at both ends, with a short labrum. The genus is widespread, with numerous species. See cut under *burying-beetle*.

necropolis (nek-rof'ō-lis), *n*. [NL., < Gr. *νεκρόπολις*, a cemetery, < *νεκρός*, a dead body, + *πόλις*, a city] A cemetery, specifically, one of the cemeteries of ancient peoples. Such burying-grounds, in the neighborhood of some sites of ancient cities, are very extensive and abound in valuable remains. From the ancient cemeteries a large part of modern archaeological knowledge has been derived owing to the practice among the peoples of antiquity of depositing in their tombs objects of art and of daily use, and very generally of ornamenting them with characteristic monuments of architecture, sculpture painting, or epigraphy. The name is sometimes given to modern cemeteries in or near towns.

necropsy (nek'rop-si), *n* [*< Gr. νεκρός*, a dead body, + *ψύω*, sight. see *optic*.] Same as *necropsy*

necroscopic (nek-rō-skop'ik), *a* [*< necroscopy + -ic*] Pertaining to necroscopy or post-mortem examinations

necroscopical (nek-rō-skop'i-kal), *a* [*< necroscopy + -al*] Same as *necroscopic*.

necroscopy (nek'rō-skō-pi), *n* [*< Gr. νεκρός*, a dead body, + *σκοπία*, < *σκοπεῖν*, view] The examination of a body after death, post-mortem examination, autopsy. Also *necropsy*

necrose (nek'rōs), *v* *t*, pret and pp. *necrosed*, ppr. *necrosing* [*< necrosis, n*] To be or become affected with necrosis

He was taught in cases of comminuted fracture to take out the splinters of bone, lest they should necrose and give rise to trouble
Medical News, LIII 135

necrosis (nek-rō'sis), *n* [NL., < L. *necrosis*, < Gr. *νεκρωσις*, a killing, in passive sense deadness, < *νεκρῶν*, kill, deaden, intr and pass mortify, < *νεκρός*, a dead body] 1 In *pathol.*, the death of a circumscribed piece of tissue. It may be produced by stoppage of the blood-supply, as in embolism, by mechanical violence, by chemical agency, or by excessive heat or cold. It may involve large masses of tissue, or small clusters of cells, or scattered individual cells. The necrosed tissue may be absorbed and replaced by normal tissue or by cicatricial tissue. It may form a caseous mass, or the cavity may fill with lymph, forming a cyst. 2 In *bot.*, a disease of plants, chiefly found upon the leaves and soft parenchymatous parts. It consists of small black spots, below which the substance of the plant decays. Also called *spotting*—*Coagulation-necrosis*. See *coagulation*.

necrotic (nek-rof'ik), *a* [*< necrosis (-ot-) + -ic*] Characterized by necrosis, exhibiting necrosis, dead, as applied to tissues.

necrotomic (nek-rō-tom'ik), *a*. [*< necrotomy + -ic*] Of or pertaining to necrotomy

necrotomy (nek-rof'ō-mi), *n* [*< Gr. νεκρός*, a corpse, + *-τομή*, < *τέμνειν*, *ταμείν*, cut] Dissection of dead bodies

necrotype (nek'rō-tīp), *n* [*< Gr. νεκρός*, a corpse, + *τύπος*, a type] A type formerly extant in any region, afterward extinct, thus, indigenous horses and rhinoceroses are *necrotypes* of North America. Gill, Smithsonian Report, 1881, p. 460

necrotypic (nek-rō-tīp'ik), *a*. [*< necrotype + -ic*] Having the character of a necrotype

Nectandra (nek-tan'drā), *n* [NL. (Rolander, 1776), irreg. < Gr. *νεκταρ*, nectar, + *άνδρα* (andrā), male (mod. bot. stamen).] A genus of trees of the apetalous order *Lauraceae* and the tribe *Persea*, known by the anthers with four cells in a curving line. There are about 70 species, found from Brazil to Mexico and the West Indies. They bear alternate rigid feather veined leaves, loosely panicle flowers, and globose or oblong berries. The genus furnishes important timber trees and some oils and aromatic products. See *greenheart*, 1, and *bebeera*.

nectar (nek'tār), *n* [= F. *nectar* = Sp. *néctar* = Pg. *nectar* = It. *nettare*, < L. *nectar* = Gr. *νεκταρ*, the drink of the gods (see def. 1); usually explained, without probability, as < *νε-fer*, not (see *no*), + *κτα* in *κτενέειν*, kill (cf. *ἀμβροσία*, ambrosia, the food of the gods, ult. < *a-priv.* + *μωρ*, die).] 1 In *classical myth.*, the drink or wine of the Olympian gods, poured out for them by Hebe and Ganymede, the cupbearers of Zeus. It was reputed to possess wondrous life-giving properties, to impart a divine bloom, beauty, and vigor to him so fortunate as to obtain it, and to preserve all that it touched from decay and corruption. See *ambrosia*.

He esteems the nectar of the goddess,
Homers Nephthe, to come short by odds
Of this delicious juice.

Nectar to all the other gods. Chapman, Iliad, I. 578.

2 Hence, any delicious and salubrious drink. Specifically—(a) A drink compounded of wine, honey, and spices. Also called *piment*. (b) A sweet wine produced in the Greek islands, a name given indifferently to wines of similar quality.

3 In *bot.*, the honey of a flower, the superfluous saccharine matter remaining after the stamens and pistils have consumed all that they require.

nectar-bird (nek'tār-bērd), *n* A honey-sucker or sunbird of the family *Nectarinidae*

nectareal (nek-tā-rē-āl), *a*. [*< nectareous + -al*] 1 Pertaining to nectar, nectarean.—2. Same as *nectarial*.

nectarean (nek-tā-rē-an), *a* [*< L. nectareus*, of nectar (see *nectareous*), + *-an.*] Pertaining to nectar, resembling nectar, very sweet and pleasant

Choicest nectarean juice crown'd largest bowls
And overlook d the brim, alluring sight,
(Of fragrant scent, attractive, taste divine

Gay, Wine

nectared (nek'tārd), *a* [*< nectar + -ed*²] Imbued with nectar; mingled with nectar; abounding in nectar

And a perpetual feast of nectar'd sweets,
Where no crude surfeit reigns

Milton, Comus, l. 479

nectarell, *a*. [In the quoted passage for **nectarell*, < *nectar* + *-al*] Lake nectar; nectareous

For your breaths too, let them smell
Ambrosia-like, or nectarell

Herrick, To his Mistress.

nectareous (nek-tā-rē-us), *a* [= Sp. *nectáreo* = Pg. *nectareo* = It. *nettareo*, < L. *nectareus*, < Gr. *νεκταρεος*, nectareous, < *νεκταρ*, nectar. see *nectar*] Same as *nectarean*

Annual for me the grape, the rose, renew
The juice nectareous and the balmy dew

Pope, Essay on Man, l. 136.

nectareously (nek-tā-rē-us-lī), *adv* In a nectareous manner

nectareousness (nek-tā-rē-us-ness), *n* The quality of being nectareous

nectar-gland (nek'tār-gland), *n* A gland secreting nectar or honey.

nectarial (nek-tā-rī-āl), *a* [*< nectary + -al.*] Of or pertaining to the nectary of a plant

nectaried (nek'tā-rīd), *a* [*< nectary + -ed*²] Provided with nectaries or honey-producing organs, said of flowers or plants

nectarilyma (nek'tā-rī-lī-mā), *n* [NL., < *nectarium*, nectary, + Gr. *λύμα*, what is washed or wiped off, < *λύνω*, L. *luere*, wash. see *lute*², *lave*²] In *bot.*, a collection of long hairs found on the inner surface of some flowers, as *Menyanthes*.

nectarine (nek'tā-rīn), *a* and *n*. [*< OF. nectarin* = Sp. *nectarino*, < NL. **nectarinus*, < L. *nectar*, nectar. see *nectar*] I. *a* Sweet or delicious as nectar

To their supper fruits they fell—
Nectarine fruits, which the compliant boughs
Yielded them

Milton, P. L., iv. 332.

II. *n* A variety of the common peach, from which its fruit differs only in having a rind devoid of down and a firmer pulp. Both fruits are sometimes found growing on the same tree. See *peach*.

Nectarinia (nek-tā-rīn-i-ā), *n*. [NL., < **nectarinus*, of nectar. see *nectarine*.] The representative genus of the family *Nectarinidae*, in which the middle tail-feathers of the male are long-exserted. The species are African. *N. famosa* is an example. *Cinnyris* is a synonym.

Nectarinidae (nek'tā-rī-nī-dē), *n* pl. [NL., < *Nectarina* + *-idae*.] A family of oscine passerine birds, represented by the genus *Nectarinia*, the nectar-birds, honey-suckers, or sunbirds. They have an acute, often very long and arcuate bill, no vibrissae, and a naked nasal scale. The tongue is long, protrusile, and at the end bifid in such a way as to form a kind of tube or haustellum for sucking the juices of flowers. There are 10 primaries, 12 rectrices, and the tarsal are scutellate. The plumage as a rule is gorgeous or exquisite in its iridescence or sheen, greens and yellows being the principal colors. These beautiful birds are confined to the Ethiopian, Indian, and Australian regions. They are non-migratory, and generally lay two white eggs in a woven pensile nest. The nectar-birds represent or replace hummingbirds in the Old World, though the two families belong to different orders. Nearer New World relatives are the *Corvidae* or gnatcatchers. The *Nectarinidae* are sometimes divided into *Nectarininae*, *Promeropinae*, and *Arachnotherinae*. Also *Cinnyridae*, *Nectarinidae*, *Nectarinidae*.

nectarize (nek'tār-īz), *v* *t*; pret. and pp. *nectarized*, ppr. *nectarizing*. [*< nectar + -ize*.] To mingle with nectar; sweeten. Cockerham.

nectarotheca (nek'ta-rō-thē'kē), *n.*; pl. *nectarothecae* (-sē). [NL., < Gr. *nectar*, nectar, + *theca*, a receptacle: see *theca*.] In bot., a honey- or nectar-case; a nectary; specifically, the spur of certain flowers.

nectarous (nek'ta-rus), *a.* [*nectar* + *-ous*.] Resembling nectar; nectarean.

From the gash
A stream of nectarous humour issuing flow'd
Sanguine Milton, P. L., vi. 382.

nectary (nek'ta-ri), *n.*; pl. *nectaries* (-riz). [= *F. nectaire* = Sp. *Pg. nectario* = It. *nettario*, < NL. *nectarium* (Linnaeus), a nectary (cf. Gr. *νεκτάριον*, a certain plant, otherwise *ἐκτινον*: see *Helenium*), < Gr. *nectar*, nectar. see *nectar*.] 1. In bot., a part of a flower that contains or secretes a saccharine fluid. Sometimes it is a prolongation of the calyx, as in *Tropaeolum*, or of the corolla, as in *Viola*, *Aquilegia*, and *Aconitum*, or it may belong

Nectary of (a) *Fritillaria meleagris* (fritillaria), (b) *Ranunculus acris* (cuckoo-bill), (c) *Ranunculus acris* (cuckoo-bill), (d) *Ranunculus acris* (cuckoo-bill), (e) *Ranunculus acris* (cuckoo-bill), (f) *Ranunculus acris* (cuckoo-bill), (g) *Ranunculus acris* (cuckoo-bill).

to some other organ. The curious fringed scales of *Parasitica*, those on the claws of the petals of *Ranunculus*, and the pits on those of the lilies and fritillaries are also nectaries, as are the crown of the narcissus, the processes of the passion flower, and the inner minute scales of grasses. The name *nectary* should be restricted to those parts which actually secrete honey, care being taken not to confound these parts with the different kinds of disk.

2 In entom., one of two little tubular organs on the abdomen of an aphid or plant-louse, from which a sweet fluid like honey is exuded. Also called *honey-tube*, *siphuncle*, or *cornicle*.

nectocalyxine (nek-tō-kāl'i-ān), *a.* [*nectocalyx* (-calyx) + *-ine*.] Having the character of a nectocalyx; of or pertaining to a swimming-bell.

nectocalyx (nek'tō-kā-lik-s), *n.*, pl. *nectocalyces*, *nectocalices* (-kā-lik-sēz, -kāl'i-sēz). [NL., < Gr. *νηκτός*, swimming, + *καλός*, swim: see *nectant*, + *καλός*, a cup, the envelop of a flower, etc.: see *calyx*.] A swimming-bell; the bell-shaped or discoidal natatory organ with which many hydrozoans are provided, and by means of which the hydrosome is propelled through the water. The nectocalyx alternately contracts and relaxes, giving rise to a gently undulatory movement. It consists of a cup or bell attached to the hydrosome by its base, and furnished with appropriate muscles for the execution of its movements. A nectocalyx is morphologically an undeveloped asexual medusiform person, without a manubrium, tentacles, or sense-organs. See cuts under *Diphyllia*, *medusiform*, *Hydrozoa*, and *Willela*.

nectocyst (nek'tō-sist), *n.* [*Gr. νηκτός*, swimming, + *κύστις*, a bag.] Same as *nectosac*.

Nectopoda (nek-top'ō-dā), *n.*, pl. [NL., < Gr. *νηκτός*, swimming, + *πούς* (pod-) = *E. foot*.] In conch., in De Blainville's classification (1825), one of two families (the other being *Heteropoda*) into which his order *Nucleobranchiata* was divided. It was composed of the genera *Pterotrachea* (or *Pterota*) and *Carinaria*, corresponding to the family *Pterotracheidae* in a broad sense, or to the modern families *Pterotracheidae* and *Carinariidae*, now referred to an order *Heteropoda*. See *Heteropoda*.

nectosac (nek'tō-sak), *n.* [*Gr. νηκτός*, swimming, + *σάκος*, a bag or sack: see *sac*.] The interior or cavity of a swimming-bell or nectocalyx. Also *nectocyst*.

nectosome (nek'tō-sōm), *n.* [*Gr. νηκτός*, swimming, + *σῶμα*, body.] The upper or proximal portion of a siphonophorous stock modified for swimming: contradistinguished from the *siphosome*, which is the nutrient portion.

nectostem (nek'tō-stēm), *n.* [*Gr. νηκτός*, swimming, + *E. stem*.] In *Hydrozoa*, the axis of a series of nectocalyces.

Just below the float on the nectostem there is a small cluster of minute buds in which can be found nectocalices of all sizes [in *Agalma*]. Stand Nat. Hist., I 90.

nectosoid (nek-tō-sō'id), *n.* [*Gr. νηκτός*, swimming, + *E. zooid*.] A nectocalyx considered as a zooid.

Necturus (nek-tū'rus), *n.* [NL., < Gr. *νηκτός*, swimming, + *ουρά*, tail.] A genus of amphibians same as *Menobranchius*.

nedder, *a.* A Middle English form of *nadder* for *ne hadde*, had not.

nedder, *n.* A form of *nadder*, usually *adder*. See *nadder*, *adder*.

nedder, *a.* A dialectal form of *nether*.

neddy (ned'i), *n.*, pl. *neddies* (-iz). [A particular use of *Neddy*, dim. of *Ned*, a familiar form of *Ed*, a common dim. abbreviation of *Edward* (cf. equiv. *cuddy*).] An ass, a donkey.

nedet, *n.*, *v.*, and *adv.* A Middle English form of *need*.

nedest, *adv.* A Middle English form of *need*.

nedlet, *n.* A Middle English form of *needle*.

nee, *v.* An obsolete or dialectal form of *neigh*.
née (nā), *f.* [*F. née*, fem. of *né* (< *L. natus*), pp. of *natus*, < *L. nasci*, be born: see *nascant*, *natal*.] Born. sometimes placed before a married woman's maiden name to indicate the family to which she belongs: as, Madame de Staël, née Necker (that is, Madame de Staël, born Necker, or whose family name was Necker).

need (nēd), *n.* [*ME. need*, *neede*, sometimes *neethe*, < AS. *nīd*, *nīd*, *nēd*, by umlaut from *nodd*, *neōd*, necessity, need, compulsion, force, urgent requirement, want, etc. = OHG *nōd* = OFries *nāth*, *nēd* = D. *nood* = MLG *nōt* = OHG MHG *nōt*, G. *noth*, *not* = Icel *naudh*, *naudhr*, *neydh* = Sw. The knights sat down and ate and drank as they that ther to have grete neede. Merlín (E. E. T. S.), III 517.

Little neede there was, and less reason the ship should stay. Quoted in Capt. John Smith's Works, I 189.

The sea itself, which one would think should have but little need of drink, drinks ten thousand rivers up. Cowley, Anacreontics II.

2 Specifically, want of the means of subsistence, destitution, poverty, indigence, distress, privation.

As well knowe ye the neede of the londe as do I. Merlín (E. E. T. S.), III 506.

Famine is in thy cheeks,
Need and oppression starveth in thine eyes
Contempt and beggary hangs upon thy back. Shak., R. and I., v 1 70.

3 Time of want, exigency, emergency as, "a friend in need is a friend indeed."

Thow shalt finde Fortune the failest at thi moeste neede. Piers Plowman (B) xl 28.

For in many a neede he hadde hym accoured and holpen. Merlín (E. E. T. S.), III 678.

Deserted at his utmost need
By those his former bounty fed. Dryden, Alexander's Feast, l. 80.

4. That which is needful; something necessary to be done.

Hoom to hurrye ben they went ful fayn,
And doon her needes as they han doon yore. Chaucer, Man of Law's Tale, l. 76.

5. A perilous extremity. Chaucer — At need, at one's need, at a time of greatest requirement, in a great exigency, in a strait or emergency.

Three fair queene,
Who stood in silence near his throne, the friends
Of Arthur, gazing on him, tall, with bright
Sweet faces, who will help him at his need. Tennyson, Coming of Arthur.

—Syn. 1. Necessity, Need (see necessity and exigency), emergency, strait, extremity, distress. — 2. Want, indigence, etc. See poverty.

need (nēd), *v.* [*ME. noden*, < AS. *nīdan*, *nīdan*, *nēdan*, also *neōdan*, compel, force, < *nīd*, *nēd*, *nōd*, need, compulsion. see *need*, *n*.] 1. *trans.* To have necessity or need for; want; lack; require.

They that be whole need not a physician, but they that are sick. Mat. ix. 12.

An hundred and fiftie other Tenements for the poore of the Citty, which have there an asper a day, and as much bread as they need. Purchas, Pilgrimage, p. 290.

[Need, especially in negative and interrogative sentences implying obligation or necessity, is often used, in the present, before an infinitive, usually without *to*, need being then invariable (without the personal terminations of the

second and third persons singular) as, he or they need not go, need he do it? = Syn. Want, etc. See lack.

II. *intrans.* To be wanted, be necessary used impersonally.

It needeth not to telle you the names of the Cytees, ne of the Townes that ben in that Weye. Mandeville, Travels, p. 54.

There needs no such apology. Shak., Rich. III., III 7 104.

In north of England I was born

She let it drop by *negligence*,
And, to the advantage, I, being here, took 't up
Shak, *Othello*, III 3 311

2 Specifically, in law, the failure to exercise that degree of care which the law requires for the protection of those interests of other persons which may be injuriously affected by the want of such care. If such failure directly results in injury to the interests of another person, who did not by his own negligence contribute to the result, the negligence is *actionable negligence*. If the failure to exercise due care is wilful, liability is incurred irrespective of contributory negligence, but the failure may still be treated at the option of the person injured as mere negligence, so far at least as concerns the liability of the person actually guilty of it and in some cases also for the purpose of holding his employer liable. By a rule of law which obtains in some of the United States the person injured may recover notwithstanding his own negligence if it was slight as compared with that of the defendant (*comparative negligence*). *Contributive or contributory negligence* is negligence, on the part of the person injured which contributed to produce the injury. *Gross negligence* is the failure to exercise even slight care, and is usually measured by reference to that degree of care which every person of ordinary sense, however inattentive, takes of his own interests. *Ordinary negligence* is the failure to exercise ordinary care, usually measured by reference to that degree of care which a man of common prudence and capable of governing a family takes of his own interests. *Slight negligence* is the failure to exercise a high degree of care, usually measured by reference to that diligence with which a circum-spect and thoughtful person would attend to his own interests. Whether these three degrees are proper distinctions to be observed as a test of liability for damages is much disputed, but there is no question that the law fully recognizes in a general way the corresponding degrees of care as required of persons in various different relations, nor that degrees of neglect must be noticed by the law in determining other questions than that of liability for damages, as good faith, fidelity, etc.

3 Lack of attention to matters or conventionalities, especially of dress, manner, or style; disregard of appearances, easy indifference of manner

Many there are who seem to slight all Care,
And with a pleasing *Negligence* unware
Congree, tr of Ovid's Art of Love

Horace still chatters with graceful *negligence*,
And without method talks us into sense
Pope, *Essay on Criticism*, I 658

4 An act of neglectfulness, an instance of negligence or carelessness

Remarking his beauties, I must also point out his

E. *negrescent*, *negritude*, *Negella*, *niello*, *anneal* (in part), etc. The words *Moort*, *blackamoor*, in the same sense, are much older in E.] I. *n*; pl. *negroes* (-grōz) A black man, specifically, one of a race of men characterized by a black skin and hair of a woolly or crisp nature. Negroes are distinguished from the other races by various other peculiarities—such as the projection of the visage in advance of the forehead, the prolongation of the upper and lower jaws, the small facial angle, the flatness of the forehead and of the hinder part of the head, the short, broad, and flat nose, and the thick projecting lips. The negro race is generally regarded as comprehending the native inhabitants of Sudan, Senegambia, and the region southward to the vicinity of the equator and the great lakes, and their descendants in America and elsewhere. In a wider sense it is used to comprise also many other tribes further south, as the Zulus and Kafirs. The word *negro* is often loosely applied to other dark or black-skinned races, and to mixed breeds. As designating a "race," it is sometimes written with a capital.

Toward the south of this region is the kingdom of Guinea, with Senega, Mofo, Gambia, and many other regions of the black Moors called Ethiopians or *Negros*, all which are watered with the ryuer Negro, cauled in owlde tyme Niger.

R. Eden, *First Three English Books on America* (ed. Arber), p. 374.

II. *a* Of, pertaining to, or characteristic of black men or negroes as, *negro* blood; *negro* dances.

It is often asked what *Races* are *Negro*, as the meaning of the term is not well defined. The word is not a National appellation, but denotes a physical type, of which the tribes in North Guinea are the representatives. When these characteristics are not all present, the Race is not *Negro*, though black and woolly haired.

R. N. Cus, *Mod. Langa*, of Africa, p. 58.

Nemachilus (nem-a-kī'lus), *n.* [*NL. < Gr. νῆμα, a thread (< νῆμ, spin see needle), + χείλος, a lip*] A genus of cobitid fishes or loaches having barbels on the lips and no suborbital spine, as the common European *N. barbatulus*. See *cut* under *loach*.

Nemæan, *a.* See *Nemean*

Nemalium (nem-a-lī'ūm), *n. pl.* [*NL. < Nema-lion + -ium*] A suborder of florideous algae, typified by the genus *Nemalion*

Nemalion (nē-mā'h-on), *n.* [*NL. (Duby, 1830)*, so called from the cylindrical solid fronds; irreg. *< Gr. νῆμα, a thread*] A small genus of marine algae, typical of the suborder *Nemalinea*, with repeatedly dichotomous gelatinous fronds *N. multisetum* is the most common and widely diffused species, it has brownish-purple lubricous fronds, from 2 to 8 inches long

nemalite (nem'a-līt), *n.* [*< Gr. νῆμα, a thread, + λίθος, a stone*] The fibrous variety of brucite, or native hydrate of magnesium. It occurs in slender fibers, which are elastic, sometimes curved, and easily separated, the color is white with a shade of yellow, the luster highly silky

nemathæce (nem'a-thēs), *n.* [*< nemathodium*] Same as *nemathodium*

nemathelial (nem-a-thē'si-āl), *a.* [*< nemathodium + -ial*] Of or pertaining to the nemathodium: as, the *nemathelial* filaments.

nemathodium (nem-a-thē'si-um), *n.*; *pl. nemathodia* (-ē) [*< Gr. νῆμα, a thread, + θῆσις, dim. of θῆκη, a case or receptacle see theca.*] A wart-like elevation developed on the surface of the thallus of some of the higher algae (*Florideae*), and ordinarily containing clusters of tetraspores mixed with barren hyphae or paraphyses but in some forms the antheridia and cystocarps are also produced in similar protuberances.

nemathelminth (nem-a-thel'minth), *a* and *n*. [*Gr* νημα-
τόν, thread-like. see *nematoid*] Same as
nematoid. Also *nemathelminth*.

II. n. A member of the *Nemathelminthes*.
Nemathelmintha (nem-a-thel-min'thē), *n. pl* [NL.] Same as *Nemathelminthes*.

Nemathelminthes (nem-a-thel-min'thēz), *n. pl* [NL., < *Gr* νημα (νημα-), thread, + ελμυς (έλμυς), worm] A class of *Vermes*, including nematoid worms and certain related forms, the roundworms or threadworms. They are round or cylindrical worms, sometimes extremely slender and filiform or thread like, from less than an inch to several feet in length, found everywhere, and mostly parasitic (endoparasitic). Those that are never parasitic are generally of very minute size. Some are parasitic in the larval state, and free when adult, in others this is reversed. The body is not truly segmental, though the cuticle may be ringed. The class is chiefly made up of the *Nematodea*. It includes, however, the *Acanthocephala* (*Echinorhynchidae*) and formerly the *Chaetognaths* (*Sagittae*) were added. The term is sometimes used synonymously with *Nematodea*. See cuts under *Nematodea*, *Acanthocephala*, and *Sagitta*.

nemathelminthic (nem-a-thel-min'thik), *a*. [*Gr* νημαθελμινθ + -ic.] Same as *nemathelminth*.

Nematistius (nem-a-tis-ti'i-dē), *n. pl.* [NL., < *Nematistius* + -idae] A family of acanthopterygian fishes, represented by the genus *Nematistius*. The body is oblong, covered with scales, and having a continuous lateral line, the head is compressed, and the mouth obliquely cleft, the eyes are lateral and the opercular bones unarmored. There are 2 dorsal fins, the first with 8 spines, most of which are elongate and filamentous, the anal is moderately long, with 8 spines the ventrals have a spine with 5 rays, the innermost of which is composed of many parallel branches, and the caudal is furcate.

Nematistius (nem-a-tis-ti-us), *n.* [NL., prop. **Nematistius*, < *Gr* νημα (νημα-), thread, + ιστιος, web; see *histoid*] The typical genus of *Nematistidae*, so called from the thread-like extension of the spines of the first dorsal fin. There is only one species, *N. pectoralis*.

nematoblast (nem-a-tō-blást), *n.* [*Gr* νημα (νημα-), a thread, + βλαστός, a germ] Same as *spermatoblast*. See *testis*.

nematocalyxine (nem-a-tō-kal'i-mīn), *a*. [*Gr* νηματοκαλυσ (νηματοκαλυσ) + -ine] Pertaining to or having the character of a nematocalyx.

nematocalyx (nem-a-tō-kā'lik-s), *n.*, *pl* *nematocalyces*, *nematocalyces* (-kā'lik-sez, -kal'i-sez) [NL., < *Gr* νημα (νημα-), thread, + καλὺς, calyx; see *calyx*] A calyx of some hydrozoans, as *Plumularia*, containing nematocysts.

Nematocera (nem-a-tōs'e-ra), *n. pl* [NL., neut. pl. of *nematocerus*; see *nematoceros*] A suborder or section of *Diptera*, containing the numerous insects known as gnats, midges, mosquitoes, crane-flies, gall-flies, etc. so called from the long thread-like antennae. These organs are usually many jointed, with from 6 to 16 joints, most of which are alike and often plumose or setose, and the maxillary palpi are often long, 4- or 6-jointed. See *Nemocoera*.

nematoceros (nem-a-tōs'e-rus), *a*. [*Gr* νηματοκερας (νηματοκερας), < *Gr* νημα (νημα-), thread, + κέρας, horn; see *ceras*] Having long or thread-like antennae, as a dipterous insect, or of pertaining to the *Nematocera*, nematoceros.

nematocyst (nem-a-tō-sist), *n.* [*Gr* νημα (νημα-), a thread, + κύστις, bladder, bag; see *cyst*] A thread-cell or lasso-cell, a endocell or endida; one of the organs of offense and defense

Tentacle and Nematocysts of *Athyridia*. A, tentacle, with A peduncle, B, invagination of C, the sacculus, with D, its filaments, E, ectoderm, F, endoderm, G, nematocyst; H, a thread-cell or lasso-cell, enlarged, the lower one, with its filament projected from the sheath.

peculiar to coelenterates, as jellyfishes, by means of which they sting. See cuts under *cnida*, *Actinozoa*, and *Willula*.

nematocystic (nem-a-tō-sis'tik), *a*. [*Gr* νηματοκύστις (νηματοκύστις) + -ic.] Pertaining to or having the character of a nematocyst; endarian.

Nematoda (nem-a-tō'dā), *n. pl.* [NL., irreg. for *Nematodea*, *Nematodea* see *nematoid*] Same as *Nematodea*.

nematode (nem-a-tō'd), *a*. and *n.* [*Gr* νημα-
τόν, thread-like. see *nematoid*] Same as *nematoid*.

Nematodea (nem-a-tō'dē-ā), *n. pl* [NL., < *Gr* νηματόν, thread-like. see *nematoid*] Same as *Nematodea*.

Nematodontes (nem-a-tō-don'tē-ē), *n. pl* [NL., < *Gr* νημα (νημα-), a thread, + οδών (όδων-), = E tooth, + -es] A division of mosses in which the teeth of the peristome are not provided with transverse septa opposed to the *Athrodontes*, in which the teeth are transversely septate.

nematogen (nem-a-tō-jen), *n.* [*Gr* νηματογενος (νηματογενος), The vermiform embryo of a nematoid worm; one of the phases or stages of nematoid embryos opposed to *rhombogen*. See cut under *Dicyema*.

Nematogena (nem-a-tō-jē-nā), *n. pl.* [NL., neut. pl. of *nematogenus*; see *nematogenous*] Those nematogenous *Dicyemida* which give rise to vermiform embryos, as distinguished from *Rhombigena*, which produce infusiform embryos. See cut under *Dicyema*.

nematogenic (nem-a-tō-jen'ik), *a*. Same as *nematogenous*. *Encyc Brit*, XVIII 259.

nematogenous (nem-a-tō-jē-nus), *a*. [*Gr* νηματογενος (νηματογενος), < *Gr* νημα (νημα-), thread, + -γενος, producing; see -gen] Producing vermiform embryos, as a nematoid worm, having the characters of a nematogen.

Thus the *nematogenous* *Dicyema* gives rise by a gametic process to new *Dicyema*. *Huxley, Anat Invert*, p 600.

Nematoglossata (nem-a-tō-glo-sā'tā), *n. pl* [NL.] Same as *Nemoglossata*.

nematognath (nem-a-tō-gnāth), *a* and *n*. [*Gr* νηματογνάθος (νηματογνάθος), < *Gr* νημα (νημα-), thread, + γνάθος, jaw] I. *a* Having barbels on the jaws, as a catfish, specifically, of or pertaining to the *Nematognathi*.

II. *n* A member of the *Nematognathi*, any catfish.

Nematognathi (nem-a-tō-gnā-thi), *n. pl* [NL., pl. of **nematognathus*; see *nematognath*] An order of teleost fishes in which the suprmaxillary bones are lateral and short or rudimentary, and covered with skin which forms barbels at each corner of the mouth, whence the name, the *nematognathi* or catfishes. The intermaxillaries are closely apposed to the ethmoid and immovably fixed. There is no subopercular, the four anterior vertebrae are coalesced into a single piece, and elements are detached to form bones which connect the air bladder with the organ of hearing. *Nematognathi* have no true scales; they are either naked or have appendages developed as plates on all or a part of the body. About 800 species are known, they are especially numerous in tropical waters, both fresh and salt. By some authors all have been referred to one family, *Siluridae*, by others from 8 to 12 families are admitted. They are most closely related to plotosomoid fishes, as the characids and cyprinoids. The two most prominent families are *Siluridae* proper and *Loricariidae*. See cuts under *Siluridae* and *Loricariidae*.

nematognathous (nem-a-tō-gnā-thus), *a*. [*Gr* νηματογνάθος (νηματογνάθος), Same as *nematognath*.

nematoid (nem-a-tō'id), *a*. and *n*. [*Gr* νηματοειδής (νηματοειδής), contr. νηματόν, thread-like, thready, fibrous, filamentous, < νημα (νημα-), thread, + εἶδος, form] I. *a* Thread-like, as a worm. (a) In zoöl, nemathelminth, or of pertaining to the *Nematodea*. (b) In mycol, thread like or filamentous applied to the hyphae or mycelium.

II. *n* A threadworm, hairworm, roundworm, or pinworm.

Also *nematode*, *nematodean*.

Nematodea (nem-a-tō'idē-ā), *n. pl* [NL. see *Nematoda*] An order of *Nemathelminthes*, or class of *Vermes*, having a mouth and an alimentary canal and separate sexes, and being usually parasitic, the nematoid worms, the roundworms and threadworms. The name was introduced by Rudolphi for worms previously known under the name of *Ascarides*, a term afterward used in a much restricted sense. Most of these worms are endoparasitic at one or another stage of their life or during the whole of it, those which are not are mostly of minute size. There are several distinct families, and most of them have popular names. Thus, the *Ascaridae* contain the roundworms and pinworms of the human rectum. The *Strongylidae* or strongyles are parasites of various parts of the body, like the *Trichinidae* or mealies of pork. The *Philaridae* are the guinea-worms. The *Gordius* are the horsehair worms, found in ponds and brooks and in the bodies of insects. *Anguillulidae* are the little creatures known as vinegar eels. Some nematodes are marine. In Cuvier's system, in which the *Nematodea* are the first order of *Emisozoa*, they included the lernaeans crustaceans. In a late arrangement they are made the fourth phylum or main division of coelomatus animals, and divided into three classes, called *Eunematoidea*, *Chaetognathia* (with genera *Chaetognathus* and *Rhabdogaster*), and *Chaetognathia* (*Sagitta* and *Spadella*). Also *Nematoda*, *Nematodea*, *Nematodes*, *Nematodae*. See cut in next column, and cuts under *Oxyuris*, *Philaria*, and *Gordius*.

Nematopoda

A threadworm (*Anguillula brevispinis*). I, male; II, female; III, female, ventral view; IV, seminal corpuscle; A, unilocular uterine glands at anal end; B, fatty looking gland; C, sexual aperture; D, seminal corpuscles; E, testis; F, esophagus; G, dilated oral capsule; H, gastric and rectal parts of alimentary canal; I, anterior and posterior thickening, with their common core. B, ovary, C, dilatation of uterus serving as a receptaculum seminis.

nematodean (nem-a-tō'idē-an), *a* and *n*. [*Gr* Νεματοδεα + -αν] Same as *nematoid*.

Nematoneura (nem-a-tō-nū'ra), *n. pl* [NL., < *Gr* νημα (νημα-), a thread, + νευρον, a nerve, nerve; see *neura*] A division of animals proposed by Owen for the higher *Radiata* of Cuvier, in which a nervous system is apparent. The group included the echinoderms, rotifers, polychaetes, and caelomins.

nematoneurous (nem-a-tō-nū'rus), *a*. Of or pertaining to the *Nematoneura*.

Nematophora (nem-a-tō'fō-rā), *n. pl* [NL., < *Gr* νημα (νημα-), thread, + φέρω, < φέρω = E bear] A prime division of *Ctenophora*, containing all those which have thread-cells or stinging-hairs, the nematophorans, nematophorous coelenterates, or *Cnidaria* distinguished from *Porosia* or sponges. The name is a synonym of *Cnidaria* in the usual and current sense of that term, as covering the *Anthozoa*, *Hydrozoa*, and *Ctenophora*. In some arrangements, as that of E. L. Lankster, *Nematophora* are a prime division or phylum of animals, with four classes: (1) *Hydromedusae*, (2) *Scaphomedusae*, (3) *Actinozoa*, and (4) *Ctenophora*. Also called *Cnidaria*, *Ephyra*.

nematophoran (nem-a-tō'fō-ran), *a* and *n*. I. *a*. Same as *nematophorous*, 2.

II. *n* A member of the *Nematophora*, a cnidian or coelenterate having thread-cells or stinging-organs.

nematophore (nem-a-tō'fōr), *n.* [*Gr* νημα (νημα-), a thread, + φέρω, < φέρω = E bear] A cup-shaped eecal appendage of the ctenophores of the polypary of plumularians, scutellarians, and other hydromedusans, containing numerous thread-cells or nematocysts at its extremity.

nematophorous (nem-a-tō'fō-rus), *a*. [*Gr* νηματοφόρος (νηματοφόρος), < νημα (νημα-), thread, + φέρω, < φέρω = E bear] 1. Of or pertaining to a nematophore. 2. Pertaining to the *Nematophora*, or having their characters, cnidian. Also *nematophoran*.

Nematophyceae (nem-a-tō'fī-se-ē), *n. pl* [NL., < *Gr* νημα (νημα-), a thread, + φύκος, a seaweed, + -ει] An order of multicellular chlorophyllaceous algae, consisting of a single branched or unbranched filament of cells, propagating by means of oöspores or zoögonidia. It contains, according to Rabenhorst, the families *Utracae*, *Sphaeropleaceae*, *Conferaceae*, *Udoogonaceae*, *Ulothricaceae*, *Crotophaceae*, and *Chaetophoreae*. Later algologists have made different disposition of several of these families, placing them in the *Zooecoporeae*.

Nematophycus (nem-a-tō'fī-kus), *n.* [NL., < *Gr* νημα (νημα-), thread, + φύκος, a seaweed.] The name given by Carruthers to a plant first found in the Devonian of Gaspé in Canada, by Dawson, and named by him *Prototaxites* and considered to belong to the *Conyfera*, although differing in certain important respects. The same plant, to which Dawson later gave the name of *Nematophyton*, was examined by Carruthers and placed among the *Algae*, he considering it an anomalous alga and one which it was not possible to correlate with certainty with any known alga. Later (in 1875) the same plant was discovered by Hicks much lower in the geological series, namely, in the Denbighshire grits (a rock occupying a rather uncertain position, but probably near the limit between Upper and Lower Silurian). The specimens from this position have been identified with the *Nematophycus* of Carruthers (the *Prototaxites* of Dawson) by Etheridge, who considers it as unquestionably forming a portion of a colossal seaweed, whose habits resemble those of the North Pacific species of the genus *Nereocystis* and the arborescent *Leanomia*.

Nematophyton (nem-a-tō'fī-ton), *n.* See *Nematophycus*.

Nematopoda (nem-a-tō'pō-dā), *n. pl* [NL., < *Gr* νημα (νημα-), thread + ποδ (ποδ-) = E foot] De Blainville's name (1825) of the cirrpedes, as the first class of his *Malentozozoa*, contrasted

with a second class *Polyplaxiphora*, containing the chitons so called from the thready legs of barnacles or acorn-shells. The *Nematopoda* were divided into two families, *Lepadacea* and *Balanacea*. See cuts under *Lepadacea* and *Balanacea*.

Nematoscopes (nem'-a-tō-skol'-i-sēz), *n. pl.* [NL, prop. *Nematoscopes*, < Gr *nēma* (*nēma*-), thread, + *skōlē*, a worm see *scōlē*] A superordinal division, proposed by Huxley for the *Nematodea* and their allies, which are as remarkable for the general absence of cilia as are the *Trichoscolec* for their presence, and which are further distinguished by the nature of their eedyses and by the disposition of their nervous, muscular, and water-vascular systems.

nematoscolicine (nem'-a-tō-skol'-i-sin), *a.* Pertaining to the *Nematoscopes*, or having their characters.

nematozooid (nem'-a-tō-zō'-oid), *n.* [< Gr *nēma* (*nēma*-), thread, + *zōōid*] A stinging-fentacle or filament of a siphonophore regarded as a zooid.

Nematura (nem-a-tū'-rā), *n.* [NL, < Gr *nēma* (*nēma*-), thread, + *oipā*, tail] In *zool.*, a name of various genera. (a) In *ornith.* (1) A genus of sand grouse, a synonym of *Syrhaptes*. (2) A genus of Asiatic warblers, containing such as *N. cyanaura*, *N. rufilata*, etc. In this sense originally *Nemura* Hodgson, 1844. (b) In *conch.*, a genus of risolod gastropods, subsequently named *Stenothyrus*. (c) In *entom.*, a genus of pseudoneuropterous insects of the family *Perilidae*. The body is depressed, and the abdomen ends in two long filaments, the labial palpi are short and approximate, and the second tarsal joint is very short. The larvae are aquatic. The genus is a large one and the species are wide spread. They are known as *willow flies*. Originally written *Nemoura*. Latreille, 1796. See cut under *Perla*.

nem. con. An abbreviation of *nemine contradicente*.

Nemes (nē-mē'-ē), *n. pl.* [NL (Fries), < Gr *nēma*, a thread, + *-ia*] Cryptogams so called by Fries in allusion to the supposed fact that they germinate by means of a protruded thread, without indications of cotyledons, a character which does not hold good in all. See *Cryptogamia*.

Nemean (nē-mē-an or nē-mē'-an), *a.* [< L. *Nēmeus* or *Nēmēus*, also *Nemeus*, incorrectly *Nēmeus*, < Gr *Nēmos*, *Nēmos* (neut. pl. *Nēmeia*, the Nemean games), also *Nēmaios*, *Nēmaios*, pertaining to Nemea, < *Nēma* (> L. *Nēma*), a valley in Argolis in Greece, appar. 'pasture-land,' < *nēma*, a wooded pasture, < *nēma*, pasture] Of or pertaining to Nemea, a valley and city situated in the northern part of Argolis, Greece, held by Argos during almost the whole of the historical age of ancient Greece. In the valley was the wood in which, according to tradition, Hercules slew the Nemean lion, which feat is counted one of his twelve labors.

My fate cries out,
And makes each petty artery in this body
As hardy as the Nemean lion's nerve.

Shak., Hamlet, I 4 83

Nemean games, one of the four great national festivals of the ancient Greeks (the others being the Olympian, Pythian, and Isthmian games). These games were celebrated at Nemea in the second and fourth years of each Olympiad, near the temple of the Nemean Zeus, some (Doric) columns of which are still standing. According to the mythological story, the games were instituted in memory of the death of the young hero Archemorus or Opheltes by the bite of a serpent as the expedition of "the Seven against Thebes" was passing through the place. The victor's garland at the Nemean games was made of parsley.

nemelt, *a.* An obsolete form of *nimble*.

Nemertea (nē-mēr'-tē-ā), *n. pl.* [NL, < *Nemertes*, *q. v.*] A class of *vermes* having a long straight alimentary canal, an anus, a protrusile proboscis, and usually distinct sexes, the nemertean or nemertine worms. They were formerly classed with the platyhelminths, and known as the *rhynchocoelous turbellarians*, but they are more nearly related to annelids. They have well developed muscular, blood vascular, and nervous systems. Most of the species are dioecious, and some are viviparous. There are commonly ciliated pits on the head. The object known as a *phidum* is the free swimming larva of a nemertean. These worms vary greatly in general outward aspect, in size, and in habits. Some are minute, others very long. (See *Lancea*.) They live for the most part in the sea, but some live in the mud or on land, and some are parasitic. The *Nemertes* are often divided into two orders, called *Anopla* and *Euploia* according as the proboscis is armed with stylets or unarmed. Of the latter order is the family *Nemertidae* (or *Amphiporidae*), the *Lancea* and *Cephalothroca* are an oplan. Another division is into *Urolophoreta*, *Schizoneurata*, and *Palaemonemertea*. See *Rhynchocoela*, and cuts under *phidum* and *proboscis*. Also written *Nemertodea*.

nemertean (nē-mēr'-tē-an), *a.* and *n.* [< *Nemertes* + *-an*.] *I. a.* Pertaining to the *Nemertes*, or having their characters.

II. n. A worm of the class *Nemertea*.

Nemertes (nē-mēr'-tēz), *n.* [NL, < Gr *Nemertes*, the name of a Nereid, < *νῆμερτις*, unerring, infallible, < *νῆ-* priv. (see *no*) + *ἀμάρτην*, miss, err] A genus of nemertean worms, to which

different limits have been given. (a) The genus also called *Borlasi*. (b) The genus also called *Lancea*.

nemertian (nē-mēr'-ti-an), *a.* and *n.* [< *Nemertea* + *-ian*.] Same as *nemertean*.

nemertidan (nē-mēr'-ti-dan), *a.* and *n.* [< *Nemertea* + *-id* + *-an*.] Same as *nemertean*.

nemertine (nē-mēr'-tin), *a.* and *n.* [< *Nemertes* + *-ine*.] Same as *nemertean*.

nemertoid (nē-mēr'-toid), *a.* and *n.* [< *Nemertes* + *-oid*.] *I. a.* Resembling a nemertean; pertaining to the *Nemertes*, or having their characters, nemertean, nemertine.

II. n. A nemertean.

Nemesis (nē-mēs'-ik), *a.* [< *Nemesis* + *-is*.] Having or exhibiting the character of *Nemesis*, fatal, in the sense of necessary; retributive, avenging.

Nemesis (nem'-e-sis), *n.* [< L. *Nemesis*, < Gr. *Nēmeis*, a goddess of justice and divine retribution, < *νῆμειν*, deal out, distribute, dispense; see *neme*, *neme*, etc.] *1.* In *Gr. myth.*, a goddess personifying allotment, or the divine distribution to every man of his precise share of fortune, good and bad. It was her especial function to see that the proper proportion of individual prosperity was preserved, and that any one who became too prosperous or was too much uplifted by his prosperity should be reduced or punished, and thus came to be regarded as the goddess of divine retribution. Sometimes *Nemesis* was represented as winged and with the wheel of fortune, or borne in a chariot drawn by griffins, and confounded with *Adrasteia*, the goddess of the inevitable. Hence — *2.* Retributive justice.

Is Talbot slain the Frenchmen's only scourge,
Your kingdom's terror and black Nemesis?
Shak., I Hen. VI., iv 7 78

Against him invokes the terrible *Nemesis* of wit and satire.
Bushman, Nature and the Supernat., v 3 [NL] In *zool.*, a genus of crustaceans *Roux*, 1827 — *4.* The 128th planetoid, discovered by Watson in 1872.

Nemestrinidae (nem-es-trin'-i-dē), *n. pl.* [NL, < *Nemestrinus* + *-ida*.] A family of dipterous insects founded by Macquart in 1834 upon the genus *Nemestrinus*. They are distinguished by the very numerous cross veins of the wings, which thus appear almost reticulate. They are medium sized flies, slightly hairy, of dark-brown or black color with lighter bands or spots and most of them have a very long proboscis. It is a small family of about 100 known species, of which scarcely a dozen inhabit Europe and North America.

Nemestrinus (nem-es-tri'-nus), *n.* [NL] A genus of dipterous insects founded by Latreille in 1802, formerly placed in *Tabanidae*, now made typical of *Nemestrinidae*.

Nemichthyidae (nem-ik-thi'-i-dē), *n. pl.* [NL, < *Nemichthys* + *-ida*.] A family of deep-sea apodal or muraenoid fishes, typified by the genus *Nemichthys*. The body is much elongated, and scaleless, the head is long with greatly prolonged jaws, like beaks, armed with teeth of various kinds, the branchial apertures are lateral (the anus is near the breast, and the tail is thread like). The family is composed of 8 or 9 species, represented by 4 genera. All inhabit the deep sea, and with one exception are extremely rare. Some are known as *snipe fishes*.

nemichthyoid (nē-muk'-thi-oid), *a.* and *n.* [< *Nemichthys* + *-oid*.] *I. a.* Of or having the characteristics of the *Nemichthyidae*.

II. n. A fish of the family *Nemichthyidae*.

Nemichthys (nē-muk'-this), *n.* [NL, < Gr *nēma*, thread, + *ichthys*, fish] A genus of apodal fishes having a thread-like tail, typical of the family *Nemichthyidae*. *N. scolopaceus* is a deep-sea form known as *snipe-fish*. Richardson, 1848.

nemine contradicente (nem'-i-nē kon'-tra-di-sen'-tō) [L. *nemine*, abl. of *nemo*, nobody, *contradicente*, ppr. abl. of *contradicere*, contradict] No one contradicting or dissenting, unanimously. Abbreviated *nem. con.*

nemly, *adv.* An obsolete variant of *namely*.

nemner, *v. t.* See *neven*.

Nemocera (nē-mos'-ō-rā), *n. pl.* [NL, < Gr *nēma*, a thread, + *keras*, horn] In Latreille's system, the first family of dipterous insects, represented by the genera *Tipula* and (*ulex* of Linnaeus, or the crane-flies, midges, gnats, etc. It is equivalent to the modern suborder *Nematocera*.

nemoceran (nē-mos'-ō-ran), *a.* and *n.* *I. a.* Same as *nemoceros*.

II. n. A dipterous insect of the suborder *Nematocera*.

nemoceros (nē-mos'-ō-rus), *a.* [< NL *"nemoceros"*, < Gr *nēma*, a thread, + *keras*, a horn] Pertaining to the *Nemocera*, or having their characters, having filamentous antennae; nematoceros.

nemocyst (nem'-ō-sist), *n.* Same as *nematocyst*. Gegenbaur.

Nemoglossata (nem'-ō-glo-sā'-tā), *n. pl.* [NL, < Gr *nēma*, a thread, + *glossa*, Attic *γλῶσσα*, the tongue.] A tribe of hymenopterous in-

sects, including those bees which have a long filiform tongue. Also *Nemoglossata*.

nemoglossate (nem'-ō-glos'-āt), *a.* [< Gr. *nēma*, a thread, + *glossa*, tongue] Having a thready or filamentous tongue, as a bee.

Nemopantes (nem'-ō-pan'-thēs), *n.* [NL. (Rafinesque, 1819), so called in allusion to the thread-like flower-stalk or "foot-stalk"; irreg. < Gr *nēma*, a thread, + *πανς*, = *E. foot*, + *ανθς*, flower.] A genus of shrubs of the dicotyledonous order *Illiciaceae*, known by its one-flowered pedicels, the mountain holly. The single species is common in damp shade in the northern United States and Canada. It bears small greenish flowers with distinct linear petals, oblong alternate leaves, and red berry-like drupes.

Nemophila (nē-mof'-i-lā), *n.* [NL (Nuttall), fem. of *"nemophilus"* see *nemophilous*] A genus of ornamental plants of the gamopetalous order *Hydrophyllaceae* and the tribe *Hydrophyllae*, known by the included stamens and the calyx with appendages; the grove-love. There are 7 or 8 species, natives of North America, chiefly of California. They are tender hairy annuals with dissected leaves and blue, white, or spotted bell shaped flowers. They form beautiful garden plants, sometimes called *Californian blue bell*. Among the species is *N. insignis*, with a pure-blue corolla an inch broad.

nemophilous (nē-mof'-i-lus), *a.* [NL *"nemophilus"*, < Gr *nēmos*, a wooded pasture, + *φίλος*, loving] Fond of woods and groves, inhabiting woodland, as a bird or an insect.

Nemoræ (nem'-ō-rē'-ā), *n.* [NL. (R. Devoidy, 1830), prob. < L. *nemus* (*nemor*-), a grove] A

genus of parasitic tachinid flies of medium or large size, quite bristly and blackish or gray, sometimes with the tip of the abdomen reddish-yellow. Their flight is remarkably swift. *N. leucania* is an important insect, being the commonest parasite of the destructive army worm, *Leucania unipuncta*, and often so abundant that scarcely one of these worms can be found unparasitized.

Army worm Tachina fly (*Nemoræ leucania*) (Line shows natural size.)

nemoral (nem'-ō-rāl), *a.* [= OF. *nemoral*, F. *nemoral* = Sp. *nemoral*, a wood, grove, prop. a wooded pasture, < Gr *nēmos*, a pasture, a wooded pasture, < *nēma*, pasture see *neme*, *neme*.] Of or pertaining to a wood or grove.

Nemorhædine (nem'-ō-rē-dī-nē), *n. pl.* [NL, < *Nemorhædus* + *-ina*.] A group, conventionally regarded as a subfamily, of antelopes, composed of the genera *Nemorhædus* and *Haploceros* (or *Aploceros*), the goat-antelope. The former is Asiatic. The common Indian goral, *N. goral* and the cambling utan of Sumatra, *N. sumatrensis*, are representative species. The Rocky Mountain goat, *Haploceros montanus*, is the corresponding American animal. Also *Nemorhædinae*. See cuts under *goral* and *Haploceros*.

nemorhædine (nem'-ō-rē-dīn), *a.* Of or pertaining to the *Nemorhædinae*.

Nemorhædus (nem'-ō-rē-dūs), *n.* [NL, < L. *nemus* (*nemor*-), a grove, + *hædus*, a kid] A genus of Asiatic goat-antelopes, typical of the subfamily *Nemorhædinae*, the gorals. The common species is *N. goral* of the Himalayas. The cambling utan of Sumatra, *N. sumatrensis*, is placed in this genus or separated under *Capricornus*. Also *Nemorhædus*. See cut under *goral*.

nemoricole (nē-mor'-i-kōl), *a.* [< L. *nemus*, a grove, + *colere*, inhabit] Inhabiting groves.

nemoricoline (nem'-ō-rik'-ō-lin), *a.* [As *nemoricole* + *-ine*.] Same as *nemoricole*.

nemorose (nem'-ō-rōs), *a.* [< L. *nemorosus*, woody, abounding in woods, also bushy, < *nemus*, a grove see *nemoral*] In bot., growing in groves or woodland.

nemorous (nem'-ō-rus), *a.* [= OF. *nemorosus* = Pg. *nemoroso*, < L. *nemorosus* see *nemorose*] Woody; pertaining to a wood.

Paradise itself was but a kind of *nemorous* temple, or sacred grove.
Boslyn, Sylva, iv

Nemours blue. See *blue*.

nempnet (nemp'-ne), *v. t.* See *neven*.

nengeta, *n.* [S. Amer.] A South American temnopterine flycatcher, *Tamioptera nengeta*. It is of an ashy or cinereous black and white color, about 9 inches long, and inhabits the pampas. See *Tamioptera*. Also called *pepouza*.

nesia, *nēnia* (nē'-ni-ā), *n. pl. nēnia, nēnia* (-ē) [< L. *nēma*, *nēnia*, a dirge, a song of lamentation; according to Cicero (Leg. 2, 24), a Gr. word, but it is found only in LGr *νηία*, which is appar. < L.] A funeral song; an elegy.

nente, *a*. An obsolete form of *ninth*.

nentyat, *a* and *n*. An obsolete form of *nineteen*.

nentyt, *a*. and *n*. An obsolete form of *ninety*.

nenuphar (nē-nū-fār), *n*. [*< F. nenuphar, nenufar = Sp. nenufar, < Ar. nūnūfar, nūlūfar = Turk. Nūfar, < Pers. nūlūfar, nūlūfar, the water-lily. Cf. Nuphar.*] The great white water-lily of Europe, *Castalia speciosa* (*Nymphaea alba*), also, the yellow water-lily, *Nymphaea* (*Nuphar*) *lutea*.

neo-, [*L. neo-*, etc., *< Gr. νέος*, new, young, recent, etc., = *E. new* see *new*] An element meaning 'new,' 'young,' 'recent,' used in many words of Greek origin or formation to denote that which is new, modern, recent, or innovating in character. In the physical sciences *ceno-*, *ceno-* is used in a somewhat similar sense, and *paleo-*, *paleo-* is opposed to both *neo* and *ceno*.

Neoarctic (nē-ō-ārk'tik), *a*. Same as *Nearctic*.

neobiologist (nē-ō-bi-ol'ō-jist), *n*. [*< Gr. νέος*, new, + *E. biologist*] A biologist of a new or a future school. *Beall*, *Protoplasm*, p. 24.

neoblastic (nē-ō-blas'tik), *a*. [*< Gr. νέος*, new, + *βλαστικός*, a germ] Having the character of a new growth, as any tissue appearing in parts where it did not before exist.

neo-Catholic (nē-ō-kath'ō-lik), *a*. New Catholic applied (a) to a party in the Anglican Church which openly sympathizes with the Roman communion, (b) to the party of liberals in the French Church represented by Lamenais.

Neocene (nē-ō-sēn), *a*. and *n*. In *geol.*, the later Tertiary, including the Miocene and Pliocene.

Neoceratodus (nē-ō-se-rat'ō-dus), *n*. [*< Gr. νέος*, new, + *NL. Ceratodus*, *q* v.] A genus of ceratodont fishes, established for the living representative of the family, the barramunda, *N. forsteri* or *Ceratodus forsteri*.

neo-Christian (nē-ō-kris'ti-an), *a*. and *n*. [= *F. néochrétien = Sp. neocrisiano*, *< Gr. νέος*, new, + *Χριστιανός*, *LL. Christianus*, Christian see *Christian*] 1. *a*. Of, pertaining to, or professing neo-Christianity.

2. *a*. A professor of neo-Christianity, a rationalist.

neo-Christianity (nē-ō-kris-ti-an'i-ti), *n*. [*< Gr. νέος*, new, + *LL. Christianitas* (*l*)-s, Christianity.] Rationalistic views in Christian theology, rationalism.

Neocomian (nē-ō-kō-mi-an), *a*. and *n*. [So called with ref. to *Neuchâtel*, in Switzerland (*F.* *< L. novus*, new, *novum*, new, + *castellum*, a castle, *ML.* also a village), *< Gr. νέος*, new, + *κωμη*, a village.] In *geol.*, the name given to the lower division of the Cretaceous system. The Neocomian includes the Lower Greensand and the Wealden of the English geologists. In the present more generally adopted nomenclature of the Cretaceous subgroups in France and Belgium, the Neocomian includes the Hauterivian and the Valanginian. The typical region of the Neocomian is in the Jura, especially near Neuchâtel, in Switzerland, and also in the south of France, where the series reaches a thickness of 1,600 feet, the rocks being chiefly limestones and marls.

neocosmic (nē-ō-kōz'mik), *a*. [*< Gr. νέος*, new, + *κόσμος*, the universe see *cosmos*, *cosmic*] Pertaining to the present condition and laws of the universe specifically applied to the races of historic man.

Antediluvian men may, in geology, be Pleistocene as distinguished from modern, or Palaeocosmic as distinguished from Neocosmic. *Dawson*, *Origin of World*, xiii.

neocracy (nē-ōk'ra-si), *n*.; pl. *neocracies* (-siz). [*< Gr. νέος*, new, + *κρατία*, *κράτειν*, rule.] Government by new or inexperienced officials, the rule or supremacy of upstarts. *Imp. Dict.*

Neocrina (nē-ōk'ri-nā), *n*. pl. [*< NL.*, *< Gr. νέος*, new, + *κρίνον*, a lily.] In some systems, one of two orders of *Crinodea*, distinguished from *Palaeocrina*.

neocrinoid (nē-ōk'ri-noid), *a*. and *n*. [*< Neocrina* + *-oid*] 1. *a*. Pertaining to the *Neocrina*, or having their characters.

2. *n*. A member of the *Neocrina*.

neodamode (nē-ōd'a-mōd), *n*. [*< Gr. νεοδαμώδης*, lately made a citizen, or one of the *δῆμος* (at Sparta), *< νέος*, new, + *δαμός*, Doric form of *δῆμος*, the people, the body of citizens, + *ειδός*, form (cf. *δημώδης*, popular)] In ancient Sparta, a person newly admitted to citizenship; a newly enfranchised helot.

neobryon (nē-ō-em'bri-ō), *n*. [*< Gr. νέος*, new, + *εμβρυον*, embryo.] The earliest of the ciliated stages of a metazoan embryo, in which it is similar to a planula, a trochosphere, a pilidium, etc.

neobryonic (nē-ō-em-bri-on'ik), *a*. [*< neobryon* (*n*)- + *-ic*.] Pertaining to a neobryon.

Neofiber (nē-ōf'i-ber), *n*. [*< NL.*, *< Gr. νέος*, new, + *NL. Fiber* see *Fiber*] A genus of American muskrats, of the family *Muridae* and subfamily *Arvicolinae*, resembling *Fiber*, but having the tail cylindrical. *N. allenii*, lately discovered in Florida, is the only species known.

Neogaea (nē-ō-jē'a), *n*. [*< NL.*, *< Gr. νέος*, new, + *γῆα*, the earth] In *zoogeog.*, the New World or western hemisphere, considered with reference to the geographical distribution of plants and animals opposed to *Palaearctica*.

Neogean (nē-ō-jē'an), *a*. [*< Neogaea* + *-an*.] Of or pertaining to *Neogaea*; indigenous to or autochthonous in the New World; American.

neogamist (nē-ō-g'a-mist), *n*. [*< Gr. νεγάμος*, one lately married (*< νέος*, new, + *γάμος*, marry), + *-ist*] A person recently married. *Bailey*, 1727.

Neogene (nē-ō-jēn), *a*. [*< Gr. νέος*, new-born, *< νέος*, new, + *-γενής*, -born see *-gen*] New-born, later developed an epithet sometimes applied to the later Tertiary as distinguishing it from the older Tertiary, which latter would embrace the divisions now denominated *Eocene* and *Oligocene*. This change has been advocated for the alleged reason that such a classification of the Tertiary would be more in accordance with the results of paleontological investigations than that at present generally adopted. *Also Neogene*.

neogrammarian (nē-ō-gra-mā'ri-an), *n*. [*< Gr. νέος*, new, + *E. grammarian*, tr. *G. Junggrammatiker*] An adherent of a school of students of comparative Indo-European grammar (since about 1875), who insist especially upon the importance and strictness of the laws of phonetic change.

neogrammatical (nē-ō-gra-mat'ik-al), *a*. [*< Gr. νέος*, new, + *E. grammatical*] Relating to the neogrammarians, or to their tenets.

neography (nē-ō-g'ra-fī), *n*. [= *F. néographie = Sp. neografía*, *< Gr. νεγράφω*, newly written, *< νέος*, new, + *γράφω*, write] A new system of writing. *Gent. Mag.*

neohellenism (nē-ō-hol'en-izm), *n*. [*< Gr. νέος*, new, + *E. Hellenism*.] A new or revived Hellenism, the body of Hellenic ideals as existing in more or less modified form in modern times; the cult of Hellenic letters and the pursuit of Hellenic ideals characterizing the Renaissance, especially in Italy.

This scene which is perhaps a genuine instance of what we may call the *neohellenism* of the Renaissance, finds its parallel in the "Phoenissae" of Euripides.

J. A. Symonds, *Italy and Greece*, p. 87.

neoid (nē-ō'id), *n*. [*Irreg. < Gr. νέος*, swim, + *-ιδος*, form.] A curve which, being the water-line of a ship, gives the least resistance with a given velocity.

neo-Kantian (nē-ō-kan'ti-an), *a*. [*< Gr. νέος*, new, + *E. Kantian*] Pertaining to the doctrines of the followers and successors of Kant.

neokoros (nē-ōk'ō-rōs), *n*. [*< Gr. νεοκόρος*, *< νέος*, new, + *κόρος*, sweep.] In *Gr. antiqu.*, the guardian of a temple in some cases merely a janitor or temple-sweeper, in others a priestly officer of much dignity, having charge of the treasures dedicated in the temple. Under the Roman imperial dominion the title was accorded by the senate to certain cities regarded as custodians of the ceremonial worship of Rome and of the emperor.

neo-Latin (nē-ō-lat'in), *a*. [= *F. néo-Latin = Sp. Pg. It. neolatino*, *< Gr. νέος*, new, + *L. Latinus*, Latin see *Latin*] 1. Now Latin an epithet applied to the Romance languages, as having grown immediately out of the Latin.

M. Raynaud declares that he expounds the numerous affinities between the six *neo-Latin* languages, namely, 1, the language of the Troubadours, 2, the Catalan, 3, Spanish, 4, Portuguese, 5, Italian, 6, French.

2. Latin as written by authors of modern times.

neolite (nē-ō-lit), *n*. [*< Gr. νέος*, new, + *λίθος*, a stone] A silicate of aluminum and magnesium, dark-green in color, owing to the presence of protoxide of iron. The mineral is massive or fibrous, the fibers being in stellate groups.

Neolithic (nē-ō-lith'ik), *a*. [*< Gr. νέος*, new, + *λίθος*, stone (cf. *neolite*), + *-ic*] Belonging to the period or epoch of highly finished and polished stone implements. The period so noted is a division of the "stone age," and the term is especially applicable to northwestern Europe, where there is, on the whole, a chronological advance from a time when coarser implements were used (the Paleolithic age) to one in which a much more perfect standard of workmanship prevailed (the Neolithic). See *Paleolithic*.

neologian (nē-ō-lō'ji-an), *a*. and *n*. [*< neology* + *-ian*.] 1. *a*. Pertaining to neology.

2. *n*. One who introduces needless innovations in language or thought, specifically applied to a modern school of rationalistic interpreters of Scripture. See *neology*.

neologic (nē-ō-lōj'ik), *a*. [= *F. néologique = Sp. neológico = Pg. It. neologico*, *< neolog-y* + *-ic*] Same as *neological*.

neological (nē-ō-lōj'ik-al), *a*. [*< neologic* + *-al*] Of or pertaining to neology; having the character of neology or neologism.

I seriously advise him [Dr. Johnson] to publish a general *neological* dictionary, containing those politer, though perhaps not strictly grammatical, words and phrases commonly used, and sometimes understood, by the beau monde. *Chatterfield*, *The World*, No. 32.

neologically (nē-ō-lōj'ik-al-i), *adv*. In a neological manner.

neologise, *v*. See *neologize*.

neologism (nē-ō-lōj'iz-m), *n*. [= *F. neologisme = Sp. Pg. It. neologismo*, as *neolog-y* + *-ism*] 1. A new word or phrase, or a new use of a word.

Philologists have marked out how ancient words were changed, and Norman *neologisms* introduced. *I. D. Israel*, *Amos of Lit*, I, 137.

2. The use of new words, or of old words in new senses.

I learnt my complement of classic French (kept pure of Balzac and neologism). *Mrs. Browning*, *Aurora Leigh*, I.

3. A new doctrine.

neologist (nē-ō-lōj'ist), *n*. [= *F. néologiste = Sp. Pg. It. neologista*, as *neolog-y* + *-ist*] 1. One who introduces new words or phrases into a language.

A dictionary of barbarisms too might be collected from some wretched *neologists*, whose pens are now at work! *I. D. Israel*, *Curios of Lit*, III, 347.

2. Same as *neologian*.

There sprung up among the Greeks a class of speculative *neologists* and rationalizing critics, called *Sophists*. *Bushnell*, *Nature and the Supernat*, I.

neologistic (nē-ō-lōj'is'tik), *a*. [*< neologist* + *-ic*] Relating to neology or neologists; neological.

neological (nē-ō-lōj'is'tik-al), *a*. [*< neologistic* + *-al*] Same as *neologistic*.

neologize (nē-ō-lōj'iz), *v*. *t*, *pret* and *pp* *neologized*, *ppr* *neologizing* [*< neolog-y* + *-ize*] 1. To introduce or use new terms, or new senses of old words — 2. To introduce or adopt rationalistic views in theology, introduce or adopt new theological doctrines.

Dr. Candlish lived to *neologize* on his own account. *Tulloch*.

Also spelled *neologue*.

neology (nē-ō-lōj'i), *n*. [= *F. néologie = Sp. neología = Pg. It. neologia*, *< Gr. νέος*, new, + *-λογία*, *< λέγω*, speak see *-ology*] 1. Innovation in language, the introduction of new words or new senses of old words.

Neology, or the novelty of words and phrases, is an innovation which, with the opinion of our present language, the English philologist is most jealous to allow. *I. D. Israel*, *Curios of Lit*, III, 343.

2. The invention or introduction of new ideas or views.

They endeavour, by a sort of *neology* of their own, to confound all ideas of right and wrong. *Boothby*, *On Burke*, p. 206.

3. Specifically, rationalistic views in theology.

neomembrane (nē-ō-mem'brān), *n*. [*< Gr. νέος*, new, + *E. membrane*] A false membrane.

neomenia (nē-ō-mē-ni-ā), *n*. [= *F. néoménie = Sp. neomenia = Pg. It. neomenia*, *< LI. neomenia*, *< Gr. νεομένη*, Attic *νεομένη*, the time of new moon, the beginning of the month, *< νέος*, new, + *μήνη*, the moon, *μήν*, a month see *moon*, *month*] 1. The time of new moon, the beginning of the month — 2. In *antiquity*, a festival held at the time of the new moon — 3. [*cap.*] [*NL.*] A genus of animals of disputed characters and affinities, type of a family *Neomeniidae*.

Neomenia carinata, natural size

It has been made by Sars a group (*Telobranchiata*) of opisthobranchiate mollusks, by Lankester a class (*Scolio-morpha*) and a superclass (*Laploglossa*) of mollusks, by Von

Jhering a class or phylum (*Amphineura*) of worms, and by some writers an order (*Neomenioides*) of isopodous gastropods. *N. carinata* is a worm like organism found on the European coast of the North Atlantic, about an inch long, shaped like a pea pod, of a grayish color with a rosy tint at one end, covered with small spines which give it a velvety appearance, with a retractile pharynx, a many-toothed lingual ribbon, and the mouth reduced to a small ring around the anus, inclosing paired gills. Also called *Solenofus*.

neomenian (nē-ō-mē-ni-an), *a.* and *n.* [*< Neomenia + -an*] *I. a* Pertaining to the *Neomenia*, or having their characters, neomenioid.

II. n An animal of the genus *Neomenia*.

Neomeniidae (nē-ō-mē-ni-i-de), *n.* *pl* [*NL, < Neomenia + -idae*] A family of mollusks, typified by the genus *Neomenia*. There is a second genus, *Proneomenia*, more elongate and vermiform. The family is also raised to ordinal rank, under the names *Neomenioidea*, *Neomeniaria*, and *Neomenioides*.

neomenioid (nē-ō-mē-ni-oid), *a.* [*< Neomenia + -oid*] Resembling the animals of the genus *Neomenia*, neomenian.

neomorphism (nē-ō-mōr-fizm), *n.* [*< Gr νέος, new, + N. morphē + -ism*] A new formation, development of a new or different form. *Nature*, XXXIX 161.

Neomorphus (nē-ō-mōr-fus), *n.* [*NL, < Gr νέος, new, + morphē, form*] A notable genus of terrestrial cuckoos peculiar to South America, founded by Gloger in 1827. They have the bill and feet stout, the head crested, the tail long and graduated, the wings short and rounded and the plumage of brilliant metallic hues. There are several species, about 18 inches long, as *N. geoffroyi*, *N. salmii*, and *N. rufipennis*. Also called *Cultrides* Pucheran, 1851.

neon (nē-on), *n.* [*< Gr νέος, new*] An elementary substance discovered in liquid argon.

neonism (nē-ō-ni-izm), *n.* [*Irreg < Gr νέος (neuter νέον), new, + -ism*] A new word, phrase, or idiom. *Worcester* [Rare]

Neonomian (nē-ō-nō-mi-an), *n.* and *a.* [*< Gr νέος, new, + νόμος, law see nōmō*] *I. n.* One who holds that the old or Mosaic law is abolished and that the gospel is a new law. See *Neonomianism*.

One that asserts the Old Law is abolished, and therein is a superlative Antinomian, but pleads for a New Law, and justification by the works of it and therefore is a *Neonomian*. *Neonomianism* (*Unmasked*) (1892), quoted in *Blunt's Dict. of Sects*, p. 305.

II. a Relating to the Neonomians.

Neonomianism (nē-ō-nō-mi-an-izm), *n.* [*< Neonomian + -ism*] The doctrine that the gospel is a new law, and that faith and a partial obedience are accepted in place of the perfect obedience of the old moral law. These views were held by certain British dissenters about the end of the seventeenth century, and are said to have been held also by the Hopkinsians, etc.

neonomous (nē-ō-nō-mus), *a.* [*< Gr νέος, new, + νόμος, law*] *In biol.*, having a greatly and lately modified form or structure, new-fashioned, or specialized according to recent conditions of environment. Specifically applied by S. Loven to echinoids of the spatangoid group.

neontologist (nē-on-tol-ō-jist), *n.* [*< neontol-og-y + -ist*] One who is versed in neontology.

neontology (nē-on-tol-ō-jī), *n.* [*< Gr νέος, new, + ὄν (ōn-), being, + -λογία, < λέγειν, speak see -ology*] The zoology of extant as distinguished from extinct animals, the science of living animals. *opposed to paleontology*.

The division of zoology into paleontology and neontology is one which is, no doubt, logically defensible. *Nature*, XXXIX 364.

neonym (nē-ō-nim), *n.* [*< Gr νέος, new, + ὄνομα, ὄνομα, name*] A new name. *B. G. Wilder*.

neonymy (nē-on-i-mi), *n.* [*As neonym + -y (cf. synonymy)*] The coming of names. *B. G. Wilder*, *Jour. Nervous Diseases*, xii. (1885).

neopaganism (nē-ō-pā-gan-izm), *n.* [*< Gr νέος, new, + Ε. paganism*] A revival or reproduction of paganism.

It [pre-Raphaelism] has got mixed up with aesthetism, neo-paganism, and other such fantasies. *J. McCarthy*, *Hist. Own Times*, V 248.

neopaganize (nē-ō-pā-gan-iz), *v. t.*; pret. and pp. *neopaganized*, ppr. *neopaganizing*. [*< Gr νέος, new, + Ε. paganism*] To imbue with a new or revived paganism. Also *neopaganise*.

neophobia (nē-ō-fō-bi-ā), *n.* [= Sp. *neofobia* = Pg. *neofobia*, < Gr. νέος, new, + φόβος, < φέσθαι, fear] Fear of novelty; abhorrence of what is new or unaccustomed, dislike of innovation.

In the student, curiosity takes the place of neophobia. *Pop. Sci. Mo.*, XXIX 782.

Neophron (nē-ō-fron), *n.* [*NL, < Gr νεφρών, of childish mind or intelligence, < νέος, new, young, + φρόν, mind*] A genus of Old World vultures, technically characterized by the hori-

zontal nostrils, and typified by the Egyptian vulture, *Neophron percnopterus*. This celebrated bird is about 2 feet long, and when adult is white, with black primaries, and rusty yellowish neck hackles extending up the occiput, the head is bare, with scanty down on the throat and a few loral feathers, the bill is horn

1 Egyptian Vulture or Pharaoh's Hen (*Neophron percnopterus*)

brown, the feet are whitish, and the irides reddish. The young are blackish brown varied with fulvous. The bird is widely distributed in countries bordering the Mediterranean, and thence to Persia, India, and South Africa. One of its many names is *rachama*, used by Bruce in 1790, but subsequently applied (in the New Latin form *Racama*) to the Angola vulture, *Gypohierax angolensis*, which is a very different bird. *N. percnopterus* is a second species of the genus, closely resembling the foregoing, found in India. *N. monachus* and *N. paterulus* are both African and much alike, but quite different from the others.

neophyte (nē-ō-fit), *a.* and *n.* [= F. *néophyte* = Sp. *neofito* = Pg. *neofito* = It. *neofito*, < L. *neophytus* (in inscriptions also *neofitus*), < Gr. νεοφυτός, newly planted, a new convert, < νέος, new, + φυτόν, verbal adj. of φέρω, produce, bring forth, φέρω, grow, come into being] *I. a* Newly entered on some state, having the character of a novice.

It is with your young grammatical courtier, as with your neophyte player, a thing usual to be daunted at the first presence or interview. *B. Jonson*, *Cynthia's Revels*, III 4.

II. n. 1 A new convert, one newly initiated. Specifically—(a) In the primitive church, one newly baptized. These formed a distinct class in the church at first, because of the reference in 1 Tim. III 6 to a novice, they were regarded as unfit for ecclesiastical office.

After immersion [in baptism in the ancient church] the neophyte partook of milk and honey to show that he was now the recipient of the gifts of God's grace. *Encyc. Brit.*, III 351.

(b) In the Rom. Cath. Ch., a converted heathen, heretic, etc. (c) Occasionally in the Rom. Cath. Ch., a novice.

2 A tiro, a beginner in learning.

Jorevin reports that in Charles the Second's time, in Worcester-shire, the children were sent to school with pipes in their mouths, and the schoolmaster called a halt in their studies whilst they all smoked—he teaching the neophytes. *J. Ashton*, *Social Life in Reign of Queen Anne*, I 207.

=Syn 1 *Proselyte*, *Apostate*, etc. See *convert*.

neophytism (nē-ō-fi-tizm), *n.* [*< neophyte + -ism*] The condition of a neophyte or novice.

neoplasm (nē-ō-plazm), *n.* [*NL, < Gr νέος, new, + πλάσμα, anything formed*] A new growth or true tumor, a morbid growth more or less distinct histologically from the tissue in which it occurs.

neoplastic (nē-ō-plas'tik), *a.* [*< Gr νέος, new, newly formed, < νέος, new, + πλάστος, verbal adj. of πλάσσειν, form, mold see plastu*] Pertaining to or of the nature of a neoplasm, newly formed.

Neoplatonic (nē-ō-plā-ton'ik), *a.* [*< Gr νέος, new, + Ε. Platonic*] Relating to the Neoplatonists or their doctrines.

Neoplatonically (nē-ō-plā-ton'ik-ly), *adv.* In accordance with Neoplatonism, in the manner of the Neoplatonists.

The Neoplatonically conceived Fons Vitae of the Jew Gebirol. *Encyc. Brit.*, XXI 420.

Neoplatonician (nē-ō-plā-tō-ni-sh'an), *n.* [*< Gr νέος, new, + Ε. Platonician*] Same as *Neoplatonist* [Rare].

Neoplatonism (nē-ō-plā-tō-nizm), *n.* [*< Gr νέος, new, + Ε. Platonicism*] A system of philosophical and religious doctrines and principles which originated in Alexandria with Ammonius Saccas in the third century, and was developed by Plotinus, Porphyry, Iamblichus, Hypatia, Proclus, and others in the third, fourth, and fifth centuries. The system was composed of elements of Platonism and Oriental beliefs, and in its later development was influenced by the philosophy

of Philo, by Gnosticism, and by Christianity. Its leading representative was Plotinus. His views were popularized by Porphyry and modified in the direction of mysticism by Iamblichus. Considerable sympathy with Neoplatonism in its earlier stages was shown by several eminent Christian writers, especially in Alexandria, such as St. Clement, Origen, etc. The last Neoplatonic schools were suppressed in the sixth century.

Neoplatonist (nē-ō-plā-tō-nist), *n.* [*< Gr νέος, new, + Ε. Platonist*] A believer in the doctrines or principles of Neoplatonism.

Neopus (nē-ō-pus), *n.* [*NL, < Gr νεώπτερος, young-looking, < νέος, new, + ὤψ (ōp-), face*] An East Indian genus of hawks having the tail feathered to the toes, the outer toe reduced, the claw of the inner enormous, and all the claws little curved, the kite-eagles. *N. malayensis* is the only species.

Neopythagorean (nē-ō-pi-thag-ō-rē'an), *a.* [*< Gr νέος, new, + Ε. Pythagorean*] Belonging to the doctrines of the later philosophers calling themselves Pythagoreans, after that school had ceased to exist. The Neopythagoreans flourished chiefly in the first century B. C. and the first and second centuries of the Christian era.

neorama (nē-ō-rā-mā), *n.* [*< Gr νέος, Attic νέος, a temple, + ὄραμα, that which is seen, a view, < ὁράω, see*] A panorama representing the interior of a large building, in which the spectator appears to be placed. *Imp. Dict.*

Neosorex (nē-ō-sōr-eks), *n.* [*NL (Baird, 1857), < Gr νέος, new, + Ε. sorex, a shrew-mouse*] A genus of aquatic fringe-footed American shrews, with 32 teeth, long close-haired tail, and the feet not webbed. The type is *N. navigator* from the Pacific United States, the best-known species is *N. palustris*, of general distribution in North America, a large silvery gray shrew, white below, with the tail as long as the body.

neossine (nē-ō-sin), *n.* [*< Gr νεοσσινα, a nest, < νεοσσία, a young bird, a nestling, < νεός, young see new*] The substance of which edible bird's-nests are partly composed, the unspiced saliva of certain swifts of the genus *Collocalia*.

neossology (nē-ō-sol-ō-jī), *n.* [*< Gr νεοσσία, a young bird (see neossine), + -λογία, < λέγειν, speak see -ology*] The study of young birds, that part of ornithology which relates to incubation, rearing of the young, etc. Compare *calology*.

neoteric (nē-ō-ter'ik), *a.* and *n.* [= F. *néotérique* = Sp. *neotérico* = Pg. It. *neoterico*, < L. *neotericus*, < Gr νεωτερικός, youthful, natural to a youth, < νεώτερος, younger, newer, compar. of νέος, young, new see new] *I. a* New; recent in origin; modern.

The neoteric astronomy hath found spots in the sun. *Glennville*, *Vanity of Dogmatizing*, xviii.

Among the educated and, in especial, among the most highly educated, the same sort of feeling [rather an antipathy than a reasonable dislike] with regard to neoteric expressions seems to be sedulously instilled. *F. Hall*, *Mod. Eng.*, p. 99.

II. n. A modern.

How much mistaken both the philosophers of old and later neoteric have been, their own ignorance makes manifest. *Ford*, *Honour Triumphant*, i.

neoterical (nē-ō-ter'ik-al), *a.* [*< neoteric + -al*] Same as *neoteric*.

neoterism (nē-ō-ter'iz-m), *n.* [*< Gr νεωτερισμός, an innovation, < νεωτερίζω, innovate see neoterize*] 1 Innovation; specifically, the introduction of new words or phrases into a language, neologism. —2 A word or phrase so introduced, a neologism.

neoterist (nē-ō-ter'ist), *n.* [*< neoter(ize) + -ist*] One who invents new words or expressions; an innovator in language, a neologist.

neoteristic (nē-ō-ter'is'tik), *a.* [*< neoterist + -ic*] Of, pertaining to, or characteristic of neoterism or neoterists.

neoterize (nē-ō-ter'iz), *v. t.*, pret. and pp. *neoterized*, ppr. *neoterizing*. [*< Gr νεωτερίζω, innovate, < νεώτερος, compar. of νέος, young, new see neoteric*] To innovate; specifically, to coin new words or phrases, neologize.

Our scientists, since they neoterize, would find their ac-

count in entertaining a few consulting philologists. *F. Hall*, *Mod. Eng.*, (p. 176, note).

Neotoma (nē-ō-tō-mā), *n.* [*NL (Say and Ord, 1825), < Gr νέος, new, + τόμα, cut*] A genus of very large sigmodont *Murinae*.

Florida Wood-rat (*Neotoma floridana*)

peculiar to North America; the wood-rats. They have thick soft fur, a long tail either scant-haired or bushy, pointed mobile snout, large full eyes, large rounded ears, the fore feet with four perfect clawed digits and rudimentary thumb, and the hind feet five-toed. *N. fortis* is the common wood-rat of the southern United States. It has white paws and under parts, and is nine inches in length, with a tail about six inches long. *N. fuscipes* is the black-footed wood-rat of California. *N. ferruginea* is a reddish Mexican species. *N. cinerea* is a very large bushy tailed wood-rat which inhabits the Rocky Mountains and other mountains of the west.

neotome (nē'ō-tōm), *n*. A sigmodont rat of the genus *Neotoma*. *S. G. Goodrich*

Neotragus (nē-ōt'ra-gus), *n*. [NL, < Gr *neōs*, new, + *trāgos*, a goat] A genus of pygmy antelopes of Africa; the steinboks. It includes the smallest representatives of the group, as the common steinbok (*N. tragulus*), the gray steinbok (*N. melanotos*), and the madoqua (*N. madoqua*). The genus was established by Hamilton Smith. It has been used with different limits, and *Neotragus* is synonymous.

Neotropical (nē-ō-trop'i-kal), *a*. [< Gr. *neōs*, new, + *E. tropical*] In zoogeogr., belonging to that division of the New World which is not Nearctic, specifically applied by Sclater to one of six prime divisions of the earth's surface, and including all of America which is south of the Neartic region.

Neottia (nē-ōt'i-ā), *n*. [NL (Linnaeus, 1737), so called in allusion to the interwoven fibers of the roots of the plants, < Gr *neōssia*, Attic *neōtē*, a nest of young birds, a nest. see *neossine*] A genus of orchids, type of the tribe *Neothecae*, belonging to the subtribe *Spirantheae*, and known by the long column and leafless habit. There are 3 species, of northern Asia and Europe, supposed parasites bearing a raceme of short-pediceled flowers on a short stem covered with sheaths and proceeding from a dense cluster of short fleshy roots. *N. Nidus avis* is the bird's nest orchid. It has also been called *goose-nest*. See *bird's nest*, 1.

Neottia (nē-ō-t'i-ā), *n* pl [NL (Landley, 1826), < *Neottia* + *-ae*] A tribe of endogenous plants of the order *Orchideae*, known by the separate and parallel anther-cells and granular pollen. It includes 6 subtribes and 61 genera. They are generally terrestrial, with thickened rootstocks or tubers, but without bulbous stems. Of this tribe *Spirantheae*, *Good yera*, *Arethusa*, *Calopogon*, and *Pogonia* are well known orchids of the northern United States, and *Vanilla* an important tropical genus.

neovolcanic (nē'ō-vol-kan'ik), *a*. A term used by Rosenbusch to designate the modern volcanic rocks, or those more recent than the Cretaceous, while those older than this are called by him *paleovolcanic*. The older eruptive rocks have as a rule undergone a larger amount of alteration (see *metamorphism*) than the more recent, but this affords no reliable criterion for a general classification.

Neozoic (nē-ō-zō'ik), *a*. [< Gr *neōs*, new, + *zōē*, life] A designation suggested by Edward Forbes, but not generally adopted, for that division of the geological series which includes the Mesozoic and Tertiary. According to this method of nomenclature, the entire sequence of geological fossiliferous rocks would be divided into Paleozoic and Neozoic.

nep¹ (nep), *n*. [Also dial *nep*, < ME. *neppe*, *nepte*, *nept*, < AS *nepte*, *nefte* = MD. *nepte*, *neppe*, *nep*, D *neppe* = G *nepi* = OF. *nepte* = It *neputa*, dim *neputella*, catnip, < L *nepeta*, ML also *neputa*, Italian catmint. see *Nepeta*. Hence, in comp, **catnep*, now *catnip*.] The catnip, *Nepeta Cataria*.

— **Wild nep**, the common bryony, *Bryonia dioica*.

nep² (nep), *n*. A variant of *nep¹*. [Prov Eng]

nep³ (nep), *n*. [Perhaps a var. of *nep¹* for *knep²*] A knob, swelling, protuberance, or knot which exists in imperfect cotton-fibers as a result either of unsymmetrical growth or of operations (principally ginning) to which the cotton is subjected preparatory to carding or combing.

nep⁴ (nep), *v* *t*; pret and pp. *nepped*, ppr *nepping*. [< *nep³*, *n*.] To form knots, knobs, or protuberances in (cotton-fibers) during the processes of ginning, opening, etc., preparatory to carding and combing.

Nepa (nē'pā), *n*. [NL, < L. *nepa*, a scorpion (an African word).] The typical genus of bugs of the family *Nepidae*, founded by Linnaeus in 1748, the water-scorpions. They are related to *Ranatra*, but are easily distinguished by the broad flat body and less raptorial fore tarsi. The genus is wide-spread, though only one species occurs in Europe and one in the United States. All are aquatic and predaceous. The common water scorpion of Europe, *N. cinerea* is a large bug, an inch long, of an elliptical form. *N. apiculata* is a smaller but smaller one found in the United States.

Nepal acornite, laburnum, paper, etc. See *acornite*, etc.

Nepalense (ne-pā-lēs' or -lēz'), *a*, and *n*. [< *Nepaul* (*Nepal*) + *-ense*.] I. *a*. Of or pertaining to Nepal (Nepal, or Nepaul), an independent state in the Himalayas, north of Hindustan and south of Tibet.

II. *n*. An inhabitant or inhabitants of Nepal.

nep¹, *a* and *n*. An obsolete form of *nep¹*.

nep², *n*. An obsolete form of *nep²*.

Nepenthes (nē-pen-thēs'sē-ē), *n* pl. [NL (Lindley, 1836), < *Nepenthes* + *-aceae*] An order of dicotyledonous apetalous plants, with numerous ovules in the ovary-cells, diocious flowers, and fleshy albumen, consisting of the single genus *Nepenthes*.

nepenthe (nē-pen'thē), *n*. [Pronounced as if L; but the L form is *nepenthes* see *nepenthes*.] Same as *nepenthes*, 1.

Nepenthe is a drink of sovereign grace,
Devised by the Gods, for to assuage
Harsh grief, and bitter gall away to chase
Spenser, *F. Q.* IV. iii. 48

Or else *Nepenthe*, enemy to sadness,
Repelling sorrows, and repelling gladness
Sylvestre, tr of Du Hartas's *Weeks*, II, Eden

Quaff, oh, quaff this kind *nepenthe*, and forget this lost
Lenore! Poe, *The Raven*

Crown us with asphodel flowers, that are wet with the
dews of *nepenthe* Longfellow, *Evangeline*, II. 4

nepenthes (nē-pen'thēz), *n*. [Cf. *F. nepenthes* = Pg *nepenthes* = D *nepent* = G *nepenthe*, < L *nepenthes*, described as a plant which, mingled with wine, had an exhilarating effect, < Gr *νεπενθης*, removing sorrow, free from sorrow, applied in the Odyssey to an Egyptian drug which lulled sorrow for the day; as a noun, *νεπενθης*, neut. (see *φαρμακόν*); < *νπ*-priv, not, + *πένθος*, grief, sadness.] 1 A magic potion, mentioned by ancient writers, which was supposed to make persons forget their sorrows and misfortunes. Used poetically, and commonly in the form *nepenthe*, for any draught or drug capable of inducing forgetfulness of pain or care.

Not that *Nepenthes* which the wife of Thone
In Egypt gave to Jove-born Helena
Is of such power to stir up joy as this
Milton, *Comus*, l. 675

2 [*cap*] [NL (Linnaeus, 1737)] A genus of pitcher-plants, comprising 31 species, and constituting the order *Nepenthes*, found especially in the Malay archipelago. They are somewhat shrubby leaf climbers, with the prolonged mid

ribs of many of the leaves transformed into pitchers, closed in the bud by a lid, glandular within, and secreting a liquid which aids in the assimilation of insects caught. Their flowers are small and greenish, in racemes, followed by somewhat cubical capsules. See *pitcher plant*.

Neparian, *a*. Same as *Napiarian*.

Nepeta (nep'e-tā), *n*. [NL (Rivinus, 1690), < L *nepeta*, catmint, catnip see *nep¹*] A genus of labiate plants, type of the tribe *Nepeteae*, known by the tubular calyx and anther-cells diverging or divaricate. There are about 120 species, widely scattered in the northern parts of the Old

World, a few in the tropics. They are erect, spreading, or creeping herbs with toothed leaves and many flowered whorls of bluish or white flowers. Two species are very common, *N. Cataria*, the catmint, and *N. Glechoma*, the ground ivy.

Nepetæ (nē-pet'ē-ē), *n* pl [NL (Bentham, 1832), < *Nepeta* + *-æ*.] A tribe of dicotyledo-

nous plants of the order *Labiata*, typified by the genus *Nepeta*. It is known by the usually fifteen-nerved calyx and the superior stamens longer than the lower pair. It contains 8 genera and about 184 species.

nephalism (nēf'ā-lizm), *n*. [< Gr. *νηφαλισμός*, sobriety, < *νηφάω*, sober, < *νήφειν*, be sober.] The principles or practice of those who abstain from spirituous liquors; total abstinence; teetotalism.

Some figures had been extracted from a report on Intemperance and Disease without the corresponding explanation, and had been misunderstood as implying that *nephalism* was more fatal than tippling. *Lancet*, No 3423, p 702.

nephalist (nēf'ā-list), *n*. [< *nephalism* + *-ist*] One who practises or advocates nephalism, or total abstinence from intoxicating drink, a teetotaler.

nephela (nēf'e-lā), *n*, pl *nephelæ* (-lē) [NL, < Gr *νεφέλη*, a cloud, a disease of the eyes, = L *nebula*, a cloud—see *nebula*, *nebule*] A white spot on the cornea.

nephele (nēf'e-lō), *n*. [< Gr *νεφέλη*, a cloud see *nephela*] In the Gr. myth, the outermost eucharistic veil same as *avr¹*, 7.

nephele, *nepheline* (nēf'e-lū), *n*. [< Gr *νεφέλη*, a cloud, + *-inē*, *-inē*²] A mineral occurring in glassy white or yellowish hexagonal crystals or granules in volcanic rocks, as on Monte Somma, Vesuvius (the variety *sommitite*), and also in masses with greasy luster and a dark greenish or reddish color (the variety *elæolite*). It is a silicate of aluminium, sodium, and potassium. Also *nephelinite*.

nephele-basalt (nēf'e-lū-ba-sālt'), *n*. A rock of the basaltic family in which the feldspathic constituent is largely or wholly replaced by nephele. It is more coarsely crystalline than *nephelinite*, to which, however, it is closely related, and it contains more augite than that rock, nephele (which is frequently largely replaced by haidyne) and augite constituting its essential ingredients. *Nephele-basalt* is much more common than *nephelinite*, occurring in many localities in Europe. Like the true basalt, the *nephele* rocks are frequently found to contain various accessory minerals, as olivin, haidyne, apatite, magnetite, etc.

nepheleitic (nēf'e-lū'ik), *a*. [< *nephele* + *-ic*.] Pertaining to or of the nature of nephele, as, a *nepheleitic* tephrite.

nepheleite (nēf'e-lū-it), *n*. [< *nephele* + (*augite*)] The name given by Rosenbusch to what had previously been generally designated as "*nephele-dolerite*." The difference between this rock and *nephele-basalt* is exceedingly slight. See *nephele-basalt*.

nepheleinitoid (nēf'e-lū'i-toid), *a*. An epithet applied by Bovecky to a rock resembling and passing into *nephele-basalt*, but having, in many instances at least, the augite either wholly or in large part replaced by hornblende. The rocks described under this name occur chiefly in Bohemia.

nephele-rock (nēf'e-lū-rok), *n*. A volcanic rock closely allied to the basalt in character, but in which nephele takes the place of feldspar either wholly or in large part. *Nephele*-rocks are almost exclusively of neovolcanic age. See *nephele-basalt* and *nephele-itephrite*.

nephele-tephrite (nēf'e-lū-tēf'rīt), *n*. That variety of tephrite (see *tephrite*) which is characterized by the presence of nephele. Rocks of this character are especially well developed in the Canary Islands. According to Rosenbusch, a rock occurring in the Rhöngebirge and described by Sandberger under the name of *buchonite* belongs to the *nephele* tephrites.

nephelite (nēf'e-lit), *n*. [< Gr *νεφέλη*, a cloud, + *-ite*²] Same as *nephele*.

Nephelium (nē-fē'li-um), *n*. [NL (Linnaeus, 1767), < L *nephelium*, a kind of plant, < Gr *νεφέλιον*, a little cloud, < *νεφέλη*, a cloud see *nephela*] A genus of dicotyledonous trees of the polypetalous order *Sapindaceae* and the tribe *Sapindeae*, known by the regular cup-shaped five-toothed calyx, indehiscent warty fruit, and long projecting stamens. There are about 20 species, mostly of the East Indies and Australia, some yielding delicious fruits, of China and the Indian archipelago. They bear axillary and terminal panicles of many small flowers, alternate evergreen abruptly pinnate leaves of a beautiful pink when young, and roundish fruit with an areolate crust partly filled within by a sweet edible pulp inclosing the bitter shining seed. See *dragon's-eye*, *longan*, and *rambutan*. Compare *Uchi*.

Nephelococcylgia (nēf'e-lō-kok-sij'i-ā), *n*. [< Gr *Νηφελόκοκκυγία*, "Cloud Cuckoo-town" (see *def*). < *νεφέλη*, a cloud, + *κόκυς*, a cuckoo] In Aristophanes's comedy "The Birds," an imaginary city built in the clouds by the birds at the instigation of two Athenians, and represented both as a fantastic caricature of Athens in the poet's day and as a sort of Philistine Utopia full of gross enjoyments; hence, in literary allusion, cloudland, fools' paradise.

As respects the New England settlers, however visionary some of their religious tenets may have been, their political ideas savored of the reality, and it was no *Nephelococcygia* of which they drew the plan, but of a commonwealth whose foundation was to rest on solid and familiar earth. *Lowell*, Among my Books, 1st ser., p. 238.

nepheloid (nef'-e-lōid), *a*. [*< Gr νεφέλη, a cloud, + eidos, form*] In *med.*, cloudy; turbid, as urine.

nephelometer (nef'-e-lōm'-e-tēr), *n*. [*< Gr νεφέλη, a cloud, + μέτρον, measure*] A proposed instrument which will make a continuous record of the proportion of cloudiness of the sky. No such instrument has yet been constructed.

It bears about the same relations to the *nephelometer* which we should have that the sun dial bears to the clock. *Amer Meteorological Jour.*, I 4

nepheloscope (nef'-e-lō-skōp), *n*. [*< Gr νεφέλη, a cloud, + σκοπεῖν, view*] An apparatus devised by Eaply for illustrating the formation of cloud.

nephelosphere (nef'-e-lō-sfēr), *n*. [*< Gr νεφέλη, a cloud, + σφαῖρα, sphere*] An envelop or atmosphere of cloud surrounding the earth or any heavenly body.

It (water mist) gathers into a vaporous envelope, constituting a true atmosphere or *nephelosphere*. *Winchell*, World Life, p. 543

nephew (nev'ū or nef'ū), *n*. [Formerly also *neveu*, dial *nery*, *< ME nephew, nephow, neveu, nevw, neveu, nevw, nevo, < AF nevu, OF neveu, nevu, nevu, neud, F. neveu (> Sw nevo = Dan neveu) = Pr nebot, nepa, noba = Sp nielo = Pg. nelo = It nepote, nepote, < L nepos (nepot-), m, a son's or daughter's son, a grandson (also f., a granddaughter), later also a brother's or sister's son, a nephew, in general a descendant; = Skt napāt, a grandson, son, descendant; = Gr νεπός, pl., children (a rare word, applied by Homer to seals, νεπός, καλός 'Aλυσσίδης, 'children of fair Amphitrite,' whence applied by later poets to water-animals generally), = (with loss of the final consonant of the stem) OHG nevo, nefo, MHG neve, G nefte, sister's son, rarely brother's son, also uncle, and in general 'kinsman,' = MLG. nevr, LG. neve = OFries. neva = D. neef, grandson, nephew, cousin, = Icel. nefi, kinsman, = AS. nefa = ME. neve, grandson, nephew. Usually explained from the L., as < νε-, not, + ποτις, strong, but this does not hold for the other forms. The application, as with all other terms denoting relationship beyond the first degree, formerly varied ('grandson,' 'nephew,' 'cousin,' 'kinsman,' etc.), its final exclusive use for 'nephew' instead of 'grandson' is prob due in part to the fact that, by reason of the great difference in age, a person has comparatively little to do with his grandsons, if he has any, while nephews are proverbially present and attentive, if their uncle is of any importance. The pron. nef'ū, common in the United States, is not original, but conforms to the irreg. later spelling *nephew*, *ph* being always pronounced as *f* except in this word and in *Stephen* (Middle English *Steven*).] 1† A grandchild, sometimes, a more remote lineal descendant.*

His [Jove's] blynde neveu Cupido. *Chaucer*, House of Fame, l. 617

Their eldest sonnes also, that succeeded them, were called Iouus, and their nephews or sonnes sonnes, which reigned in the third place, Hercules.

Hokmshed, Descrip. of Britaine, ix. Nephews are very often liker to their grandfathers than to their fathers. *Jer Taylor*, Works (ed. 1835), I 776

He is by several descents the nephew of Hugo Grotius (died 1645). Let it not be said that in any lettered country a nephew of Grotius asked a charity and was refused. *Johnson*, to Dr. Vyse, July 9, 1777 (in Boswell).

2† A cousin.

Henry the Fourth grandfather to this king. Deposed his nephew Richard, Edward's son, The first begotten, and the lawful heir Of Edward king, the third of that descent. *Shak.*, I Hen VI., ll. 5 64

3 The son of one's brother or sister. This is now the usual meaning. Sometimes, in the interpretation of wills, the word is understood as including also 'grand nephew.'

As thei rode in woche maner thei mette fyve childeren that be youre neuewes These be youre suster sonnes. *Merlin* (E. E. T. S.), II 280

The uncle is certainly near of kin to the common stock, by one degree, than the nephew, though the nephew, by representing his father, has in him the right of primogeniture. *Blackstone*, Com., II xiv

Nephila (nef'-i-lā), *n*. [NL. (?), irreg. *< Gr νειν, spin, + φίλος, loving*] A genus of spinning-spiders of the family *Epeiridae*, having a long cylindrical abdomen. *N. plumipes* is well known and abundant in the southern United States. *Leach*, 1815

nephological (nef'-ō-lōj'-i-kal), *a*. [*< nephology + -ical*] Pertaining to nephology, relating to clouds or cloudiness.

But at no time was it observed that the *nephological* [read *nephological*] state of the atmosphere overhead or the prevalence of fog banks gave rise to anything like an aerial echo. *Arc. Cruise of the Corwin*, 1881, p. 14.

nephology (ne-fol'-ō-jī), *n*. [*< Gr νέφος, a cloud, + λογία, < λέγειν, speak. see -ology*] That part of meteorology which treats of clouds.

nephoscope (nef'-ō-skōp), *n*. [*< Gr νέφος, a cloud, + σκοπεῖν, view*] An instrument used in determining the apparent velocity and the direction of motion of clouds. It usually consists of a horizontal mirror, with compass-points or degrees drawn on the mirror or on the surrounding frame, together with an adjustable sighting-piece placed at various positions above the mirror. The sighting piece serves as a fixed point for viewing the cloud image as it moves away from the center of the mirror, upon which point the image is initially adjusted.

nephralgia (nef'-ral'-jī), *n*. [NL., *< Gr νεφρός, a kidney, + άλγος, pain*] In *pathol.*, pain in the kidneys, renal neuralgia.

nephralgic (nef'-ral'-jik), *a*. [*< nephralgia + -ic*] Pertaining to, of the nature of, or affected with nephralgia.

nephralgia (nef'-ral'-jī), *n*. [*< NL nephralgia, q v*] Same as *nephralgia*.

nephrectomy (nef'-rek'-tō-mī), *n*. [*< Gr νεφρός, kidney, + εκτομή, excision*] In *surg.*, excision of a kidney.

nephridial (nef'-rid'-i-al), *a*. [*< nephridium + -al*] Of or pertaining to the nephridia. as, a *nephridial* organ or function.

Each of the eight sets often appeared to have a *nephridial* tuft specially related to it. *Microsc. Science*, XXVIII 907

I should be glad to draw attention to the, in some ways, still more interesting features of the *nephridial* system in *Megascoides australis*. *Nature*, XXXVIII 197

nephridion (nef'-rid'-i-on), *n*; pl. *nephridia* (-iā). Same as *nephridium*.

nephridium (nef'-rid'-i-um), *n*, pl. *nephridia* (-iā). [NL., dim. of *Gr νεφρός, kidney* see *neφ* 2] The sexual or renal organ of mollusks, corresponding to the kidneys of the vertebrates, having an excretory and depurative office, the so-called organ of Bojanus. The term is extended to similar organs in other invertebrates. In mollusks the nephridia are tubular structures which place the cavity of the pericardium in communication with the exterior.

The renal organs, *nephridia*, or organs of Bojanus as they are frequently called from the celebrated anatomist who discovered them, are always present [in mollusks]. *Stand. Nat. Hist.*, I 251

nephrite (nef'-rit), *n*. [*< Gr νεφρίτης, pertaining to the kidneys, < νεφρός, a kidney* see *neφ* 2] A tough compact variety of amphibole (tremolite or actinolite), of a leek-green color, often found in rolled pieces, jade. It was formerly worn as a remedy for diseases of the kidneys. See *jade* 2.

nephritic (nef'-rit'-ik), *a* and *n*. [= F. *néphrétique* = Sp. *nefrítico* = Pg. *nephritico* = It. *nefrítico*, *< LL. nephriticus* = Gr. *νεφριτικός*, affected with nephritis, *< νεφρίτις, nephritis* see *nephritis* 1.] 1. Of or pertaining to the kidneys as, a *nephritic* disease.

The balsam of Peru obtained by boiling wood and scumming the decoction [is] a very valuable medicine and of great account in divers cases, particularly asthma, nephritic pains, nervous colics and obstructions. *Ep. Berkeley*, Siris, § 62.

2. Pertaining to or affected with nephritis. as, a *nephritic* patient.

The diet of *nephritic* persons ought to be opposite to the alkaliescent nature of the salts in their blood. *Arbuthnot*, Aliments, IV 2 § 16.

3. Relieving disorders of the kidneys in general. as, a *nephritic* medicine.—4. Of the nature of nephrite or jade.—*Nephritic* colic, renal colic, pain due to the passage of a calculus from the kidney. *Nephritic* retinitis, retinitis dependent on nephritis.—*Nephritic* stone, same as *nephrite*.—*Nephritic* tree, a small leguminous tree of the West Indies, *Phacellobium Unguis cati*.—*Nephritic* wood, the lignum nephriticum of old pharmacologists—a wood, supposed to be that of the horse-dalziel-tree, which has been used in decoction for affections of the kidneys, etc.

II. *n*. A medicine adapted to relieve or cure diseases of the kidneys, particularly gravel or stone in the bladder.

nephritical (nef'-rit'-i-kal), *a*. [*< nephritic + -al*] Same as *nephritic*.

nephritis (nef'-rit'-is), *n*. [NL., *< L. nephritis* = Gr. *νεφριτις*, a disease of the kidneys, fem. of *νεφρις*, pertaining to the kidneys: see *nephrite*.] In *pathol.*, inflammation of the kidneys. See *Bright's disease*, under *disease*.—*Amyloid nephritis*, the presence of lardacin in the renal tissues.—*Desquamative nephritis*. See *desquamative*.—*Diffuse*

diffuse nephritis, inflammation involving both epithelial and connective-tissue elements of the kidney.—*Hemorrhagic nephritis*, nephritis with hemorrhages into the substance of the kidney.—*Interstitial nephritis*, inflammation involving primarily and principally the interstitial connective tissue of the kidney. It produces contracted kidney.—*Nephritis gravidarum*, nephritis developing in pregnant women without antecedent renal disease.—*Parenchymatous nephritis*, inflammation involving primarily and principally the epithelium of the uriniferous tubules.—*Suppurative nephritis*, inflammation of the kidney resulting in the formation of abscesses. It never is a part of Bright's disease, but may occur in pyemia, ulcerative endocarditis, pyelitis (see *pyelonephritis*), and more rarely in dysentery and actinomycosis, also, of course, from direct wounds of the kidney.

nephrocele (nef'-rō-sēl), *n*. [*< Gr νεφρός, a kidney, + κήλη, a tumor*] In *pathol.*, hernia of the kidney.

nephrocinic (nef'-rō-din'-ik), *a*. [*< nephro (idia) + (por)odemic*] Porodinic by means of nephridia, as a mollusk; having nephrogonaducts which discharge the genital products. *Encyc. Brit.*, XVI. 682

Nephrodium (nef'-rō'-di-um), *n*. [NL. (Richard, 1803), *< Gr νεφρόδωρος, νεφροειδής*, like a kidney: see *nephroid*.] An extensive genus of cosmopolitan polypodiaceous aspidoid ferns with cordate-reniform indusia. By many recent pteridologists the species are referred to the genus *Aspidium*, of which they form a well characterized section. *N. mollis* is frequently found in collections of cultivated plants. See *hay-scent* and *male-fern*.

nephrogonaduct (nef'-rō-gon'-a-duct), *n*. [*< Gr νεφρός, a kidney, + Ε gonaduct*] The nephridium of a mollusk when it serves as a gonaduct. See *idogonaduct*.

nephrography (nef'-rog'-ra-fī), *n*. [*< Gr νεφρός, a kidney, + γραφία, < γράφειν, write, mark, draw*] In *anat.*, a description of the kidneys.

nephroid (nef'-rōid), *a* and *n*. [*< Gr νεφροειδής, like a kidney, < νεφρός, a kidney, + εἶδος, form*] 1. *a*. Kidney-shaped, reniform; in *bot.*, resembling the genus *Nephrodium*.

II. *n*. In *math.*, a curve of the sixth order with one triple and one single cusp, the polar equation being

$$r = a(1 + 2 \sin \frac{3}{2} \theta).$$

Nephrolepis (nef'-rōl'-e-pis), *n*. [NL. (Schott, 1834), so called from the reniform indusia; *< Gr νεφρός, a kidney, + λεπίς, a scale*] A genus of polypodiaceous ferns of the tribe *Aspidieae*, having pinnate fronds with the pinnae articulated at the base and often very deciduous in the dried plant. The veins are all free, and the sori arise from the apex of the upper branch of a vein, and are covered with a reniform or roundish indusium. The genus is tropical or subtropical, and contains 7 species, of which 2 are found in Florida. See *cut* under *fern*.

nephrolithiasis (nef'-rō-lith'-i-as-is), *n*. [NL., *< Gr νεφρός, a kidney, + λίθιασις, stone* (a disease) see *lithiasis*] The formation of calculi in the substance or in the pelvis of the kidney.

nephrolithic (nef'-rō-lith'-ik), *a*. [*< Gr νεφρός, a kidney, + λίθος, a stone*] In *med.*, relating to calculus in the kidney.

nephrolithotomy (nef'-rō-lith'-ō-tō-mī), *n*. [*< Gr νεφρός, a kidney, + λίθος, a stone, + τομή, < τέμνειν, τμήν, cut*] In *surg.*, the removal of a calculus from the kidney by an incision.

nephrologist (nef'-rōl'-ō-jist), *n*. [*< nephrology + -ist*] One who is versed in nephrology.

nephrology (nef'-rōl'-ō-jī), *n*. [*< Gr νεφρός, a kidney, + λογία, < λέγειν, speak* see *-ology*] Scientific knowledge or investigation of the kidney.

Nephropneusta (nef'-rop-nūs'-tā), *n* pl. [NL., *< Gr νεφρός, a kidney, + πνευστος, verbal adj. of πνέω, breathe*] A superfamily group of pulmonate gastropods, equivalent to the *Geophila* or *Stylommatophora*, containing the land-snails and slugs, which are thus contrasted with the *Branchiopneusta* or *Basommatophora*, including the aquatic snails: so called on the ground that the respiratory sac is morphologically a kind of urinary bladder.

nephropneustan (nef'-rop-nūs'-tān), *a*. and *n*. I. *a*. Having lungs of the nature of kidneys; pertaining to the *Nephropneusta*, or having their characters.

II. *n*. A pulmonate gastropod of the superfamily *Nephropneusta*.

Nephrops (nef'-rops), *n*. [*< Gr νεφρός, a kidney, + ὤψ, eye*] A genus of long-tailed ten-footed crustaceans of the family *Homaridae*: so called from the nephroid eyes. *N. norvegicus*, known as the Norway lobster, is found on the Atlantic coasts of Europe, and has commercial value.

nephrorrhagia (nēf-rō-rā'jī-ā), *n.* [NL., < Gr *νεφρός*, a kidney, + *-ρῆμα*, < *ρῥῖναι*, break] Renal hemorrhage.

nephrorrhaphy (nēf-rō-rā'fī), *n.* [*<* Gr *νεφρός*, a kidney, + *ρᾶψις*, a sewing, < *ράπτειν*, sew.] The stitching of a (movable) kidney to the lumbar abdominal parietes.

nephrostoma (nēf-rōs'tō-mā), *n.*; pl *nephrostomata* (nēf-rōs'tō-mā-tā). [NL., < Gr *νεφρός*, a kidney, + *στόμα*, mouth.] One of the ciliated infundibular orifices of a primitive kidney. See *pronephron*.

nephrostome (nēf'rō-stōm), *n.* Same as *nephrostoma*.

nephrostomous (nēf-rōs'tō-mus), *a.* Of or pertaining to a nephrostoma.

nephrotomy (nēf-rōt'ō-mī), *n.* [*<* Gr *νεφρός*, a kidney, + *-τομία*, < *τέμνειν*, *ταμειν*, cut] In *urol*, the operation of incising the kidney, as for the extraction of a calculus.

nephrozymose (nēf-rō-zī'mōs), *n.* [*<* Gr *νεφρός*, kidney, + *ζύμωσις*, *E. symose*.] A diastatic ferment occurring in urine.

Nephtyidae (nēf-thī'dē), *n. pl.* [NL., < *Nephtys* + *-idae*.] A family of annelids, typified by the genus *Nephtys*. They have similar rings, a very large proboscis, and the branchiae in the form of a stoke-shaped process between the foliaceous lobes of the legs. They live chiefly in the sand of the sea-shore.

Nephtys (nēf'this), *n.* [NL.] The typical genus of *Nephtyidae*. *N. caeca* is a British species, the white-rag worm, also known as the *lury* and the *hairybast*.

Nepidae (nēp'ī-dē), *n. pl.* [NL. (Leach, 1818), < *Nepa* + *-idae*.] A family of aquatic heteropterous insects of the order *Hemiptera*, typified by the genus *Nepa*, the water-scorpions. They have a flattened elliptical or oval form, and ambulatory as well as natatorial legs, with the fore femora enlarged and channelled to receive the fore tibiae and tarsi, which fold into them. The abdomen ends in a pair of channelled stylets which unite to form a respiratory tube. The narrow head bears prominent eyes, and the membranous and coriaceous parts of the wing covers are well distinguished. Three genera are recognized.

ne plus ultra (nē plus ul'trā) [L., no further, no, not, *plus* (compar. of *multus*), more; *ultra*, beyond.] Not (anything) more beyond; the extreme or utmost point, completeness; perfection.

nepos, n. See *nepus*.

nepotal (nēp'ō-tal), *a.* [*<* L. *nepos* (*nepot-*), a grandson, a nephew see *nephew*] Of or pertaining to a nephew or nephews. *Gentleman's Mag.*

nepotic (nēp'ō-tik), *a.* [*<* L. *nepos* (*nepot-*), a grandson, a nephew see *nephew*. Cf. *nepotism*] Of or belonging to nepotism; practising or displaying nepotism.

The nepotic ambition of the ruling pontiff *Mūman*

nepotious (nēp'ō-shus), *a.* [*<* L. *nepos* (*nepot-*), a grandson, a nephew see *nepotal*, etc.] Overfond of nephews and other relatives, nepotic.

We may use the epithet *nepotious* for those who carry this fondness to the extent of doting, and, as expressing that degree of fondness, it may be applied to William Dove, he was a *nepotious* uncle.

Southey, The Doctor, x. (Davies)

nepotism (nēp'ō-tizm), *n.* [= F. *népotisme* = Sp. Pg. *el nepotismo*, < NL *nepotismus*, < L. *nepos* (*nepot-*), a grandson, a nephew see *nephew*] Favoritism shown to nephews and other relatives; patronage bestowed in consideration of family relationship and not of merit. The word was invented to characterize the propensity of the popes and other high ecclesiastics in the Roman Catholic Church to aggrandize their family by exorbitant grants or favors to nephews or relatives.

To this humour of *Nepotism* Rome owes its present splendour *Addison*.

nepotist (nēp'ō-tist), *n.* [*<* *nepotism* + *-ist*.] One who practises nepotism.

Were they to submit to be accused of Nepotism by *Nepotists*? The real disgrace would have been to have submitted to this.

Sydney Smith, To Archd. Singleton (Davies)

neppy (nēp'ī), *a.* [*<* *nep* + *-y*.] Nepped, as cotton-fiber. *Spon's Encyc. Manuf.*, I, 748.

neptē, *n.* A Middle English form of *nept*.

Nephtula (nēp'tik'ū-lā), *n.* [NL. (Von Heyden, 1842), < LL. *nephtula*, granddaughter, dim. of *nephis*, a granddaughter: see *nece*] A genus of microlepidopterous moths, giving name to the family *Nephtulidae*. There are several species, as *N. aureola*, *N. splendens*, and *N. microtheridia*, all among the smallest of the tineids. The larvae, as far as known, are all leaf miners.

Nephtulidae (nēp'ti-kū'lī-dē), *n. pl.* [NL., < *Nephtula* + *-idae*.] A family of microlepidopterous insects, typified by the genus *Nephtula*.

Neptune (nēp'tūn), *n.* [= F. *Neptune* = Sp. Pg. *Neptuno* = It. *Nettuno*, < L. *Neptunus*, a sea-god. see def.] 1. In *Rom. myth.*, the god of the sea, who came to be identified by the Romans themselves with the Greek Poseidon, whose attributes were transferred by the poets to the ancient Latin deity. In art Neptune is usually represented as a bearded man of stately presence, with the trident as his chief attribute, and the horse and the dolphin as symbols.

2. Figuratively, the ocean.

Ye that on the sands with printless foot

Do chase the ebbing Neptune

Shak, Tempest, v 1 85.

3. In *her*, same as *Triton* — 4. The outermost known planet of the solar system, and the third in volume and mass, though quite invisible to the naked eye. It was discovered in the autumn of 1846. Uranus, the planet next to Neptune, revolving about the sun in eighty-four years, was discovered in 1781, but observations of it as a fixed star were scattered through the eighteenth century. In 1821 Bouvard found that the observations of Uranus could not be satisfied by any theory based on the gravitation of known bodies, and hinted at an undiscovered planet. During the following twenty years further observations satisfied astronomers that such a planet must exist. To find where it could be was the problem which two mathematicians, J. C. Adams in England and U. J. J. Leverrier in France, set themselves to solve by mathematics. The calculations of Leverrier assigned the boundaries of a not very large region within which the unknown planet might be. In consequence of the indications of Adams, the astronomer Challis observed the planet Neptune August 4th and 12th, 1846, but, neglecting to work up his observations, failed to recognize it as a planet, while, in consequence of the indications of Leverrier, Galle of Berlin discovered Neptune September 23d, 1846. The orbit of the new planet, having been determined from direct observations, was found to differ excessively from the predictions in all its elements, so much so that Leverrier declared these elements "incompatible with the nature of the irregular perturbations of Uranus." The distance from the sun was 30 times instead of 34 times that of the earth, as predicted, and the orbit, instead of being more elliptical than that of any planet except Mercury, was in fact the most circular of all. When Neptune was discovered by Dr. Galle it was only 1 from the predicted place, but this would not have been so at the epoch to which the calculations referred, and there was nothing in their nature to render them particularly accurate for 1846, so that this coincidence must be regarded as in great measure a happy accident, such as would occur by mere chance once in 180 times. A satellite to Neptune was detected in October, 1846, by Lassell. Its period of revolution is 5 days, 21 hours, and 8 minutes, and its maximum elongation 18'. The mass of Neptune, having been calculated from these data, was found to be 1/25th that of the sun, against predicted values nearly twice as great. With the mass so ascertained, the perturbing action upon Uranus was calculated, and found to satisfy the observations of that planet much better than either Leverrier's or Adams's hypothesis had done. This was because the real action of Neptune upon the orbit of Uranus was of a different kind from what it had been assumed to be, those terms of the mathematical expressions which had been assumed to be the principal ones being really insignificant, and those which had been neglected as insignificant being really the controlling ones. The name *Neptune* was conferred by Encke, Leverrier having signified that he wished it called by his own name. The diameter of Neptune is 37,000 miles. Its distance from the sun is about 2,900,000,000 miles, and its period of revolution about 104 years. — *Neptune's horse*, a fish of the family *Hippocampidae*, a sea-horse. — *Neptune's rumble*, a retort — *Neptune's spoonworm*, a cephyrean, *Thalassoma neptuni*.

Neptunian (nēp'tū-ni-an), *a.* [*<* L. *Neptunius*, pertaining to Neptune, marine, < *Neptunus*, Neptune see *Neptune*.] 1. Pertaining to Neptune, the god of the sea, or to the ocean or sea itself — 2. In *geol*, formed by water or in its presence. The word is used especially to designate an aqueous origin of certain formations, now generally admitted to be volcanic, but which according to the views of Werner were deposited from water (See *Huttonian* and *Wernerian*). A most violent discussion in regard to this subject was carried on, during the latter third of the eighteenth century, by geologists and theologians.

Neptunist (nēp'tū-nist), *n.* and *a.* [*<* *Neptune* + *-ist*.] 1. *n.* A navigator; a seaman.

Let the brave engineer, fine Daedalus, skillful *Neptunist*, marvelous Vulcanist, and every Mercurial occupationer be respected *Harvey*, Pierce's Supererogation

2. In *geol*, an advocate of or believer in the Neptunian theory; an opponent of the Vulcanists.

Whenever a zealous *Neptunist* wished to draw the old man (Desmarres) into an argument, he was satisfied with replying "Go and see."

Sw C Lyell, Prin of Geol. (ed 1836), I 87

II. *a.* Of, pertaining to, or advocating the Neptunian theory.

For the untenable *Neptunist* hypothesis, asserting a once universal aqueous action unlike the present, Hutton substituted an aqueous action, marine and fluvial, continuously operating, as we now see it, antagonized by a periodic igneous action.

H. Spencer, Study of Sociol., p 227

nepus (nē'pus), *n.* [Also *nepos*, *nepos*, perhaps < *nip*, or some similar form (cf. *Sw. knapp*, narrow, scanty; *E. neap*, in orig. sense 'scanty'), + *house* (ME. *hus*, etc.).] For the second element, cf. the surnames *Backus*, *Belows* (*Bel-*

lus), reduced from *bakehouse* and *bellhouse*.] A gable [Scotch.]

In the title-deeds of an old property in St. Enoch Square, Glasgow, now occupied as an hotel called "His Lordship's Larder," reference is made to the garret room, 10 feet square, in the middle or *nepos* of the storey.

N and Q, 7th ser, IV 65

nepus-gable (nē'pus-gā'bl), *n.* A gable [Scotch.]

There being then no rooms to the houses, at every place, especially where the *nepus gables* were towards the streets, the rain came gushing in a spout.

neri, nere, *a.* Nearer. *Chaucer*

nere, *adv.* *prep.*, and *a.* A Middle English form of *near*.

nere, *n.* A Middle English form of *neer*.

nere, *a.* A Middle English contraction of *ne*

nere, *adv.* An obsolete contracted form of *never*.

Nereid (nē'rē-id), *n.* [*<* L. *Nereis* (*Nereid-*) = Gr *Νηρηΐς* (*Νηρηΐδ-*), a sea-nymph, daughter of Nereus, < *Νηρηΐς*, Nereus, a sea-god, < *νηρός*, wet.] 1. In *Gr myth.*, a sea-nymph, one of the daughters of Nereus and Doris, generally spoken of as fifty in number. The most famous among them were Amphitrit, Thetis, and Galatea. The Nereids were beautiful maidens helpful to voyagers, and constituted the main body of the female, as the Tritons did of the male, followers of Poseidon or Neptune. They were imagined as dancing, singing, playing musical instruments, wooed by the Tritons, and passing in long processions over the sea seated on hippocamps and other sea monsters. Monuments of ancient art represent them lightly draped or nude, in poses characterized by undulating lines, harmonizing with those of the ocean, and of ten riding on sea-monsters of fantastic forms.

Her gentlewomen, like the *Nereides*,

So many mermaids, tended her

Shak, A and C, II 2 211

2. [L. c.] In *zool*, a sea-centiped, an errant marine worm of the family *Nereidae*, in a wider sense, a marine annelid applicable to nearly all of the polychaetous worms — 3. [L. c.] Some ocean organism that shines by night. See the quotation under *noctilucous*.

Nereidae (nē'rē'idē), *n. pl.* [NL., < *Nereis* + *-idae*.] A family of annelids, typified by the genus *Nereis*. They have similar rings, a large proboscis, and the branchiae obsolete or much reduced and combined with the lobes of the legs. The species live mostly along the sea shore.

Nereides (nē'rē'idēz), *n. pl.* [NL. pl. of *Nereis*.] A family of worms, essentially the same as *Nereidae*.

nereidian (nē'rē'id-i-an), *a.* and *n.* [*<* *Nereid* + *-ian*.] 1. A resembling a nereid, pertaining to the *Nereidae*, or having their characters; nereidous.

II. *n.* A nereid, or sea-worm of the family *Nereidae*.

nereidous (nē'rē'id-us), *a.* Same as *nereidian*. *Darwin*, Voyage of Beagle, II 259

Nereis (nē'rē-is), *n.* [NL., < L. *Nereis*, a Nereid see *Nereid*.] 1. The typical genus of the family *Nereidae*. It was formerly used with great latitude for nearly all of the nereids or errant marine annelids. *N. pelagica* is a well known sea worm of both coasts of the Atlantic. *N. virens* is a large New England species from 18 to 20 inches long, known as the *chamworm*.

2. In *entom*, a genus of lepidopterous insects. *Hubner*, 1806 — 3. In *bot*, a systematic account of the algae or seaweeds of a locality or country as, the *Nereis* Boreali-Americana, by Harvey.

nereite (nē'rē-it), *n.* [*<* NL. *Nereites*, < L. *Nereis*, a Nereid (see *Nereid*), + *-ite*.] A fossil annelid related to the nereids, or supposed to be one of them, a member of a genus *Nereites* of Paleocene age.

Nereites (nē'rē'idēz), *n.* [NL. see *nereite*.] 1. A generic name of nereites.

A few of these fossils may truly be of a vegetable nature, whilst as to others (such as *Nereites*) no certain conclusion can be arrived at.

H A Nicholson, Man of Paleontology, xiii

2. A genus of mollusks. *Emmons*, 1842

Nereocystis (nē'rē-ō-sis'tis), *n.* [NL., < Gr. *Νηρηΐς*, a sea-god (see *Nereid*), + *κυστίς*, a bag, a bladder.] A gigantic seaweed of the natural order *Laminaraceae*, having a simple filiform stem, sometimes several hundred feet in length, terminating in a huge club-shaped or spherical bladder, from which springs a tuft of dichotomously dividing fronds. *N. Lütkeana*, the only species, is found on the northwestern coast of America and the opposite shores of Asia, where by its tangled stems it

Bait worm (*Nereis pelagica*)

quently forms floating islands upon which the sea-otters rest. It is there called *bladder kelp*. See *kelp*.

nerf, *n* A Middle English form of *nerve* *Chaucer*.

Nerine (nĕ-rĭ-nĕ), *n* [NL (Herbert, 1821), < L. *Nerine*, a Nereid, < *Nereus*, Nereus see *Nereid*] A genus of ornamental flowering bulbs of the monocotyledonous order *Amaryllidaceae* and the tribe *Amaryllideae*, known by the versatile anthers, many biseriate ovules in each cell, filaments dilated at the base, and thong-like leaves. There are about 9 species, all South African, producing a stout scape with an umbel of large saucer, pink, or rose-colored flowers. *N. Sarmenata*, the Guernsey lily, has been cultivated in Europe two hundred years or more, especially on the island of Guernsey, where tradition says it was introduced accidentally by shipwreck. It was mistakenly ascribed to Japan. This and the other species are now coming much into notice as autumn bloomers.

Nerita (nĕ-rĭ-tā), *n* [NL, < L. *nerita* = Gr. *νηριτις*, *νηριτις*, a sea-mussel, a periwinkle, < *Νηρις*, a sea-god see *Nereid*] A genus of mollusks used with widely varying limits. (a) By Linnaeus it was applied to a large and heterogeneous assemblage. (b) By later writers it has been restricted to a more or less well defined group typical of the family *Neritidae*. Also written *Nerites*.

Nerita ustulata

neritacean (nĕ-rĭ-tā-sĕ-an), *a* and *n* [*< Nerita* + *-acean*] I. a Having the characters of a nerite, of or pertaining to the *Neritida*.

II. *n* A member of the *Neritida*, a nerite.

nerite (nĕ-rĭt), *n* A gastropod of the genus *Nerita* or the family *Neritidae*.

Neritidae (nĕ-rĭ-tā-dĕ), *n* pl [NL, < *Nerita* + *-idae*] A family of gastropods, typified by the genus *Nerita*. As limited by recent conchologists, it includes thysanopod rhipidoglossates, with a radula characterized by 7 median teeth (a small central, 2 wide transverse ones, and 4 small external ones), and on each side a wide lateral tooth and numerous narrow marginal ones. The shell is generally subglobular, but varies to a patelliform shape, it has a flattened or nuxiform columella and a semilunar aperture, while the interior is absolved and destitute of whorl partitions. The species are numerous and are out in all tropic seas, and a few are also residents of fresh waters. See out under *Nancella*.

Nerita polita - New Zealand

nerite (nĕ-rĭt), *n* [*< Nerita*, a sea-mussel (see *Nerita*), + *-ite*] A fossil nerite.

Nerium (nĕ-rĭ-um), *n* [NL (Tournefort, 1700), < L. *nerium*, *nerion*, < Gr. *νηριον*, the oleander] A genus of dicotyledonous gamopetalous shrubs of the order *Apocynaceae* and the tribe *Echitidae*, and type of the subtribe *Nerieae*, known by its erect follicles. There are 2 or 3 species, native from the Mediterranean to Japan. They are smooth erect shrubs, with rigid narrow whorled leaves, fragrant and showy pink, white, or yellowish flowers, and long straight pod like fruit filled with woolly seeds. See *oleander*.

nero-antico (nĕ-rō-an-tĕ-kō), *n* [It. *nero*, black (see *negro*), *antico*, ancient (see *antiqui*)] A marble of deep and uniform black, which takes a high polish. It is found among ruins of ancient buildings of the Roman empire, and the pieces have been much used by decorators of later times.

nerret, *adv* An obsolete form of *near*.

nerval (nĕ-r'val), *a* [= F. *nerval* = It. *nervale*, < LL. *nerualis*, < L. *neruus*, sinew, nerve see *nerve*] Of or pertaining to a nerve or nerves, neural.

nervation (nĕ-r-vā'shon), *n* [= F. *nervation*, as *nerve* + *-ation*] The arrangement or distribution of nerves. Specifically—(a) In bot., the disposition of the fibrovascular bundles in the blades of leaves, the sepals or petals of flowers, the wing-like expansions of samaroid fruits, etc. a character which has assumed special importance in the study of fossil plants, since it has been proved to have generic rank, while the form and outline of leaves have only specific rank. The

(b) In anat., the arrangement or distribution of nerves. Specifically—(a) In bot., the disposition of the fibrovascular bundles in the blades of leaves, the sepals or petals of flowers, the wing-like expansions of samaroid fruits, etc. a character which has assumed special importance in the study of fossil plants, since it has been proved to have generic rank, while the form and outline of leaves have only specific rank. The

nerve is only one primary nerve, the midrib, which may be regarded as a continuation of the petiole, and from which there are given off secondary nerves which proceed at various angles through the blade toward or to its margin. These secondaries may or may not give off other nerves called tertiary, and even these may produce quaternary nerves. In palmately nerved leaves there arise, usually from the summit of the petiole, two or more (sometimes numerous) more or less divergent primary nerves, which may have nearly equal strength, but more commonly the central one is thickest and may still be denominated the midrib. In the latter case the others are called lateral primaries. Any or all of the primaries of a palmately nerved leaf may give off secondaries as in pinnately nerved leaves, but these more commonly proceed from the outer pair.

Leaves of only three primaries are sometimes called *triple nerved*, those of five, *quintuple nerved*. Peltate leaves usually have a peltate nervation, which may be regarded as a modification of the palmate nervation. The peltate nervation is simply a case of palmate nervation in which there are several nearly equal primaries. The terms *penninerved*, *palm-nerved*, *peltate-nerved*, and *pedal-nerved* were suggested by De Candolle for these several kinds of leaves. As regards the course of the nerves through the blade and their ultimate disposition, the following classes are distinguished: (1) *craspedodrome* [*< Gr. κρᾶσπειδον*, edge, margin, + *-δρομος*, < *δρομος*, run], the nerves passing directly to the margin of the blade; (2) *campitodrome* [*< Gr. καμπτός*, verbal adj. of *καμπειν*, bend, curve], the nerves curving (usually forward) near the margin, and either losing themselves in the parenchyma, or joining, arching, or otherwise anastomosing within the margin; (3) *brochidodrome* [*< Gr. βροχίς* (βροχίς), dim. of *βροχός*, a noose, loop], the nerves forming loops within the blade of the leaf; (4) *acrodrome* [*< Gr. ακρος*, at the point], the nerves passing upward and forward and terminating in the apex or point of the leaf; (5) *dictyodrome* [*< Gr. δικτυον*, a net], the nerves soon dividing up and losing themselves in the general network of the leaf (see explanation of *nerulles*, below); (6) *hypodrome* [*< Gr. ὑπο*, a web], the nerves of lower rank than primaries, so lost in the thick, coriaceous tissues of the leaf as to be nearly or quite invisible at the surface; (7) *paraphidrome* [*< Gr. παραφίς*, a border woven along a robe], a strong nerve passing round the entire margin of the leaf, forming a sort of hem or border; (8) *marginal*, a distinct nerve passing along the margin of the leaf, parallel to it, but separated from it by a narrow interval; (9) *parallelodrome* [*< Gr. παράλληλος*,

5 palmately nerved brochidodrome paraphidrome leaf of *Cocculus Haydenianus*, from the Fort Union group of Montana; 6, palmately nerved leaf of *Hedera Bruneri*, from the Cretaceous (Laramie) of Wyoming.

7 transversely parallelodrome nervation of *Macrotenupterus magnifolia* from the Trias of Virginia.

parallel] the nerves running parallel to one another, either longitudinally as in grasses, or horizontally from the midrib to the margin, as in the banana tree; (10) *campitodrome*

8 longitudinally parallelodrome nervation of a fossil palm leaf, from the Fort Union group of Montana; 9, campitodrome leaf of *Orodonites placatus*, from the Cretaceous (Laramie) of Colorado.

[< Gr. καμπτός, curved], the nerves passing in a gentle curve from base to apex of the leaf, the interval between them increasing gradually in width from either end to the middle. The last two classes are almost wholly restricted to monocotyledonous plants. Besides the above, there is the *dichotomous* or *forking* nervation of most ferns and some other plants. From the various nerves as thus described there usually proceed many much finer ones which join and anastomose in various ways, forming a network of meshes of different shapes, usually angular, and either rectangular, trapezoidal, or nearly square, the spaces inclosed by which are known as *areoles*. To such nerves the term *nerulles* has been applied. Physiologically considered, all nerves consist of vascular bundles which pass from the branch through the petiole, if there is one, into the base of the leaf, the primary fascicle of which is subsequently divided up to furnish the various nerves of the leaf, the primary nerves further dividing to supply the secondaries, these to supply the tertiaries, etc., and no nerves or fibers originate within the leaf. (b) In anat., the arrangement or disposition of the nerves, nerves, or veins of an insect's wing, the set or system of nerves as thus arranged, *neurulation*, *venation*. (c) In anat., the way or mode in which

the nerves are disposed as, the *neruation* of a vertebrate consists of a cerebrospinal and a sympathetic system.

nerature (nĕ-r'vā-jūr), *n*. [*< nerve* + *-ature*.] In bot., soil, and anat., same as *nervation*.

neraura (nĕ-r-vā-rā), *n*. [NL, < L. *neruus*, a nerve, + *aura*, air.] A hypothetical subtle essence radiating or emanating from the nervous system, and enveloping the body in a kind of sphere, same as *aura*, I.

nerauric (nĕ-r-vā-rĭk), *a*. [*< neraura* + *-ic*] Of or pertaining to *neraura*.

nerve (nĕrv), *n*. [*< ME *nerve*, *nerfe*, *nerf* = LG. *nerf*, *nerve* = G. *neru*, *nerve* = Sw. *neru* = Dan. *nerve*, < OF. *nerf*, F. *nerf* = Sp. *nerveo*, OSp. *niervo* = Pg. It. *neruo*, < L. *neruus*, a sinew, a tendon, a fiber, a nerve, string of a musical instrument or of a bow, etc., also vigor, force, strength, energy, = Gr. *νῆρον*, a sinew, tendon, nerve, a string; perhaps ult. akin to *snare*.] 1† A sinew, tendon, or other hard white cord of the body the original meaning of the word, at the time when nervous tissue was not distinguished from some forms of connective tissue. See *aponeurosis*.

Men myghte many an arwe fynde
That thyrled hadde horn and nerf and rynd
Chaucer, *Troilus*, II 642.

Thy nerves are in their infancy again,
And have no vigour in them
Shak, *Tempest*, II 1 484.

2 In anat., a nerve-fiber, or usually a bundle of nerve-fibers, running from a central ganglionic organ to peripheral mechanisms, either active (as glands and muscles) or receptive (sense-organs). The nerve-fibers are bound together into a primitive bundle called a *funiculus*. The connective tissue between the fibers within the funiculus is the *endoneurium*, and the connective tissue sheathing the funiculus is the *perineurium*. In the larger nerves several funiculi may be bound together into one trunk by connective tissue which forms the *epineurium*. See out under *median*.

But to nobler sights

But the spachies and Janizaries are the nerves and supporters of the Turkish Monarchy
Sandys, *Travels*, p. 88.

Chromatic tortures soon shall drive them hence,
Break all their nerves, and fritter all their sense
Pope, *Dunciad*, IV 56.

"My dear Renée," he said, taking hold of the stole and thereby establishing a *nerve* of communication, "let me present my beautiful wife!"
The Century, XXXVII 271.

4 Strength of sinew; bodily strength; firmness or vigor of body; muscular power; brawn. More specifically—(a) Strength, power, or might in general, fortitude or endurance under trying or critical circumstances, courage.

The infantry . . . is the nerve of an army
Bacon, *Kingdoms and Estates* (ed. 1887).

Having herin the scripture so copious and so plane, we have all that can be properly called true strength and nerve, the rest would be but pomp and incumbrance
Milton, *Civil Power*.

O iron nerve to true occasion true,
O fall'n at length that tower of strength
Which stood four-square to all the winds that blew!
Tennyson, *Death of Wellington*, IV.

(b) Force, energy, spirit, dash.

The nerve and emphasis of the verb will lie in the preposition
Abp. Sanborn, *Sermons*, p. 20 (*Latham*).

(c) Assurance, boldness, cheek. [Slang.]

5. pl. Hysterical nervousness. See *nervousness* (c). [Colloq.]—6. In entom., a nerve; a vein; a costa; one of the tubular ridges or thickenings which ramify in the wings. See *nerve*, 3.—7. In bot., one of a system of ribs or principal veins in a leaf. See *neruation*.—8. In arch., same as *nerve*, 1.—9. A technical name applied to the non-porous quality acquired by cork when, in its preparation for use in the arts, its surface is slightly charred.

by heat, and its pores are thus closed. *Encyc. Brit.*, VI, 402.—**Abducent nerve.** See *abducent*.

Accelerans nerves. Same as *accelerator nerves*.—**Accelerator nerves.** Certain nervous filaments passing to the heart through the sympathetic, and causing on stimulation an increased pulse-rate. Also called *augmentor nerves*.—**Accessory nerve of Willis.** The spinal accessory nerve.

—**Acoustic nerve.** Same as *auditory nerve*.—**Alveolar nerves.** See the adjective.—**Anterior cutaneous nerves of the abdomen.** Two or three small branches of the abdominal intercostals.—**Anterior cutaneous nerves of the thorax.** Terminal twigs of the intercostal distributed to the skin over the pectoralis major muscle.—**Anterior tibial nerve.** See *tibial*.—**Arnold's nerve.** The auricular branch of the vagus nerve.

—**Auditory nerve.** See *auditory*.—**Axillary nerve.** See *axillary*.—**Bell's nerve.** The posterior thoracic nerve, a branch from the brachial plexus to the serratus magnus muscle, called by Sir C. Bell the *external respiratory nerve*.—**Buccal, buccinator, buccolabial, carotid, cavernous nerves.** See the qualifying words.—**Cardiac nerve.** (a) Three nerves, superior, middle, and inferior, from the cervical sympathetic to the superficial and deep cardiac plexuses. (b) Branches of the pneumogastric to the cardiac plexus, variable in number. Those arising in the neck are called *cervical cardiac*, in the thorax, *thoracic*.

—**Cerebrospinal nerves.** Nerves coming directly from the cerebrospinal axis in contradistinction to *sympathetic nerves*.—**Cervicocardiac nerves.** See *cervicocardiac*.—**Cervicofacial nerve.** One of the divisions of the facial nerve, distributed to the lower face and upper neck.—**Ciliary, circumoesophageal, circumflex, cranial, crural, depressor nerves.** See the qualifying words.—**Dental nerves.** Branches of the fifth nerve supplying the teeth and gums. (a) *Anterior dental nerve*, a branch of the superior maxillary supplying the upper front teeth and contiguous part of the antrum. Also called *superior anterior alveolar*. (b) *Inferior dental nerve*, the largest branch of the inferior maxillary, running through the inferior dental canal and supplying the teeth of the lower jaw. It gives off the mylohyoid and mental branches. Also called *inferior alveolar*. (c) *Posterior dental nerve*, a branch of the superior maxillary distributed to the mucous membrane of the cheek and gum and the back teeth of the upper jaw. Also called *posterior superior alveolar*.—**Descending cervical nerve.** A branch of the hypoglossal in the neck, receiving filaments from the cervical nerves, and distributed to the omohyoid, sterno-, and thyro-hyoid muscles. Also called *descendens nuchæ*.—**Digastric nerve, dorsal nerves.** See the adjective.—**Eighth nerve.** (a) The glossopharyngeal. (b) The glossopharyngeal, vagus, and spinal accessory nerves.—**Esophageal nerves.** Branches of the vagus that go to form the esophageal plexus.—**External cutaneous nerve of the arm.** See *musculocutaneous*.—**External cutaneous nerve of the thigh.** A branch from the second and third lumbar nerves passing under Poupart's ligament to be distributed to the integument of the outer side of the hip and thigh.

—**External saphenous nerve.** See *saphenous*.—**Facial nerve.** See *facial*.—**Fifth nerve.** The trigeminal nerve.—**Fourth nerve.** The trochlear nerve.—**Frontal, genitofacial, glossopharyngeal, gluteal, gustatory, hypoglossal nerves.** See the adjective.—**Gastric nerves.** Terminal branches of the vagus, mainly distributed to the stomach. Those of the left side form the anterior gastric plexus on the anterior wall, and those of the right side the posterior gastric plexus on the posterior wall of the stomach. The posterior especially assists in the formation of the sympathetic plexuses of the other abdominal viscera.

—**Great auricular nerves.** See *auricular*.—**Inferior cardiac nerve.** A nerve on either side arising from the inferior cervical or first thoracic ganglion, and passing down to join the deep cardiac plexus. Also called *nervus cardiacus minor*.—**Inferior hemorrhoidal nerve.** A branch of the pudic distributed to the external sphincter and the skin of the anus, and in the female to the lower part of the vagina.—**Inferior pudendal nerve.** See *pudendal*.—**Inframaxillary, inhibitory intercostal, intercostohumeral nerves.** See the adjective.—**Internal cutaneous nerve of the arm.** A branch of the inner cord of the brachial plexus, distributed to the skin of the lower inner part of the arm and of the ulnar side of the forearm.—**Internal cutaneous nerve of the leg.** A branch of the anterior crural distributed to the skin on the inner side of the thigh and upper part of the leg.—**Internal saphenous nerve.** See *saphenous*.—**Interosseous nerve.** (a) *Anterior*, the longest branch of the median, arising a little below the elbow, and lying upon the interosseous membrane. It supplies the flexor longus pollicis, deep digital flexor, interosseous membrane, forearm bones, and wrist-joint. (b) *Of the foot*, slender branches of the anterior tibial to the metatarsal phalangeal articulations. (c) *Posterior*, the larger terminal division of the musculospiral. It supplies the short supinator and all the extensor muscles on the back of the arm, except the long radio-carpal.—**Jacobson's nerve.** The tympanic branch of the glossopharyngeal nerve.—**Lacrimal nerve.** A branch of the ophthalmic nerve distributed to the lacrimal gland and upper eyelid. Also called *lacrymo-palpebral*.—**Lateral cutaneous nerves.** Branches of the intercostal nerves distributed chiefly to the skin of the side of the chest and abdomen and that over the scapula and latissimus dorsi muscle.—**Lingual nerve.** See *lingual*.—**Lumbar nerves.** Median nerve, mental nerves. See the adjective.—**Masseteric nerve.** A branch from the inferior maxillary nerve to the masseter muscle.—**Meningeal nerve.** A small branch of the vagus distributed to the dura of the cerebellar fossæ. Also called *recurrent*.—**Middle cardiac nerve.** See *cardiac*.—**Motor oculi nerve.** The third cranial nerve, supplying all the muscles of the orbit except the superior oblique and external rectus, and giving motor filaments to the iris and ciliary muscles. It arises superficially from the inner side of the crus, in front of the pons. Also called *oculomotor*.—**Mylohyoid, nasopalatine, etc. nerve.** See the adjective.—**Nasal nerve.** A branch of the ophthalmic nerve distributed to the mucous membrane at the fore part of the nose, and to the skin of the tip and wing. It gives off the long ciliary nerves, the infratrochlear, and a branch to the ophthalmic ganglion. Also called *oculonasal*.—**Nerve of Cotunnus** (named after Cotugno, an Italian anatomist, 1736-1823), the nasopalatine nerve from Meck-

el's ganglion. See *nasopalatine*.—**Nerve of Scarpa.** Same as *nasopalatine nerve*.—**Nerve of Wrisberg.** (a) The lesser internal cutaneous nerve of the arm, a branch of the brachial plexus to the integument on the inner side of the arm. (b) The para intermedia of the facial nerve.

—**Nerves of Lancisi.** Certain longitudinal striations on the upper surface of the corpus callosum. Also called *striae longitudinales*.—**Ninth nerve.** (a) The glossopharyngeal nerve. (b) The hypoglossal nerve.—**Obturator, ophthalmic, optic, orbital, palatine, pathetic, etc. nerves.** See the qualifying words.—**Palmar cutaneous nerves.** Branches of the median and ulnar to the integument of the palm of the hand.—**Perforating cutaneous nerves.** A slender branch of the fourth sacral, distributed to the skin over the inner and lower part of the gluteus maximus.—**Perforating nerve of Casser,** the musculo-cutaneous nerve from the brachial plexus, which perforates the coracobrachialis muscle.—**Perineal, peroneal, petrosal, pharyngeal, phrenic, plantar, popliteal, pterygoid, pudic, pulmonary, etc. nerve.** See the adjective.—**Posterior auricular nerve.** A branch of the facial nerve supplying the postauricular and occipital muscles.—**Posterior tibial nerve.** See *tibial*.—**Radial nerve.** One of the two principal branches of the musculospiral nerve, running along the radial side of the forearm in relation with the radial artery.—**Sciatic nerves, sensorimotor nerve, sensory nerve.** See the adjective.—**Seventh nerve.** (a) The facial nerve. (b) The facial and auditory nerves.—**Sixth nerve.** The abducent nerve.—**Small internal cutaneous nerve.** A small branch from the inner cord of the brachial plexus, distributed to the skin of the inner lower half of the upper arm. Also called *nerve of Wrisberg*.—**Small occipital nerve.** See *occipital*.—**Sphenopalatine nerves.** See *sphenopalatine*.—**Spinal accessory nerves.** See *accessory*.—**Spinal, splanchnic, suboccipital, subscapular nerve.** See the adjective.—**Superior, upper, or superficial cardiac nerve.** A nerve arising from the superior cervical sympathetic ganglion, the right nerve going to the deep, and the left usually to the superficial cardiac plexus. Also called *nervus superficialis cordis*.—**Superior maxillary nerve.** See *maxillary*.—**Suprascapular, suprasternal, sympathetic, temporofacial, temporomalar, etc. nerve.** See the adjective.—**Third nerve.** The oculomotor nerve.—**Thoracic, trochlear, tympanic, ulnar, etc. nerve.** See the adjective.—**Vidian nerve.** A nerve formed by the union of the large superficial petrosal from the facial nerve and the deep petrosal from the carotid plexus of the sympathetic, and passing through the Vidian canal to terminate in Meckel's ganglion.

nerve (nêrv), *v t*; pret and pp *nerved*, ppr *nerving* [*nerve*, *n.*] To give nerve to, supply strength or vigor to; arm with force, physical or moral as, rage *nerved* his arm

I thank thee, Roderick, for the word!
It *nerves* my heart, it steels my sword
Scott, *L. of the L.*, v 14

Didst thou, when *nerving* thee to this attempt,
Ne'er range thy mind's extent, as some wild hall,
Dazzled by shapes that filled its length with light?
Browning, *Paracelsus*.

The song that *nerves* a nation's heart
Is in itself a deed
Tennyson, *Epilogue*
Not fumes to slacken thought and will,
But bracing essences that *nerve*
Lo wait, to dare, to strive, to serve.
Lowell, *To C. F. Bradford*

nerve-aura (nêrv'â'ûr), *n.* Same as *neri-aura*.
nerve-broach (nêrv'brôch), *n.* A wire instrument, sometimes notched, for extracting the nerve of a tooth
nerve-canal (nêrv'ka-nal'), *n.* Same as *pulp-cavity*

nerve-capping (nêrv'kap'ing), *n.* A cap placed over a tooth to preserve an exposed nerve
nerve-cell (nêrv'sel), *n.* 1 Any cell constituting part of the nervous system—2 More particularly, one of the essential cells of the nervous centers, forming, in its entirety or in part, the parts along which the nervous impulses are propagated and distributed in the activity of such centers. These cells have usually finely branched processes, and from some of them proceed the fibers of peripheral nerves. Also called *ganglion-cell*. See *under cell*

nerve-center (nêrv'sen'têr), *n.* A group of ganglion-cells closely connected with one another and acting together in the performance of some function, as the cerebral centers, psychical centers, respiratory or vasomotor centers.

nerve-chord. *n.* See *nerve-cord*.
nerve-collar (nêrv'kol'êr), *n.* The nervous ring or collar around the gullet in many invertebrates

nerve-cord (nêrv'kôrd), *n.* A cord composed of nervous tissue; a nerve. Also *nerve-chord*.
The tabular condition of the cerebro-spinal *nerve-cord*.
Encyc. Brit., XXIV, 184.

nerve-corpuscle (nêrv'kôr'pus-l), *n.* A nerve-cell
nerved (nêrvd), *a* [*nerve* + *-ed*] 1. Having nerves; especially, having nerves of a specified character. Specifically—2. In *bot*, ribbed, applied to leaves having fibrovascular bundles ramifying through them, like veins or nerves in the animal structure. Also *nervous*. See *nerivation*—3. In *entom*, having nervures or

veins: applied to the wings of insects.—4. In *her*, having nerves, as a leaf said of a leaf when the nerves and veins are of a different tincture from the rest of the leaf

nerve-drill (nêrv'dril'), *n.* A dental instrument for drilling or enlarging a pulp-cavity.

nerve-ending (nêrv'en'ding), *n.* The structure in which a nerve terminates, as an end-plate in a muscle.

nerve-fiber (nêrv'fî'bêr), *n.* A minute cord conveying molecular disturbance which serves as a stimulus to some peripheral active organ or to some central nervous mechanism. The nerve fibers may form peripheral nerves, or may constitute parts of the cerebrospinal axis, or of similar central organs in invertebrates. Two principal forms are recognized, the *medullated nerve fibers* and the *non medullated nerve-fibers* (or fibers of Ranvier)

nerve-fibril (nêrv'fî'bril'), *n.* One of the exceedingly fine filaments of which the axis-cylinder of a nerve-fiber is composed

nerve-fibrilla (nêrv'fî-bril'la), *n.* Same as *nerve-fibril*

nerve-force (nêrv'fôrs), *n.* The energy, actual or potential, of the nervous system, the capacity of the nervous system for work

nerve-hill (nêrv'hil'), *n.* A nerve-hillock or neuromast. *J. A. Ryder*

nerve-hillock (nêrv'hil'ok), *n.* Same as *neuromast*

nerveless (nêrv'les), *a* [*nerve* + *-less*] Without nerve, destitute of strength, weak.
There sunk Thalia, *nerveless*, cold, and dead
Pope, *Dunciad*, iv 41

His [Peter Angelis's] pencil was easy, bright, and flowing, but his colouring too faint, and *nerveless*.
Walpole, *Anecdotes of Painting*, IV 1
No doubt we have in Coleridge the most striking example in literature of a great genius given in trust to a *nerveless* will and a fitful purpose
Lowell, *Coleridge*

nervelessness (nêrv'les-ness), *n.* A nerveless state, lack of vigor, weakness, imbecility.
A pusillanimity and *nervelessness* utterly unparalleled.
New York Tribune, April 21, 1862.

The "North China Herald" says the quality of *nervelessness* distinguishes the Chinaman from the European.
See *Amer.*, N S, LIX 108

nerve-motion (nêrv'mô'shon), *n.* Molecular movement in nervous substance, constituting nervous action

I maintain that feeling is not a product of *nerve motion* in anything like the sense that light is sometimes a product of heat, or that friction electricity is a product of sensible motion
J. Plake, *N. A. Rev.*, CXXVI 38

nerve-needle (nêrv'nê'dl), *n.* In *dentistry*, a tool used for broaching out a pulp-cavity.

nerve-obtundent (nêrv'ob-tun'dent), *n.* A medicine used to deaden the nerve of a tooth more commonly *obtundent*

nerve-paste (nêrv'pâst), *n.* A mixture of arsenic (generally with creosote or morphine) used to kill the nerve of a tooth

nerve-path (nêrv'pâth), *n.* A course, especially in the central nervous organs, along which a nervous impulse can propagate itself

nerve-pentagon (nêrv'pen'ta-gon), *n.* In *echinoderms*, same as *esophageal ring* (which see, under *esophageal*)

nerve-plate (nêrv'plât), *n.* A layer or lamina of nervous tissue which may develop into a nerve-tube or nerve-cord
Continuation of dorsal *nerve plate* as a *nerve cord*.
Encyc. Brit., XXIV 187

nerve-ring (nêrv'ring), *n.* The nervous system of some aculeate, as the *Medusa*, forming a fibrous ring round the edge of the disk, with cellular ganglionic enlargements at regular intervals, a nerve-collar

This *nerve ring*, which is most accurately known in the Geryonidae, is supported on the annular cartilage
Gegenbaur, *Comp. Anat.* (trans.), p 108

nerve-rudiment (nêrv'rô'di-ment), *n.* The rudiment of a nerve
The original attachment of the *nerve rudiment* to the medullary wall is not permanent
Pöster and Balfour, *Embryology*, p 129

nerve-shaken (nêrv'shâ'kn), *a.* Having the nervous system weakened or enfeebled

nerve-storm (nêrv'stôrm), *n.* A paroxysmal attack of nervous disturbance, as a megrim

nerve-stretching (nêrv'strech'ing), *n.* In *surg.*, the operation of forcibly stretching a nerve, as for neuralgia.

nerve-substance (nêrv'sub'stans), *n.* The substance of which the essential part of a nerve or ganglion-cell and its processes is composed

nerve-tire (nêrv'tîr), *n.* Neurasthenia.

nerve-tissue (nêrv'tîsh'ô), *n.* The tissue of which the nervous system is composed, exclu-

sive of the requisite sustentacular and vascular parts. It includes the nerve-fibers and the ganglion-cells.

nerve-track (nérv'trak), *n.* Any path of nerve-fibers, but especially in the cerebrospinal axis, along which nervous impulses travel.

nerve-tube (nérv'túb), *n.* 1. A nerve-fiber. *Hoblyn*.—2. A hollow cord of nervous or embryonic nervous tissue, as the spinal cord of a vertebrate embryo.

The Cranial ancestor had a dorsal median nerve, which has increased in size and importance so as to become the nerve tube of existing forms. *Encyc Brit*, XXIV 183.

nerve-tuft (nérv'tuft), *n.* A minute plexus or network of nerve-fibers. *Beale*, *Protoplasm*, p 267.

nerve-tunic (nérv'tú'nik), *n.* An investiture by nerves or nervous tissue; a plexus or ramified set of nerves inclosing the body or any part of it.

An elongate animal, with a plexiform nerve tunic. *Encyc Brit*, XXIV 184.

nerve-twist (nérv'twíst), *n.* One of the small or ultimate ramifications of a nerve, a little nerve given off from a larger branch.

nerve-wave (nérv'wáv), *n.* Wave-motion in a nerve, transmitting nerve-commotion in a manner analogous to the progress of a water wave. Compare *brain-wave*.

Throughout the world the sum total of motion is ever the same, but its distribution into heat-waves, light-waves, nerve waves, etc., varies from moment to moment. *J. Fluke*, *N. A. Rev.*, (XXVI) 3.

nerve-winged (nérv'wingd), *n.* In *entom*, having the nerves or nervures of the wings conspicuous; specifically, of or pertaining to the *Neuroptera*, neuropterous.

nerve-duct (nér'vi-duct), *n.* [*L. nervus*, a nerve, + *ductus*, a duct.] An opening in a bone through which a nerve is conducted. *Cones*, 1882.

nerveless (nér'vil), *n.* [*L. nervillus*, dim of *L. nervus*, nerve, see *nerve*.] In *bot*, a very fine nerve or vein traversing the parenchyma of a leaf. See *nerivation*.

nerve-motion (nér'vi-mó-shon), *n.* [*L. nervus*, a nerve, + *motio* (n-), motion, see *motion*.] 1 The reflex action of the nervous system, motion excited in nerves by external stimuli and reflected in muscular motion. *Dutrochet*.—2 In *bot*, the power of self-motion in leaves.

nerve-motor (nér'vi-mó-tor), *a* and *n.* [*L. nervus*, a nerve, + *motor*, a mover, see *motor*.] I. *a*. Pertaining to or causing nerve-motion.

II. *n.* That which causes nerve-motion.

nerve-muscular (nér'vi-mú'skü-lár), *a* [*L. nervus*, a nerve, + *musculus*, a muscle, see *muscular*.] Of or pertaining to both nerve and muscle, neuromuscular. *Cones*, 1887.

nerveless (nér'vil), *a* and *n.* [*L. nervus*, made of sinews or fibers, *nervus*, a sinew, a fiber, a nerve, see *nerve* and *-less*.] I. *a*. 1 Of or pertaining to the nerves.—2 Capable of quieting nervous excitement, or otherwise acting upon the nerves.

II. *n.* A drug used in nervous diseases.

nervous (nér'vüs), *a*. [*L. nervosus*, full of sinews or fibers, nervous, see *nervous*.] 1 In *bot*, same as *nerveless*.—2 In *zool*, nerved, as an insect's wing, having nervature.

nervosity (nér'vös'i-ti), *n.* [= *F. nervosité* = *Pr. nervositas* = *Sp. nervosidad* = *Fr. nervosité* = *It. nervosità*, *L. nervositas* (n-), strength, thickness, *nervosus*, full of sinews, nervous, *nervus*, nerve, see *nerve*.] 1 The quality of being nervous, nervoussness. *Worcester*.—2 In *bot*, the state of being nerved.

nervous (nér'vüs), *a*. [= *F. nervus* = *Sp. Pg. It. nervosus*, *L. nervosus*, full of sinews or fibers, sinewy, nervous, vigorous, *nervus*, sinew, nerve, see *nerve*.] 1 Full of nerves.

We may easily imagine what acerbity of pain must be endured by our Lord by the piercing his hands and feet, parts very nervous, and exquisitely sensible. *Barrow*, *Sermons*, I 82. (*Latham*.)

2 Sinewy, strong, vigorous, well-strung.

What nervous arms he boasts! how firm his tread! His limbs how turn'd! *Broome*, in *Pope's Odyssey*, viii 147.

3 Possessing or manifesting vigor of mind; characterized by force or strength in sentiment or style. as, a nervous historian.

The pleadings were then short, nervous, and perspicuous. *Blackstone*.

Though it ["Arcadia"] contains some nervous and elegant passages yet the plan of it is poor. *Gifford*, Note to *B. Jonson's Every Man out of his Humour*, II. 1.

The style is sometimes clumsy and unwieldy, but nervous, masculine, and such as became a soldier. *De Quincy*, *Style*, III.

4. Of or pertaining to the nerves; seated in or affecting some part of the nervous system. as, a nervous disease, a nervous impulse; a nervous action.—5. Having the nerves affected; having weak or diseased nerves; easily agitated or excited; weak, timid.

Poor, weak, nervous creatures. *Cheyne*.
Some of Johnson's whims on literary subjects can be compared only to that strange nervous feeling which made him uneasy if he had not touched every post between the Mitre tavern and his own lodgings. *Macaulay*, *Boswell's Johnson*.

Seneca himself was constitutionally a nervous and timid man, endeavouring, not always with success, to support himself by a sublime philosophy. *Lecky*, *Europ. Morals*, I 204.

6. In *bot*, same as *nerved*.—**Nervous center**. See *nerve-center*.—**Nervous deafness**, deafness from disease of the auditory nerve or brain centers.—**Nervous fever**. See *fever*.—**Nervous fluid**, the fluid formerly supposed to circulate through the nerves, and regarded as the agent of sensation and motion.—**Nervous headache**, headache with nervous irritability, *migrain*.—**Nervous impulse**. See *impulse*.—**Nervous prostration**, weakness or depression due to the want of nervous power, *neurasthenia*.—**Nervous substance**, the substance of which the essential part of a nerve or a ganglion cell and its processes is composed.—**Nervous system**, the nerve centers with the peripheral nerves and organs of sense. The function of this system is to direct the functions of active organs, muscular and epithelial, in response to the varying states of the body, its several parts and its environment, in such manner as shall conduce to life and health and the bearing and raising of healthy offspring. Whether the nervous system has a direct trophic influence on passive tissues, protective or sustentacular, is undetermined.—**Stomatogastric nervous system**. See *stomatogastric*.—**Sympathetic nervous system**. See *sympathetic*.—*Syn* 3. *Forbible*.—5 Timorous, excitable, high strung.

nervously (nér'vüs-lí), *adv.* In a nervous manner. (a) With strength or vigor.

He [Marston] thus nervously describes the strength of custom. *T. Warton*, *Hist. Eng. Poetry*, IV 47.
(b) With weakness or agitation of the nerves, with restless agitation.

Rendered nervously cautious and anxious by so many successive losses. *Scott*.

nervousness (nér'vüs-nés), *n.* The state or quality of being nervous. (a) The state of being composed of nerves. (b) Strength, force, vigor.

If there had been epithets joined with the other substantives, it would have weakened the nervousness of the sentence. *J. Warton*, *Essay on Pope*.

(c) Morbid psychical irritability, unsteadiness of nervous control, a state of dependency consequent on an affection of the nerves.

If we mistake not, moreover, a certain quality of nervousness had become more or less manifest, even in so solid a specimen of Puritan descent as the gentleman now under discussion. *Hawthorne*, *Seven Gables*, viii.

nerveless (nér'vil-lai), *a* [*nervule* + *-less*.] In *entom*, pertaining to, on, or near the nervures of an insect's wing as, nerveless dots, lines, etc. **nerveless** (nér'vil), *n.* [= *F. nervule*, *L. nervulus*, dim of *nervus*, a nerve, see *nerve*.] A small nerve, specifically, in *entom*, a small nerve or vein of the wing, emitted by a larger one or connecting two other nervures. Also called *nervelet*, *venule*, *venule*, or *branch*.

nervelet (nér'vil-lét), *n.* [*nervule* + *-let*.] In *entom*, same as *nerveless*.—**Coronate nervelet**. See *coronate*.

nerve (nér'vür), *n.* [*F. nervure*, a rib (in arch, *bot*, etc.), *L. nervus*, a sinew, fiber, nerve, see *nerve*.] 1 In *arch* (a) Any one of the ribs of a groined vault, but especially that part

Nervures or Venation of Wings in Insects.
a, *Coleoptera* common chafar (*Melolontha vulgaris*); b, *Eu-pleuroptera* earwig (*Forficula auricularis*); c, *Neuroptera* dragonfly (*Aeshna maculata*); d, *Lepidoptera* butterfly (*Par-nassus apollo*); e, *Diptera* a fly (*Rissa marci*).

of a rib which forms one of the sides of a compartment of the grooming. (b) A projecting molding, particularly if small and acute-angled in profile. Also called *nerve*.—2. In *bot*, a vein or nerve of a leaf.—3. In *entom*, one of the tubes or tubular thickenings which ramify in an insect's wing, a nerve, vein, or costa proceeding along one of certain definite lines, to strengthen the wing and, through a central hollow, to nourish it. The wing is developed as a sac-like projection of the body-wall, and is hence composed of two closely applied membranes. The nerves are exactly apposed thickenings of the dorsal and ventral membranes. In most insects a groove extends along the inner surface of the thickening of each wall, forming a tube in the center of each nerve within which the fluids of the body circulate. The larger ones also contain tracheae. The number of these nervures is greatest and their arrangement is most complicated in some of the *Orthoptera* and *Neuroptera*, while they are almost entirely wanting in some of the small *Hymenoptera*. The nervures furnish important zoological characters. See out in preceding column.—**Coronate, cross, discoidal, externomedian, internomedian, marginal, etc., nervure**. See the adjectives.—**Inner apical nervure**. See *inner*.

nervus (nér'vüs), *n.* [*pl. nervi* (-vi)] [*L. nervus* see *nerve*.] In *anat.* and *zool.*, a nerve.

nerve (nér'vi), *a* [*nervus* + *-y*.] 1 Vigorous, sinewy; strong, as if well-nerved or full of nervous force.

Death, that dark spirit, in's nerve arm doth lie. *Shak*, *Cor*, II 1 177.

Between His nerve knees there lay a boar sear kenon. *Keats*, *Endymion*, I.

2 Courageous; having or exhibiting fortitude or nerve.

Yonder brisk and sinewy fellow has taken one short, nerve step into the ring, chanting with rising energy. *G. W. Cable*, *The Century*, XXXI 522.

Nesaea (nè-sè'ä), *n.* [*NL* (Commerçon, 1789), *L. Nesaea*, *Gr. Nysaia*, the name of a sea-nymph or Nereid, fem. of *Nysaios*, of an island, *Gr. Nysa*, an island.] A genus of polypetalous plants of the order *Igthariceae* and the tribe *Lythreae*, known by the three- to six-celled capsule wholly concealed within the calyx. There are 27 species, leafy erect herbs or shrubs, with four-angled branches and purplish or bluish flowers, natives of warmer Asia, Africa, Australia, and America, with one *N. verticillata*, in the United States, a conspicuous inhabitant of shallow waters, with opposite or whorled leaves and long arching tufted stems, enormously thickened below, with remarkable white spongy and floccose tissue (aerenchyma). This species is called *swamp-luosetrate*. See *hanchinol* and *Hesmia*.

nescience (nesh'iens), *n.* [= *F. nescience* = *Sp. Pg. nesciencia* = *It. nescienza*, *L. nescientia*, ignorance, *L. nescient* (n-), ignorant, see *nescient*.] The state of not knowing, lack of knowledge, ignorance.

The ignorance and involuntary nescience of men. *Jer. Taylor*, *Works* (ed 1835), I 800.

nescient (nesh'iënt), *a*. [= *OF. nescient*, *L. nescien* (n-), ppr of *nescire*, be ignorant, know not, *Gr. not*, + *scire*, know, see *science*.] Destitute of knowledge, ignorant, characterized by or exhibiting nescience. *Coles*, 1717.

nescious (nesh'ius), *a*. [*L. nescius*, ignorant.] Same as *nescient*.

He that understands our thoughts cannot be nescious of our works. *Rev. T. Adams*, *Works*, II 171.

nescock, *n.* See *nestcock*.

neselt, *v. t.* An obsolete form of *neese*.

neselt, *n.* An obsolete form of *nosel*.

nesh (nesh), *a.* [*ME. nesh, nesch, nesch, nesch*, *AS. nesch, hnesc*, soft, tender, = *MD. nesch, nes*, soft, wet, = *Goth. hnaskvus*, soft, tender. Cf *nask, nasky, nasty*.] 1 Soft, tender.

I was fader of his flesh, His Moder hedde an herte nesh. *Holy Rood* (E. E. T. S.), p 143.

Take wyld tanscy and grynde yt, and make yt nesh, & ley it therto. *Political Poems*, etc. (ed. Furnivall), p 36.

It semeth for love his harte is tender nesh. *Court of Love*, I 1092.

2 Delicate; weak, poor-spirited. [*Prov. Eng.*]

Synne was harde, hys blood was neshche, To defende folk fro feendys wode. *Holy Rood* (E. E. T. S.), p 217.

3. Soft; friable; crumbly. [*Prov. Eng.*].—For hard or for nesh, in hard or in nesh, come weal, come woe, in good fortune or bad.

In nesh, in hard, y pray the nows, In al stedes thou him avows. *Arthur and Merlin*, p 110 (*Hallwell*).

nesh (nesh), *v. t.* [*nesh*, *a.*] To make soft, tender, or weak.

Nesh not your womb [stomach] by drinking immoderately.

Animale, *Theatrum Chemicum* (1652), p 113. (*Latham*.)

neshen (nesh'n), *v. t.* [*nesh* + *-en*.] To make tender. *Hallwell*. [*Prov. Eng.*]

nesote (nē'si-ōt), *a.* [*< Gr. νῆσος, an island, < νῆος, an island.*] Insular, inhabiting an island.

neski, neskihi (nēs'ki), *n.* [*Ar.*] The cursive or running hand ordinarily used in Arabic manuscripts and printed books

Two systems of writing were used concomitantly, the Cufic or uncial and the *Neski* or running hand
Encyc. Brit., XIII 117

Nesogaea (nē-sō-jē'ā), *n.* [*NL.*, *< Gr. νῆσος, an island, + γαία, the earth*] In *zoogeog.*, Polynesia or Oceania, with New Zealand excluded, considered with reference to the geographical distribution of its animals.

Nesogean (nē-sō-jē'an), *a.* [*< Nesogaea + -an.*] In *zoogeog.*, of or pertaining to *Nesogaea*

Nesokia (nē-sō-ki-ā), *n.* [*NL.*] A genus of murine rodents of the subfamily *Phaomysinae*,

Bandicoot (*Nesokia bandicota*)

having a short, scaly, nearly naked tail, and including several species of Indian bandicoot-rats, as *N. bandicota* *J. E. Gray*

Nesomys (nēs'ō-mis), *n.* [*NL.*, *< Gr. νῆσος, an island, + μῦς, a mouse.*] A remarkable genus of murine rodents of the family *Muridae*, having teeth of sigmoid pattern. It is peculiar to Mada-

Nesomys rufus

gascar, where it is one of two genera which constitute the entire rodent fauna of the island, so far as is known. The genus was established by W. Peters in 1870

Nesonetta (nēs-ō-net'ā), *n.* [*NL.*, *< Gr. νῆσος, an island, + νῆττα, a duck*] A genus of erismaturine ducks of the family *Anatidae* and the subfamily *Erismaturinae*, established by G. R. Gray in 1844. *N. aucklandica*, the only species known, inhabits the Auckland Islands, whence the name

Nesotragus (nē-sot'ra-gus), *n.* [*NL.*, *< Gr. νῆσος, an island, + τράγος, a goat*] A genus of small antelopes inhabiting Zanzibar and Mozambique. *N. moschatus* is the typical species. Same as *Neotragus*

ness (nēs), *n.* [*< ME. nesse, < AS. nass = Icel. nes = Dan. nās = Sw. nās, a headland; akin to nose.*] A point of land running into the sea, a promontory, a headland; a cape

We weyed anker, and bare cleere of the nesse
Hakluyt's Voyages, I 310.

[*Ness* occurs as a termination of the names of some promontories or headlands, as, Sheerness, Dungeness]

A machine by means of which the action of the hands in netting is imitated, and a fabric is produced secured by knots at the intersections of the lines. In general, the name *netting machine* is given to any machine producing the net or background of lace.

netting-needle (net'ing-nē'dl), *n* A kind of shuttle used in netting.

Nettion (net'-i-on), *n* [NL, < Gr. *νῆτιον*, a duckling, dim. of *νήτις*, a duck; see *Anas*] A genus of very small and pretty ducks of the family *Anatidae* and the subfamily *Anatinae*, containing such as *N. crecca* of Europe and the similar *N. carolinensis* of North America, the green-winged teals. See *teal*.

nettle (net'l), *n* [ME *nettla*, *netle*, < AS *netele*, *netle* = D *netel* = MLG *netele*, *nettle* = OHG *nezula*, *nezula*, MHG *nezzel*, G *nessel* = Dan. *nezle* (for **netle*) = Sw *nassla* (after G., the reg form being **natla*), with dim suf-

fix -el (-la), from a simple form seen in OHG. *nassa*, a nettle; root unknown; perhaps connected with *net*. The OPruss. *notas*, Lith. *notere*, Ir *nenaid*, nettle, appear to be unrelated. Skeat assumes an orig initial *h*, and compares Gr *νήδυ*, a nettle, and E. *nit* (AS *hnutu*); but if there were an orig initial *h*, it would appear in OHG and AS, as in other cases.] 1. A herbaceous plant of the genus *Urtica*, armed with stinging hairs. *U. dioica* is the common, great, or stinging nettle, native in the northern Old World, naturalized in the United States and elsewhere. This plant is now somewhat cultivated in Germany for its fiber, which, properly dressed, is fine and silky. The tender shoots are not unfrequently used as a pot-herb. This and the small nettle, *U. urens*, were formerly in use as diuretics and astringents. The Roman nettle of southern Europe is *U. pilulifera*. *U. cannabina* of Siberia is locally utilized as a fiber plant.

Out of this nettle, danger, we pluck this flower, safety. *Shak*, I Hen IV, li 8, 10.

The Earth doth not always produce Roses and Lilies, but she brings forth also Nettles and Thistles. *Hovell*, Letters, I vi 57.

2. One of several plants of other genera of the nettle family (*Urticaceae*), any nettle-like plant, generally with a qualifying word. — **Chill nettle**. See *Loasae*. — **False nettle**, *Hamamelis virginica* (U.S.). — **In dock, out nettle**. See *dock*. — **Nelcherry nettle**, the East Indian *Gracilaria* (*Urtica*) *heterophylla*. It yields a fine white and glossy strong fiber, locally important. — **Nettle broth**, **nettle porridge**, a dish made with nettles out early in the season before they show any flowers.

There we did eat some nettle porridge, which was made on purpose to-day for some of their coming, and was very good. *Pepps*, Diary, Feb 27, 1661.

nettle (net'l), *v* *t*, pret and pp *nettled*, ppr *nettling* [< ME *netten*, < *nettle*, *n.*] To sting, irritate or vex, provoke; pique.

I am whipp'd and scourged with rods, *Nettled* and stung with plimires, when I hear Of this vile politician, Bolingbroke. *Shak*, I Hen IV, li 3, 240.

She hath so nettled the King that all the doctors in the country will scarce cure him. *Beau and Fl*, Philaster, li 4.

Nay, I know this nettles you now, but answer me, is it not true? *B. Jonson*, Poetaster, li 1.

She was not a little nettled at this my civility, which passed over her head. *Steele*, Lover, No 7.

I, tho' nettled that he seemed to slur With garrulous ease and oily courtesies Our formal compact, yet, not less, Went forth again with both my friends. *Tennyson*, Princess, l.

nettle (net'l), *n* *Naut*, same as *knittle*, 2.

nettle-bird (net'l-bērd), *n* A little bird which creeps about hedges among the nettles, as the whitethroat, *Sylvia cinerea*, or the blackcap, *S. atricapilla*. [Local, Eng.]

nettle-blight (net'l-blit), *n* The *Aecidium urticae*, a parasitic fungus common on nettles.

nettle-butterfly (net'l-but'ēr-flī), *n* A common European butterfly, *Vanessa urticae*. The cosmopolitan *Pyrausta cardui* and *P. alabaster*, whose larvae feed on nettles, are also sometimes known by this name.

nettle-cell (net'l-sel), *n* A stinging-cell or thread-cell, one of the urticating organs of a nettle-fish, a cnida or nematocyst.

nettle-cloth (net'l-kloth), *n* A thick cotton cloth which, when japanned, is used instead of leather for waist-belts, vizors for caps, etc.

nettle-creeper (net'l-kre'pēr), *n* Same as *nettle-bird*.

nettle-fever (net'l-fē'vēr), *n* Urticaria.

nettle-fish (net'l-fish), *n* A jelly-fish; a sea-nettle so called from its stinging or urticating.

nettle-geranium (net'l-jē-rā'ni-um), *n* See *geranium*.

nettle-leaf (net'l-lēf), *n* In her, a leaf of ordinary rounded form but with the edge very deeply serrated in long sharp points.

nettle-monger (net'l-mung'gēr), *n* Same as *nettle-bird*.

nettler (net'lēr), *n* [< *nettle* + -er] One who or that which stings, provokes, or irritates. These are the nettlers, these are the blabbing Books that tell, though not half, your fellows' foats. *Milton*, On Def. of Humb Remonst.

nettle-rash (net'l-rash), *n* An eruption on the skin like that produced by the sting of a nettle, urticaria.

nettle-springs (net'l-sprinj), *n* The nettle-rash. *Hallwell* [Prov Eng].

nettle-stuff (net'l-stuf), *n* *Naut*, a thin twist of two or three yarns, laid up or twisted by hand, and rubbed smooth. It is used for hammock-ropes and stops.

nettle-tap (net'l-tap), *n* A moth, *Simastis fabriciana*.

nettle-thread (net'l-thred), *n* One of the stinging hairs of aculephs; a cnidocell.

nettle-tree (net'l-trē), *n*. 1. A tree of the genus *Celtis* of the nettle family, chiefly the Old World species *C. australis* and the North American *C. occidentalis*, so named from the aspect of the leaves. The former is a desirable shade-tree, and its yellow-tinged wood is hard, dense, and fine grained, suitable especially for turning and carving. See *hackberry* and *lotus-tree*, 2.

2. An Australian tree of the genus *Laportea*. Two species, *L. gigas* and *L. photinophylla*, are large trees, more or less stinging; a third, *L. moroides*, is a small tree, the stinging hairs extremely virulent. Also *tree-nettle*. — **Jamaica nettle-tree**, *Trema* (*Spondia*) *micrantha*.

nettlewort (net'l-wērt), *n* [< *nettle* + *wort*] A plant of the nettle family (*Urticaceae*).

netting (net'ing), *n*. [< *nettle* + -ing] In rope-making. (a) A method of spinning or twisting together the ends of two ropes so as to unite them with a seamless joint. (b) A system of tying in pairs the yarns when they are laid on the posts in a ropewalk, in order to prevent entanglement or confusion.

netty (net'i), *a*. [< *net* + -y] Resembling a net; interlaced or interwoven like network, netted.

This reticulate or network was also considerable in the inward parts of man, not only from the first subtegment, or warp of his formation, but in the netty fibers of the veins and vessels of life.

Sir T. Browne, *Garden of Cyrus*, III.

net-veined (net'vänd), *a* 1. In entom., displaying numerous veins or nervures tending to form a more or less confused network on the surface, the principal longitudinal veins being almost lost, as in the wings of certain Hemiptera and many Orthoptera opposed to parallel-veined. — 2. In bot., same as *netted-veined*.

net-winged (net'wngd), *a* In entom., having netted or net-veined wings, specifically, neuropterous.

network (net'wērk), *n*. 1. Anything formed in the manner or presenting the appearance of a net or of netting; work made of intersecting lines which form meshes or open spaces like those of a net; an openwork or reticulated fabric, structure, or appearance; interlacement; technically, anastomosis; inoculation, rete, as, a *network* of veins or nerves; a *network* of railways. See *cut* under *latticeleaf*.

Her hair, which is platted in bands within golden network, is surmounted by a truly beautiful crown. *Enycy Brit*, VI 469.

The woven leaves
Make net work of the dark blue light of day. *Shelley*, *Alastor*.

2. Netting decorated with darned work or other needlework. Compare *net embroidery*, under *net*. — 3. Work in metal or other tenacious and ductile material resembling a net in having large openings divided by slender solid parts. Compare *fyrework*.

Beautiful net-work of perforated steel. *Hamilton Sale Cat.*, 1882, No 985.

Darned network. (a) Same as *darned netting*. (b) Ornamental threadwork used as a ground for various kinds of embroidery, especially when a set of parallel threads are made into a netting by other threads worked across them with the needle.

neutet, *n* An old spelling of *newt*.

neuf, *n* An error for *neuf*. See *neaf*.

Neufchâtel cheese. See *cheese*.

neuft, *n*. An obsolete variant of *newt*.

neuk (nük), *n*. A Scotch form of *nook*.

neuma (nū'mä), *n*. [ML. see *neume*.] Same as *neume*.

neumatic (nū-mat'ik), *a*. [< *neume* + -atic] Cf *pneumatic*. In music, of or pertaining to neumes. — **Neumatic notation**. See *notation*.

neume (nūm), *n*. [< ME *neume*, *neume*, *neme*, < OF *neume*, "a sound, song, or close of song after an anthem" (Cotgrave), < ML. *pneuma*, also *neupma*, *neuma*, a song, a sign in music, < Gr *πνεῦμα*, breath, breathing see *pneuma*. In the sense of 'sign,' some compare Gr. *νῆμα*, a nod] 1. Modulation of the voice in singing. *Nominale MS* (Halliwell).

Neume (var *neume*, *neme*) of a song, *neupma*. *Prompt. Parv.*, p. 355.

2. In music: (a) A sign or character used in early medieval music to indicate a tone or a phrase. A large number of these characters were used, more or less complicated in form and meaning. They were first written alone over the text to be sung, but soon one and then two or more horizontal lines were added to indicate some fixed pitch, as F or C. Neumes were in use as early as the eighth century, their origin is obscure. They were the first important step toward a graphic musical notation in which relative pitch should be indicated by relative position on a page. They passed over gradually into the more definite ligatures and the staff notation of later times. The earlier examples cannot be deciphered with entire certainty. (b) A melodic phrase or

a, the male flower; b, the female flower; c, a stinging hair, taken from the leaf, highly magnified.

division, sung to a single syllable, especially at the end of a clause or sentence; a sequence. [In this sense also *pneuma*]

neumic (nū'mik), *a.* [*neume* + *-ic*.] Of or pertaining to neumes; as, *neumatic notation*.

neura, *n.* Plural of *neuron*.

neurad (nū'rad), *adv.* [*neur(al)* + *-ad*.] Toward the neural axis or neural side of the body, in direction or relative position: opposed to *hemad*.

neuradynamia (nū'ra-dī-nā'mi-ā), *n.* [NL., < Gr. *νεῦρον*, nerve, + *δύναμις*, weakness. See *adynamia*.] Neurasthenia.

neuradynamic (nū'ra-dī-nam'ik), *a.* [*neuradynamia* + *-ic*.] Pertaining to, of the nature of, or suffering from neuradynamia.

neuramia, **neuramic**. See *neuremia*, *neuremic*.

neural (nū'ral), *a.* [*Gr. νεῦρον* (= *L. nervus*), a sinew, nerve (see *nerve*), + *-al*. Cf. *neural*.]

1 Pertaining to nerves or the nervous system at large; nervous.—2. Specifically, of or relating to the cerebrospinal nervous system of a vertebrate. Hence.—3. Situated on that side of the body, with reference to the vertebral axis, on which the brain and spinal cord lie, dorsal or tergal: opposed to *ventral*, *sternal*, *visceral*, or *hemal*.—4. In *physiol.*, done or taking place in the nerves.—**Neural arch**, the arch of a vertebra which incloses and protects the corresponding part of the spinal cord, consisting essentially of a pair of neurapophyses, to which various other apophyses are usually added as diapophyses, xypapophyses, etc. opposed to *hemal arch*, also extended to a similar segment of the skull by those who hold the vertebrate theory of the skull, according to which, for example, the occipital and supraoccipital bones are parts of the neural arch of the hind most cranial vertebra. See cuts under *endocranium* and *cervical*.—**Neural axis**, canal, lamina, mollusks, etc. See the nouns.—**Neural spine**, the spinous process of a vertebra, developed at the junction of a pair of neurapophyses, over the neural canal usually single and median, sometimes paired or bifid. opposed to *hemal spine*. See cuts under *cervical*, *endocranium*, *lumbar*, *carapace*, *Chelonia*, and *pleuropondylia*.—**Neural tremors**, **neural units**, in *psychol.* See the quotation.

If we confine ourselves to the Nervous System, we may represent the molecular movements of the bioplasm by the *neural tremors* of the psychoplasm, these tremors are what I call *neural units*—the raw material of Consciousness. Its several neural groups formed by these units represent the organized elements of tissues.

G. H. Lewes, *Probs. of Life and Mind*, I 108.

neuralgia (nū'ral'jī), *n.* [Also *neuralgy*, = *F. névralgie* = *Sp. neuralgia* = *Pg. neuralgia* = *It. neuralgia*, < NL. *neuralgia*, < Gr. *νεῦρον*, nerve, + *ἀλγος*, pain.] A pain, corresponding frequently to the distribution of some one nerve, which is not due immediately and simply to excessive stimulation of the nerve or nerves involved by some gross or extra-nervous lesion, but to a nutritive or other molecular change in the nerves themselves or their central connections. The pain is usually paroxysmal, varying in intensity, and described as shooting, stabbing, boring, burning, or deep seated. Neuralgia is largely confined to adult life, is more frequent in women than in men, and is especially apt to occur in neuropathic individuals. It is induced by cold, exhaustion (from overwork, worry, over lactation, mental shock, lack of food and rest), anemia, malaria, alcohol, lead, and glycohemias. In addition to this so-called *idiopathic neuralgia*, *symptomatic neuralgia* is sometimes used to designate neuralgiform pains incident to some gross lesion—*Gillary*, *intercostal*, etc., *neuralgia*. See the adjectives.

neuralgic (nū'ral'jik), *a.* [*neuralgia* + *-ic*.] Pertaining to, of the nature of, or affected by neuralgia: as, *neuralgic pains*, a *neuralgic patient*.

neuralgiform (nū'ral'ji-fōrm), *a.* Resembling or of the nature of neuralgia.

neuralgy (nū'ral'ji), *n.* Same as *neuralgia*. [Obsolete or provincial.]

neuralist (nū'ral-ist), *n.* [*neural* + *-ist*.] A neuropath.

neuramöba (nū-ra-mö'bä), *n.*; pl. *neuramöbae* (-bä) [NL., < Gr. *νεῦρον*, nerve, + NL. *amöba*: see *amöba*, 3.] A nerve-cell regarded as an organism of the morphic valence of an amöba: correlated with *myamöba* and *osteamöba*. *Coues*, 1884.

neuranal (nū-rä'näl), *a.* [*Gr. νεῦρον*, nerve, + *L. anus*, anus: see *anal*.] Of or relating to the outlet of the canal of the neural cord of a vertebrate embryo.

A current of water, which escaped by the *neuranal canal* (as in larval Amphioxus). *Enayes Brit.*, XXIV 184.

neurapophysial (nū-räp-ō-fiz'i-äl), *a.* [*neurapophysis* + *-al*.] Of or pertaining to a neurapophysis.

neurapophysis (nū-ra-pōf'i-sis), *n.*; pl. *neurapophyses* (-sēs). [*Gr. νεῦρον*, nerve, + *ἀπόφυσις*, an offshoot, process: see *apophysis*.] In *anat.*, a process or part of a vertebra which,

meeting its fellow in midline over the centrum of the vertebra, constitutes a neural arch and completes a neural canal. A neurapophysis consists essentially of the parts of a vertebra known in human anatomy as the *pedicle* and *lamina*. It usually bears other apophyses, as diapophyses or transverse processes, xypapophyses or oblique or articular processes, and is usually surmounted by a neural spine or spinous process. See cut under *cervical*.

neurasthenia (nū-ras-the-ni'ā), *n.* [NL., < Gr. *νεῦρον*, nerve, + *ἀσθένεια*, weakness: see *asthenia*.] In *med.*, nervous debility; nervous exhaustion.

neurasthenic (nū-ras-the-ni'ik), *a* and *n.* [*neurasthenia* + *-ic*.] 1. *a.* Of or pertaining to neurasthenia or nervous debility; affected or characterized by neurasthenia.

2. *n.* A person suffering from nervous debility.

Neurasthenics almost always gain by being a great deal in the open air. *Busk's Handbook of Med. Sciences*, V 164.

neurasthenically (nū-ras-the-ni'kal-i), *adv.* In a neurasthenic manner; as regards neurasthenia.

neuraton (nū-rä'shon), *n.* [*Gr. νεῦρον*, a nerve, + *-ation*. Cf. *nervation*.] 1. In *entom.*, nervature, venation, as of an insect's wing.—2. In *anat.*, the way or mode of distribution of nerves, the system of the nerves, *nervation*.

neuratrophia (nū-ra-trō'fi-ā), *n.* [NL., < Gr. *νεῦρον*, nerve, + *τροφία*, wasting: see *atrophy*.] Impaired nutrition of the nervous system, or of some part of it.

neuratrophic (nū-ra-trō'fik), *a.* [*neuratrophia* + *-ic*.] Pertaining to neuratrophia.

neurectomy (nū-rēk'tō-mi), *n.* [*Gr. νεῦρον*, a nerve, + *εκτομή*, a cutting out, < *ἐκτείνω*, *ἐκταίω*, cut out, < *ἐκ*, out, + *τείνω*, *ταίω*, cut.] The operation of excising or cutting out a part of a nerve.

neuremia, **neuremic** (nū-rē'mi-ā), *n.* [NL. *neuremia*, < Gr. *νεῦρον*, a sinew, tendon, nerve, + *αἷμα*, blood.] A purely functional disease of the nerves. *Laycock*.

neuremic, **neuremic** (nū-rē'mik), *a.* [*neuremia* + *-ic*.] Relating to or affected with neuremia.

neurenteric (nū-ren-ter'ik), *a.* [*Gr. νεῦρον*, nerve, + *ἐντερον*, intestine: see *enteric*.] Pertaining to the neuron and to the enteron; connecting the neural canal with the enteric tube.—**Neurenteric canal** or **passage**, the temporary passageway or communication which may persist for a time in vertebrates between the neural and the enteric tube. This connection leads from the hinder end of the neural tube into the enteric cavity, and is said to have been discovered by Gasser.

neuroepithelial (nū-rep-i-thē'i-äl), *a.* See *neuroepithelial*.

neuriatry (nū-rī'a-tri), *n.* [*Gr. νεῦρον*, nerve, + *ιατρεία*, healing, < *ιατρίω*, heal, < *ιατρός*, a physician: see *iatrie*.] The treatment of nervous diseases.

neuric (nū'rik), *a.* [*Gr. νεῦρον*, a nerve, + *-ic*.] 1. Belonging to a nerve or to the nervous system; nervous.

Dr. Barely has attempted to show that actual "neuric rays" are emitted by eyes and fingers, which are susceptible of reflection from mirrors, concentration by lenses, etc. *Proc. Soc. Psych. Research*, Oct., 1886, p. 178.

2. Having a nervous system.

neuricity (nū-ris'i-ti), *n.* [*neuric* + *-ity*.] The peculiar or essential properties or functions of nerves collectively; nerve-force.

Neuricity is not electricity any more than is myonicity. *Owen*, *Comp. Anat.*, I iv.

neuridine (nū-rī-din), *n.* [*Gr. νεῦρον*, nerve, sinew, + *-idin* + *-ine*.] A ptomaine (C₈H₁₄N₂) commonly produced in the putrefaction of proteids. It forms crystalline salts with gold and platinum chlorides, and when pure is not toxic in its effects.

neurilemma (nū-rī-lem'mā), *n.*, pl. *neurilemmata* (-a-tā). [NL., prop. "*neurolemma*", < Gr. *νεῦρον*, a nerve, + *λέμμα*, a husk, skin, < *λένω*, strip, peel: see *lepis*.] 1. The delicate structureless sheath of a nerve-fiber; the primitive sheath, the sheath of Schwann.—2. The sheath of a nerve-funiculus, the perineurium.—3. Of the spinal cord, the pia mater.

neurilemmatic (nū-rī-le-mat'ik), *a.* Pertaining to the neurilemma.

neurilemmitis (nū-rī-le-mi'tis), *n.* [NL., < *neurilemma* + *-itis*.] In *pathol.*, inflammation of the neurilemma.

neurility (nū-ril'i-ti), *n.* [= *F. neurilité*, as *Gr. νεῦρον*, nerve, + *-ιότης* + *-ιότης*.] The specific function of the nervous system—that of conducting stimuli.

We owe to Mr. Lewes our very best thanks for the stress which he has laid on the doctrine that nerve-fibre is uni-

form in structure and function, and for the word *neurility*, which expresses its common properties.

W. E. Clifford, *Lectures*, II 189.

neurine, **neurin** (nū'rīn), *n.* [= *F. neurine*, as *Gr. νεῦρον*, nerve, + *-ίνη*, *-ίνη*.] 1. A ptomaine, and possibly also a leucomaine, having the formula (CH₃)₃C₂H₅NOH. It has decided toxic properties.—2. A basic substance having the formula (CH₃)₃C₂H₄OH.NOH. same as *cho-line*.

neurism (nū'rīzm), *n.* [*Gr. νεῦρον*, nerve, + *-ισμός*.] Nerve-force. *E. D. Cope*, *Origin of the Fittest*, p. 20. [Rare.]

neuritic (nū-rī'tik), *a.* [*neuritis* + *-ic*.] Of, pertaining to, characterized by, or affected with neuritis.

neuritis (nū-rī'tis), *n.* [NL., < Gr. *νεῦρον*, nerve, + *-ίτις*.] In *pathol.*, inflammation of a nerve.—**Lipomatous neuritis**, the condition of a nerve in which, as the terminal stage of an interstitial neuritis, there is an accumulation of fat in the newly formed connective tissue of the nerve.—**Multiple neuritis**. See *multiple*.—**Optic neuritis**, inflammation of the optic nerve, especially of its retinal termination, the optic papilla, papillitis.—**Rheumatic neuritis**, neuritis due to exposure to cold.

Neurobranchiata (nū-rō-brang-kī-ā'tā), *n. pl.* [NL., < Gr. *νεῦρον*, nerve, + NL. *branchiata*, having gills: see *branchiate*.] The so-called *Pulmonata operculata*, or operculate pulmoniferous gastropods, as of the families *Cyclostomidae*, *Aciculidae*, and related forms.

neurobranchiate (nū-rō-brang'ki-āt), *a.* Pertaining to the *Neurobranchiata*, or having their characters.

neurocentral (nū-rō-sen'tral), *a.* [*Gr. νεῦρον*, nerve, + *κεντρικόν*, center: see *central*.] Relating both to the neural arch and to the centrum of a vertebra.—**Neurocentral suture**, the line on each side of the centrum along which a neurapophysis meets and fuses with the centrum. The body of a vertebra may be thus in part neurapophysial.

neurocele (nū-rō-sēl), *n.* [*Gr. νεῦρον*, nerve, + *κοίλον*, cavity: see *coelum*.] The entire hollow or system of cavities of the cerebrospinal axis.

neurocollan (nū-rō-sē'l-an), *a.* [*neurocele* + *-an*.] Of or pertaining to the neurocele.

neurocrane (nū-rō-krān), *n.* [*Gr. νεῦρον*, nerve, + *κρανιον*, skull, cranium: see *cranium*.] The brain-case, the cranial as distinguished from the facial and chondrosteal parts of the skull.

For the three segments of the cranium, forming a vaulted tubular brain case, or *neurocrane*, are morphologically complete without the intervention of a chondrosteon.

Coues, *Amer. Jour. Otol.*, IV 19.

neurocranial (nū-rō-krā'nī-äl), *a.* [*neurocrane* + *-ial*.] Of or pertaining to the neurocrane. *Coues*.

neurodeatrophia (nū-rō-dē-a-trō'fi-ā), *n.* [NL., < Gr. *νεῦρον*, like sinews or nerves (see *neuro*), + *τροφία*, atrophy: see *atrophy*.] Atrophy of the retina.

neurodynamis (nū-rō-dī-nā-mis), *n.* [NL., < Gr. *νεῦρον*, nerve, + *δύναμις*, power.] Nervous energy.

neuroepithelial (nū-rō-ep-i-thē'i-äl), *a.* [*Gr. νεῦρον*, nerve, + *E. epithelial*.] Pertaining to the endings of nerves in the skin where special modifications of both the nervous and the epidermal tissues result. Neuroepithelial structures are especially characteristic of the skin of water-breathing vertebrates, and consist of end buds and nerve-hillocks or neuromata. Preferably *neuroepithelial*.

neuroepithelium (nū-rō-ep-i-thē'i-um), *n.* [*Gr. νεῦρον*, nerve, + *E. epithelium*.] Neuroepithelial tissue.

neuroglia (nū-rōg'i-ā), *n.* [NL., < Gr. *νεῦρον*, nerve, + *γλία*, glue: see *glue*.] The peculiar sustentacular tissue of the cerebrospinal axis.

neurogliac (nū-rōg'i-āk), *a.* [*neuroglia* + *-ac*.] Having the character of neuroglia.

neurogliar (nū-rōg'i-ār), *a.* [*neuroglia* + *-ar*.] Of or pertaining to neuroglia.

neurography (nū-rōg'ra-fi), *n.* [*Gr. νεῦρον*, nerve, + *-γραφία*, < *γράφω*, write.] Descriptive neurology, a description of or treatise on nerves.

neurohypnologist (nū-rō-hip-nol'ō-jist), *n.* [*Gr. neurohypnology* + *-ist*.] One who is skilled in or who practises induction of the hypnotic state. Also *neurypnologist*.

neurohypnology (nū-rō-hip-nol'ō-jī), *n.* [*Gr. νεῦρον*, nerve, + *ὑπνος*, sleep, + *-λογία*, < *λέγω*,

Third Cervical Vertebra of Young *Ichthya*, the pieces slightly separated, *ne*, neural arch, *ne*, neural canal, *ne*, neural axis, *ne*, neural spine, *ne*, transverse process, *ne*, vertebral canal.

sleep: see -ology.] 1. Knowledge or investigation of hypnism — 2. The means or process employed for inducing the hypnotic state. See *hypnotism*.

Also neurohypnology

neurohypnotism (nū-rō-hīp'no-tizm), *n.* [*Gr* νευρον, nerve, + *E* hypnōtism] Same as *hypnotism*.

neuroid (nū'roid), *a* and *n.* [*Gr* νευροειδής, νευρώδης, like a sinew, sinewy, < νευρον, sinew, nerve, + ειδος, form] 1. *a* Resembling a nerve, or the substance of the nerves.

II. *n.* One of the pair of distinct neural elements which compose the neural arch of a vertebrate; a neuropophysis correlated with pleurod. (*Gr* Baur, Amer. Nat. XXI 1945)

neurokeratin (nū-rō-kar'a-tin), *n.* [*Gr* νευρον, nerve, + κέρας (keras), horn, + -in²] A substance allied to ceratin. It forms the sheath of Schwann and the inner sheath about the axis cylinder, as well as the connecting bands traversing the myelin between these, but is found in largest quantity in the white substance of the brain.

neurological (nū-rō-loj'i-ka), *a* [*Gr* νευρολογ- + -ic-al] Of or pertaining to neurology.

neurologist (nū-rō-loj'i-ka), *n.* [*Gr* νευρολογ- + -ist] One who is versed in neurology.

neurology (nū-rō-loj'i-ka), *n.* [*Gr* νευρολογία, < νευρον, nerve, + -λογία, < λέγω, speak: see -ology] Scientific knowledge or investigation of the form and functions of the nervous system in sickness and in health.

neuroma (nū-rō-mā), *n.* [*Gr* νευρομα, < νευρον, nerve, + -μα, < -μα, tumor] 1. A tumor formed of nervous tissue — 2. A fibroma developed on a nerve.

neuromalacia (nū-rō-ma-lā-si-ka), *n.* [*Gr* νευρομαλακία, < νευρον, nerve, + μαλακία, softness] Softening of nervous or nervous tissue.

neuromast (nū-rō-mast), *n.* [*Gr* νευρομαστός, < νευρον, nerve, + μάστος, a hillock] In *zoöl*, a neuro-epithelial sense-organ, or modified epidermal tract, specialized as a sensitive surface or area. It may be free on the general surface of the integument, or more or less covered in a special sac or invagination of the epidermis, or even entirely withdrawn from the epidermis into canals of the corium, hence called *neuromastoid canals*. These canals may be strengthened by bones or scales developed about the site of the neuro epithelial tract. Neuromasts are found in all fishes and aquatic amphibians, but not in the higher air breathing vertebrates. Also called *nerve hillock*.

neuromastic (nū-rō-mas'tik), *a.* [*Gr* νευρομαστικός, < νευρον, nerve, + μάστος, a hillock] Pertaining to or connected with neuromasts. *as*, neuromastic canals, into which these structures may be withdrawn, neuromastic bones or scales, developed in connection with neuromasts.

neuromata, *n.* Plural of *neuroma*.

neuromatous (nū-rō-ma-tus), *a.* [*Gr* νευροματώδης, < νευρον, nerve, + μάστος, a hillock] Pertaining to or of the nature of a neuroma.

neuromere (nū-rō-mēr), *n.* [*Gr* νευρομερ, < νευρον, nerve, + μέρος, a part] A segment or division of the neuron.

neuromerous (nū-rō-mēr-us), *a.* [*Gr* νευρομερής, < νευρον, nerve, + μέρος, a part] Segmented, as the neuron of a vertebrate, having or consisting of nervous metameres.

neuromimesis (nū-rō-mi-mē'sis), *n.* [*Gr* νευρομιμήσις, < νευρον, nerve, + μιμήσις, imitation: see *mimesis*] Imitation in neurotic patients of organic disease, nervous mimicry.

neuromimetic (nū-rō-mi-met'ik), *n.* [*Gr* νευρομιμητικός, < νευρον, nerve, + μιμήσις, imitation: see *mimesis*] Pertaining to or exhibiting neuromimesis.

neuromuscular (nū-rō-mus'kū-lār), *a.* [*Gr* νευρομυϊκός, < νευρον, nerve, + μυς, muscle, + -ικός, pertaining to] Pertaining to nerve and to muscle; especially, resembling or partaking of the nature both of nervous and of muscular tissue, having a character intermediate between that of muscle and that of nerve, representing or physiologically acting both as a nerve and as a muscle, as the neuromuscular cells of the freshwater polyp (*Hydra*). In these cells, which exhibit the beginnings both of a nervous and of a muscular system the indifference of such systems is seen, for every single cell is in part nervous, responding to stimuli, and in part muscular, or executive of movements which result from the stimulation of the other part. The motile filaments into which these neuromuscular cells are drawn out are called *fibers of Kleinberg*. The whole complex of the nervous and muscular systems of any animal is to be regarded as based upon and derived from this primitive, simple, and direct continuity of parts of a single neuromuscular form element, one part functioning as a nerve and the other as a muscle. Also *neuromuscular*.

neuromyological (nū-rō-mi-ō-lōj'i-ka), *a.* [*Gr* νευρομυολογ- + -ic-al] Of or pertaining to neuromyology.

neuromyology (nū-rō-mi-ō-lōj'i-ka), *n.* [*Gr* νευρομυολογία, < νευρον, nerve, + μυς, muscle, + -λογία, < λέγω, speak: see -ology Cf. *myology*] A system of classifying and naming muscles with reference to the nerves, myology based upon neurology.

Neurology is the key to myology, and a *neuro myology* is practicable.

Coxes and Shute, N. Y. Med. Record, XXXI. 98.

neuron (nū'ron), *n.* [*Gr* νευρον, nerve, + -ον, ending] 1. The cerebrospinal axis in its entirety, the whole of the encephalon and myelon, or brain and spinal cord, considered as one — 2. In *entom*, a nerve of an insect's wing, a vein or costa.

neuronosis (nū-rō-nō-sis), *n.* [*Gr* νευρονοσία, < νευρον, nerve, + νόσος, disease] Any disease of the nervous system. Also *neuronosis*.

neuropath (nū-rō-path), *n.* [*Gr* νευροπάθος, < νευρον, nerve, + πάθος, suffering] 1. In *pathol*, one who assigns to the nervous system an excessive if not exclusive responsibility for disease — 2. A person of a nervous organization liable to or exhibiting nervous disorders.

neuropathic (nū-rō-path'ik), *a.* [*Gr* νευροπαθικός, < νευρον, nerve, + πάθος, suffering] Of or pertaining to neuropathy.

neuropathical (nū-rō-path'ik-al), *a.* [*Gr* νευροπαθικός, < νευρον, nerve, + πάθος, suffering] Same as *neuropathic*.

neuropathically (nū-rō-path'ik-al-i), *adv.* In a neuropathic manner.

neuropathological (nū-rō-path'ik-al-ō-lōj'i-ka), *a.* [*Gr* νευροπαθολογικός, < νευρον, nerve, + πάθος, suffering, + -λογία, < λέγω, speak: see -ology Cf. *pathology*] Pertaining to a diseased condition of the nervous system or some part of it.

neuropathologist (nū-rō-pā-thol'ō-jist), *n.* [*Gr* νευροπαθολόγος, < νευρον, nerve, + πάθος, suffering, + -λογία, < λέγω, speak: see -ology Cf. *pathology*] One who is skilled in neuropathology.

neuropathology (nū-rō-pā-thol'ō-jī), *n.* [*Gr* νευροπαθολογία, < νευρον, nerve, + πάθος, suffering, + -λογία, < λέγω, speak: see -ology Cf. *pathology*] The sum of human knowledge concerning the diseases of the nervous system.

neuropathy (nū-rō-pā-thi), *n.* [*Gr* νευροπάθεια, < νευρον, nerve, + πάθος, suffering] In *pathol*, a general term for disease of the nervous system.

neurophysiological (nū-rō-fiz'i-ō-lōj'i-ka), *a.* [*Gr* νευροφυσιολογικός, < νευρον, nerve, + φυσικός, physical] Pertaining to neurophysiology.

neurophysiology (nū-rō-fiz'i-ō-lōj'i-ka), *n.* [*Gr* νευροφυσιολογία, < νευρον, nerve, + φυσικός, physical] Physiology of the nervous system.

neuropodial (nū-rō-pō-dī-al), *a.* [*Gr* νευροποδία, < νευρον, nerve, + ποδία, foot] Pertaining to neuropodia. *as*, a neuropodial cirrus or filament. See cuts under *Polynoe*, *prastomium*, and *pygidium*.

neuropodium (nū-rō-pō-dī-um), *n.* [*Gr* νευροπόδιον, < νευρον, nerve, + ποδός, foot] 1. One of the series of ventral or inferior foot-stumps of a worm, one of the lower parapodia of an annelid, a ventral oar opposed to notopodium. See *parapodium*.

neuropore (nū-rō-pōr), *n.* [*Gr* νευροπόρος, < νευρον, nerve, + πόρος, pore] An orifice of communication between the neural canal and the exterior in the embryos of some animals. An anterior neuropore, where the brain remained last in connection with the epidermis, may correspond to the pineal body. In the lancelet it is a permanent opening. A posterior neuropore may be a neural orifice, or on closure of that orifice may be diverted into a neuroenteric canal.

neuropsychology (nū-rō-si-kō-lōj'i-ka), *n.* [*Gr* νευροψυχολογία, < νευρον, nerve, + ψυχή, soul, + -λογία, < λέγω, speak: see -ology] Neurology including psychology.

neuropsychopathic (nū-rō-si-kō-path'ik), *a.* [*Gr* νευροψυχωπάθης, < νευρον, nerve, + ψυχή, soul, + πάθος, suffering: see *pathic*] Pertaining to disease of the nervous system, including those parts of it subserving psychic functions. — **Neuropsychopathic constitution**, a permanent condition of irritable weakness of the nerve centers, especially the higher or psychical ones, exhibiting itself in irregular sleep, exaggerated febrile reactions, liability to delirium and convulsions, headache, susceptibility to alcohol, diminished or exaggerated sexual instinct, self-consciousness, fickleness in emotions, lack of determination, insane temperament or diathesis.

neuropter (nū-rōp'tēr), *n.* [*NL*] A neuropterous insect; a member of the order *Neuroptera*.

Neuroptera (nū-rōp'tēr-ā), *n.* [*NL*, neut. pl. of *neuropterus*, < *Gr* νευρον, nerve, + πτερόν, a wing] An order of the class *Insecta*, founded by Linnaeus in 1748. It was originally composed of the genera *Libellula*, *Ephemera*, *Phryganea*, *Hemerobius*, *Myrmeleon*, *Panorpa*, and *Raphidia* (*Raphididae*), the winged termites being included in *Hemerobius*. The group thus constituted has suffered many changes, and entomologists are still far from agreed upon its proper definition. Fabricius founded a distinct order *Odonata* for the Linnaean *Libellula* or dragon-flies. Kirby separated the Linnaean *Phryganea* or caddis-flies under the ordinal name *Trichoptera*. Erichson founded the order *Pseudoneuroptera* for those Linnaean neuropters whose metamorphosis is in-

complete and whose pupae are active. These eliminations left the *Neuroptera* to consist of the families *Stalidae*, *Hemerobidae*, *Mantodeidae*, *Myrmeleontidae*, and *Panorpidae*. By some authors the *Phryganidae* (the *Trichoptera* of Kirby) are still assigned to *Neuroptera*, though M'Lachlan, Brauer, and others exclude them. The last-named authority has the largest following in restricting the order *Neuroptera* to the four families *Stalidae*, *Hemerobidae*, *Mantodeidae*, and *Myrmeleontidae*, forming a separate order *Panorpidae* for the family *Panorpidae*, and leaving the *Trichoptera* out as a separate order. In this restricted sense the technical characters of the *Neuroptera* are — wings four in number and reticulate, labial palpi three jointed, the joints free, mandibles free, pupae distinctly mandibulate, and larvae as in *Myrmeleon*. These insects are all carnivorous in the larval state, and are either aquatic or terrestrial, the aquatic forms pupating terrestrially. See cuts under *Chrysopa*, *Mantis*, and *nerure*.

neuropter (nū-rōp'tēr), *a.* [*As* *neuropterous* + -al] Same as *neuropterous*.

neuropteran (nū-rōp'tēr-an), *n.* [*As* *neuropterous* + -an] A neuropter.

Neuroptera (nū-rōp'tēr-ā), *n.* [*NL*, < *Gr* νευρον, nerve, + πτερόν, fern] A genus of fossil ferns, established by Brongniart in 1828, very widely distributed, especially characteristic of the coal-measures (of Carboniferous age) in different parts of the world, and not passing above the Permian. The fronds are simple, bipinnate or tripinnate, the pinnae rounded, heart shaped, or auriculate at the base, the median nerve sometimes at most entirely wanting, and generally disappearing altogether before the point of the pinnae is reached — the nervation diverging from the base or from the middle nerve, fan like and curving backward. In several species the main stem bears rounded or kidney shaped leaflets, which were formerly referred to a distinct genus (*Cyclopteris*). The fructification of *Neuroptera* has not yet been clearly made out. The genera *Neuropteris*, *Lodleya*, *Diopteris*, and *Odonopteris* are referred by Lesquereux to the section of *Neuropteris*.

neuropterology (nū-rōp'tēr-ō-lōj'i-ka), *n.* [*NL*, *Neuroptera* + *Gr* -λογία, < λέγω, speak: see -ology] That branch of entomology which treats of neuropterous insects.

neuropteron (nū-rōp'tēr-on), *n.* [*NL*: see *neuropter*] An insect of the order *Neuroptera*, a neuropter.

neuropterous (nū-rōp'tēr-us), *a.* [*NL* **neuropterus*, < *Gr* νευρον, nerve, + πτερόν, wing] Having conspicuous neurulation of the wings; netted-winged, specifically, pertaining to the *Neuroptera*, or having their characters. Also *neuropterical*. See cut under *nerure*.

neuropurpuric (nū-rō-pōr-pū'rik), *a.* [*Gr* νευροπυρρικός, < νευρον, nerve, + *NL* *purpura* + -ic] Pertaining to the nervous system and to purpura. — **Neuropurpuric fever**, epidemic cerebrospinal meningitis.

neuroretinitis (nū-rō-ret-i-nī'tis), *n.* [*NL*, < *Gr* νευρορετινίτις, < νευρον, nerve, + *NL* *retina*, q. v., + -itis] Inflammation of the retina and the optic nerve.

neurorhopter (nū-rō-rhōp'tēr), *n.* A member of the order *Neurorhoptera*.

Neurorhoptera (nū-rō-rhōp'tēr-ā), *n.* [*NL*, < *Gr* νευρορροπτερά, < νευρον, nerve, + *NL* *Orthoptera*] An order of fossil insects of the coal period, founded by C. Brongniart for the reception of numerous forms which resemble the modern leaf-insects or *Phasmidae*.

neurorhopterous (nū-rō-rhōp'tēr-us), *a.* Of or pertaining to the *Neurorhoptera*.

neurosial (nū-rō-si-al), *a.* [*Gr* νευροσιάλης, < νευρον, nerve, + σιάλη, saliva] Of the nature of or pertaining to a neurosis; originating in the nervous system. *as*, *neurosial* disorders, the *neurosial* theory of gout.

Neurosial and reflex disorders of the heart.

Allen and Neurol., x. v, Index.

neurose (nū-rō-sē), *a.* [*Gr* νευροσής, < νευρον, nerve, + -σής, < *Gr* νευρικός, nervous] 1. In *bot*, same as *nerved*. — 2. In *entom*, having many nervures or veins: applied specifically to an insect's wing when it has discal as well as marginal nervures. See cut under *nerure*.

neurosis (nū-rō-sis), *n.* [*NL*, < *Gr* νευροσής, < νευρον, nerve, + -σής, < *Gr* νευρικός, nervous] A nervous disease without recognizable anatomical lesion, as epilepsy, hysteria, neuralgia, etc.

neuroskelatal (nū-rō-skel'ē-tal), *a.* [*Gr* νευροσκελετικός, < νευρον, nerve, + σκελετός, skeleton] Of or pertaining to the neuroskelton; endoskelatal; skeletal, with special reference to the nervous system.

neuroskelton (nū-rō-skel'ē-tōn), *n.* [*Gr* νευροσκελετόν, < νευρον, nerve, + σκελετός, a dry body (skeleton): see *skeleton*] The endoskeleton of a vertebrate; the skeleton proper, or, as ordinarily understood, that which consists of the interior bony framework of the body, and is developed in special relation with and upon the pattern of the nervous system, serving to inclose and support the cerebrospinal axis and main nervous trunks: a term introduced by Carus in 1828. The term is correlated with *dermatoskeleton*, *exoskeleton*, and *aplanoskeleton*. All the bones of "the skeleton"

of ordinary language are neuroskeltonal. Compare *endo-skelton* and *exoskelton*.

neuropast (nū-rō-spast), *n.* [*< Gr. νεύρον, drawn or actuated by strings, as a puppet, < νῆρον, a sinew, fiber, string, + πασσω, verbal adj. of παύω, draw out or forth: see spasm*] A puppet, a little figure put in motion by a string

That outward form is but a neuropast.

Dr H. More, Psychathanaia, I 11 24

neuropastict (nū-rō-spas'tik), *a* [*< neuropast + -ic*] Of or pertaining to or resembling a neuropast.

To these, with subtle wires and neuropastic springs, they give, now and then, various motions of head, and eyes, which they have made to weep.

Boylan, True Religion, II 281

neuroterous (nū-rot'g-rus), *a*. Pertaining to the genus *Neuroterus*.

Neuroterus (nū-rot'e-rus), *n* [*NL (Hartig, 1840)*] A genus of hymenopterous gall-insects of the family *Cynipidae*, exhibiting parthenogenesis. Forms of one of the alternate generations are known as *Spathogaster*. *N. lentus* makes oak galls, the insect produced in which in turn makes galls of another kind, which yield *Spathogaster*. The neuroterous generation is represented only by females, the spathogasteric by both sexes.

neurotherapeutics (nū-rō-ther-a-pū'tiks), *n.* [*< Gr. νεύρον, nerve, + θεραπεύω, I treat*] Therapeutics of nervous disease.

neurotherapy (nū-rō-ther-a-pi), *n* [*< Gr. νεύρον, nerve, + θεραπεία, medical treatment*] Same as *neurotherapeutics*.

neurotic (nū-rot'ik), *a* and *n* [*< neurosis (-osis) + -ic*] *I. a.* 1. Relating to the nervous system or to neuroses; as, a *neurotic* disease.

All of us, in certain neurotic crises, hear music or see pictures or receive other striking and mysterious impressions.

New Princeton Rev., II 158.

2. Prone to the development of neuroses.

The *neurotic* woman is sensitive, jealous, managing, self-forgetful, wearing herself for others, the hysterical, whether languid or impulsive, is purposeless, introspective, and selfish. *Buck's Handbook of Med. Sciences, V 102.*

3. Capable of acting on the nerves; as, a *neurotic* medicine.

II. n 1. A disease having its seat in the nerves—2. A medicine for nervous affections; a *neurotic*.

neurotomical (nū-rō-tōm'ik-al), *a* [*< neurotomy + -ic-al*] Pertaining to neurotomy.

neurotomy (nū-rot'ō-mi), *n* [*< Gr. νεύρον, a tendon, sinew, nerve, + -τομή, < τέμνω, to cut*] In *surg.*, the division of a nerve.

neurotonic (nū-rō-tōn'ik), *n* [*< Gr. νεύρον, a nerve, + E. tonic*] A medicine employed to strengthen the nervous system.

neurotrophic (nū-rō-tiōf'ik), *a*. [*< Gr. νεύρον, nerve, + τροφή, nourishment*] Pertaining to or dependent on trophic influences coming through the nerves.

neurypnologist (nū-rip-nol'ō-jist), *n* [*< neurypnology + -ist*] Same as *neurhypnologist*.

neurypnology (nū-rip-nol'ō-jī), *n*. Same as *neurhypnology*. *Brad*

Neustrian (nūs'tri-an), *a* [*< Neustria (see dof) + -ian*] Of or pertaining to Neustria, a kingdom of the West Franks in the sixth, seventh, and eighth centuries, comprising France north of the Loire, and Flanders. as generally used, opposed to *Austrasian*.

To no small extent the *Neustrian* Franks had lost their old Germanic vigour.

Encyc. Brit., IX 631

neut. An abbreviation of *neuter*.

neuter (nū'tēr), *a* and *n* [*< L. neuter, neither, in grammatical use, neuter, tr. Gr. ουδέτερος (neutrum genēs, tr. Gr. γένος ουδέτερον, neuter gender); < ne, not (see ne), + uter, either, one of two*] *I. a.* 1. Neither the one thing nor the other; not adhering to either party, taking no part with either side, as in a contention or discussion; *neutral*.

The duke and all his country abode as *neuter*, and held with none of both parties.

Berners, tr. of Froissart a Chron., I cclii

I cannot mend it, I must needs confess, But since I cannot, be it known to you I do remain as *neuter*.

Shak., Rich II., II. 3. 159

Mr. Burchell, on the contrary, dissuaded her with great ardour, and I stood *neuter*.

Goldsmith, Vicar, xiii.

2. In *gram.* (a) Of neither gender; neither masculine nor feminine; used when words are grammatically or formally distinguished as *masculine*, *feminine*, and *neuter*—a distinction made in English only in the pronouns *he*, *she*, *it*. (b) Neither active nor passive; intransitive. Abbreviated as *neut.*—3. In *bot.*, same as *neutral*.—4. In *zool.*, having no fully developed sex: as, *neuter* bees.

II. n. 1. A neutral.

Shall we, that in the battle sate as *neuters*, Serve him that's overcome?

Fletcher (and another), False One, I 1

Damn'd *neuters*, in their middle way of steering,

Are neither fish, nor flesh, nor good red herring.

Dryden, Epilogue to the Duke of Guise, I 39

2. An animal of neither sex, and incapable of propagation; one of the imperfectly developed females of certain social insects, as ants and bees, which perform all the labors of the community, a worker. See *ants* under *bee*, *Ita*, and *Termes*.—3. In *bot.*, a plant which has neither stamens nor pistils. See *cut* under *neutral*.—4. In *gram.*, a noun of the neuter gender. Abbreviated *n.* and *neut.*

neutral (nū'tral), *a* and *n*. [= *Sp. Pg. neutral* = *It. neutrale*, *< L. neutralis, neuter, < neuter, neither see neuter*.] *I. a* 1. In the condition of one who refrains from taking sides in a contest or dispute, taking no active part with either of two contestants or belligerents, not engaged on or interfering with either side.

Who can be wise, amazed, temperate and furious, Loyal and *neutral*, in a moment? No man.

Shak., Macbeth, II 3. 115

He [Temple] was placed in the territory of a great *neutral* power, between the territories of two great powers which were at war with England.

Macaulay, Sir William Temple

A *neutral* State is one which sustains the relations of amity to both the belligerent parties, or negatively, is a non hostis, one which sides with neither party in a war.

Wooley, Introduct. to Inter Law, § 155

2. Belonging to a neutral state as, *neutral* ships, a *neutral* flag.—3. Neither one thing nor the other, intermediate, indifferent, mediocre.

Some things good, and some things ill do seem, And *neutral* some, in her fantastic eye.

Sir J. Davies, Immortality of the Soul, xx

I was resolved to assume a look perfectly *neutral*, a complete virginity of face, uncontaminated with the smallest symptom of meaning.

Goldsmith, Citizen of the World, xvi

4. In *chem.*, exhibiting neither acid nor alkaline qualities as, *neutral* salts.—5. In *bot.*, sexless, having neither stamens nor pistils, as

Neutral flowers of (a) Snow ball. 1 rec. (*Pylaeococcus*) (b) *Verbena verticillata* (a ray flower) (c) *Ronteloua Texana*

the ray-flowers of many *Compositae*, the marginal flowers of *Hydrangea*, and the upper florets of many grasses. See *cut* under *Hydrangea*.—6. In *elec.* and *magnetism*, not electrified, not magnetized.—7. In *color*, of low chroma; without positive quality of color, grayish—*Neutral axis*, in *mech.* See *axis*.—*Neutral blue*, *Neutralism*. See the nouns.—*Neutral line* or *equator* of a magnet. See *magnet*.—*Neutral salts*, in *chem.*, salts in which all the hydrogen atoms capable of replacement by acid or basic radicals have been so replaced, as sodium sulphate (Na_2SO_4) distinguished from hydrogen sodium sulphate (NaHSO_4). *Neutral salts* may, however, react either acid, alkaline, or neutral with test paper. Also called *normal salts*.—*Neutral vowel*, the vowel sound heard in such accented syllables as *but, son, food, trust, firm, earn*, etc., and very widely in unaccented syllables so called because of the virtual absence in its utterance of a positive determining position of the organs, it being rather the product of intonation of their indifferent position in breathing, and the form toward which vowels excessively slighed in pronunciation tend. It is instanced also by the French "mute *e*" (where this is not altogether silenced), by the *e* of many unaccented syllables in German, and so on.—*Neutral zone*, in *bot.*, in the *Characeae*, the motionless hyaline band of protoplasm, entirely destitute of chlorophyll grains, which marks the boundary between two currents of oppositely rotating protoplasm in active growing cells. Also called *indifferent line*.

II. n A person, party, or nation that takes no part in a contest between others, one who or that which occupies a neutral or indifferent position.

As a painted tyrant, Pyrrhus stood, And like a *neutral* to his will and matter, Did nothing.

Shak., Hamlet, II 2. 503

The right of blockade is one affecting *neutrals*, and a new kind of exercise of this right cannot be introduced into the law of nations without their consent.

Wooley, Introduct. to Inter Law, App III, p 443

neutralisation, neutralise, etc. See *neutralization, etc.*

neutralist (nū'tral-ist), *n* [*< neutral + -ist*] One who professes neutrality, a *neutral*. [Rare.]

Intrusting of the militia and navy in the hands of *neutralists*, unfaithful and disaffected persons.

Petition of the City of London to the House of Commons, 1848, p 6 (Latham.)

neutrality (nū'tral-i-ti), *n*. [= *F. neutralité* = *Sp. neutralidad* = *Pg. neutralidade* = *It. neutralità* = *D. neutraliteit* = *G. neutralität* = *Sw. Dan. neutralitet*, *< ML. neutrahita* (*-t*), a neutral condition, *< L. neutralis, neutral*. see *neutral*.]

1. The state of being neutral or of being unengaged in a dispute or contest between others, the taking of no part on either side, in *international law*, the attitude and condition of a nation or state which does not take part directly or indirectly in a war between other states, but maintains relations of amity with all the contending parties. It is not a departure from neutrality to furnish to either of the contending parties supplies which do not fall within the description of contraband of war—that is, arms and munitions of war, and things out of which munitions of war are made.

Purchase, but their *neutrality*, thy sword Will, in despite of omens, reduce The rest of Greece.

Glomer, Athenaid, ix.

Venice, with her usual crafty policy, kept aloof, maintaining a position of *neutrality* between the belligerents.

Prentiss, Ford and Lea, II 14

2. Indifference in quality, a state neither very good nor very evil. [Rare.]

There is no health, physicians say that we At best enjoy but a *neutrality*.

Donne, Anatomy of the World

3. The state of being of the neuter gender.

Hence appears the truth of those words of our Saviour, I and the Father are one, where the plurality of the verb, and the *neutrality* of the noun, with the distinction of their persons, speak a perfect identity of their essence.

By Pearson, Expos. of the Creed, II 3, § 38

4. In *chem.*, the state of being neither acid nor basic, absence of the power to saturate or combine with either an acid or a base.—**Armed neutrality**. See *armed*.—**Proclamation of neutrality**, in *U. S. hist.*, the proclamation by which Washington, in 1793, announced the neutrality of the United States in the war then begun between Great Britain and France.—**Byn 1. Neutrality, Indifference**. A nation may be very far from viewing or regarding with indifference a war between two of its neighbors, and yet it may preserve a strict *neutrality*—that is, it may refrain strictly from helping the one that it wishes to see victorious or hindering the one that it wishes to see defeated.

A state may stipulate to observe perpetual *neutrality* towards some or all of its surrounding neighbors, on condition of having its own *neutrality* respected.

Wooley, Introduct. to Inter Law, § 155

Met

With blank *indifference*, or with blame reproved.

M. Arnold, Buried Life

neutralization (nū'tral-i-zā'shon), *n* [= *F. neutralisation*, as *neutralize* + *-ation*] 1. The act of neutralizing, specifically, in *chem.*, the process by which an acid and a base are so combined that the resulting compound has neither acid nor basic properties. Thus, if a solution of sodium hydrate is carefully added to sulphuric acid, the acidity of the mixture grows less and at length quite disappears, leaving the mixture with neither acid nor basic properties. This is the *neutralization point*. If more sodium hydrate is added, it imparts a basic or alkaline property to the mixture. Neutralization can then be brought about only by addition of an acid. In these cases the acid and base are said to *neutralize* each other. The name *neutralization* is also given to the decomposition of alkaline carbonates by the addition of some stronger acid in quantity just sufficient wholly to displace carbonic acid.

There are some cases in which the *neutralization* is effected by the addition of a substance which, even if added in excess, produces a precipitate, and so leaves the solution neutral, so that the addition of an excess of the precipitant is without much importance.

Lea, Photography, p 425.

2. (a) An act of one or more nations imposing upon one of their number or upon another state a condition of permanent neutrality by ordaining that it shall not take part in any war into which the others may enter, in consideration for which its freedom from attack is usually guaranteed, as in the case of Switzerland in 1815, and Belgium since its separation from the Netherlands in 1830. (b) An act of military powers agreeing that certain persons, property, and places, such as surgeons, chaplains, and the wounded, medical supplies, hospitals, and ambulances, shall be deemed neutral in war, and not subject to capture, etc., as was agreed by the Geneva Convention, 1864. (c) More loosely, the act of securing by convention immunity

for certain territory or waters from being made the scene of hostilities or of exclusive national maritime jurisdiction, as for the Black Sea, 1856, and for the Congo in Central Africa, 1885. (d) The condition of immunity and restriction resulting from any of such acts

Also spelled *neutralisation*

neutralize (nū'tral-iz), *v. t.*, pret and pp *neutralized*, ppr *neutralizing* [= F. *neutraliser* = Sp. Pg. *neutralizar* = It. *neutralizzare*, as *neutral + -ize*] 1 To render neutral; reduce to a state of neutrality between different parties or opinions. Specifically—(a) To bestow by convention a neutral character upon (states, persons and things which would or might otherwise bear a belligerent character), declare non belligerent. (b) To prohibit hostilities within the limits of, as territory or waters.

The article of the treaty which referred to the Black Sea is of especial importance. "The Black Sea is *neutralized*, its waters and its ports, thrown open to the mercantile marine of every nation, are formally and in perpetuity interdicted to the flag of war of either of the Powers possessing its coasts or of any other Power."

J. M. Curthy, Hist. Own Times, xxviii.

2. In *chem.*, to destroy or render inert or imperceptible the peculiar properties of, by chemical combination. See *neutralization*, 1.

Ammonia *neutralizes* the most powerful acids, and forms a very important class of salts.

W. A. Miller, Elem. of Chem., § 369

3 To render inoperative; invalidate; nullify, counterbalance as, to *neutralize* opposition.

He acts as Archimedes would have done if he had attempted to move the earth by a lever fixed on the earth. The action and reaction *neutralize* each other.

Macaulay, West. Reviewer's Def. of Mill

As one poison will sometimes *neutralize* another, when wholesome remedies would not avail, so he was restrained by a bad passion from quaffing his full measure of evil.

Dickens, Martin Chuzzlewit, xl.

Also spelled *neutralise*.
= Syn. 3. *Annul*, *Nullify*, *Annihilate*, *Neutralize*. These words agree in meaning the bringing of a thing to nothing, causing it to cease to be absolutely, or as to some special relation. *Annul* represents an official or authoritative act as, to *annul* an edict. (See *abolish*.) *Nullify*, to render invalid or of no avail, is more general and less often official. A law may be *illegally nullified* by inert resistance. To *annihilate* is to reduce to nothing, and should be used only where absolute putting out of existence is meant, such expressions as "his army was *annihilated*" are manifestly improper, "his army was *annihilated*" would be proper by strong hyperbole. If the army was so broken up that no parts of it were ever gathered together again. To *neutralize* is to bring to nothing in respect to some special relation, or to render inoperative or ineffectual in respect to certain other agencies or forces, by a contrary or counterbalancing force as, to *neutralize* an acid, his efforts were *neutralized* by the influence of his opponent. That which is *neutralized* would naturally have force in itself. Hence we should not speak of *neutralizing* a law or a command.

neutralizer (nū'tral-iz-er), *n.* [*neutralize* + -er] 1 One who or that which neutralizes; that which destroys, disguises, or renders inert the peculiar properties of anything. Also spelled *neutraliser*.

news-pamphlet (nūz'pam'flet), *n.* Formerly, a publication issued occasionally when any special event seemed to call for it. Such pamphlets were precursors of newspapers, and appeared especially in the sixteenth century

newspaper (nūz'pā'pér), *n.* A paper containing news; a sheet containing intelligence or reports of passing events, issued at short but regular intervals, and either sold or distributed gratis, a public print, or daily, weekly, or semi-weekly periodical, that presents the news of the day, such as the doings of political, legislative, or other public bodies, local, provincial, or national current events, items of public interest on science, religion, commerce, as well as trade, market, and money reports, advertisements and announcements, etc. Newspapers may be classed as *general*, devoted to the dissemination of intelligence on a great variety of topics which are of interest to the general reader, or *special*, in which some particular subject, as religion, temperance, literature, law, etc., has prominence, general news occupying only a secondary place. The first English newspaper is believed to be the "Weekly News," issued in London in 1622. The beginnings of newspapers in Germany and Italy are said to reach back to the sixteenth century, although it is often stated that the oldest newspaper is the "Frankfurter Journal," founded in 1615. In the United States "Publick Occurrences" was started in Boston in 1689, but was suppressed; the Boston "News-Letter" followed in 1704, but the oldest existing newspaper in the country is the "New Hampshire Gazette," founded in 1756.

This month, a certain great Person will be threatened with death or sickness. This the *News Paper* will tell them
Isaac Bickerstaff, Predictions for the Year 1708.

There now exist but two newspapers which were in being in Queen Anne's reign, namely the "London Gazette" (but that has been kept alive through its official nursing) and — but one due to private enterprise — Burrows' "Worcester Journal," which was established in 1709

Nicene (nī's'en), *n* [*< LL Nicænus*, less correct-
 ly *Nicæmus*, of Nicæa or Nice (*Nicæna fides*, the
 Nicene Creed), *< Nicæa*, also *Nicaea*, *< Gr Nikaia*
 (> *Nikaia*, adj), a name of several cities (see
 def.), *< vnaio*, victorious, *< vnaio*, victory] Of or
 pertaining to Nicæa or Nice, a town of Bithy-
 nia, Asia Minor — *Nicene council*, either of two gen-
 eral councils which met at Nicæa. The first Nicene coun-
 cil, which was also the first general council, met in A. D.
 325, condemned Arianism, and promulgated the Nicene
 Creed in its earlier form. The second Nicene council,
 accounted also the seventh general council, was held in
 787, and condemned the Iconoclasts. The recognition of
 the first Nicene council as ecumenical has been almost uni-
 versal among Christians of all confessions, it is acknow-
 ledged to the present day not only by the Roman Catholic
 and the Greek churches, and by many Protestant churches,
 but by Nestorians, Jacobites, and Copts. The Anglican
 Church does not accept the second Nicene council as ec-
 umenical — *Nicene Creed* or *Symbol*, a summary of the
 chief tenets of the Christian faith, first set forth as of ec-
 umenical authority by the first Nicene council (A. D. 325),
 but closely similar in wording to ancient creeds of Oriental
 churches, and especially founded upon the baptismal creed

of the church of Caesarea in Palestine. The distinctive word
 added at Nice to exclude the possibility of an Arian con-
 struction was *homoousion* (consubstantial), which word,
 however, was already in well established theological use.
 This creed ended with the words and in the Holy Ghost, and
 an anathema against the distinctive tenets of the Arians
 was subjoined to it. The second general council — that is,
 the first Constantinopolitan (A. D. 381) — reaffirmed this
 creed, and also authorized, as subsidiary to it, an expla-
 natory version previously formulated, probably in a local
 synod at Antioch, and closely similar to the baptismal creed
 of the church of Jerusalem, differing from the Nicene form
 very slightly in wording, but adding a fuller statement as to
 the Holy Ghost, directed against the heresy of the Macedo-
 nians, and concluding as in the form still used. At the Chal-
 cedonian (or fourth general) council (A. D. 451), the second
 form was authorized equally with the first as the Nicene
 faith, and was officially and historically known from that
 time forward as the *Nicene Creed*, church historians, how-
 ever, sometimes speak of it as the *Niceno-Constantinopoli-
 tan Creed*. Both these forms have been reaffirmed ever
 since by all councils claiming to be ecumenical. The sec-
 ond form came into general use in the Eastern Church in
 the latter part of the fifth century, and has remained unal-
 tered in that church to the present day. It remained un-
 altered in the West also for some centuries, but an impor-
 tant addition, namely, the word *filioque* "and (from) the
 Son," after the words *who proceedeth from the Father*, in the
 last paragraph, was introduced in the sixth century, and,
 though still rejected by the Roman Church in the ninth
 century, had by the eleventh become accepted throughout
 all western Europe. It is this form, with the interpolated
filioque, which is used by the Roman Church, the Anglican
 Church, and all Protestant churches which accept the Ni-
 cene Creed, and it is this last form, therefore, which is gen-
 erally called by that name. The Western forms begin "I
 believe," not "We believe," as in the Greek. The Nicene
 Creed in its second form is the only authoritative creed of
 the Eastern Church.

sical architecture sometimes also square in plan. They
 were ornamented with pillars, architraves, and consoles,
 and in other ways. In the architecture of the middle ages
 niches were extensively used in decoration and for the re-
 ception of statues. In the Romanesque style they were so
 shallow as to be little more than panels, and the figures
 were frequently carved on the back in high relief. In the
 Pointed style they became more deeply recessed, and were
 highly enriched with elaborate canopies, and often much
 accessory ornament. In plan they are most frequently
 a semi octagon or a semi hexagon, and their heads are
 formed of groined vaulting, with bosses and pendants ac-
 cording to the prevalent architecture of the time. They are
 often projected on orbels, and adorned with pillars, bal-
 ustrades, and various moldings. Compare out under gallery.

In each of the niches are two statues of a man and wo-
 man in alto relievo

Chemical symbol, Ni; atomic weight, 58.7. A metal closely related to cobalt, with which it almost always occurs. The two are, in fact, so much alike that their chemical separation is by no means an easy task. The specific gravity of nickel is given at 8.267 when cast, and 8.739 if rolled, in this and in atomic weight it differs little from cobalt. Nickel and

cobalt are also closely allied to iron, which they resemble in color, although slightly whiter than that metal, the former having rather a yellowish tinge, the latter a bluish. They are both magnetic, but in a lesser degree than iron. Both also stand on a par with that metal in regard to most of those qualities which make it valuable in the arts, namely tenacity, malleability, and ductility, but both are so much scarcer than iron that there is no possibility of their replacing that metal to any considerable extent. The occurrence of nickel (as also of cobalt) in connection with iron in meteorites is interesting and peculiar. (See *meteorite*.) The native metal of terrestrial origin has been found in only one locality, Fraser river, where it occurs in small flattened grains among the scales of gold. The ore of nickel are somewhat widely disseminated, but nowhere occur in great abundance. The arseniuret (kuppelnickel) and the silicate are the principal sources of this metal, the latter having been found within a few years in considerable quantity in New Caledonia, where it is exceptionally free from cobalt. Nickel was discovered by Cronstedt in 1751, but it is only within a few years that it has begun to be of considerable commercial importance. Its value has varied greatly since it came into general use. It is an ingredient of certain valuable alloys and especially of German silver, and is now much experimented with in this direction. It is largely used for plating iron in order to improve its appearance and preserve it from rusting. It is also somewhat extensively employed in coinage, in the United States, Belgium, Switzerland, Germany, and Mexico. Nickel bromide has been used in medicine as an antispasmodic, and the chlorid and sulphate as tonics.

A grandchild, or more remote lineal descendant, whether male or female; specifically, a granddaughter.

Laban answerde to hym My dowtyres and sones, and the flocke, and alle that thou beholdest, ben myne, and what may I do to my sones and to my nees?

Wyclif, Gen. xxi. 42.

The emperor Augustus, among other singularities that he had by himself during his life, saw, ere he died, the nephew of his nees—that is to say, his progeny to the fourth degree of lineal descent.

Holland, tr. of Pliny, I 162.

Who meets us here? my nece Plantagenet,

Led in the hand of her kind aunt of Gloucester.

Shak., Rich. III., iv 1. 1.

2. The daughter of one's brother or sister.

I scarce did know you, uncle there lies your nees,
Whose breath, indeed, these hands have newly stopp'd

Shak., Othello, v. 2 301.

O by the bright head of my little nees,

You were that Psycho, and what are you now?

Tennyson, Princess, II

niece-ship (nēs'ship), *n.* [*< nece + -ship*.] The relationship of a niece. [*Rare*.]

She was allied to Ham in another way besides this remote niece-ship

Southeby, Doctor, lxxii. (*Davies*.)

C. C. Perkins, Italian Sculpture, p. 810

niello (ni-el'ō), *n.* [= *F. nielle* = *Sp. niel*, < *It. niello*, < *ML. nigellum*, neut. of *L. nigellus*, blackish, dark, dim. of *niger*, black. see *negro*, *negrescent*.] 1. A design in black on a surface of silver, as that of a plaque, chalice, or any ornamental or useful object, formed by engraving the design and then filling up the incised

Niello, from top of snuff-box.

furrows with an alloy composed of silver, copper, lead, crude sulphur, and borax, thus producing the effect of a black drawing on the bright surface. The process is of Italian origin, and is still extensively practised in Russia, where the finest niello is now produced. In many examples, conversely, the ground is cut out and inlaid with the black alloy, on which the design appears white or bright, as in the cut. 2. An impression taken from the engraved surface before the incised lines have been filled up. It is from such impressions, accidental or intentional, that the modern art of incised engraving on metal is held to have originated in the fifteenth century, in the shop of the Florentine goldsmith Finiguerra.
